Dear Bidder,

After coast-to-coast auctions – first, the \$53+ million FUN show in Tampa, Florida, followed by an active Long Beach Expo event in California – we look forward to returning to our home base and Heritage headquarters in Dallas for the Signature Auction as the Official Auctioneer at the 2016 ANA Dallas Money Show. This year's event is held at the Kay Bailey Hutchison Convention Center and promises to be one for the record books, with more than 500 dealers in attendance and a full slate of lectures, seminars, and historical numismatic treasures on display.

Heritage Auctions will be involved with many aspects of the show, including the Inaugural Legacy Dinner to be held on Thursday, March 3 – a fundraising event for the ANA Legacy Series, followed by an up-close and off-the-cuff conversation with Steve Ivy and Jim Halperin, founders of Heritage Auctions. We hope you will be attending this reservations-only dinner!

Our Signature Auction gets underway on Thursday afternoon, March 3 with a Floor Session, followed by a second Floor Sessions on Friday afternoon and the Premier Session on Friday evening, March 4. The Online Signature® Session is scheduled for Sunday afternoon, March 6.

Nearly 150 consignors have entrusted Heritage with more than 2,800 lots including 450+ Premier Session high-value coins. Some of these selections come from our Featured Collections, as well as many other fine lots from regular consignors and specialized individual collections. Please take a moment to read more about the Featured Collections:

The Dr. John Young Collection

John Marcus Young, M.D. was a native Texan born in 1938 in Arlington, Texas, subsequently settling in Athens, Texas, and then Alpine, Texas near Big Bend. In addition to his medical practice as a radiologist, he was known for his many interests and hobbies including the development and promotion of Texas country music artists early in their careers such as Willie Nelson and Waylon Jennings. He was the financial backer of Willie Nelson's original (1st) Fourth of July Picnic, as well as subsequent concerts over the years, and Dr. Young is mentioned in Nelson's seminal biography *Willie Nelson: An Epic Life* by Joe Nick Patoski. He and Nelson remained friends until Dr. Young's death in 2009. Other pursuits included specialty aircraft, art, cars, and motorcycles.

As a radiologist, Dr. Young possessed instinctive and remarkable diagnostic skills viewing the nuances of x-rays – a keen eye that he applied when assembling an exceptional coin collection over many years beginning in the early 1970s. Innumerable hours of research are evident, while the overall quality of the coins attests to the knowledge and passion of an expert collector. Highlights include a wonderful set of proof Barber quarters in high grades – put together before the advent of Registry Sets, all housed in early generation “NGC 4” holders, the first NGC holders to use a hologram on the reverse more than 25 years ago. Other silver type coins in the collection are equally impressive and housed in early 1990s-style green label PCGS holders. We encourage bidders to pay particular attention the The Dr. John Young Collection, appearing in the Premier Session and Certified Floor Sessions throughout the auction.

The Lenny Reiner Collection, Part III

Selections from The Lenny Reiner Collection, Part III is our second Signature Auction offering of the Reiner Hoard GSA dollars (the first part appeared at FUN in Tampa). This Dallas ANA offering includes 52 specially selected GSA dollar lots, divided between the Premier Session, Floor Session 2, and the Sunday Online Signature Session.

Additional selections from The Reiner Hoard Collection of GSA Dollars will appear in a standalone Internet Auction devoted exclusively to The Reiner Hoard. GSA dollar collectors will not want to miss this special Internet Auction, which opens on March 1 and continues through March 11, running concurrently with the Dallas ANA event, presenting 1,050 GSA dollars in all.

Longtime Houston jewelry store owner Lenny Reiner developed an interest in GSA dollars based on a suggestion by Pat Johnson at the Houston Numismatic Exchange, who advised “buy them and hold them.” Lenny accumulated many GSA dollars – adding and adding – and later, with the assistance of Pat’s son Jay Johnson, assembled the balance of the collection. Lenny Reiner would like to dedicate the appearance of his GSA dollars to the memory of Pat Johnson.

The Jim Hilands Collection

A nice group of federal series type coins from The Jim Hilands Collection is slated for Premier and Signature Floor Sessions. Early issues include a 1795 No Pole half cent, C-6a, struck on a thin planchet, graded XF45 PCGS; a 1795 Flowing Hair half dollar, O-104 (T-24), in XF45+ PCGS, and a 1796 Small Date, Large Letters Draped Bust dollar, B-4, BB-61 graded AU50 PCGS. Later dates are highlighted by an 1880 Trade dollar, PR65 Deep Cameo PCGS, a proof-only issue; an impeccable 1874 Arrows quarter, MS66 PCGS; and an 1882 dime graded PR66 Deep Cameo by PCGS, with dazzling field/device contrast.

Whether you attend the Premier or Floor Sessions, or prefer to participate remotely, bidding is simple both before the auction and instantaneous during the sale by phone, tablet, or computer. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® (our proprietary, award-winning online platform).

While in Dallas, we encourage you to stop by our headquarters at 3500 Maple Avenue, where we can assist you with lot viewing, buying, selling, consigning, or just answer questions that you may have.

Good luck and have a great time at the ANA Dallas National Money Show!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

SESSION ONE

COLONIALS

3455 (1670-75) St. Patrick Farthing VF20 PCGS. Breen-208, W-11500. Originally struck for Ireland, the St. Patrick farthings were chiefly rejected by that nation. In 1681, Mark Newby exported a large shipment to America, where they were declared legal tender by New Jersey. This medium brown example has clear types, readable legends, and minimally marked granular surfaces. Listed on page 41 of the 2016 *Guide Book*. NGC ID# AUAR, PCGS# 42

3456 1787 Massachusetts Half Cent AU58 NGC. Ryder 4-C, W-5940, R.2. Glistening silverlike luster illuminates the unabraded fields of this nearly Uncirculated Ryder 4-C half cent, while the design elements show medium brown toning. Moderate strike weakness on the central high points is not unusual for the issue. A visually unsurpassable example for the grade. Census (all varieties included): 12 in 58, 34 finer (1/16). NGC ID# 2B22, PCGS# 296

1787 Massachusetts Half Cent, MS62 Brown Well-Struck Ryder 4-C Example

3457 1787 Massachusetts Half Cent, Ryder 4-C, W-5940, R.2, MS62 Brown NGC. This is a pleasing type-coin example of the 1787 Massachusetts half cent, showing glossy burgundy-brown surfaces that are free of environmental impairments. The strike is even and well-centered. Central definition is above average — the shield is not fully defined, but HALF CENT is bold; the Indian's tunic is well-detailed. Satiny luster remains in the fields. NGC ID# 2B22, PCGS# 296

3458 1787 Massachusetts Cent, Arrows in Right Talon — Holed — NGC Details. Fair. Ryder 2a-F, W-6070, High R.6. The reverse has the bundle of arrows in the eagle's right talon, to the viewer's left, on this rare colonial variety. This piece dark brown fields with tan devices. A hole is present at 6 o'clock relative to the obverse. Although only a "hole filler," this piece will bring the collector one step closer to a complete variety set of Massachusetts copper coinage.

3459 1788 Massachusetts Cent, Period, XF40 PCGS. CAC. Ryder 10-L, W-6280, R.2. A rather plentiful 1788 Massachusetts Cent variety, this example exhibits mottled tan and steel surfaces with minimal marks on each side. A minor planchet crack is evident at 5 o'clock relative to the obverse. NGC ID# 2B27, PCGS# 948 Base PCGS# 311

3460 1788 Vermont Copper, Bust Right, XF45 NGC. CAC. RR-16, Bressett 15-S, W-2120, R.1. For the colonial type collector who desires a single example of each major issuing entity, this Vermont copper is an ideal candidate, representing the single most plentiful variety. This exquisite example has smooth olive-brown surfaces with only slight weakness at the center, typical of nearly every survivor from the die pair. NGC ID# 2B5D, PCGS# 563

3461 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, XF40 NGC. N. 11-X, W-6790, R.4. This pleasing two-tone piece has rich chocolate-brown fields with lighter brown devices. A few minor planchet rifts appear on the obverse with others on the reverse. A pleasing example of a scarce variety. NGC ID# AX5E, PCGS# 883

1787 N. 104-FF Fugio Cent, MS64 New Haven Restrike, Brass

3462 1787 Fugio Cent, New Haven Restrike, Brass, MS64 PCGS. N. 104-FF, W-17560. The New Haven Restrikes were produced circa 1860 in copper, brass, and silver. Reportedly at least one example was struck in gold. Although numismatist Horatio N. Rust recounted that he had located the original dies for the Fugio cents from the previous century, it is clear that these were newly created dies, likely by the Scovill Manufacturing Company of Waterbury, Connecticut, shortly before the Civil War. Because they are virtually identical to the original design, these New Haven Restrikes are highly collectible with demand from colonial type collectors and others. This Choice Mint State piece has brilliant orange luster with delicate bluish-brown toning on the reverse. NGC ID# 2B8T, PCGS# 919

3463 (1795) Washington Liberty & Security Penny, Copper, Plain Rims, Lettered Edge, MS61 Brown NGC. Baker-30, W-11050, R.2. This issue was produced in quantity in England and is one of the more easily obtainable Washington pieces with a Liberty and Security reverse. The strike is bold, and the surfaces display glossy auburn-brown toning. The rims have several small nicks, and the occasional bits of verdigris appear over the interiors. There are no significant imperfections. NGC ID# 2B7V, PCGS# 767

HALF CENTS

3464 1793 C-3, B-3, R.3 — Tooled — PCGS Genuine. VG Details. Strong outlining of the central devices gives this well-circulated 1793 half cent moderate appeal for the budget-conscious collector. The surfaces are medium brown and show extensive corrosion with a number of minor scratches and tool marks. All legends, including the date and fraction, are clear. Our EAC grade AG3. NGC ID# 2222, PCGS# 35009 Base PCGS# 1000

1794 Half Cent, Problem-Free VF35 Elusive C-3a, B-5b Variety

3465 1794 Normal Head, C-3a, B-5b, R.5, VF35 PCGS. Manley Die State 2, heavily clashed with a subtle die bulge right of the 4 in the date. This is the more plentiful of the two Cohen-3 variants, showing small edge lettering as opposed to large, but is nonetheless an elusive die pairing. Most pieces are well-circulated. This Choice VF coin displays lovely medium brown color and smooth, problem-free surfaces. The obverse dentils grow weak from 6 to 9 o'clock, while the reverse periphery is bold. Central detail is pleasing for the grade. Our EAC grade VF20. From The Jim Hilands Collection. PCGS# 35030 Base PCGS# 1003

3466 1795 Lettered Edge, C-1, B-1, R.2 — Rim Damage — NGC Details. AU. Manley Die State 1. Several small indentations appear at intervals on the rims, as if the coin was gripped by pliers. The reverse exhibit an interesting linear flan flaw (as made) through UNITED. Otherwise, this early half cent is pleasing and unmarked with strong details and little wear on smooth, glossy surfaces. Our EAC grade Fine 15. NGC ID# 2224, PCGS# 35067 Base PCGS# 1009

3467 1804 Plain 4, Stems, C-11, B-12, High R.3, XF40 PCGS. Manley Die State 1.0. A medium to deep brown example of the very scarce Plain 4, Stems *Guide Book* variety. The surfaces display minimal marks, and verdigris is incidental. The strike shows moderate incompleteness on the central reverse, but the curls are nicely detailed. Our EAC grade VF20. NGC ID# 222F, PCGS# 35170 Base PCGS# 1066

3468 1805 Large 5, Stems, C-4, B-4, R.2, AU55 PCGS. Manley Die State 1.0. The Large 5 in the date and the die scratch from the second A in AMERICA to the ribbon end help identify the C-4, B-4 variety. This Choice AU specimen offers well-detailed design elements and pleasing olive brown surfaces with only minor signs of contact. Our EAC grade XF40. NGC ID# 222H, PCGS# 35188 Base PCGS# 1090

3469 1806 Large 6, Stems, C-4, B-4, R.1, MS62 Brown PCGS. Manley Die State 1.0, usual for high grade examples. A splendid Draped Bust type coin that retains hints of faded red in protected regions. The predominantly chocolate-brown surfaces show only inconsequential contact. Though the coin is generally sharp, the bust tip and portions of the wreath are lightly brought up. Our EAC grade AU50. NGC ID# 222J, PCGS# 35200 Base PCGS# 1099

3470 1806 Large 6, Stems, C-4, B-4, R.1, MS62 Red and Brown NGC. CAC. Manley Die State 1.0. Brick-red persists in design crevices though the open fields and devices are deep brown. Void of consequential contact. The strike is good despite bluntness on the bust tip and opposite at the top of the wreath and on the second S in STATES. Our EAC grade MS60.
Ex: *Long Beach Signature* (Heritage, 2/2012), lot 3048; *Long Beach Signature* (Heritage, 9/2012), lot 3372. NGC ID# 222J, PCGS# 35201 Base PCGS# 1100

1810 C-1 Half Cent, MS62 Brown Usual Rotated Reverse

3471 1810 C-1, B-1, R.2, MS62 Brown PCGS. The only 1810-dated die pair. This Mint State C-1 half cent displays excellent interior detail and russet-brown luster over lightly abraded surfaces. The right-hand stars are weakly struck, and the reverse is rotated about 45 degrees counterclockwise, as is typical of this issue. Our EAC grade AU55. Population: 5 in 62 Brown, 19 finer (1/16). NGC ID# 222R, PCGS# 35236 Base PCGS# 1132

1825 Half Cent, MS64 Brown Pleasing C-2, B-2 Example

3472 1825 C-2, B-2, R.1, MS64 Brown PCGS. Although the bust and wreath are indistinct, there are no actual signs of wear on this chestnut and olive-brown half cent. Satiny surfaces host lighter tan peripheries, faded from original red. Our EAC grade MS60. Population: 26 in 64 Brown, 4 finer (1/16).
Ex: *FUN Signature* (Heritage, 7/2012), lot 3042. NGC ID# 222T, PCGS# 35249 Base PCGS# 1141

3473 1828 13 Stars, C-3, B-2, R.1, MS65 Brown PCGS. Manley Die State 3. Sharp centers balance well with slight weakness on the stars and lower wreath. The surfaces are uniformly chestnut-brown and free of mentionable flaws. Luster shines through the patina, and there is no distracting carbon. Our EAC grade MS60. NGC ID# 222V, PCGS# 35261 Base PCGS# 1147

3474 1833 C-1, B-1, R.1, MS65 Brown NGC. Manley Die State 1, unclashed. An attractive, thoroughly lustrous Gem with burgundy toning that allows tinges of coppery-red to emerge around the relief elements, particularly on the reverse. The surfaces are free of flaws, and the strike is impressively bold. A few tiny specks do not affect the eye appeal. Our EAC grade MS60. Census: 42 in 65 (1 in 65+) Brown, 7 finer (1/16). NGC ID# 222Z, PCGS# 35282 Base PCGS# 1162

3475 1835 C-1, B-1, R.1, MS65 Brown NGC. Manley Die State 2.0, heavily clashed. This Gem Classic Head type coin displays bold detail throughout each side, with vibrant luster and unabraded surfaces. The obverse is olive-brown, the reverse mottled in additional reddish-brown hues. Housed in a prior generation holder. Our EAC grade MS60. Census (both varieties included): 56 in 65 (1 in 65 ★) Brown, 3 finer (1/16). NGC ID# 2233, PCGS# 35288 Base PCGS# 1168

3476 1835 C-1, B-1, R.1, MS64 Red and Brown PCGS. Manley Die State 1.0. The 5 in the date is lightly repunched. Well-struck except for a couple of stars. Carefully preserved, and the lavender and honey-gold color is attractive. Struck from strongly clashed dies, as is characteristic of this Cohen variety. The dies are slightly rotated clockwise. Our EAC grade MS62.
Ex: *FUN Signature* (Heritage, 1/2004), lot 4107. NGC ID# 2233, PCGS# 35289 Base PCGS# 1169

3477 1853 C-1, B-1, R.1, MS65 Red and Brown NGC. Little true brown toning is seen on this Gem 1853 half cent, although attractive auburn, amber, and pistachio-green overtones preclude full Red classification. The strike is bold, and the surfaces show little noticeable carbon. Our EAC grade MS62. Census: 9 in 65 Red and Brown, 3 finer (1/16). PCGS# 35328 Base PCGS# 1228

LARGE CENTS

3478 1794 Head of 1794, S-49, B-41, R.2, VF30 PCGS. Breen Die State III. Evenly struck and bold on the obverse — the border dentils are sharp, and the portrait is well-detailed. The reverse is much weaker, particularly around the periphery. The surfaces are generally smooth but have deep bluish-gray toning. A few stray marks are seen on the obverse. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35609 Base PCGS# 901374

- 3479 1794 Head of 1794, S-57, B-55, R.1, VF20 PCGS.** Linear depressions in the field near the profile attribute this interesting Sheldon variety. The reverse die is moderately buckled in several places. Nicely defined and without consequential marks. Both sides display olive-brown and faded orange toning. Our EAC grade VG8. NGC ID# 223P, PCGS# 35633 Base PCGS# 901374

**1794 S-65 Cent, VF30
Head of 1794, Late Die State**

- 3480 1794 Head of 1794, S-65, B-51, R.1, VF30 PCGS.** Breen Die State IX. The so-called "Shielded Hair" variety, with a broad border along the lower-left obverse. This midgrade example is in an extremely advanced die state, with the reverse buckling along the heavy vertical crack that extends downward from the second S in STATES. The surfaces are smooth and display excellent reddish-brown color. A few small rim nicks are seen along the upper-right obverse. Areas of weakness on the reverse are due to die fatigue. Our EAC grade Fine 12. NGC ID# 223P, PCGS# 35654 Base PCGS# 901374

**1795 Cent, Attractive VF35
S-76b, Plain Edge
Small Planchet Clip**

- 3481 1795 Plain Edge, S-76b, B-4b, R.1, VF35 PCGS.** Breen Die State VII. Attractive medium brown surfaces show tiny bits of verdigris that attest to their originality, while the strike is bold and even with good centering. Both sides are impressively smooth, although die state-induced weakness of strike is seen around the reverse periphery. A shallow planchet clip is present left of the L in LIBERTY, adding to the appeal of this piece. Our EAC grade VF20. *From The Jim Hilands Collection.* NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

- 3482 1795 Plain Edge, S-76b, B-4b, R.1 — Smoothed — PCGS Genuine. XF Details.** A moderate planchet clip is evident at 2:30 relative to the obverse. This pleasing medium brown example has glossy surfaces with dappled ebony patina that is especially evident on the reverse. Our EAC grade Fine 15. NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

- 3483 1798 Second Hair Style, S-169, B-28, R.3, VF35 NGC.** Breen Die State I. This variety is typically encountered in later states with a small rim break below the 98 in the date. This example appears to have such a feature, but it is actually metal moved from a tiny rim bump. A few other insignificant rim bruises are evident on this light brown example. Our EAC grade Fine 15. NGC ID# 2244, PCGS# 36077 Base PCGS# 1434

- 3484 1800 S-211, B-13, R.3 — Burnished, Struck Off Center — NGC Details. AU.** Breen Die State VIII, the latest record in his Large Cent Encyclopedia. This piece has been cleaned and retoned with attractive light brown and pale blue surfaces, although the NGC description of burnished is harsh, in our opinion. The strike was slightly off center toward 12:30 with the tops of LIBERTY off the flan. An attractive example for an advanced collection. Our EAC grade VF30. NGC ID# 2248, PCGS# 36221 Base PCGS# 1449

- 3485 1801 1/000, S-223, B-17, R.1, VF25 PCGS.** Breen Die State V with a large cud at the RT in LIBERTY. The pointed left stem is diagnostic for this blundered fraction variety. An appealing lavender-brown representative with minor marks between ONE and CENT. Our EAC grade Fine 12. NGC ID# 224D, PCGS# 36278 Base PCGS# 1464

- 3486 1802 S-230, B-8, R.1, AU53 PCGS.** Breen Die State II. The surfaces appear smooth and nearly unmarked in-hand, while a lens reveals minor build-up and a few widely scattered tiny marks. Pleasing, medium-brown surfaces show glimpses of orange and some deeper blue overtones. Sharp definition remains on Liberty's hair strands and on the reverse wreath elements, with die clashing beneath the fraction and faint die cracks at MER of AMERICA. Our EAC grade XF40. NGC ID# 224E, PCGS# 36302 Base PCGS# 1470

- 3487 1802 S-230, B-8, R.1, AU53 PCGS.** Breen Die State VI-VII. Die cracks across the upper reverse and LIBERTY help attribute this deep olive-brown cent. No marks provide a distraction, and luster rolls across the curls, wreath, and legends. Granularity is limited to minor flaking near the D in UNITED. Our EAC grade XF40. NGC ID# 224E, PCGS# 36302 Base PCGS# 1470

**1802 S-231 Cent, MS61 Brown
Smooth, Glossy Surfaces**

- 3488 1802 No Stems, S-231, B-9, R.1, MS61 Brown NGC.** Breen Die State IX, heavily cracked and clashed. The surfaces display glossy, burgundy-brown color without evidence of environmental damage. There is a small mark within the reverse bow and there are a few others in the left obverse field. Otherwise, there is not much to limit the grade other than slightly muted luster. The strike is bold, even, and well-centered. Fading dentils around portions of the rims is due to die failure in this latest-known state. Our EAC grade AU50. NGC ID# 224F, PCGS# 36344 Base PCGS# 1476

- 3489 1802 S-232, B-12, R.1, AU55 NGC.** Breen Die State VII. A deep mahogany brown example of the S-232 late die state that shows a sizeable rim cud above ATE of STATES and numerous smaller die cracks surrounding the cud. The fraction bar is long, nearly touching the ribbons left and right. The T in LIBERTY is struck over an erroneous Y. Sharp detail remains on this Choice About Uncirculated example with generally smooth and attractive surfaces. Our EAC grade VF30. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

- 3490 1803 Small Date, Small Fraction, S-246, B-4, R.3, XF45 NGC.** Breen Die State IV with a rim break over the STA in STATES. The "Mumps" die break below the jaw is well advanced. Pastel rose-red and apple-green shades grace this richly detailed and partly lustrous representative. The obverse displays scattered inoffensive marks. Our EAC grade VF30. NGC ID# 224G, PCGS# 36356 Base PCGS# 1482

3491 1803 Small Date, Small Fraction, S-254, B-13, R.1, AU55 NGC. Breen Die State II, with three sets of clashed dentils near LIBERTY. A richly detailed medium brown Draped Bust type coin that displays pleasing luster on the portrait, wreath, and legends. Well-struck except for the T in CENT and nearby leaves. Close examination locates only faint pinscratches along the profile and above CENT. Our EAC grade XF40. NGC ID# 224G, PCGS# 36377 Base PCGS# 1482

3492 1804 S-266b, B-1, R.2, — Damage — PCGS Genuine. VG Details. This piece shows the elusive die state with the narrow die break over RTY in LIBERTY, but without the cud over MERIC in AMERICA. The 1804 Draped Bust large cent is one of the most sought-after issues of the series, with a single die variety known for the date. This well-worn example shows evidence of corrosion over much of the medium brown surfaces, but the devices retain some interior detail. Our EAC grade AG3. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

**1808 S-278 Classic Cent
Sole CAC XF45 Example**

3493 1808 S-278, B-2, R.3, XF45 PCGS. CAC. Breen Die State I without flow lines from the right-side stars. S-278 is the scarcest of the three die pairings for this conditionally challenging date. A charming chocolate-brown example that shows only incidental contact. Minimally granular near ONE CENT. Struck slightly off center toward 6 o'clock. Rare with a CAC seal; the sole example for the XF45 grade. Our EAC grade VF35. NGC ID# 224P, PCGS# 36460 Base PCGS# 1543

3494 1813 S-292, B-2, R.2 — Environmental Damage — NGC Details. AU. This scarce Classic Head cent has exceptional design definition with deep green patina on its dark brown surfaces. Minimal marks are evident on each side of this example. Our EAC grade Fine 15. NGC ID# 224X, PCGS# 36511 Base PCGS# 1570

**1813 S-292 Cent, MS62 Brown
Lustrous Fields**

3495 1813 S-292, B-2, R.2, MS62 Brown PCGS. The 1813 is often encountered in type collections, representing the elusive Classic Head design. This Sheldon-292 example displays generous detail amid lightly flowlined fields. A few small marks account for the grade. Although deeply toned in olive-brown hues, the surfaces yield luminous original luster. Our EAC grade AU55. Population (both varieties included): 7 in 62 Brown, 5 finer (1/16). From The Jim Hilands Collection. NGC ID# 224X, PCGS# 36511 Base PCGS# 1570

**1814 Cent, Sharp AU55
S-294, Crosslet 4**

3496 1814 Crosslet 4, S-294, B-1, R.1, AU55 PCGS. Breen Die State II, clashed. The Classic Head large cent is a difficult type to acquire with pleasing eye appeal. This Choice AU Crosslet 4 1814 example is sharply and evenly struck with little evidence of wear. Die erosion in the fields is evident near the peripheries. The surfaces are free of major abrasions and show deep ebony-brown color. Our EAC grade XF45. From The Jim Hilands Collection. NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573

3497 1817 15 Stars, N-16, R.1, AU50 PCGS. CAC. A deep brown example of the popular Guide Book variety. The presumably distracted engraver entered the wrong number of stars into the die, the sole such incident for a post-1807 large cent. The flashy fields display only unimportant contact. An early die state without noticeable rim crumbling. Struck slightly off center toward 10:30. Our EAC grade VF35. NGC ID# 2252, PCGS# 36598 Base PCGS# 1597

1818 N-10 Cent, MS63 Red

3498 1818 N-10, R.1, MS63 Red PCGS. An orange-red type representative that shows moderate mellowing toward gunmetal on the fields and portrait high points. Lustrous and minimally abraded with occasional small gray spots. N-10 was a prominent contributor to the Randall Hoard of high grade Matron Head cents, although in lesser quantity than the 1820 N-13. Our EAC grade MS63. NGC ID# 2253, PCGS# 36630 Base PCGS# 1602

3499 1819 Small Date, N-8, R.1, MS64 Brown PCGS. CAC. The "Crooked UNI" variety. An early die state with bold dentils throughout both sides. A lovely chocolate-brown near-Gem that retains glimmers of Red near the stars and letters. Unobtrusive contact on the chin decides the grade. Our EAC grade MS60. PCGS# 36649 Base PCGS# 1606

3500 1819 Small Date, N-9, R.1, MS63 Brown PCGS. CAC. The obverse field is mahogany-brown, the reverse field is steel-gray, and the motifs are dark brown. A coruscating cent that boasts unmarked fields and only light, faded contact on Liberty's cheek. Our EAC grade AU50. Ex: Orlando FUN Signature (Heritage, 7/2013), lot 3050, which realized \$1,068.08. NGC ID# 2254, PCGS# 36652 Base PCGS# 1606

3501 1820 Large Date, N-13, R.1, MS64 Red and Brown PCGS. Die State B, obverse cracked around periphery. This Choice Red and Brown coin displays sharp central devices and only minor weakness on the peripheral stars. Radiant luster illuminates largely untouched surfaces, save for a few small marks on Liberty's cheek. Mottled burgundy-brown toning intermingles with coppery-red luster. Our EAC grade MS62.

From The Jim Hilands Collection. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

3502 1833 N-5, R.1, MS64 Brown PCGS. A splendid sea-green and mahogany-brown near-Gem. Nearly void of contact or carbon, and the sole planchet imperfection is minor and relegated to the obverse margin at 7 o'clock. Our EAC grade MS60. NGC ID# 225P, PCGS# 37030 Base PCGS# 1696

3503 1836 N-3, R.1, MS64 Brown PCGS. CAC. Die State C. The obverse shows a heavy rim break near star 6, and the reverse is cracked from the M in AMERICA, through ONE, to the first S in STATES. This piece is boldly struck on the central devices but slightly weak on the peripheral stars. Lustrous burgundy-brown surfaces are free of significant abrasions. Quite pleasing for the grade. Our EAC grade MS60. Population: 18 in 64 Brown, 7 finer (1/16). NGC ID# 225T, PCGS# 37117 Base PCGS# 1726

3504 1838 N-16, Low R.5, XF40 PCGS. Newcomb-16 is a scarce variety in all grades. This lightly circulated example displays smooth, problem-free surfaces with medium auburn-brown color. The interior motifs are well-defined, although weakness is seen around the borders — consistent with the lapped and eroded dies of this marriage. Our EAC grade VF25. NGC ID# 4CZK, PCGS# 37222 Base PCGS# 1741

3505 1847 Large Over Small 47, N-2, R.3, AU58 PCGS. CAC. Grellman Die State a with diagonal die lines below the C in CENT. A distinctive *Guide Book* variety. This medium brown near-Mint cent displays light wear but lacks any mentionable marks. The upper stars are incomplete but the remainder of the strike is crisp. Our EAC grade AU50. NGC ID# 226D, PCGS# 37367 Base PCGS# 1880

1847/47 Cent, N-31, MS64 Brown Well-Struck and Appealing

3506 1847/47 Large Over Small 47, N-31, R.5, MS64 Brown PCGS. Die State d, with the reverse periphery extensively cracked. The so-called Large 7 Over Small 7 variety, showing the 47 in the date repunched at the top. The strike is impressively well-executed throughout the central devices, stars, and even the dentils. Each side displays smooth auburn-brown luster with silvery accents revealed when rotated beneath a light. A few tiny marks on Liberty's cheek are all that limit the grade. Our EAC grade MS60. PCGS# 37370 Base PCGS# 1880

3507 1848 N-35, R.2, MS64 Red and Brown PCGS. Grellman Die State b. This lovely cent exhibits the intermediate of three die states recorded in Grellman's reference. This piece has satin surfaces with considerable brilliant orange mint luster and light bluish-brown toning. Our EAC grade MS63. PCGS# 406529 Base PCGS# 1884

3508 1855 Upright 55, N-13, R.2, MS65 Red and Brown NGC. CAC. The obverse of this lovely piece has more than half its original red mint color remaining, blended with light brown. The reverse is virtually full red with only traces of delicate brown patina. The pristine surfaces show only a few trivial flecks and spots. An exceptional example, this lovely cent is high within the N-13 Condition Census. The Dan Holmes coin, graded MS62+ with very little red, was called third finest known. Our EAC grade MS64. PCGS# 406180 Base PCGS# 1908

3509 1856 Upright 5, N-6, R.1, MS66 Brown PCGS. CAC. Die State a, as usual for high-end Mint State coins. This Premium Gem Brown N-6 example displays razor-sharp interior devices but is weak on the upper peripheral stars. The lustrous surfaces are seemingly flawless, showing rich auburn-brown toning on the obverse with modest mint red emerging in the reverse fields. Our EAC grade MS62. Population: 2 in 66 Brown, 0 finer (1/16). NGC ID# 226N, PCGS# 404588 Base PCGS# 1919

3510 1856 N-14, R.1, Slanted 5 MS65 Red and Brown NGC. Die State B. The fields are lightly flowlined toward the peripheries in this late die state. Strike weakness on the upper stars and the LI in LIBERTY is characteristic of the variety, which was struck with misaligned dies. Slight softness is also visible on the lower wreath. This Gem type coin is free of carbon spotting and displays attractive coppery-red luster with olive-brown overtones. Our EAC grade MS63. PCGS# 406211 Base PCGS# 1923

FLYING EAGLE CENTS

3511 1857 MS64 PCGS. Snow-14. Snow-14 shows a lightly die doubled obverse with distinctive chipping around the (UNITE) D S(TATES). As a type coin, this Choice 1857 Flying Eagle cent displays sharp design definition and soft, satiny bronze-gold luster. A few trivial russet specks on the reverse do not overly detract. NGC ID# 2276, PCGS# 2016

3512 1857 MS64 NGC. A satiny and unabraded tan-gold representative. The strike shows softness on the tail and right-side cotton leaves, but the remainder of the design is bold. Minor flecks are distributed. NGC ID# 2276, PCGS# 2016

3513 1857 MS64 NGC. The well-detailed design elements of this attractive Choice specimen show just a touch of softness on the eagle's tail and wreath. The copper-red surfaces display a few hints of crimson, with only minor signs of contact. NGC ID# 2276, PCGS# 2016

3514 1858 Large Letters MS64 PCGS. Low Leaves Reverse. Close E in ONE. A precisely struck near-Gem bathed in dusky wheat-gold and gunmetal toning. No marks are remotely of interest. Minor flan striations cross the upper right portion of the wreath. NGC ID# 2277, PCGS# 2019

3515 1858 Small Letters MS64 PCGS. Low Leaves Reverse. Open E hubbed over Close E. A fully struck Choice cent. The lovely peach-gold surfaces are semiprooflike, and marks are chiefly confined to a tick above the eagle's neck. The reverse exhibits a wire rim between 11 and 3 o'clock, and the date is strike doubled. *From The Jim Hilands Collection.* NGC ID# 2279, PCGS# 2020

3516 1858 Small Letters MS64 PCGS. Low Leaves. Close E in ONE. This scarce subtype representative exhibits sea-green, cherry-red, and peach-gold shades. The strike is good, and the coruscating surfaces are refreshingly devoid of marks. The reverse rim displays numerous small die breaks. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3517 1860 Pointed Bust, FS-401, MS64 PCGS. CAC.** The scarcer Pointed Bust variant, this piece showing crisp detail and satiny bronze-gold luster. Well-preserved surfaces are free of distinctive abrasions, although a wisp of amber toning across the lower obverse serves as a pedigree marker. NGC ID# 227F, PCGS# 37393 Base PCGS# 2056
- 3518 1860 MS66 PCGS. CAC.** Glistening surfaces yield rose, peach, and crimson hues through bronze-gold luster, illuminating sharp design elements. No abrasions or carbon spotting distract from the eye appeal. Population: 44 in 66 (3 in 66+), 9 finer (1/16). NGC ID# 227F, PCGS# 2058
- 3519 1861 MS65 PCGS.** Flowing, gentle luster, unmarked surfaces, and a sharp strike all contribute to the broad eye appeal on this copper-nickel Gem type coin, a great candidate for a high-grade set. Appealing surfaces are light tan throughout. NGC ID# 227G, PCGS# 2061
- 3520 1861 MS66 PCGS.** This Premium Gem 1861 Indian cent would serve well as a copper-nickel type coin. The surfaces are well-preserved and satiny with light copper-gold color. The upper headdress feather tips show trivial softness, and a tiny carbon speck hugs the reverse rim at 7:30. Population: 71 in 66 (2 in 66+), 13 finer (2/16). NGC ID# 227G, PCGS# 2061
- 3521 1862 MS66 PCGS. CAC.** This splendid Premium Gem is a worn dies impression that shows several fine die cracks, faded clash marks, and wavy fields from dies that had seen extensive use. This beauty has brilliant and highly lustrous golden-tan surfaces with minuscule carbon-like flecks but no other marks. Population: 85 in 66 (6 in 66+), 12 finer (1/16). NGC ID# 227H, PCGS# 2064
- 3522 1868 MS65 Red and Brown PCGS. CAC.** The important CAC endorsement confirms the eye overall quality of this delightful Gem Red and Brown Indian Head cent. Copper-orange color provides a lustrous backdrop to the slate-blue overtones. The strike, while bold, lacks completeness at the wreath bottom and on a few of the feather tips, yet the eye appeal is outstanding. PCGS lists just 20 numerically finer coins in Red and Brown (2/16). NGC ID# 227S, PCGS# 2092
- 3523 1869 MS64 Red and Brown PCGS. CAC.** Boldly struck with vibrant coppery-orange luster that yields a few mottled overtones. Trivial specks are not immediately obvious. The 1869 Indian cent is scarce with full Red color, making this near-Red coin especially appealing. NGC ID# 227T, PCGS# 2095
- 3524 1869 MS65 Red and Brown PCGS.** Rich orange color remains in generous amounts on both sides of this pleasing Gem example, with purple-brown toning on the high points spilling into the adjacent fields. Mint luster glows throughout both sides, revealing smooth, glossy surfaces with just two or three tiny marks of little concern. PCGS reports just six pieces in numerically finer grade in Red and Brown (2/16). NGC ID# 227T, PCGS# 2095

1870 Indian Cent, MS65 Red Fiery Orange Luster

- 3525 1870 MS65 Red PCGS. Ex: Perfection 1.** Obverse clash marks are visible between the lower feather tips on this lovely Gem. Both sides are highly lustrous with frosty red surfaces and trivial carbon spots. The strike is weak at the upper reverse but bold everywhere else. Superb surface quality for the grade, and few coins are known finer. Population: 40 in 65 (2 in 65+) Red, 7 finer (1/16). NGC ID# 227U, PCGS# 2099

1873 Closed 3 Cent, AU Details Snow-1, Doubled LIBERTY

- 3526 1873 Doubled LIBERTY, Snow-1, FS-101 — Cleaning — PCGS Genuine. AU Details.** LIBERTY is boldly die doubled on this popular Closed 3 Guide Book variety. The present example is toned in mottled chestnut and olive-brown hues with faintly textured underlying surfaces — indicative of a light, old cleaning. Portions of the wreath and the area of the date are weakly defined due in part to die erosion. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115
- 3527 1876 MS66 Red and Brown PCGS. CAC.** The preservation of this Premium Gem 1876 Indian cent is seemingly flawless — were the luster slightly more vibrant, a higher-grade might have been achieved. Each side is carbon-free with glowing orange-brown color. The strike is sharp. Population: 4 in 66 (1 in 66+) Red and Brown, 0 finer (1/16). NGC ID# 2283, PCGS# 2125
- 3528 1876 MS65 Red PCGS.** Booming luster sweeps the essentially mark-free surfaces of this better date Gem. The centers are rose-gold and the borders offer hints of olive-green. Only microscopic carbon emerges beneath a loupe. Population: 41 in 65 (1 in 65+) Red, 14 finer (2/16). NGC ID# 2283, PCGS# 2126
- 3529 1877 VF25 PCGS.** Well-detailed for the VF level with bits of verdigris around the devices attesting to the originality of the medium brown surfaces. Scattered abrasions appear on each side, none individually bothersome. A pleasing collector-grade example of this key Indian cent issue. NGC ID# 2284, PCGS# 2127
- 3530 1877 XF40 NGC.** In a series where the annual production was normally eight figures, the 1877 and 1909-S are the only two issues with less than 1 million coins produced. This key-date Indian cent exhibits smooth and pleasing medium brown surfaces with minimal handling marks on each side. NGC ID# 2284, PCGS# 2127

1877 Cent, MS63 Red and Brown Luminous Surfaces

- 3531 1877 MS63 Red and Brown PCGS. CAC.** Blazing orange-gold luster is only partially obscured by soft chestnut-brown toning, giving this Select Red and Brown 1877 Indian cent excellent eye appeal. The lower wreath and several headdress feather tips show slight weakness, as is typical of the issue. A pleasing example of this sought-after key date. NGC ID# 2284, PCGS# 2128
- 3532 1886 Type One MS65 Red and Brown NGC. CAC.** This sharply struck Gem Indian cent has mellow orange mint luster on both sides, changing to light brown on the reverse. A few microscopic carbon flecks are noted on the reverse. Census: 51 in 65 Red and Brown, 6 finer. CAC: 18 in 65 Red and Brown, 3 finer (2/16). NGC ID# 228D, PCGS# 2155

3533 1886 Type Two MS64 Red and Brown NGC. Bold clash marks appear on each side but are virtually absorbed by the rich, glowing luster. Crimson, rose, and copper-gold hues emerge from the carbon-free surfaces, while trivial contact on Liberty's cheek limits the grade. Near the Red side of the Red and Brown color designation. NGC ID# 228E, PCGS# 92155

3534 1888/7 Snow-1, FS-301, Good 4 PCGS. On this well-circulated Snow-1 example, the 9 o'clock obverse rim cud is no longer visible, but the lower tip of a 7 is seen at the lower edge of the final 8 in the date, denoting this sought-after variety. Even wear leaves both rims complete and offers smooth chocolate-brown surfaces that are free of problems. Population: 8 in 4, 32 finer (1/16). NGC ID# 228G, PCGS# 37543 Base PCGS# 2169

3535 1895 MS66 Red PCGS. Snow-8. The lower loops of the 8 and 5 are repunched. The variety is unlisted on the PCGS insert. A magnificent orange, olive, and ruby-red Premium Gem. Well struck and thoroughly lustrous. Population: 53 in 66 (5 in 66+) Red, 4 finer (1/16).
Ex: *FUN Signature (Heritage, 1/2015)*, lot 3220. NGC ID# 228P, PCGS# 2192

3536 1908-S MS65 Red and Brown PCGS. CAC. This popular Indian cent issue represents the first occurrence of minor coinage at the San Francisco Mint. Both sides are boldly detailed with delicate blue toning over red luster on the obverse, and virtually full red mint luster on the reverse. PCGS has only certified 10 finer Red and Brown examples. CAC: 27 in 65 Red and Brown, 3 finer (2/16). NGC ID# 2296, PCGS# 2233

3537 1908-S MS64 Red PCGS. A trivial mark on the Indian's cheek prevents a higher grade to this brilliant orange S-Mint cent that represents the first minor coinage issue in California. The strike is bold throughout. NGC ID# 2296, PCGS# 2234

3538 1909-S MS64 Red and Brown PCGS. This Choice Red and Brown branch mint key displays glowing coppery-orange luster with subtle chestnut overtones. The top three headdress feathers are ill-defined, as is characteristic of the issue. A small speck appears in the left obverse field, but there are no severe abrasions. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

1859 Indian Cent, PR65 Sharp Laurel Wreath Type Coin

3539 1859 PR65 PCGS. Razor-sharp and well-preserved with satiny luster on the relief elements. The fields display honey, rose, and tan-gold coloration over attractive mirroring. Scattered small specks are not overly bothersome. The 1859 proof Indian cent is always in demand as a one-year type. Population: 58 in 65 (2 in 65+), 24 finer (2/16). NGC ID# 2299, PCGS# 2247

3540 1863 PR64 PCGS. A razor-sharp near-Gem with pleasing red-orange coloration, lavender accents, and undisturbed surfaces. The reverse is lightly strike doubled. This is a fully rendered, deeply mirrored proof with modest contrast between the reflective fields and frosted motifs. A tiny bit of green verdigris sits at the upper right serif of the E in UNITED, visible under magnification. Population: 75 in 64, 31 finer (2/16).
Ex: *Central States Bullet (Heritage, 4/2002)*, lot 86; *Long Beach Signature (Heritage, 9/2002)*, lot 5370. NGC ID# 229D, PCGS# 2262

1877 Indian Cent, PR64 Red and Brown Attractive Key Date Specimen

3541 1877 PR64 Red and Brown NGC. The key date status of its 1877 business strike counterpart is essentially transferred over to the 1877 proof Indian cent, by association. This is a lovely piece with warm red-brown patina over each side, in addition to sharp strike definition and carefully preserved surfaces. The fields are not highly reflective, due to the deep toning. NGC ID# 229W, PCGS# 2319

3542 1878 PR65 Red Cameo PCGS. This delightful Gem exhibits sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. The original red surfaces show two microscopic carbon specks on the obverse. Population: 10 in 65 Cameo, 7 finer (2/16). NGC ID# 4YVB, PCGS# 82323

1880 Cent, PR66 Red Lovely Coloration

3543 1880 PR66 Red NGC. A beautiful Premium Gem Red proof, this 1880 Indian cent displays interior hues of rose-red and copper-orange, transitioning to lighter gold around the peripheries. The strike is sharp, and there are only a few tiny specks of carbon. Seldom seen this fine. Census: 11 in 66 Red, 1 finer (2/16). NGC ID# 229Z, PCGS# 2329

1882 Cent, PR67 Red and Brown Rich Patina

3544 1882 PR67 Red and Brown PCGS. Hints of coppery-red emerge from beneath deep olive-green and amber-brown toning on this Superb Gem proof 1882 Indian cent. The strike is sharp, and the fields offer deep reflectivity. The obverse portrait is modestly contrasted through the thick patina. A few trivial specks do not detract. Population: 4 in 67 Red and Brown, 0 finer (2/16). NGC ID# 22A3, PCGS# 2334

- 3545 1885 PR66 Brown PCGS. CAC.** Steel-blue hues grace the burgundy-brown surfaces of this reflective Premium Gem proof 1885 Indian cent. The strike is needle-sharp, and close study with a loupe fails to reveal noteworthy surface imperfections. Population: 69 in 66 (4 in 66+) Brown, 30 finer (2/16). NGC ID# 22A6, PCGS# 2342

**1885 Cent, PR67 Red and Brown
Rare This Fine**

- 3546 1885 PR67 Red and Brown PCGS.** Glimmering fields show off sharp, satiny relief elements on this Superb Gem Red and Brown proof. Both sides display even amber-orange and coppery-red hues, although the overall patina is a little too deep to claim a full Red designation. There is no obvious carbon. Population: 23 in 67 Red and Brown, 2 finer (2/16). NGC ID# 22A6, PCGS# 2343

**1885 Cent, PR67 Red and Brown
Deep Original Coloration**

- 3547 1885 PR67 Red and Brown PCGS.** Fully defined, satiny design elements are set against deeply mirrored fields. This Superb Gem Red and Brown proof displays blended olive-brown and amber-red hues on the obverse with rose-gold and coppery-orange on the reverse. The 1885 is available in many grades but becomes rare at the Superb Gem level. This piece is housed in a green label holder. Population: 23 in 67 Red and Brown, 2 finer (1/16). NGC ID# 22A6, PCGS# 2343

- 3548 1886 Type One PR66 Red and Brown PCGS. CAC.** Beautifully toned surfaces and excellent preservation appear on this Premium Gem Red and Brown Type One cent, golden-orange with glints of fire on the obverse, rose-lilac on the reverse amid peeks of blue and gold. A sharply struck and distraction-free example. Population: 41 in 66 (2 in 66+) Red and Brown, 2 finer. CAC: 7 in 66 Red and Brown, 4 finer (1/16). NGC ID# 22A7, PCGS# 2346

- 3549 1889 PR65 Red PCGS. CAC.** This brilliant Gem proof exhibits full orange-gold color with deeply mirrored fields and sharply defined, satiny devices. An exceptional example in a seldom seen, high-tier grade. The proof 1889 Indian cent had a mintage of 3,336 pieces, but few survive in Gem Red condition. Population: 18 in 65 Red, 8 finer (2/16). NGC ID# 2732, PCGS# 2356

LINCOLN CENTS

- 3550 1909-S VDB MS65 Red and Brown PCGS.** Soft chestnut-brown toning blankets each side of this Gem '09-S VDB Lincoln cent, but substantial copper-gold luster shines through, delivering the Red and Brown designation. The strike is bold, and the surfaces are free of distractions. Seldom seen finer in any color category. NGC ID# 22B2, PCGS# 2427

- 3551 1909-S VDB MS65 Red and Brown PCGS.** Typical of the issue, both sides exhibit frosty golden luster and bold design motifs. Perhaps this piece deserves a full Red designation. PCGS has only certified 50 finer Red and Brown examples (2/16). NGC ID# 22B2, PCGS# 2427

**1911-D Cent, MS66 Red
Prohibitively Rare Any Finer**

- 3552 1911-D MS66 Red PCGS.** A conditionally scarce Registry-grade example of this challenging early Denver issue, showing copper-red luster and carbon-free surfaces. The strike is slightly soft due to worn dies, but there are no mentionable abrasions. The 1911-D is a better date in the upper reaches of the full Red grade range. Population: 36 in 66 (3 in 66+) Red, 1 finer (2/16). NGC ID# 22B8, PCGS# 2446

- 3553 1912-S MS65 Red PCGS.** Early branch mint Lincoln issues tend to be rare in full Red, and that maxim holds true for the 1912-S. The present fully struck Gem is virtually void of contact. The dusky peach-gold surfaces show minimal carbon. Certified in a green label holder. Population: 91 in 65 (9 in 65+) Red, 2 finer (1/16). Ex: Portland, Oregon Signature (Heritage, 3/2004), lot 5180, which realized \$3,565. NGC ID# 22BC, PCGS# 2458

- 3554 1914-D AU58 NGC.** Deeply toned in auburn-brown hues but with only a trace of high-point friction over the devices. This near-Mint 1914-D Lincoln cent displays smooth, problem-free surfaces and bold detail with remnants of luster in the fields. NGC ID# 84BX, PCGS# 2471

**1916 Cent, Glowing MS67+ Red
Exuberant Eye Appeal**

- 3555 1916 MS67+ Red PCGS.** A seldom seen Superb Gem example of this early Lincoln cent issue, showing intense coppery-gold and amber-orange luster with accents of mint-green and rose-red. The strike is sharp, and the remarkably well-preserved surfaces yield staggering eye appeal. A couple of tiny specks in the left obverse field are barely worthy of mention. Population: 63 in 67 (6 in 67+) Red, 0 finer (2/16). NGC ID# 22BN, PCGS# 2488

3556 1919-D MS65 Red PCGS. The surfaces are medium orange-red and noteworthy throughout for their lack of carbon and an absence of other distractions as well. The obverse die in particular (and the reverse to a lesser degree, as well) show moderate die fatigue that prevents an absolute strike. Population: 63 in 65 Red, 16 finer (1/16). NGC ID# 22BZ, PCGS# 2518

3557 1919-D MS65 Red PCGS. CAC. A scarce Gem Red example of this early Denver issue, showing satiny copper-orange luster that is free of heavy abrasions. The strike is sharp, and there are no severe signs of carbon. Genuinely rare any finer. Population: 63 in 65 Red, 16 finer (1/16). NGC ID# 22BZ, PCGS# 2518

**1922 No D Cent, AU53
Die Pair 2, Strong Reverse**

3558 1922 No D, Strong Reverse, FS-401, AU53 PCGS. CAC. Die Pair 2, showing the strong reverse and the sharp 2 in the date. The No D 1922 Lincoln cent is a popular *Guide Book* variety. This AU example displays glossy chocolate-brown surfaces with light, even wear. The CAC-endorsement adds to the appeal. This is among the more popular Lincoln cent varieties. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

3559 1923-S MS64 Red and Brown PCGS. CAC. Satiny copper-orange surfaces have a tinge too much brown in their patina to achieve a full Red designation. This Choice example displays pleasing detail without distracting abrasions. A few small specks are not particularly obvious. PCGS lists 20 finer coins in the Red and Brown category (1/16). NGC ID# 22CB, PCGS# 2547

3560 1926-S MS64 Red and Brown PCGS. CAC. This satiny near-Gem has slight mellowing of the red luster on the obverse, with brilliant gold luster on the reverse. A lovely example of a scarce issue in high grades. CAC: 33 in 64 Red and Brown, 5 finer (2/16). NGC ID# 22CL, PCGS# 2574

3561 1928-S MS65 Red and Brown PCGS. The surfaces of this Gem are about an even mix of orange and brown but, more importantly, no mentionable spots appear on either side, and the strike is better than on many survivors of this issue, one more elusive in this grade than generally realized. Population: 4 in 65 Red and Brown, 0 finer (1/16). NGC ID# 22CT, PCGS# 2592

3562 1939-S MS67+ Red PCGS. CAC. The pristine surfaces of this Superb Gem exhibit fiery orange mint luster, and the strike creates bold design definition. This piece is tied for the finest certified with just 32 CAC approved examples (2/16). NGC ID# 22DS, PCGS# 2683

3563 1942-D/D FS-502 MS67 Red PCGS. The mintmark is repunched due north. Luster bathes this fully struck and practically pristine peach-red Superb Gem. One of two *Cherry-pickers'* varieties for the issue; FS-504 shows the mintmark repunched west. Population: 2 in 67 Red, none finer (2/16). NGC ID# 22E2, PCGS# 37801 Base PCGS# 2707

3564 1944 MS67+ Red PCGS. This shell-case cent displays fiery orange mint luster with frosty surfaces. An extraordinary Superb Gem featuring a bold strike. PCGS has only certified two finer examples (2/16). NGC ID# 22EA, PCGS# 2722

3565 1944-D/S FS-512 MS66 Red PCGS. FS-512 shows an errant S beneath the primary D mintmark. This PCGS Set Registry variety is elusive in the finer Mint State grades. The present coin is one of seven MS66 Red examples at the top of the PCGS population report (1/16). Vibrant copper-red luster illuminates bold design elements on each side. A few unobtrusive specks do not detract. NGC ID# 2734, PCGS# 37837

3566 1945-S MS67+ Red PCGS. CAC. The second year of the shell-case cents with their distinctive pinkish-orange coloration. This Superb Gem is tied for the finest certified (2/16). Both sides are brilliant and sharply struck. CAC: 30 in 67 Red, 0 finer (2/16). NGC ID# 856Y, PCGS# 2740

**1948 Cent, Frosty MS67 Red
Among the Finest Certified**

3567 1948 MS67 Red PCGS. Few 1948s achieve the MS67 grade, perhaps because not many original Uncirculated rolls were saved during the post-war downmarket for coins. This lustrous and appealing Superb Gem ranks among the finest at both services combined. Pale-orange toning covers the frosty-smooth surfaces, with a mere tiny carbon or two join only a few nearly imperceptible, ticklike marks. Sharply struck with great eye appeal. Population: 19 in 67 Red, 0 finer (1/16). NGC ID# 22ES, PCGS# 2761

3568 1949 MS67 Red PCGS. CAC. An impressive later issue Wheat cent, this Superb Gem displays bold design definition and fully brilliant light orange luster on both sides. Population: 19 in 67 Red, 0 finer. CAC: 3 in 67 Red, 0 finer (2/16). NGC ID# 22EV, PCGS# 2770

3569 1955 Doubled Die Obverse AU55 ANACS. FS-101. A Choice AU example of this extremely popular variety, with lightly abraded light brown surfaces that show traces of original mint luster. The design elements show only traces of wear and the doubling on the date is quite bold. NGC ID# 22FG, PCGS# 2825

3570 1955 Doubled Die Obverse AU58 PCGS. CAC. FS-101. This lightly circulated example of the famous Lincoln cent error boasts a typical appearance for such a coin, nut-brown with only minor ticks consistent with short circulation. No major impairments appear. NGC ID# 22FG, PCGS# 2825

3571 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS. Golden-brown, olive, and mauve color embrace this sharply struck and unmarked representative. The most famous of all doubled die varieties, one that is easily noticed with the unaided eye. Housed in an older green label holder.

Ex: Long Beach Signature (Heritage, 6/2004), lot 5439; FUN Signature (Heritage, 1/2009), lot 511. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Cent, MS63 Red and Brown
Doubled Die Obverse**

3572 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS. The obverse of this Select Mint State example displays satiny copper-red luster, although areas of burgundy toning on the reverse preclude a full Red designation from PCGS. This doubled die obverse cent is well-struck and free of significant carbon. Eye appeal is excellent for the grade. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

3573 1956 MS67 Red PCGS. CAC. Despite being moderately plentiful in MS67 Red at NGC, the 1956 Lincoln cent is rare so fine in a PCGS holder, and only six pieces in this grade have received a CAC endorsement. This Registry-essential coin displays frosty luster that enjoys bright, golden color in the centers and deep crimson-orange around the peripheries. A few pepper specks in the vicinity of the date are not obtrusive. Population: 34 in 67 (1 in 67+) Red, 0 finer (1/16). NGC ID# CEAA, PCGS# 2836

3574 1962 MS67 Red PCGS. An absolutely amazing Superb Gem with fiery deep-orange luster and extraordinary eye appeal. Pristine surfaces accompany a bold strike. Population: 25 in 67 (1 in 67+) Red, 0 finer (2/16). NGC ID# 22G3, PCGS# 2878

3575 1971-S MS67 Red PCGS. A magnificent pumpkin-gold Superb Gem. Lustrous, pristine, and devoid of carbon and contact. Lincoln's shoulder shows trivial inexactness of strike. Population: 21 in 67 (3 in 67+) Red, 0 finer (1/16). NGC ID# 22GS, PCGS# 2947

3576 1972 Doubled Die Obverse, FS-101, MS66+ Red PCGS. CAC. After the 1955 doubled die, the 1972 doubled die obverse Lincoln cent is arguably the most important variety in the series that can be obtained by the average collector. This high-end Premium Gem example yields rich coppery-orange luster and bold design elements. No carbon spotting is observed. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

3577 1972-D MS67 Red PCGS. An orange-red Superb Gem. Lustrous and nicely struck. Marks are absent save for a tick on the F in OF. A few tiny flecks are noted near the date. Population: 16 in 67 (3 in 67+) Red, 0 finer (1/16). NGC ID# 22GV, PCGS# 2956

3578 1977-D MS67+ Red PCGS. This well-struck apricot-gold Superb Gem has a virtually pristine obverse. The reverse shows only two tiny flecks, below the N in CENT and the final A in AMERICA. Population: 22 in 67 (1 in 67+) Red, 1 finer (1/16). NGC ID# 22HA, PCGS# 2987

**1978 Cent, MS67+ Red
Superb Luster and Color**

3579 1978 MS67+ Red PCGS. A Registry-grade example of this surprising condition rarity. The 1978 cent is scarce in MS67 Red and rare with a Plus designation; only a single MS68 Red coin is finer (2/16). This copper-red example displays glowing luster and astounding eye appeal. There is no carbon spotting, and the strike is well-executed. Population: 51 in 67 (9 in 67+) Red, 1 finer (2/16). NGC ID# 22HB, PCGS# 2992

3580 1982-D Large Date MS68 Red PCGS. Wisps of pale blue toning appear on the brilliant orange surfaces of this satiny Superb Gem. Both sides are pristine and exceptionally sharp. Population: 4 in 68 Red, 0 finer (2/16). NGC ID# 22HT, PCGS# 146033

3581 1984-D MS68 Red PCGS. This exemplary Registry coin is tied with 16 others as the finest at PCGS (1/16), and its immaculate, carbon-free surfaces are fully deserving of the lofty grade. Well-struck and eye-appealing with a mild orange-peel effect beneath the frosty luster. NGC ID# 22J2, PCGS# 3068

**1992-D Cent, Lustrous AU58
FS-901, Close AM**

3582 1992-D Close AM, FS-901, AU58 PCGS. A popular *Guide Book* variety that shows the AM in AMERICA closely spaced. This characteristic is diagnostic of the proof reverse type, which was used to strike a number of 1992-D circulation issues. This red-and-brown-looking near-Mint coin displays bold detail and pleasing surfaces. Luster remains in the fields. PCGS# 391427 Base PCGS# 83099

PROOF LINCOLN CENTS

3583 1910 PR65 Red and Brown PCGS. CAC. The obverse is mostly bluish-brown with traces of red mint color, and the reverse is much the opposite with nearly full mint red and hints of brown patina. Population: 67 in 65 (1 in 65+) Red and Brown, 31 finer. CAC: 20 in 65 Red and Brown, 11 finer (2/16). NGC ID# 22KT, PCGS# 3307

3584 1910 PR65+ Red PCGS. CAC. A few trivial flecks of carbon appear on the fiery orange surfaces of this Gem matte proof Lincoln cent. Both sides are exceptionally well detailed with extraordinary eye appeal. Population: 43 in 65 (1 in 65+) Red, 28 finer. CAC: 3 in 65 Red, 4 finer (2/16). NGC ID# 22KT, PCGS# 3308

3585 1911 PR65 Red and Brown PCGS. A lovely Gem matte proof cent with splashes of pale blue toning over golden luster on the obverse. The reverse is mostly bluish-brown with traces of faded mint color. Population: 65 in 65 (2 in 65+) Red and Brown, 25 finer (2/16). NGC ID# 22KU, PCGS# 3310

3586 1913 PR65 Red and Brown PCGS. CAC. A sharply struck Gem matte proof, this example displays attractive blue and purple patina on its light brown surfaces with much underlying mint red. Population: 89 in 65 Red and Brown, 31 finer (2/16). CAC: 27 in 65 Red and Brown, 16 finer (2/16). NGC ID# 22KW, PCGS# 3316

3587 1936 Type One — Satin Finish PR65 Red and Brown PCGS. A fully struck example of the first proof Lincoln cent issue struck since 1916. This Gem Red and Brown coin displays reflective surfaces with mottled amber-red, coppery-gold, olive, and rose hues. Population: 35 in 65 Red and Brown, 6 finer (1/16). NGC ID# 22L2, PCGS# 3331

1936 Cent, PR66 Red Brilliant Finish

3588 1936 Type Two — Brilliant Finish PR66 Red PCGS. Silvery-gold and violet accents emerge from the copper-orange mirrors of this Premium Gem Red Type Two proof. There is no distracting carbon, and both sides are modestly contrasted. High-end for the issue with prohibitively few finer in this color category. Population: 48 in 66 (3 in 66+) Red, 2 finer (1/16). NGC ID# 22L3, PCGS# 3335

1937 Lincoln Cent, Pristine PR67 Red

3589 1937 PR67 Red PCGS. Blazing orange-red surfaces show hints of lilac and offer impeccable preservation on this Superb Gem proof 1937 cent, tied for the finest PCGS has ever certified. No spots or other disturbances mar the fabric of what is simply an amazing survivor of this issue. Population: 14 in 67 Red, 0 finer (1/16). NGC ID# 22L7, PCGS# 3338

3590 1937 PR65 Red Cameo NGC. Cameo contrast was not a priority for 1936-1942 proofs, and the designation is rarely found among proofs of the era. This Gem example displays wonderfully smooth, deeply mirrored surfaces that appear black when viewed at the proper angle, in contrast to the raised red devices. A few tiny, deep-orange toning specs are visible with a glass over the vibrant, fire-red surfaces, but they are invisible in-hand and do not detract from the well-deserved PR65 Cameo grade. Census: 10 in 65 Cameo (1 in 65 ★ Cameo), 25 finer (2/16). NGC ID# 22L5, PCGS# 83338

1937 Cent, PR66 Red Cameo Seldom Seen Quality

3591 1937 PR66 Red Cameo PCGS. Starkly contrasted with beautifully deep mirroring in the fields, this Premium Gem Red Cameo proof displays full detail and unmarked surfaces. The 1937 is only the second proof issue produced following the failed matte proof experiment that ended in 1916. Cameo examples are scarce overall and are rare this fine. Population: 27 in 66 (2 in 66+) Cameo, 4 finer (2/16). NGC ID# 22L5, PCGS# 83338

3592 1942 PR66 Red PCGS. CAC. This brilliant Premium Gem proof showcases deep mirroring beneath lovely rose-gold coloration. The strike is full, and the CAC-endorsed surfaces are beautifully preserved. PCGS lists only two Red proofs finer (2/16). NGC ID# 22L9, PCGS# 3353

3593 1942 PR66 Red Cameo PCGS. CAC. Deeply mirrored, coppery-orange fields showcase frosty, razor-sharp devices on this Premium Gem proof Cameo. Free of carbon with distinct eye appeal. Few known this fine. Population: 11 in 66 Red Cameo, 3 finer (1/16). NGC ID# 22L9, PCGS# 83353

1956 Cent, PR68 Red Deep Cameo Dazzling Registry Coin

3594 1956 PR68 Red Deep Cameo PCGS. A virtually flawless Registry-grade example of this late "Wheatie" proof, tied with just 10 others as the finest at PCGS (1/16). The fields are devoid of carbon and display seemingly infinite depth of mirroring. The devices are fully rendered and thickly frosted. Each side displays mint-fresh coppery-orange color. NGC ID# 22LG, PCGS# 93377

3595 1957 PR68 Red Cameo PCGS. Among the finest Red Cameos at PCGS, this high-end Superb Gem 1957 proof cent displays gleaming copper-orange fields and softly frosted design elements. There are no mentionable imperfections, and the eye appeal is stellar. Ideal for Registry purposes. Population: 19 in 68 Cameo, 0 finer (2/16). NGC ID# 22LH, PCGS# 83380

TWO CENT PIECES

- 3596 1864 Small Motto, FS-401, AU55 PCGS.** The ephemeral introductory Small Motto subtype is much scarcer than its 1864 Large Motto successor. Although the leaves display slight wear, most veins are bold, and the deep walnut-brown surfaces lack consequential contact. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

1864 Small Motto Two Cent MS65 Red and Brown

- 3597 1864 Small Motto, FS-401, MS65 Red and Brown PCGS. CAC.** After the low-mintage 1872, the 1864 Small Motto two cent piece poses the greatest challenge in the date run set. This Gem Red and Brown example is conditionally scarce. The strike is razor-sharp, and satiny luster prevails over mottled toning. The patina includes shades of olive, amber, violet, and copper-orange. Population: 50 in 65 Red and Brown, 6 finer (2/16). PCGS# 38233 Base PCGS# 3580

1864 Two Cent, MS66 Red Large Motto Type Coin

- 3598 1864 Large Motto MS66 Red PCGS.** This Premium Gem first-year type coin is razor-sharp and showcases seldom-seen full Red luster. Close study with a loupe fails to reveal abrasions. The Large Motto 1864 is typically chosen for date sets, as it is more affordable in high grade than its Small Motto counterpart. Nonetheless, this piece is conditionally scarce. Population: 61 in 66 (1 in 66+) Red, 2 finer (2/16). NGC ID# 22N9, PCGS# 3578

- 3599 1866 MS65+ Red and Brown PCGS.** An early die state struck from well made dies with slight die cracks from both stem ends on the reverse. An attractive Gem with considerable orange mint color and attractive bluish-brown toning. Population: 68 in 65 (1 in 65+) Red and Brown, 13 finer (2/16). NGC ID# 3XHP, PCGS# 3589

- 3600 1868 MS65 Red and Brown PCGS. CAC.** The well-preserved original red surfaces of this impressive Gem have mellowed to light brown and crimson in some areas, but they retain much of their original mint luster. The design elements are well-detailed and eye appeal is quite strong. Population: 56 in 65 (2 in 65+) Red and Brown, 4 finer (1/16). NGC ID# 22NC, PCGS# 3598

1872 Two Cent Piece, MS62 Brown Final Business-Strike Mintage

- 3601 1872 MS62 Brown PCGS.** With just 64,000 pieces struck for circulation, the 1872 is always in demand by business strike specialists and by final-year type collectors. This is a sharply struck and attractive, walnut-brown representative with pockets of orange luster tucked away in the recesses. Deep-blue overtones dominate within the wreath on the reverse. There are no mentionable abrasions or distractions to report. Population: 10 in 62 Brown, 34 finer (1/16). NGC ID# 22NG, PCGS# 3612

THREE CENT SILVER

- 3602 1858 MS64 PCGS. CAC.** This impressive Choice specimen exhibits well-detailed design elements with just a touch of softness on some of the peripheral stars and legend. The lightly marked surfaces are blanketed in shades of lavender-gray and greenish-gold toning. NGC ID# 22Z7, PCGS# 3674

- 3603 1861 MS66 PCGS.** One of 497,000 business strikes in 1861. This Premium Gem displays excellent strike definition and untuned, well preserved surfaces. Pleasing luster emanates from both sides. Interesting semi-circular, red colored marks (strike throughs ?) occur on portions of the obverse. Population: 82 in 66, 30 finer (2/16). NGC ID# 22ZA, PCGS# 3679

- 3604 1862 MS65 PCGS. Gold CAC.** Shimmering luster glows beneath ice-blue and champagne overtones on this incredibly well-preserved 1862 silver three cent. The strike is a trifle soft on the central high points, as usual. Gold-stickered by CAC as being undergraded in their opinion, and housed in an old green label PCGS holder. CAC has awarded Gold labels to only four examples of this issue, including an AU50, an MS62, and two MS65 (1/16). NGC ID# 22ZB, PCGS# 3680

1862 Three Cent Silver, MS67 Among the Finest at Both Services

- 3605 1862 MS67 NGC.** The 343,000 business strikes for the 1862 three cent silver make it the last issue of its kind to be readily available across most grades. "Most grades," however, does not include MS67, where this example is one of only 39 pieces tied for finest at NGC and PCGS combined. Each side offers radiant mint luster beneath blankets of multicolored toning that includes azure, plum, fire-orange, and rose-gold hues. Census: 23 in 67 (1 in 67 ★), 0 finer (2/16). Ex: Long Beach Signature (Heritage, 2/2010), lot 215. NGC ID# 22ZB, PCGS# 3680

- 3606 1863 AU58 PCGS.** An important Civil War issue, the 1863 is normally encountered in proof format. Circulation strike examples are quite scarce with a mintage of only 21,000 coins. This lovely near mint example has brilliant gold and blue toning with light silver at the central reverse. NGC ID# 22ZD, PCGS# 3682

PROOF THREE CENT SILVER

- 3607 1861 PR64 Cameo PCGS. CAC.** Delicate champagne toning resides on the brilliant silver surfaces of this sharply struck Choice Cameo proof. Both sides exhibit exceptional field-to-device contrast. Population: 15 in 64 Cameo, 5 finer. CAC: 10 in 64 Cameo, 7 finer (2/16), including both PCGS and NGC examples. NGC ID# 27C8, PCGS# 83710
- 3608 1871 PR65 PCGS.** Most 1871 three cent silver piece encountered in the marketplace are proofs such as this Gem example. Both sides are deeply mirrored with sharp devices and cameo contrast beneath slate and iridescent toning. Population: 47 in 65, 42 finer (2/16). NGC ID# 27CG, PCGS# 3722

THREE CENT NICKELS

- 3609 1866 MS66 PCGS. CAC.** Pale rose-gray patina appears uniformly on both sides of this nicely preserved Premium Gem 1866 business strike three cent nickel. Although there was a plentiful mintage exceeding 4.8 million pieces for this issue, most seen are lightly circulated or in low Mint State grades. Some die fatigue appears on the last 6 in the date and via a small die crack nearby, and a curved lintmark shows just above the coronet. Several die cracks appear on the reverse. An interesting coin, well-preserved yet showing the challenges of mid-19th century Mint technology. Population: 30 in 66 (2 in 66+), 2 finer (1/16). NGC ID# 22NK, PCGS# 3732
- 3610 1869 MS66 NGC.** This Premium Gem 1869 three cent nickel is devoid of abrasions and shows smooth, satiny luster with a hint of champagne toning. Heavy clash marks are evident on each side, as often seen on this issue. The reverse denomination is not fully delineated, but the obverse is well-struck. Census: 15 in 66 (2 in 66+), 0 finer (1/16). NGC ID# 22NL, PCGS# 3735

1885 Three Cent Nickel, AU55 Circulation Strike Rarity

- 3611 1885 AU55 PCGS.** Circulation-strike 1885 three cent nickels are important rarities among coins of the denomination. Less than 10% of all PCGS graded examples are circulation strike, with over 90% of all submissions identified as proofs. Sharply struck with traces of luster on its attractive light gray surfaces, this piece has a trivial spot at the left obverse. NGC ID# 275G, PCGS# 3753

1889 Nickel Three Cent, MS67 Tied for Finest Known

- 3612 1889 MS67 PCGS.** The final-year three cent nickel is available in most Uncirculated grades but becomes a distinct condition rarity at the Superb Gem level. This top-grade coin displays glowing, frosty luster warmed by delicate champagne toning. The strike is fully rendered, and the eye appeal is superb. There are no perceptible imperfections. Population: 17 in 67, 0 finer (1/16). NGC ID# 275J, PCGS# 3758

PROOF THREE CENT NICKELS

- 3613 1868 PR66 Cameo NGC.** Well-preserved and toned light golden with deeply reflective fields. The central devices are well-struck but on the reverse denomination are not completely full. The 1868 three cent nickel proof is scarce in the upper Cameo grades and rarely seen finer than the Premium Gem level. Census: 31 in 66 (1 in 66+, 5 in 66 ★, 2 in 66+★) Cameo, 14 finer (1/16). NGC ID# 275N, PCGS# 83764
- 3614 1869 PR67 Cameo NGC.** This stunning Superb Gem Cameo proof is fully brilliant with deeply mirrored fields that frame its brilliant, frosty white devices. Sharply struck and extremely pleasing. Census: 5 in 67 Cameo (4 in 67 ★ Cameo), 0 finer (2/16). NGC ID# 275P, PCGS# 83765
- 3615 1870 PR66 Cameo NGC.** The sharply detailed design elements of this spectacular Premium Gem display a thick coat of mint frost that contrasts boldly with the deeply mirrored fields. The surfaces are impeccably preserved and eye appeal is tremendous. Census: 26 in 66 Cameo (1 in 66+ Cameo, 2 in 66 ★ Cameo), 4 finer (2/16). NGC ID# 275W, PCGS# 83766

1873 Three Cent Nickel, PR66+ Cameo Closed 3 Date Logotype

- 3616 1873 Closed 3 PR66+ Cameo PCGS. CAC.** All of the proof 1873 three cent nickel coins were struck early in the year before the Mint changed from the Closed 3 to the Open 3 logotype. This brilliant, untuned Premium Gem exhibits brilliant nickel-gray surfaces without toning. The fields are deeply mirrored and nicely frame the lustrous devices. Population: 18 in 66 (3 in 66+) Cameo, 1 finer (2/16). This is one of 16 PR66 examples that CAC has approved, with just one finer. NGC ID# 275U, PCGS# 83769
- 3617 1875 Misplaced Date, FS-301, PR65+ Cameo PCGS. CAC.** This proof die pair shows the foot or flag of a misplace 1 protruding from the lower portion of Liberty's neck. This piece is fully struck with a lapped reverse and pleasantly reflective fields. A hint of champagne toning accents the unmarked surfaces. Population: 27 in 65 (2 in 65+) Cameo, 8 finer (2/16). PCGS# 524941 Base PCGS# 83771

3618 1878 PR67 PCGS. The 1878 three cent nickel was struck only in proof format. It is obtainable with patient searching through PR65, and even Premium Gems are seen occasionally. PR67s such as the current offering are rare, however. Golden-tan patina adorns both sides, each of which exhibits sharply struck design elements, including the lines in the III denomination. Impeccable preservation rounds out the outstanding eye appeal. Population: 17 in 67, 1 finer (2/16). NGC ID# 275Y, PCGS# 3774

3619 1878 PR66 Cameo PCGS. CAC. A lovely Premium Gem Cameo example of this proof-only issue, showing pleasant contrast and full relief detail. Traces of champagne toning grace unmarked surfaces whose quality is endorsed by CAC. Seldom available in finer Cameo grades. NGC ID# 275Y, PCGS# 83774

3620 1879 PR67 PCGS. CAC. A nicely preserved Superb Gem proof of this issue of 3,200 pieces, the proofs seen more often in high grade than the circulation strikes. This proof shows filled, frosty areas inside both the 8 and 9 in the date, one of three dies; Breen calls it "scarce." A sharply struck and attractive coin. Population: 47 in 67 (2 in 67+), 3 finer. CAC: 17 in 67, 0 finer (1/16). NGC ID# 275Z, PCGS# 3775

3621 1882 PR67 ★ NGC. CAC. Although modestly contrasted, NGC awarded this piece a Star designation instead of a Cameo label. The strike is sharp, and the fields are deeply reflective. An essentially untoned, nearly flawless example. Census: 66 in 67 (1 in 67+, 6 in 67 ★), 5 finer (2/16). NGC ID# 2764, PCGS# 3778

SHIELD NICKELS

3622 1870 MS66 NGC. A spectacular Premium Gem, with well-preserved surfaces that radiate vibrant mint luster and show a few delicate highlights of pink toning. The design elements are well-detailed and both sides show a number of interesting die cracks. Census: 8 in 66 (1 in 66+), 1 finer (2/16). NGC ID# 22P4, PCGS# 3797

3623 1874 MS65+ PCGS. CAC. This high-end Gem is boldly struck for the advanced die state, which shows numerous peripheral cracks on the obverse. Silvery-white luster cartwheels around each side, and there are no mentionable abrasions. CAC-endorsed and proportionately eye-appealing. Population: 36 in 65 (1 in 65+), 11 finer (1/16). NGC ID# 22P9, PCGS# 3803

3624 1874 MS66 NGC. Gem examples of this Shield nickel issue are scarcely seen, and finer pieces are genuine rarities. This Premium Gem displays softly frosted luster with a hint of light golden toning. The preservation is excellent, although some of the finer design elements show the typical striking softness. Census: 6 in 66 (1 in 66 ★), 0 finer (2/16). NGC ID# 22P9, PCGS# 3803

PROOF SHIELD NICKELS

3625 1866 Rays PR63 PCGS. An attractive Select representative of the popular, short-lived Rays design, with sharply detailed design elements and hazy, reflective surfaces that show only minor signs of contact. From a first-year proof mintage of 600 pieces. NGC ID# 276G, PCGS# 3817

3626 1871 PR66 PCGS. CAC. Pastel cherry-red and lemon-lime toning endows this intricately struck and exemplary high-grade nickel. The satiny surfaces are undisturbed. From a low mintage of 960+ proofs. NGC ID# 276M, PCGS# 3825

3627 1875 PR66 PCGS. CAC. An estimated 700 proofs were struck of the 1875 with only three dozen Premium Gem survivors known. The obverse fields are brightly reflective while the reverse is less so. Just the slightest touch of pale aqua toning covers each side of this fully struck Shield nickel. Population: 18 in 66, 1 finer (2/16). NGC ID# 276S, PCGS# 3829

3628 1878 PR64 Cameo PCGS. An unusually well-executed example of this essential proof-only issue, showing razor-sharp motifs and stark white-on-black contrast. Traces of light golden toning emerge from mirrors, and the surfaces are free of significant marks. Population: 12 in 64 Cameo, 42 finer (1/16). NGC ID# 276V, PCGS# 83832

3629 1882 PR67 PCGS. CAC. Fully defined relief elements and modestly reflective fields adorn this Superb Gem 1882 proof Shield nickel, while the immaculately preserved surfaces display iridescent lemon-gold toning. Among the finest certified at PCGS. Population: 41 in 67, 0 finer (1/16). NGC ID# 276Y, PCGS# 3837

LIBERTY NICKELS

3630 1883 No Cents MS67 PCGS. An amazing Superb Gem, this No CENTS nickel exhibits satiny surfaces with reflective fields and delicate champagne toning. This piece is tied for the finest certified. Population: 35 in 67, 0 finer (2/16). NGC ID# 2772, PCGS# 3841

3631 1883 No Cents MS67 PCGS. CAC. A spectacular Superb Gem representative of the popular, one-year No CENTS design, with sharply detailed design elements and vibrant mint luster throughout. Population: 35 in 67, 0 finer (2/16). NGC ID# 2772, PCGS# 3841

1883 With Cents Liberty Nickel, MS66 Rich Old-Time Luster

3632 1883 With Cents MS66 PCGS. This first-year Premium Gem With Cents type coin displays light straw-gold toning. The lustrous surfaces show only a solitary tick or two on the portrait. The reverse border exhibits several bold die cracks. Certified in a green label holder. Population: 64 in 66 (6 in 66+), 6 finer (1/16). NGC ID# 22PH, PCGS# 3844

3633 1884 MS65 PCGS. Satiny luster illuminates golden-gray toning on each side of this Gem 1884 Liberty nickel. There are no visible abrasions, and any faint hairlines that limit the grade are hidden beneath the patina. The corn ear to the left of the wreath bow is the only mentionable strike weakness. NGC ID# 22PJ, PCGS# 3845

1884 Nickel, Semiprooflike MS66 Delicate Champagne Toning

3634 1884 MS66 PCGS. Wheat-gold and powder-blue shades drape this thoroughly lustrous and mark-free Premium Gem. The strike is sharp save for the left ear of corn. The date is lightly repunched, apparent on the flag and base of the 1. A semikey issue certified in a green label holder. Population: 39 in 66 (10 in 66+), 0 finer (1/16). NGC ID# 22PJ, PCGS# 3845

3635 1887 MS66 PCGS. The virtually pristine, lustrous surfaces of this spectacular Premium Gem show an extensive network of spidery die cracks through the peripheral legends on both sides. The design elements are well-detailed and overall eye appeal is quite strong. Population: 26 in 66 (3 in 66+), 3 finer (1/16). NGC ID# 22PL, PCGS# 3848

3636 1890 MS66 PCGS. A remarkably attractive and well-produced example of the 1890 Liberty nickel. The Mint made 132 obverse dies, and by good fortune this Premium Gem was sharply struck, apparently from an early state of one those die pairs. Vibrant mint luster radiates from both sides with a blush of reddish-gold toning. The left ear of corn shows considerable (but not full) detail. PCGS reports just one numerically finer coin, as does NGC. Population: 20 in 66 (5 in 66+), 1 finer (1/16). NGC ID# 22PM, PCGS# 3851

3637 1890 MS66 PCGS. Cream-gray luster illuminates satiny surfaces on this Premium Gem 1890 Liberty nickel. Above-average detail appears on the stars and wreath, particularly to the left of the bowknot. Pieces grading this fine are rare, and anything finer is almost unobtainable. Population: 20 in 66 (5 in 66+), 1 finer (1/16). NGC ID# 22PM, PCGS# 3851

3638 1891 MS66 PCGS. A common date but conditionally rare so well-preserved. This Premium Gem example displays above-average sharpness through the stars and wreath, with satiny luster that illuminates warm golden toning. Housed in a green label holder. Population: 28 in 66 (2 in 66+), 2 finer (1/16). NGC ID# 2776, PCGS# 3852

3639 1892 MS66 PCGS. Beautiful splashes of amber and lavender toning accent the luminous champagne surfaces of this Premium Gem 1892 Liberty nickel. Peripheral die cracks on each side suggest a late state strike, although the lower wreath and obverse stars nonetheless display above-average detail. Among the finest certified and housed in a green label holder. Population: 37 in 66 (4 in 66+), 0 finer (1/16). NGC ID# 2777, PCGS# 3853

3640 1893 MS66 PCGS. A stunning example with both superior technical merit and remarkable eye appeal. Fully struck throughout with no weakness noted in either the stars or wreath and with essentially pristine surfaces. Pale gold, blue, and green hues accent the silky, intensely lustrous surfaces. While the 1893 Liberty Nickel is somewhat more frequently encountered in grades ranging up to full Gem than many of the other pre-1900 issues, it is nearly unobtainable finer.
Ex: Portland Signature (Heritage, 3/2004), lot 5345. NGC ID# 2778, PCGS# 3854

3641 1894 MS66 PCGS. *Ex: Friend.* Supremely lustrous with an impressive strike and beautiful nickel-white coloration with glimpses of gold. Trivial flyspecks, mostly located on the reverse, ensure the originality of the piece, and the surfaces are virtually impeccable otherwise. Population: 36 in 66 (4 in 66+), 1 finer (1/16).
Ex: ANA Signature (Heritage, 7/2005), lot 5606; FUN Signature (Heritage, 1/2010), lot 484. NGC ID# 2779, PCGS# 3855

3642 1895 MS65 PCGS. This attractive Gem representative exhibits sharply detailed design elements and well-preserved surfaces that radiate vibrant mint luster, under pleasing hints of champagne-gold toning. Finer examples are elusive. Population: 67 in 65 (3 in 65+), 28 finer (1/16). NGC ID# 277A, PCGS# 3856

3643 1895 MS66 PCGS. An outstanding 1895 nickel, satiny in appearance with mostly brilliant, untomed surfaces. Both the strike and overall eye appeal of this pristine specimen are quite pleasing. Population: 27 in 66 (2 in 66+), 1 finer (1/16).
Ex: Long Beach Signature (Heritage, 2/2005), lot 5884. NGC ID# 277A, PCGS# 3856

3644 1895 MS66 PCGS. A conditionally scarce Premium Gem example of this otherwise plentiful Liberty nickel issue, showing golden-toned satin luster and unusually well-defined wreath and star details. A single, tiny tick on Liberty's cheek appears to be all that limits the grade. Population: 27 in 66 (2 in 66+), 1 finer (1/16). NGC ID# 277A, PCGS# 3856

3645 1896 MS65 PCGS. An attractive Gem representative of this popular date, with well-detailed design elements that show some softness on the stars and lower wreath. The well-preserved surfaces radiate vibrant mint luster and show no mentionable distractions. Population: 65 in 65 (2 in 65+), 23 finer (1/16). NGC ID# 277B, PCGS# 3857

3646 1897 MS66 PCGS. Well-struck and abrasion-free with some light golden color over each side. No spotting is evident on this impressive Premium Gem example. Population: 20 in 66 (4 in 66+), 1 finer (1/16).
Ex: Central States Signature (Heritage, 5/2004), lot 6181. NGC ID# 22PN, PCGS# 3858

1898 Liberty Nickel, MS66+ Only One Finer Coin at PCGS

3647 1898 MS66+ PCGS. Delicate shades of champagne-gold toning blanket the well-preserved surfaces of this high-end Premium Gem, with vibrant mint luster underneath. The design elements are sharply detailed and overall visual appeal is terrific. Population: 37 in 66 (2 in 66+), 1 finer (1/16). NGC ID# 22PP, PCGS# 3859

1899 Liberty Nickel, MS66+ Registry Set Contender

3648 1899 MS66+ PCGS. CAC. This popular type-coin issue is scarce in Premium Gem condition and extremely rare any finer. This Plus-graded example will appeal to a range of quality-conscious collectors on a budget. Rich luster rolls over champagne and lavender-toned surfaces, delivering pleasant eye appeal. Slight weakness on the upper obverse stars and the corresponding lower reverse wreath is not unusual for the issue. Population: 78 in 66 (7 in 66+), 2 finer (1/16). NGC ID# 22PR, PCGS# 3860

3649 1901 MS66 PCGS. An exquisitely toned Premium Gem, this boldly defined 1901 Liberty nickel shows typical weakness at the ear of corn in the left branch of the wreath. All other details are sharp. A satiny example with champagne toning at the centers gradually changing to rich iridescence at the borders. Population: 65 in 66 (12 in 66+), 3 finer (2/16). NGC ID# 277C, PCGS# 3862

3650 1902 MS66+ PCGS. This high-end Premium Gem displays well-preserved, lustrous surfaces and well-detailed design elements, with just a touch of softness on some star centers and the left ear of corn in the wreath. Population: 75 in 66 (9 in 66+), 5 finer (1/16). NGC ID# 277D, PCGS# 3863

3651 1903 MS66+ PCGS. CAC. A high-end Premium Gem, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces show a few hints of golden-tan and lavender-gray toning. PCGS has graded three numerically finer examples (2/16). NGC ID# 277E, PCGS# 3864

3652 1904 MS66+ PCGS. This high-end Premium Gem displays well-detailed design elements, with just a touch of softness on some star centers and the lower wreath. No mentionable distractions are noted and vibrant mint luster adds to the tremendous visual appeal. PCGS has graded no numerically finer examples (1/16). NGC ID# 277F, PCGS# 3865

3653 1906 MS66 PCGS. This attractive Premium Gem shows just a trace of the usual softness on some of the star centers and the ear of corn in the lower wreath, but the central devices are sharply detailed. The well-preserved surfaces display vibrant mint luster, with outstanding eye appeal. Population: 27 in 66 (4 in 66+), 0 finer (1/16). NGC ID# 277H, PCGS# 3867

3654 1907 MS66 PCGS. A few russet specks and wisps of olive overlie the frosty champagne and ice-blue surfaces of this Premium Gem Liberty nickel type coin. The stars show pleasing definition, but the hair curls over Liberty's brow and the corresponding portion of the reverse wreath (the corn ear to the left of the bowknot) are characteristically weak. A couple of tiny ticks on the cheek limit the grade. Population: 35 in 66 (2 in 66+), 1 finer (1/16). NGC ID# 277J, PCGS# 3868

3655 1908 MS66 PCGS. This impressive Premium Gem is sharply detailed in most areas, with just a touch of softness on a few star centers and the lower wreath. The virtually pristine surfaces radiate vibrant mint luster, with outstanding eye appeal. Population: 30 in 66 (3 in 66+), 0 finer (1/16). NGC ID# 24FR, PCGS# 3869

3656 1909 MS66 PCGS. Vivid shades of lavender-gray and greenish-gold toning blanket the well-preserved surfaces of this impressive Premium Gem. The design elements are well-detailed, and vibrant mint luster shines through the toning. Population: 31 in 66 (3 in 66+), 0 finer (1/16). NGC ID# 277K, PCGS# 3870

3657 1909 MS66 PCGS. An outstanding Liberty nickel type coin, showing uncommonly bold detail throughout the wreath and stars, as well as reflective prooflike mirroring in the fields. Warm champagne-gold toning graces the unabraded surfaces, and the eye appeal is exceptional. Housed in a green label holder. Population: 31 in 66 (3 in 66+), 0 finer (1/16). NGC ID# 277K, PCGS# 3870

3658 1912 MS66 PCGS. Pastel ocean-blue and lime-green toning blends throughout lustrous and essentially immaculate surfaces. The uppermost stars and left ear of corn are incompletely brought up. Each side has one or two minute strike-throughs, as coined. Housed in a green label holder. Population: 34 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 277N, PCGS# 3873

1912-D Nickel, Lightly Toned MS66 Excellent Luster and Eye Appeal

3659 1912-D MS66 PCGS. The sole Denver issue in the series, the 1912-D Liberty nickel is highly sought-after in seldom seen MS66. This piece is significant also for its unusually bold strike, particularly noticeable on the lower-left portion of the wreath, which is almost always soft. Smooth, satiny surfaces yield blended lavender-gray and pale rose toning. Housed in a green label holder. Population: 41 in 66 (3 in 66+), 0 finer (1/16). NGC ID# 277P, PCGS# 3874

PROOF LIBERTY NICKELS

3660 1885 PR66+ Cameo PCGS. CAC. Both sides of this brilliant Premium Gem Cameo proof are deeply mirrored around sharply defined and satiny devices with extraordinary eye appeal. Population: 53 in 66 (5 in 66+) Cameo, 12 finer. CAC: 23 in 66 Cameo, 11 finer (2/16). NGC ID# 277T, PCGS# 83883

1897 Liberty Nickel, Contrasted PR67 Cameo

3661 1897 PR67 Cameo PCGS. CAC. The obverse boasts a slight golden tinge but the reverse is basically free of perceptible toning. Both sides show notable contrast between frosted devices and jet-black reflective fields amid excellent preservation — one small tick showing on Liberty's jaw notwithstanding. Quite attractive for the grade. Population: 17 in 67 (3 in 67+) Cameo, 3 finer. CAC: 16 in 67 Cameo, 3 finer (1/16). NGC ID# 2787, PCGS# 83895

1897 Nickel, PR67 Cameo Beautifully Toned, Ex: Gardner

3662 1897 PR67 Cameo PCGS. CAC. Cameo representatives of the 1897 proof nickel issue are challenging but usually obtainable in grades through PR66. At the Superb Gem level, however, this issue becomes notably difficult to locate, even without a Cameo designation. Green-gold and nickel-blue patina over each side of this piece contrasts with the occasional glimpse of lavender and sun-gold, the warmer colors more prominent on the obverse. Both sides offer powerful mirrors and light but distinct frost over the devices. All details are boldly brought up. Population: 17 in 67 (3 in 67+) Cameo, 3 finer (1/16).

Ex: Fort Lauderdale Bullet Sale (Heritage, 3/2000), lot 89; Chicago Signature (Heritage, 8/2011), lot 3407; purchased by Eugene Gardner from Legend Numismatics (9/2011); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98146. NGC ID# 2787, PCGS# 83895

3663 1901 PR66 Cameo NGC. CAC. A modestly contrasted example, this Premium Gem 20th century type coin displays razor-sharp design elements rising above mirrored fields with a hint of milky-gray toning. Few Cameos are known finer than this CAC-approved coin. Census: 10 in 66 Cameo (1 in 66+ Cameo, 2 in 66 ★ Cameo), 9 finer (2/16). NGC ID# 278B, PCGS# 83899

3664 1901 PR67 Cameo PCGS. Marking the debut of coinage production at the third Philadelphia Mint facility, this year also marks the last issue before Mint officials suppressed the contrasting appearance of Cameo proofs. This lovely piece has delicate champagne toning over fully mirrored fields and lustrous devices. Population: 14 in 67 Cameo, 0 finer (2/16). NGC ID# 278B, PCGS# 83899

3665 1903 PR67 Cameo PCGS. CAC. An elusive Superb Gem Cameo example of the 1903 proof Liberty nickel, showing modest contrast and CAC-endorsed surfaces. The strike is full throughout, and each side exhibits light golden toning. Population: 17 in 67 (4 in 67+) Cameo, 1 finer (1/16). NGC ID# 278D, PCGS# 83901

3666 1903 PR67 Cameo PCGS. CAC. Impressively, this Superb Gem proof is fully defined throughout the wreath and stars, and displays considerable white-on-black contrast on each side. Untoned, this high-end proof type coin ranks among the finer-known examples of the 1903 issue. Population: 17 in 67 (4 in 67+) Cameo, 1 finer (1/16). NGC ID# 278D, PCGS# 83901

3667 1906 PR67 PCGS. A delightful Superb Gem, this glittering proof Liberty nickel displays fully struck design elements that offer modest contrast with the mirrored fields. However, the chief visual attribute is the toning, which emblazons each side in spectacular rainbow hues of lemon-gold, magenta, blue, and lavender. PCGS has yet to grade a numerically finer example. Population: 12 in 67, 0 finer (1/16). NGC ID# 278G, PCGS# 3904

3668 1909 PR65 Deep Cameo PCGS. CAC. A spectacular example with blazing contrast, this Gem Deep Cameo proof exhibits brilliant nickel-gray surfaces with deeply mirrored fields, all beneath delicate champagne toning. Population: 1 in 65 Deep Cameo, 8 finer. CAC 1 in 65 Deep Cameo, 2 finer (2/16). NGC ID# 278K, PCGS# 93907

BUFFALO NICKELS

3669 1913-S Type One MS66 PCGS. CAC. A delightful Premium Gem representative of the popular Type One design, with sharply detailed design elements and well-preserved surfaces with vibrant satiny mint luster. PCGS has graded 26 numerically finer examples (1/16). NGC ID# 22PY, PCGS# 3917

3670 1913-S Type Two MS64 NGC. Other than a number of mint error varieties, the 1913-S Type Two Buffalo nickel is the greatest key date in the series, boasting a moderately low mintage of little more than 1.2 million coins. This Choice example displays smooth, satiny luster with iridescent toning and pleasing eye appeal. A soft strike is characteristic of the issue. NGC ID# 22R3, PCGS# 3923

3671 1913-S Type Two MS64 PCGS. Excluding a number of elusive varieties, the 1913-S Type Two is the scarcest issue in the Buffalo nickel series. This Choice example displays satiny, champagne-tinged luster and minimally abraded surfaces. Some central strike softness is as expected for the issue and type. NGC ID# 22R3, PCGS# 3923

1914-S Nickel, Mattelike MS65+ Impressive Sharpness, Warm Color

3672 1914-S MS65+ PCGS. CAC. An impressively sharp 1914-S with mattelike luster that delivers a soft glow beneath golden toning. There are no significant abrasions. The combination of the Plus designation and the CAC green label adds the overall appeal. The 1914-S is scarce in finer grades, making this piece ideal for the average date and mintmark collector. NGC ID# 22R6, PCGS# 3926

1915 Nickel, Luminous MS67 Few Known This Fine

3673 1915 MS67 PCGS. A particularly sharp example with little evidence of die erosion. This Superb Gem 1915 Buffalo nickel is among the finest certified. Mattelike luster glows beneath light golden toning, and the surfaces are devoid of abrasions. Eye appeal is exceptional. Population: 50 in 67 (5 in 67+), 0 finer (1/16). NGC ID# 22R7, PCGS# 3927

3674 1916-S MS65 PCGS. A seldom seen Gem example of this early branch mint Buffalo, showing satiny golden luster and well-preserved surfaces. The bison's shoulder and the hair above the Indian's braid exhibit slight softness, but the overall definition is pleasing. PCGS lists 42 finer coins (2/16). NGC ID# 22RC, PCGS# 3933

3675 1917-D 3 1/2 Leg, FS-901, AU58 PCGS. This *Cherrypickers'* variety is diagnostically struck from eroded, lapped dies. The bison's right forward leg is weakened as a result, and extensive flowlines and die fatigue can be seen in the fields. The present example is slightly soft on the bison's head but is otherwise boldly struck and shows only a trace of high-point friction. Partially lustrous surfaces display satiny golden-gray toning. NGC ID# 22RE, PCGS# 38441

1917-S Nickel, Mattelike MS65 Bold Strike

3676 1917-S MS65 PCGS. Struck with the mattelike luster that many collectors find so attractive on James Earle Fraser's iconic design. The details are sharp, and each side displays light golden toning. The 1917-S is a slightly better date in all grades but stands out for its scarcity in MS65. Above this level, the collector will encounter a rare and costly item. PCGS lists 25 finer examples (2/16). NGC ID# 22RF, PCGS# 3936

3677 1918 MS65 PCGS. CAC. Although some die erosion or fatigue or visible on each side, more so on the obverse, the strike is fairly well brought up and provides a decent amount of detail. The surfaces were subsequently well-preserved and remain quite attractive, showing few marks of consequence and some rose-gold patina on the reverse. CAC: 15 in 65, 8 finer (2/16). NGC ID# 22RG, PCGS# 3937

3678 1920 MS66 PCGS. CAC. For an issue that often comes poorly struck, this Premium Gem 1920 Buffalo nickel displays above-average sharpness. Satiny luster shows faint die rust on each side but is warmed by soft champagne hues. PCGS has seen only 11 finer representatives (1/16). NGC ID# 22RP, PCGS# 3944

**1920 Buffalo Nickel, MS62
FS-401, Two Feathers**

3679 1920 Two Feathers, FS-401, MS62 PCGS. The inner-most feather on the Indian's portrait has been effaced by die lapping, resulting in the rarely seen Two Feathers FS-401 variety. Additional die erosion is seen throughout the fields on each side, and heavy clash marks are observed with a loupe. PCGS has attributed four examples of this variety, this piece being the only one in Mint State (1/16). Others may exist that have not been attributed. The strike is well-executed, and each side displays satiny golden luster. PCGS# 569435 Base PCGS# 3944

3680 1923-S MS64 PCGS. A typical strike shows some design weakness above the hair braid and on the bison's head and shoulder. Both sides are light gray with delicate gold overtones on lustrous surfaces. NGC ID# 22RW, PCGS# 3950

**1926-S Nickel, Well-Struck AU58
Low-Mintage Date**

3681 1926-S AU58 PCGS. CAC. The 1926-S is a better date, being the only issue in the Buffalo nickel series with a mintage of less than 1 million coins (970,000 pieces). Well-struck examples are elusive. This near-Mint representative displays satiny nickel-gray surfaces with a hint of champagne color. Luster remains in the fields, and the central devices show above-average definition. Trivial high-point friction is barely noticed. NGC ID# 22S7, PCGS# 3959

**1935 Nickel, MS67+
Registry-Grade CAC Coin**

3682 1935 MS67+ PCGS. CAC. This available issue becomes conditionally scarce at the Superb Gem level and is prohibitively rare finer than the present MS67+ example. This CAC-endorsed Registry coin showcases sharp detail amid satiny ice-blue and lavender-gold toning. The delicately preserved surfaces are free of distractions and exhibit no bothersome die erosion. PCGS and NGC have each seen only a single finer example (2/16). NGC ID# 22SN, PCGS# 3974

3683 1937 MS67+ PCGS. CAC. A sharply struck, essentially pristine Superb Gem with the PCGS Plus qualifier and CAC endorsement to confirm the high end surfaces and visual appeal. The upper hair detail is particularly sharp on this excellent type coin. The bison, too, is exceptionally bold. Population: 29 in 67+, 7 finer (1/16). NGC ID# 22SX, PCGS# 3980

3684 1937-D Three-Legged, FS-901 — Cleaning — PCGS Genuine. Unc. Details. Cream-gray and golden-brown toning alternates across this satiny and lightly abraded key date nickel. Designated as cleaned by PCGS, but only mildly glossy and without any obvious patches of hairlines. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

3685 1937-D Three-Legged, FS-901, MS61 NGC. A pleasing Mint State example of this extremely popular die-polishing error, with well-detailed design elements and satiny mint luster, under shades of golden-tan and lavender-gray toning. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

3686 1937-D Three-Legged, FS-901, MS62 PCGS. CAC. This satiny, golden-toned Three-Legged Buffalo is pleasantly attractive for the grade. Small flat points on each side that appear to be wear at first glance are actually strike-induced, as is typical of the issue. Extensive die erosion in the recesses is also consistent with the worn dies that struck this variety. The astute collector will give this piece close consideration for the grade. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

**1913 Type Two Buffalo Nickel, PR66
Sharp and Luminous**

3687 1913 Type Two PR66 PCGS. Rich matte luster adorns the pristine surfaces of this Premium Gem Type Two proof Buffalo, showing a blush of pale champagne toning over each side with woodgrain amber ribbons also stretching diagonally across the reverse. The strike is full, and the eye appeal is gratifying. Finer examples are elusive and out of reach for many collectors. NGC ID# 278S, PCGS# 3990

3688 1915 PR66+ NGC. Impeccably struck surfaces show a golden glow on both sides with pale blue accents on this high-end Premium Gem proof, among the finer survivors of the original mintage of 1,050 coins. The Plus grade and the excellent preservation separate this piece from many others at this grade level that lack both. Census: 4 in 66+, 39 finer (1/16). NGC ID# 278U, PCGS# 3992

**1916 Buffalo Nickel, PR66
Matte Proof Series Key**

- 3689 1916 PR66 PCGS.** The final issue in the matte proof Buffalo nickel series is also the scarcest. The 1916 had a small 600-coin mintage and is rarely seen above PR66, the grade of the present coin. This piece is toned in warm golden hues and displays full detail with matte luster. The preservation is immaculate. NGC ID# 278V, PCGS# 3993
-
- 3690 1937 PR65 PCGS.** A nicely struck and essentially pristine specimen that displays light to medium caramel-gold and powder-blue patina. The luster resembles the satin finish proofs of the prior year. Encased in a first generation holder. NGC ID# 278Z, PCGS# 3996
-
- 3691 1937 PR66 NGC.** Proof Buffalo nickels were struck for the last time in 1937, with a reported mintage of 5,769 pieces. This spectacular Premium Gem displays razor-sharp definition on all design elements, with deeply mirrored fields that show hints of pale golden toning. NGC ID# 278Z, PCGS# 3996
-

**1937 Nickel, PR67+
Lovely Multihued Surfaces**

- 3692 1937 PR67+ PCGS.** The Plus designation sets this piece apart from most of its peers, and finer examples are scarce. The strike is fully rendered, and the fields display deep reflectivity. Pastel toning blankets both sides in multicolor hues — in a mottled pattern on the reverse and concentric ribbons on the obverse. A lovely example of this final Buffalo nickel proof. From *The Jim Hilands Collection*. NGC ID# 278Z, PCGS# 3996
-

JEFFERSON NICKELS

- 3693 1939 Doubled Monticello, FS-801, MS66 PCGS.** All lower reverse lettering is boldly die doubled on this famous *Guide Book* variety. This Premium Gem example is well-struck with nearly complete delineation of the steps. A trace of light golden toning graces the well-preserved surfaces. NGC ID# 22T8, PCGS# 38481 Base PCGS# 4004
-

**1940 Jefferson Nickel, MS68 Full Steps
PCGS Finest Certified**

- 3694 1940 MS68 Full Steps PCGS.** This Superb Gem is apparently a newly certified example as it has not yet appeared in the *PCGS Population Report*. That online document shows 49 pieces graded MS67 Full Steps, and 11 others graded MS67+ Full Steps, but none at the present higher grade level.

An impressive example, this highly lustrous and frosty piece exhibits faint traces of champagne toning on its brilliant nickel-gray surfaces. The strike is bold as expected, with about two-thirds of the bottom step visible.

Although Jefferson nickels that show all six steps clearly and completely separated, such as those seen on modern-era proofs, are most desired, those coins with five clearly visible steps still qualify for the Full Steps designation. These are the next best struck pieces, and for many issues the best that exist.

This amazing example will make a wonderful addition to an advanced PCGS Set Registry Collection of Full Steps Jefferson nickels, and it is the only one available at this grade level for the connoisseur who seeks the finest quality. NGC ID# 22TD, PCGS# 84007

**1943/2-P Nickel, MS66 Full Steps
FS-101, World War II Overdate**

- 3695 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS.** Similar to the 1942/1 and 1942/1-D dimes, the 1943/2-P nickel was created when working hubs of different dates were used to form a working die. Those overdated varieties, plus the 1918/7-D nickel and 1918/7-S quarter, were likely due to war recruitment of experienced U.S. Mint workers. The present lustrous olive-gold Premium Gem is practically immaculate and exhibits pleasing step sharpness. Population: 42 in 66 (4 in 66+) Full Steps, 5 finer (1/16). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

**1943-D Nickel, MS68 Six Full Steps
Iridescent Pastel Patina**

- 3696 1943-D MS68 Six Full Steps NGC.** Peach-gold and jade-green dominate both sides, and are especially prominent across the borders. The full strike, dazzling luster, and virtually mark-free surfaces further ensure attention from competitive Registry collectors. Census: 3 in 68 Six Full Steps, 0 finer (2/16). NGC ID# 266T, PCGS# 74020

**1943-S Nickel, MS68 Five Full Steps
Lovely Toning**

- 3697 1943-S MS68 Five Full Steps NGC.** Remarkable pastel multicolor toning endows this high grade war nickel. Lime-green, orange-gold, and rose-red cover both sides. As of (2/16), NGC has certified 446 1943-S nickels, but within that quantity, only the present lot has attained the MS68 grade. A must for the determined Registry specialist. Census: 1 in 68 Full Steps, 0 finer (2/16). NGC ID# 22TT, PCGS# 84021

- 3698 1944-P MS67+ PCGS.** Frosty luster illuminates unusually bold design elements on this non-Full Steps Superb Gem. The interiors show soft ice-blue and champagne hues, while the peripheries have light rainbow coloration. A decidedly eye-appealing Registry-grade example. Population: 39 in 67 (2 in 67+), 0 finer (1/16). NGC ID# 22TU, PCGS# 4022

- 3699 1944-P MS67+ PCGS.** This high-end Superb Gem displays sharply detailed design elements and vibrant mint luster, under attractive shades of greenish-gold and lilac toning. Eye appeal is terrific. Population: 40 in 67 (2 in 67+), 0 finer (2/16). NGC ID# 22TU, PCGS# 4022

- 3700 1944-D MS67+ PCGS.** Only four pieces grade finer than this high-end Superb Gem at PCGS (2/16), a remarkable Registry-grade 1944-D nickel. The strike is bold, and the glowing surfaces display lovely multicolor toning in soft pastel hues. NGC ID# 22TV, PCGS# 84023

**1944-S Nickel, MS67 Full Steps
Vibrant Rainbow Toning**

- 3701 1944-S MS67 Full Steps PCGS.** A conditionally rare Registry-grade example of this wartime San Francisco issue, showing bold design elements and blazing luster. Vivid rainbow toning surrounds much of the reverse and appears along the left obverse border. The remainder of the obverse is ice-blue and champagne in color. Population: 37 in 67 (3 in 67+), 1 finer (1/16). NGC ID# 22TW, PCGS# 84024

- 3702 1945-D MS67+ Full Steps PCGS.** The 1945-D is scarce in Superb Gem Full Steps. This Plus-designated example displays frosty luster with iridescent pastel toning. The strike is full. Only a couple of tiny ticks are detected beneath a loupe. Population: 84 in 67 (9 in 67+) Full Steps, 2 finer (1/16). NGC ID# 22TY, PCGS# 84026

- 3703 1946-D MS67 PCGS.** Pastel gold, green, and lavender hues grace satiny luster on each side of this boldly struck, exceptionally well-preserved Superb Gem. PCGS has certified only 12 Full Steps pieces in MS67 (two in MS67+), with none finer (8/15), making this an important opportunity for the Registry Set collector. NGC ID# 22U3, PCGS# 84029

**1947 Nickel, MS67 Full Steps
In the Top-Five for the Issue**

- 3704 1947 MS67 Full Steps PCGS.** Tied with four others as the finest in Full Steps at PCGS (2/16), this Superb Gem 1947 Jefferson nickel is an essential Registry set acquisition. The strike is sharp, and the satiny surfaces display soft, iridescent toning. A few faint grazes do not hinder the grade. Genuinely rare this fine and never seen so in an NGC holder (2/16). NGC ID# 22U5, PCGS# 84031

- 3705 1951-D MS66+ PCGS.** This late die state has prominent die cracks on Monticello, along with radial flow lines near the border. This Premium Gem has a bold strike with frosty mint luster beneath light gold toning. Population: 56 in 66 (2 in 66+), 0 finer (2/16). NGC ID# 22UH, PCGS# 84044

3706 1954-S MS64 Full Steps PCGS. This attractive Choice example shows full steps on Monticello, but some of the central design elements have a touch of softness. The lightly marked surfaces radiate vibrant mint luster under pleasing shades of greenish-gold toning. Population: 17 in 64 Full Steps, 9 finer (1/16). NGC ID# 22UU, PCGS# 84054

3707 1961-D MS66 PCGS. Full Steps 1961-D nickels are prohibitively rare in any grade. This is a Registry-grade non-Full Steps coin and a great condition rarity in a PCGS holder at this level. Satiny luster shows few marks and displays blended nickel-gray and champagne toning. Population: 13 in 66, 1 finer (1/16). NGC ID# 22VB, PCGS# 4070

PROOF JEFFERSON NICKELS

3708 1939 Reverse of 1938 PR67+ PCGS. The more often seen Reverse of 1938 variant, showing ill-defined steps on Monticello even though the strike is fully executed. This high-end Superb Gem proof yields deeply reflective fields and vivid multicolor toning. PCGS has seen 10 finer examples (1/16). NGC ID# 279X, PCGS# 4176

1942 Type One Nickel, PR68 Iridescently Toned Registry Set Quality

3709 1942 Type One PR68 PCGS. CAC. Tied with 17 others as the finest pre-war-alloy 1942 proof at PCGS (1/16), an essential acquisition for Registry enthusiasts. This piece is one of seven for the grade with CAC approval. Gleaming fields and needle-sharp devices benefit from iridescent toning that graces the near-pristine surfaces. Eye appeal is superb. NGC ID# 27A3, PCGS# 4179

EARLY HALF DIMES

3710 1794 V-1, LM-1, R.6 — Bent, Improperly Cleaned — NCS. VF Details. Ex: Jules Reiver Collection. Early die state for this variety, with no trace of the obverse cracks which form later. The bend is not discernible in the holder, but must be slight as it is not readily apparent. As to the cleaning, there are some minor hairlines on the surfaces, but no distracting evidence is found of this event. The surfaces show a few old cuts and nicks, including a minor scrape down from the E of LIBERTY into the upper curls on Liberty's head. Toned an attractive medium gray throughout. A very scarce variety and the toughest of the four 1794 varieties to find in any grade. NGC ID# 22ZT, PCGS# 38581 Base PCGS# 4250

3711 1797 16 Stars, V-4, LM-2, R.4 — Damage — PCGS Genuine. The PCGS number ending in 98 indicates Damage as the reason, or one of the reasons, PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Very Fine example with surface damage.

This early half dime show some incomplete detail, due to wear, on the bottom portion of the drapery, but much interior detail remains in Liberty's hair strands. Evidence of damage and smoothing is noted on the obverse center, at the juncture of the jaw-line and the hair. Some dramatic clash marks are visible in the obverse fields. NGC ID# 22ZZ, PCGS# 38598 Base PCGS# 4259

3712 1800 V-1, LM-1, R.3 — Cleaning — PCGS Genuine. XF Details. A visually pleasing example despite the light cleaning, which is minimized by bluish-gray toning that covers both sides. Reddish-gold highlights remain at the obverse margins and more extensively so across the reverse. Die clashing above the date and a few microscopic areas of light porosity join some delicate, hair-thin lines hidden by the patina.

From The Jim Hilands Collection. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

BUST HALF DIMES

1829 Half Dime, V-7, LM-1, MS65 Light Champagne Toning

3713 1829 V-7, LM-1, R.2, MS65 NGC. This is an earlier die state as there is no trace of die clashing in the fields. Even though numerous examples of this variety are known in Mint State, this is surely one of the finest. The surfaces are light in color with even golden-gray patina over each side. Well, but not fully struck, there are a few tiny surface marks but a magnifier will be necessary to locate them. Census (all varieties included): 33 in 65, 26 finer (1/16).

Ex: Central States Signature (Heritage, 5/2004), lot 6460. NGC ID# 232B, PCGS# 38612 Base PCGS# 4276

3714 1830 V-6, LM-8, R.1, MS64 ANACS. Forest-green toning fills the borders of this sharply struck and coruscating near-Gem. The fields exhibit lavender patina. Unabraded except for a pair of brief marks above the 3 in the date. NGC ID# 232C, PCGS# 38646 Base PCGS# 4277

3715 1830 V-1, LM-14, R.3, MS64 NGC. A satiny, Choice example of the Bust type, with bold mint luster and faint golden-tan toning at the borders. The strike is sharp and the surfaces are remarkably unmarked for the MS64 designation. NGC ID# 232C, PCGS# 38653 Base PCGS# 4277

Premium Gem 1833 V-4, LM-3.3 Half Dime Intermediate Die State

3716 1833 V-4, LM-3.3, R.2, MS66 NGC. The reverse die crack from the E of UNITED to the eagle's head and the scroll below the N is visible and the upper loop of the first S in STATES is filled on this intermediate die state. This lovely Premium Gem is sharply defined with frosty silver surfaces beneath gold and iridescent toning. PCGS# 38690 Base PCGS# 4280

**1833 Capped Bust Half Dime, MS66
V-5, LM-7, Blue-Toned Beauty**

- 3717 1833 V-5, LM-7, R.2, MS66 PCGS.** A total of 10 die pairs were employed to strike substantial mintage of nearly 1.4 million pieces. The LM-7 is moderately available, although scarce, in Premium Gem. This blue-toned example is prooflike in the obverse fields with plum-mauve accents and silver high points. Crisply struck, the coin shows only a few tiny nicks and they are of little consequence. Population (all varieties): 23 in 66 (2 in 66+), 11 finer (1/16). PCGS# 38698 Base PCGS# 4280

- 3718 1833 V-2, LM-8, R.3, MS64 NGC.** A repunched F in OF helps attribute this well preserved and nicely struck near-Gem. Light aquamarine patina adorns the peripheries. A lustrous and undisturbed Capped Bust type coin, held back in grade only by a trace of granularity on the central obverse. PCGS# 38699 Base PCGS# 4280

- 3719 1833 V-6, LM-9, R.2, MS64 NGC.** Medium autumn-brown and cobalt-blue toning enriches the obverse of this well-struck and lustrous Choice half dime. The reverse is lightly patinated in cream and tan shades and shows pristine preservation; the obverse exhibits moderate contact.

Ex: *Long Beach Signature (Heritage, 9/2015)*, lot 3357. NGC ID# 232F, PCGS# 38700 Base PCGS# 4280

**1833 Half Dime, V-1, LM-10, MS65
Incredibly Sharp Strike**

- 3720 1833 V-1, LM-10, R.1, MS65 PCGS.** Tack-sharp detail characterizes each side of this Gem Capped Bust type coin, including the stars, obverse portrait, and reverse shield and eagle. The satiny surfaces display warm golden toning and are devoid of distracting abrasions. Eye appeal is outstanding. The 1833 had a mintage of more than 1.3 million coins and is available through MS65. Finer examples are scarce.

From *The Jim Hilands Collection*. NGC ID# 232F, PCGS# 38701 Base PCGS# 4280

- 3721 1835 Large Date, Large 5C, V-3, LM-3, R.1, MS64 PCGS.** Light olive-gold toning visits this lustrous Capped Bust type coin. Unabraded aside from a single line on Liberty's jaw. The borders are well-struck, while the centers display typically incomplete detail.

Ex: *ANA Signature (Heritage, 10/2012)*, lot 3832. NGC ID# 232H, PCGS# 38709 Base PCGS# 4282

- 3722 1835 Large Date, Small 5C, V-9, LM-6, R.2, MS65 NGC.** An available date known in 12 different die marriages. LM-6 is a Large Date, Small 5C variety, and this Gem example displays satiny luster beneath soft rose-gold toning. The strike is sharp throughout the obverse but slightly weak on the eagle's left (facing) wing. A threadlike strike-through extends from the T in LIBERTY toward the rim between stars 8 and 9. NGC ID# 232H, PCGS# 38714 Base PCGS# 4283

SEATED HALF DIMES

**1838 Half Dime, MS66+
Large Stars, No Drapery**

- 3723 1838 Large Stars, No Drapery, MS66+ PCGS. CAC.** This No Drapery type coin is beautifully preserved and possesses rich luster and toning. Each side shows interior hues of sea-green and lavender-blue with peripheral rose-gold framing. The strike is sharp. A small die chip is seen in the wreath below the ER in AMERICA. This issue is elusive this fine and rare finer, but in comparison to greater high-grade rarity of many other issues in this type, it is the ideal type-coin choice. Population: 29 in 66 (4 in 66+), 8 finer (2/16). NGC ID# 2TXX, PCGS# 4317

- 3724 1840-O No Drapery AU58 PCGS. CAC.** The surfaces are bright with partial luster on this near-Mint No Drapery Seated half dime. Mild strike weakness is seen on the central high points, particularly those of the reverse. The 1840-O is a slightly better date in the No Drapery, With Stars type. Population: 7 in 58, 15 finer (1/16). NGC ID# 232V, PCGS# 4322

- 3725 1841-O MS63 PCGS. Gold CAC.** This early New Orleans issue is rarely seen in Mint State at any level. The present piece is gold-labeled by CAC, denoting that service's opinion that it is upgraded. Close study of the champagne-toned, satiny surfaces confirms exceptional quality. Die erosion affects the reverse border dentils, but the central strike is sharp. Housed in a first generation holder. Population: 4 in 63, 7 finer (1/16). CAC has awarded a gold label to only one other 1841-O half dime, an MS67.

From *The Dr. John Young Collection*. NGC ID# 232Z, PCGS# 4329

- 3726 1853 No Arrows MS65 PCGS.** While its With Arrows counterpart is a common type-coin issue, the 1853 No Arrows Seated half dime is a rarity at the MS65 level. From a mintage of only 135,000 coins, this lavender-gray and aquamarine-toned Gem displays sharp motifs and satiny, unabraded surfaces. Aesthetically and technically excellent. Population: 7 in 65, 11 finer (1/16). NGC ID# 233M, PCGS# 4351

1854-O Arrows Half Dime
Conditionally Scarce Gem Uncirculated

3727 1854-O Arrows MS65 PCGS. CAC. This is a deeply impressed, fully struck New Orleans half dime — an unquestioned Gem, and perhaps deserving of special recognition for its blatant originality and deep, frosty luster. The obverse displays rich, iridescent colors while the reverse shows swaths of olive-gray and charcoal toning with subtle supporting coloration. Die clashing and a strange network of die scratches on Liberty's torso distinguish the die pair. Few Arrows half dimes are finer. Housed in an old green label holder with CAC endorsement. Population: 9 in 65, 3 finer (2/16).
From The Dr. John Young Collection. NGC ID# 2343, PCGS# 4359

3728 1858-O MS66 PCGS. This frosty Premium Gem exhibits an excellent strike for a New Orleans product with frosty mint luster and lovely gold and iridescent peripheries. Population: 8 in 66 (2 in 66+), 1 finer (2/16). NGC ID# 233V, PCGS# 4369

3729 1859-O MS65+ NGC. This frosty Gem exhibits brilliant silver luster and bold design definition beneath delicate peripheral gold and iridescent toning. Census: 12 in 65 (1 in 65+), 6 finer (2/16). NGC ID# 233X, PCGS# 4370

3730 1860 MS67 PCGS. First year of the Legend Obverse design, and this Superb Gem is an outstanding representative for an advanced type collection. Boldly defined, the obverse is fully brilliant, save for a thin crescent of steel and iridescent toning along the left border. The reverse is almost fully toned, with a crescent of silver brilliance. Population: 43 in 67 (3 in 67+), 4 finer (2/16). NGC ID# 2347, PCGS# 4377

3731 1862 MS67 PCGS. The 1862 Seated half dime is a plentiful issue, popular among type collectors. Nonetheless, this Superb Gem example is conditionally scarce, and anything finer is rare. Bold design elements are set against semiprooflike fields, and iridescent champagne toning warms beautifully preserved surfaces. Population: 66 in 67 (7 in 67+), 4 finer (1/16). NGC ID# 234B, PCGS# 4381

3732 1867-S MS64 PCGS. Well-struck from lightly eroded dies, showing faint flowlines around the borders. This Choice 1867-S half dime displays frosty, champagne-tinged luster without significant abrasions. This Reconstruction era half dime is scarce in any Mint State grade and rare above MS64. Population: 10 in 64, 6 finer (1/16). NGC ID# 234M, PCGS# 4391

PROOF SEATED HALF DIMES

3733 1858 PR64 NGC. Boldly struck with deeply mirrored fields and a hint of cameo contrast on the obverse. This near-brilliant Choice proof 1858 Seated half dime displays excellent eye appeal for the issue. The Mint began marketing proofs to the general public in 1858, although the mintage was unrecorded. Surviving examples are scarce and highly sought-after. Census: 23 in 64 (1 in 64+), 27 finer (1/16). NGC ID# 235N, PCGS# 4437

3734 1859 PR65 PCGS. This delightful, diminutive Gem half dime exhibits splendid gold and iridescent toning over fully mirrored fields with underlying contrast between the fields and devices. Population: 24 in 65 (1 in 65+), 17 finer (2/16). NGC ID# 235P, PCGS# 4438

3735 1860 PR65 PCGS. An exceptional Gem proof representative of the first-year issue with the legend on the obverse. This type continued through the end of the half dime denomination in 1873. Both sides are fully brilliant and deeply mirrored with slight field-to-device contrast. Population: 16 in 65, 17 finer (2/16). NGC ID# 235V, PCGS# 4443

3736 1862 PR65 Cameo PCGS. CAC. Hints of champagne toning reside on the obverse of this impressive Gem Cameo proof, with full brilliance on the reverse. A sharply struck and highly attractive example. Population: 7 in 65 (1 in 65+) Cameo, 11 finer. CAC: 3 in 65 Cameo, 9 finer (2/16). NGC ID# 235X, PCGS# 84445

3737 1864 PR66 PCGS. A challenging Civil War-era proof half dime, genuinely rare in this lofty Premium Gem grade. This piece is fully struck with mirrored fields and pleasant toning. The obverse is primarily olive-gold, but the reverse shows mottled lavender-gray hues. Population: 5 in 66, 3 finer (1/16). NGC ID# 235Z, PCGS# 4447

3738 1865 PR66 Cameo NGC. This intricately struck Premium Gem Cameo proof half dime shows clean surfaces with the reverse lightly die-doubled, most evident on the H in HALF. The obverse displays a prominent wire rim between 5 and 9 o'clock. The surfaces are largely untuned save for a trace of color on the reverse, and the devices are nicely frosted. A pinpoint spot appears on the center of the M in DIME. Only 500 proofs were struck; the associated commercial mintage of 13,000 pieces is also low. Census: 5 in 66 Cameo, 1 finer (1/16).
Ex: FUN Signature (Heritage, 1/2006), lot 1691. NGC ID# 2362, PCGS# 84448

3739 1867 PR66 PCGS. CAC. Exquisite lavender-red, orange-gold, and aquamarine toning consumes this fully struck and impressively mirrored Seated half dime. One of just 625 proofs issued, and the associated business production was only 8,000 pieces. NGC ID# 2364, PCGS# 4450

3740 1870 PR66 Cameo PCGS. CAC. The sharply detailed frosty design elements of this spectacular Premium Gem contrast boldly with the reflective fields and the impeccably preserved surfaces are enhanced by shades of greenish-gold and lilac toning. Population: 8 in 66 Cameo, 2 finer (2/16). NGC ID# 2367, PCGS# 84453

EARLY DIMES

1801 Dime, AU Sharpness
The Scarcer JR-2 Variety

3741 1801 JR-2, R.5 — Improperly Cleaned — NGC Details. AU. The cleaning is readily apparent on this scarce JR-2 example, with hairlines visible under magnification and a rather lusterless surface as a by-product of the handling. Several scrapes and abrasions are revealed, too, that would have been more subtle with a natural patina. Still, the coin is sharply detailed on both sides. Field star 4 — nearly missing on many coins — retains all six points. A collectible representative of this scarce date, with an estimated 200 to 250 pieces known.

3742 1802 JR-4, R.4, VG8 ANACS. Deep lavender-gray in patina with some green-gold color in selected peripheral areas. A well-worn example, but many wing feathers are distinct. The borders have a few minor scrapes, and the obverse has several minuscule pinprick abrasions. While JR-4 is the most available variety for the date, survivors in all grades are still very elusive.
Ex: Central States Signature (Heritage, 4/2002), lot 5440. NGC ID# 236K, PCGS# 38761 Base PCGS# 4472

3743 1805 5 Berries, JR-1, R.3, VG8 PCGS. The 1805 5 Berries variety is slightly scarcer than the 4 Berries JR-2. Both varieties are popular with collectors as they are individually recorded in the *Guide Book*. This gold, gray, and ebony toned example has a few faint hairlines and other trivial marks, but it is an attractive piece overall. PCGS# 38768 Base PCGS# 4478

**1807 JR-1 Dime, XF40
Pleasing Draped Bust Type Coin**

3744 1807 JR-1, R.2, XF40 PCGS. The 1807 is the final issue in the Draped Bust series and is readily available for type purposes. This XF coin displays pleasing interior detail but is weak around the borders, as typical of the issue. Tan-gray toning blankets each side over diagnostic clash marks. A small nick is noted near the reverse rim at 3 o'clock.
From The Jim Hilands Collection. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

**1814 JR-3 Dime, MS64
Large Date**

3745 1814 Large Date, JR-3, R.2, MS64 NGC. The upright of the 4 is below the center of the hair curl, and the reverse lacks a period after the C in the denomination. That combination of features is diagnostic for the JR-3 die marriage. This Choice Mint State piece exhibits a sharp strike with rich gold and sea-green toning over frosty luster. NGC ID# 236W, PCGS# 38775 Base PCGS# 4488

1825 JR-3 Dime, MS63+

3746 1825 JR-3, R.3, MS63+ NGC. The JR-3 is an intermediate rarity among the five 1825 dime varieties. Two of those varieties are rated R.2, this one is R.3, and two others are R.4 and R.5. This variety shares a reverse die with the scarcer JR-1, immediately recognized due to the recutting of the A in STATES. Dappled gold and powder-blue toning reside on champagne surfaces with satin luster. NGC ID# 2374, PCGS# 38809 Base PCGS# 4503

3747 1827 JR-13, R.3, MS62 PCGS. The 1827 dimes were struck from 14 die marriages, a suitable number of die pairs for the 1.3 million-piece mintage. JR-13 is moderately scarce among the varieties, especially in pleasing Mint State such as this coin. Semiprooflike surfaces surround sharply struck motifs, with iridescent toning emboldened by rose, blue, and gold overtones. Abrasions are limited to a few delicate lines.

From The Jim Hilands Collection. NGC ID# 2375, PCGS# 38823 Base PCGS# 4504

3748 1828 Large Date, JR-2, R.3, AU50 PCGS. The old-style Reich obverse was used to strike JR-2, likely after the 1829 JR-1 dimes were struck. Despite die deterioration and several radial die cracks on both sides, the coin is sharp except at the eagle's head. Only minor wear appears on the luminous rose-gold and violet surfaces. Highly appealing. Population (Large Date varieties): 2 in 50, 14 finer (1/16).

Ex: FUN Signature (Heritage, 1/2007), lot 2545. NGC ID# 2376, PCGS# 38825 Base PCGS# 4506

**1829 Dime, Peripherally Toned MS64
JR-3, Small 10C**

3749 1829 Small 10C, JR-3, R.4, MS64 PCGS. Partially reflective fields accentuate sharp design elements on this Choice Capped Bust type coin, showing relatively few abrasions for the grade. The central regions show light champagne toning, while the peripheries have deeper amber with traces of sea-green and violet. Population (all Small 10C varieties included): 41 in 64 (1 in 64+), 8 finer (1/16).

From The Jim Hilands Collection. NGC ID# 2378, PCGS# 38828 Base PCGS# 4511

3750 1833 Last 3 High, JR-5, R.1, MS63 PCGS. Last 3 High. The JR-5 is a favorite selection for type and date collectors because it is perhaps the most available variety for the year. The position of the final 3 of the date is remarkably high in relation to the other digits — and less deeply impressed into the die — as if an afterthought for an existing three-digit logotype. Lightly toned, this Select Uncirculated example is brightly lustrous with pink and ice-blue hues gracing the sharply struck surfaces.

From The Jim Hilands Collection. NGC ID# 237D, PCGS# 38870 Base PCGS# 4523

3751 1834 Large 4, JR-2, R.3, MS63 NGC. The reverse shows a whisper of golden toning, but the obverse displays medium lilac and navy-blue shades. The strike is bold, and luster dominates the reverse, the obverse border, and the portrait. A pleasing Capped Bust type coin.

Ex: Houston Signature (Heritage, 11/2012), lot 3433. NGC ID# 237E, PCGS# 38874 Base PCGS# 4526

3752 1836 JR-1, R.3, MS63 PCGS. The 0 in the denomination is low and leans left, confirming the JR-1 variety. A frosty, Select Uncirculated example with glimpses of autumn-gold toning over pearlescent, silver-gray surfaces. Fully struck throughout, with just a few light marks. Population (all varieties): 33 in 63, 34 finer (1/16). NGC ID# 4DEF, PCGS# 38888 Base PCGS# 4528

3753 1836 JR-2, R.2, MS62 PCGS. Narrow 10C, 0 high in the denomination. None of the three die varieties of 1836 dime are terribly uncommon, the JR-2 being more available than the JR-1 and JR-3, however. Rose-gray patina prevails through the centers of this wholesome example, its colors deepening at the peripheral devices and date. PCGS# 38889 Base PCGS# 4528

SEATED DIMES

1837 Seated Dime, MS64 Small Date, No Stars

3754 1837 No Stars, Small Date, F-103a, R.3, MS64 PCGS. An intermediate die state with a distinctive reverse crack from 9:30 to the E in DIME. Faint butter-gold patina graces this fully struck and coruscating near-Gem. Unabraded except for a brief thin line on the right obverse field. The sole Philadelphia date without stars. Population: 16 in 64, 12 finer (1/16). PCGS# 537640 Base PCGS# 4562

3755 1840 Drapery, F-101, R.3, AU53 NGC. Some 377,500 of the Philadelphia Mint dimes struck in 1840 were of the With Drapery design, although only a single die pair is known. Surviving examples of the issue are scarce. This AU coin displays excellent gunmetal-gray and olive-gold toning with well-detailed design elements. Census: 2 in 53, 11 finer (2/16). NGC ID# 2383, PCGS# 537747 Base PCGS# 4578

3756 1845 F-105a, R.4, MS65 NGC. All four date digits nearly touch the base and die cracks crisscross over the E in STATES. Shades of turquoise-blue and plum intermingle over both sides of this Gem, creating outstanding eye appeal. Despite a mintage of over 1.7 million pieces, Gem and finer Mint State coins are rare. Census: 11 in 65, 8 finer (2/16). PCGS# 537825 Base PCGS# 4586

3757 1853-O Arrows, F-105, R.4, AU58 PCGS. CAC. Die cracks through the base of the date and above TES OF combine to identify the scarce F-105 variety. Apple-green fields and devices are bounded by straw-gold and lavender margins. A small spot is noted on the left arrow. The 1853-O is easily secured in grades through VG, but near-Mint examples are surprisingly rare. NGC ID# 2399, PCGS# 538005 Base PCGS# 4604

3758 1864-S F-101, Low R.3, MS62 NGC. Despite a reported mintage of 230,000 pieces, Gerry Fortin has only identified a single die pair. Uncirculated survivors are rare. This satiny dove-gray dime is smooth aside from a minor scuff near Liberty's left (facing) shoulder. Ex: FUN Signature (Heritage, 1/2015), lot 9769, which realized \$1,527.50. PCGS# 538203 Base PCGS# 4640

3759 1872-CC F-101, Low R.4, VG10 PCGS. This key Carson City issue is scarce in all grades and is rarely seen without problems. The present coin shows moderate, even wear with light olive-gray toning. Scattered small marks appear on the obverse. LIBERTY is complete, although the flattened wreath on the reverse precludes a Fine classification. PCGS# 538286 Base PCGS# 4657

3760 1875 F-121, R.3, MS66+ PCGS. CAC. Lustrous, untoned, and nicely struck. The reverse field exhibits minor grazes. The "Chin Whiskers" Fortin variety with circular lathe lines (as made) near Liberty's legs. Although unlisted as such, the variety should be F-121a, since a clash mark is near the left (facing) elbow and the reverse margin exhibits several delicate cracks. PCGS# 538368 Base PCGS# 4672

3761 1876-S Type Two Reverse, F-102, R.5, MS65 PCGS. An impressive Gem, with well-detailed design elements and well-preserved, lustrous surfaces under shades of golden-brown and rose-gray toning. The first S in STATES and O in OF are broken at top, possibly due to lapping. Population: 14 in 65 (2 in 65+), 11 finer (2/16). PCGS# 538534 Base PCGS# 4681

3762 1882 F-111, R.3, MS67 NGC. Radiant luster lies beneath the blended champagne and aquamarine patina that blankets both sides of this Superb Gem 1882 Seated dime. Liberty's head and the upper-left portion of the wreath show trivial weakness, but the there are no other complaints. Census: 26 in 67, 2 finer (1/16). PCGS# 538658 Base PCGS# 4690

3763 1887 MS67 NGC. Fortin-Unlisted. Boldly clashed dies in similar fashion to Fortin-115, but with the date set further left. Another example of this unlisted variety is plated at the bottom of the F-115 page of the Fortin website, misattributed as F-115. As a date, the 1887 dime is readily available in grades through MS66, but it becomes genuinely rare at the Superb Gem level. This piece is beautifully preserved with traces of light golden color over vibrant, frosty luster. A sharp strike completes the immense visual appeal. Census: 7 in 67, 2 finer (1/16). NGC ID# 23B5, PCGS# 4698

PROOF SEATED DIMES

1858 Dime, PR65 Cameo Only 300+ Proofs Struck

3764 1858 PR65 Cameo PCGS. CAC. Pastel cherry-red, straw-gold, and navy-blue toning enriches this nicely struck and flashy Gem. Devoid of contact, but brief lint marks (as made) are noted near the cap and left ribbon loop. 1858 was the first year that proofs were available for purchase by the general public. The Guide Book suggests a mintage of 300+ pieces. Population: 2 in 65 Cameo, 1 finer (2/16). NGC ID# 23CC, PCGS# 84747

3765 1858 F-101, R.5, PR64 PCGS. CAC. A popular proof issue. This Choice 1858 proof dime displays bold design elements and mirrored fields with assorted aquamarine, gold, and lavender hues. There are no noticeable contact marks. Perhaps fewer than 70 examples of this issue survive — far fewer than the inflated certified populations would suggest. Population: 36 in 64 (1 in 64+), 14 finer (1/16). NGC ID# 23CC, PCGS# 538998 Base PCGS# 4747

1858 Dime, PR65 Deep Blue and Purple Tones

3766 1858 F-101, R.5, PR65 PCGS. Estimated mintages for the 1858 vary by source. Breen believed between 60 to 75 proofs were struck, CoinFacts pegs the mintage at around 100 pieces, and the Guide Book reports a production total of 300+ examples. Breen's estimate is almost certainly low, and the Guide Book's approximation seem high based on the number of certified examples at NGC and PCGS. A reasonable figure might be between 125 to 175 proofs, and this Premium Gem must be one of the most eye-appealing examples extant. Few imperfections are visible beneath the toning without magnification. Population: 9 in 65, 5 finer (1/16). NGC ID# 23CC, PCGS# 538998 Base PCGS# 4747

3767 1859 F-101, R.4, PR64 PCGS. A fully struck, deeply mirrored Choice proof with considerable cameo contrast on the obverse. Deep aquamarine and rose-gold hues encompass each side, masking any grade-limiting flaws. Struck during the early years of the Mint's publicly marketed proof coinage, the 1859 is a favorite issue in all grades. NGC ID# 23CD, PCGS# 538999 Base PCGS# 4748

3768 1861 Type Two, F-101, R.4, PR66 NGC. This spectacular Premium Gem displays sharply detailed design elements and deeply reflective fields, under shades of jade-gold, and cerulean-blue toning. Census: 10 in 66, 1 finer (2/16). NGC ID# 23CK, PCGS# 539008 Base PCGS# 4754

1874 Arrows Dime, PR65 Excellent Original Toning

3769 1874 Arrows, F-101, R.3, PR65 PCGS. This decisively struck Gem proof exhibits vivid peach, ocean-blue, and lime shades over each side. The well-preserved surfaces gleam beneath the toning. One of just 700 proofs struck and part of the two-year Arrows, Legend Obverse subtype, always popular with type collectors. Population: 20 in 65, 10 finer (2/16).
Ex: *Denver Signature* (Heritage, 8/2006), lot 915; *Long Beach Signature* (Heritage, 5/2007), lot 694. NGC ID# 23DJ, PCGS# 539034 Base PCGS# 4770

3770 1884 F-101, R.3, PR65 PCGS. White-on-black contrast is apparent, but the green label holder precedes the extension of the Cameo designation to Seated dimes. This lightly toned and flashy Gem is sharply struck and impressively free from marks. Only 875 proofs were struck.
Ex: *St. Louis Central States Signature* (Heritage, 5/2007), lot 349, which realized \$1,380. PCGS# 539055 Base PCGS# 4781

3771 1884 F-101, R.3, PR66 PCGS Secure. CAC. Splashes of copper, cobalt-blue, lavender, golden-brown, sea-green, and plum toning enrich the well-preserved surfaces of this Premium Gem proof. The coin is well-struck overall, save for portions of Liberty's hair. Population: 33 in 66, 15 finer. CAC: 6 in 66, 10 finer (1/16).
Ex: *Baltimore Signature* (Heritage, 3/2009), lot 886; *Long Beach Signature* (Heritage, 5/2013), lot 3238. PCGS# 539055 Base PCGS# 4781

BARBER DIMES

3772 1892 MS66+ PCGS. A high-end Premium Gem example of this first-year type-coin issue, showing luminous multicolor toning over each side with frosty luster and a sharp strike. A tiny graze below the M in DIME is the only abrasion detected. A moderately large die chip sits atop the 2 in the date along the course of a crack that traces the bust truncation. Population: 87 in 66 (6 in 66+), 16 finer (1/16). NGC ID# 23DK, PCGS# 4796

1892-O Dime, MS66 Conditionally Rare, Ex: Gardner

3773 1892-O MS66 PCGS. CAC. The 1892-O was produced to the extent of 3.8 million coins. Although many examples were undoubtedly saved as the first of their kind, this issue is rare in Premium Gem grade. Mottled silver-gray, champagne-russet, and greenish-blue toning cascades over frosty textured surfaces of this Premium Gem, and the design elements are sharply struck for a New Orleans date. The surfaces are well-preserved throughout. Population: 11 in 66 (3 in 66+), 1 finer (2/16).
Ex: *Long Beach Signature* (Heritage, 9/2002), lot 6275; *Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015), lot 98351 (as NGC MS66. CAC.). NGC ID# 23DL, PCGS# 4797

1896-O Dime, Lightly Toned MS64 Elusive in Mint State

3774 1896-O MS64 NGC. One of the semikeys in the series, the 1896-O Barber dime had a low mintage 610,000 coins and is scarce in Mint State. This Choice example displays satiny luster and champagne toning with bold design elements. There are no significant abrasions, and eye appeal is pleasing for the grade. NGC ID# 23DZ, PCGS# 4810

3775 1906 MS66+ PCGS. CAC. Dusky champagne toning warms each side of this high-end Premium Gem, while amber and olive overtones appear in the margins. The strike is sharp, and the preservation is outstanding. Despite a mintage nearing 20 million coins, the 1906 dime is a great rarity in MS66 and is exceedingly so finer. Population: 12 in 66 (2 in 66+), 5 finer (1/16). NGC ID# 23EX, PCGS# 4838

3776 1914 MS66+ PCGS. CAC. Delicate shades of greenish-gold and ice-blue toning visit the impeccably preserved, lustrous surfaces of this spectacular Plus-graded Premium Gem. The design elements are well-detailed and eye appeal is terrific. Population: 69 in 66 (1 in 66+), 6 finer (1/16). NGC ID# 23FT, PCGS# 4865

PROOF BARBER DIMES

3777 1892 PR66+ Cameo PCGS. A brilliant, boldly contrasted proof of notable beauty. The deeply mirrored fields are particularly pristine and free of even the most delicate lines. The date is markedly repunched left on the 892 of the date, most visible on the 9 and 2. This doubled date variety was thought to be very rare by Breen, but we have seen several. More importantly, the eye appeal and technical quality of this Cameo proof is seldom surpassed. Population: 15 in 66 Cameo (1 in 66+), 9 finer (1/16).
From *The Jim Hilands Collection*. NGC ID# 23G2, PCGS# 84875

3778 1911 PR65 Cameo PCGS. CAC. Highlights of cobalt-blue, lavender, and greenish-gold toning visit the well-preserved surfaces of this impressive Gem. The sharply detailed frosty design elements contrast boldly with the reflective fields. Population: 17 in 65 (1 in 65+) Cameo, 23 finer (2/16). NGC ID# 23GS, PCGS# 84895

3779 1915 PR65 PCGS. Orange-red and lime-green toning accompanies the obverse of this fully struck and flashy Gem. The reverse is brilliant save for a sea-green and golden-brown periphery. The unabraded fields display a lint mark (as made) near the chin. The 1915 has the second-lowest proof mintage of the series. Only 450 proofs were produced. NGC ID# 7U3S, PCGS# 4899

MERCURY DIMES

3780 1918-D MS63 Full Bands PCGS. The 1918-D Mercury dime is elusive in Full Bands, and most such coins are clustered in the MS63 to MS64 grade range. This Select example displays sharp detail and satiny luster with a light golden tint. There are no bothersome abrasions. NGC ID# 23H6, PCGS# 4919

3781 1918-D MS63 Full Bands PCGS. Lavender and champagne hues warm the glistening surfaces of this Select Full Bands 1918-D Mercury dime. The peripheries fade with die wear, but the interior motifs are sharply rendered. Trivial lines on Liberty's cheek limit the grade in the absence of singular abrasions. NGC ID# 23H6, PCGS# 4919

3782 1919 MS66 Full Bands PCGS. The surfaces show a slight cast of golden patina with minor accents of pastel champagne-gold amid pristine preservation and a nice, sharp strike. This issue seldom appears in finer grades. Population: 85 in 66 (4 in 66+) Full Bands, 16 finer (1/16). NGC ID# 23H8, PCGS# 4923

3783 1919-D MS63 Full Bands PCGS. The Denver issues of 1919 are known for their often weak strikes. This Select Full Bands dime displays staggeringly sharp detail throughout the devices and peripheral legends, even with significant die cracking on the obverse. Satiny surfaces glisten with champagne and lavender toning and are devoid of singularly distracting abrasions. NGC ID# 23H9, PCGS# 4925

1919-D Dime, MS64 Full Bands Seldom Seen CAC-Approved Coin

3784 1919-D MS64 Full Bands PCGS. CAC. Like other Denver denominations of this year, the 1919-D Mercury dime is challenging to locate well-struck. This Choice example is obtainable by many collectors, but finer coins are rare and costly. The strike is impressively bold on the interiors, even if a trifle weak around portions of the outer peripheral legends. Satiny golden luster blankets each side. PCGS lists 20 finer coins; CAC population: 8 in 64 Full Bands, 3 finer (2/16). NGC ID# 23H9, PCGS# 4925

3785 1919-S MS63 Full Bands PCGS. This satiny Select Mint State Mercury dime has a bold strike with full reverse band detail. Both sides are brilliant with a hint of champagne toning. NGC ID# 5LLN, PCGS# 4927

3786 1920-D MS66 PCGS. CAC. A surprisingly scarce issue in high grades, despite the substantial mintage in excess of 19 million coins. This is a brilliant, intensely lustrous, unabraded example with sharp definition on the obverse and some typical softness noted on the reverse. Among the finest at PCGS. Population: 10 in 66, 0 finer (1/16). NGC ID# 23HC, PCGS# 4930

1921 Mercury Dime, MS64+ Full Bands Attractive, Lightly Toned Example

3787 1921 MS64+ Full Bands PCGS. CAC. Ample frosty luster appears on both sides of this nicely preserved Full Bands near-Gem 1921 dime, an attractive example of one of the popular key dates in the Mercury series. The central, diagonal, and all other bands are full, and good strike definition extends to the features of Liberty and the date as well. A lightly toned and extremely attractive example. CAC: 10 in 64 Full Bands, 29 finer (1/16). NGC ID# 23HE, PCGS# 4935

3788 1925-S MS64 Full Bands PCGS. The design elements of this impressive Choice specimen are well-detailed, with Full Bands definition on the fascies. The lightly marked lustrous surfaces are visited by shades of golden-brown, lavender, blue, and amber toning. NGC ID# 5LX3, PCGS# 4953

1927-D Dime, MS66+ Icy-Blue Color, None Finer at PCGS

3789 1927-D MS66+ PCGS. CAC. Both sides of this branch-mint 1920s dime display shimmering mint luster with faint hints of bluish coloration over shining silver surfaces. The strike is slightly incomplete on the reverse bands, yet the overall level of detail is pleasing, and the 1927-D issue is seldom seen this fine — not to mention with such exceptional eye appeal. PCGS has awarded just two Plus grades at this level — one to a Full Bands coin, and one to the present coin. No examples are certified finer with or without Full Bands. Population: 13 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 23HV, PCGS# 4962

3790 1927-D MS64 Full Bands PCGS. CAC. Both sides of this Choice Mint State Mercury dime exhibit soft, frosty mint luster with fully brilliant silver surfaces. A trivial splash of gold appears at the right obverse border. Population: 48 in 64 Full Bands, 44 finer. CAC: 5 in 64 Full Bands, 7 finer (2/16). NGC ID# 23HV, PCGS# 4963

3791 1928 MS67 Full Bands PCGS. CAC. This stunning Superb Gem Mercury dime exhibits a bold strike and brilliant satin luster beneath vibrant gold and iridescent toning. Population: 39 in 67 (3 in 67+) Full Bands, 1 finer. CAC: 12 in 67 Full Bands, 0 finer (2/16). NGC ID# 23HX, PCGS# 4967

3792 1928-D MS64 Full Bands PCGS. The availability of the 1928-D in Full Bands declines significantly beyond MS64. This Choice example displays a sharp strike and satiny, untuned luster with no mentionable abrasions. Highly appealing for the grade. NGC ID# 23HY, PCGS# 4969

3793 1928-D MS65 Full Bands PCGS. CAC. This satin Gem has full split bands on the reverse, with satin silver luster beneath dappled gold toning. PCGS has only certified 26 finer. CAC: 6 in 65 Full Bands, 5 finer). NGC ID# 23HY, PCGS# 4969

3794 1929-D MS67 Full Bands PCGS. CAC. Blushes of russet and tan-brown toning visit the obverse margin, but Liberty and the reverse remain brilliant. A lustrous, boldly struck and immaculate Superb Gem. Outstanding quality for this lower mintage branch issue. Population: 46 in 67 (2 in 67+) Full Bands, 2 finer (2/16). NGC ID# 5LXC, PCGS# 4975

3795 1939-S MS67+ PCGS. Vivid multicolor toning on each side of this high-end Superb Gem consists of forest-green, violet, gold, and pale olive. The strike is a trifle incomplete on the centers but bold elsewhere. The preservation is as exceptional as the coloration. Population: 52 in 67 (3 in 67+), 3 finer (1/16). NGC ID# 23JT, PCGS# 5020

3796 1939-S MS66 Full Bands PCGS. CAC. A spectacular Premium Gem Mercury dime, with sharply detailed design elements, including full split bands on the fascies. The impeccably preserved brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. NGC ID# 23JT, PCGS# 5021

1939-S Dime, MS67 Full Bands Prohibitively Rare Any Finer

3797 1939-S MS67 Full Bands PCGS. A conditionally scarce Full Bands example of the 1939-S Mercury dime, graded at the seldom-achieved Superb Gem level. The central devices are bold, and there is a hint of iridescence in the reverse fields. The obverse is brilliant save for a couple of small amber accents. Pleasing on the eyes and well-preserved. Population: 46 in 67 (3 in 67+) Full Bands, 1 finer (2/16). NGC ID# 23JT, PCGS# 5021

3798 1940 MS68 Full Bands PCGS. This glistening Superb Gem is among the finest 1940 dimes known in Full Bands. The strike is exact, and the surfaces yield raw, frosty luster. Aquamarine, violet, and golden peripheral hues appear around the obverse border and to a lesser extent the reverse. Population: 29 in 68 (2 in 68+) Full Bands, 0 finer (1/16). NGC ID# 23JU, PCGS# 5023

3799 1941-D MS68 Full Bands PCGS. Sea-green and peach-gold toning visits the margins of this lustrous and pristine Mercury type coin. Unimprovable at either service, and ideal for the Registry enthusiast. Population: 29 in 68 Full Bands, 0 finer (2/16). NGC ID# 23JY, PCGS# 5031

3800 1942/1-D AU58 Full Bands PCGS. FS-101. This overdate has a doubled 4 in addition to the 2 over 1, diagnostic for both the Philadelphia and Denver Mint varieties. Wisps of champagne toning appear over brilliant silver surfaces on this near-Mint example. NGC ID# 23K6, PCGS# 5041

3801 1944-S MS67+ Full Bands PCGS. Large S. Beautiful golden-brown and forest-green toning endows the peripheries. The lustrous centers remain brilliant. A well struck World War II type coin. Pristine aside from delicate contact on Liberty's neck and unobtrusive grazes on the right reverse field. NGC ID# 5A96, PCGS# 5055

3802 1945-S Micro S, FS-512, MS66 Full Bands PCGS. This popular *Guide Book* variety shows an abnormally small mintmark and is infrequently available in this lofty Premium Gem grade. The present example shows slight weakness along portions of the outer peripheral legends, but is well-defined internally. Frosty luster delivers a blazing cartwheel effect and is uninhibited by toning. NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

3803 1945-S Micro S, FS-512, MS66 Full Bands PCGS. CAC. A seldom seen CAC-endorsed Premium Gem example of this popular *Guide Book* variety, showing bold design definition and warm champagne and rose-gold toning. The dies are mildly eroded, with enough flowlines in the fields to deliver a dazzling cartwheel effect. NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

PROOF MERCURY DIMES

3804 1936 PR66 PCGS. CAC. A golden-toned Premium Gem example of the debut Mercury dime proof, showing full detail on the devices and excellent mirroring in the fields. Although this issue is moderately plentiful in the absolute sense, seldom is a CAC-endorsed piece seen at this grade level. NGC ID# 27DG, PCGS# 5071

3805 1942 PR68 PCGS. CAC. A fully struck proof with gleaming fields and nearly flawless preservation. Light golden-green toning graces each side, becoming more vivid around the rims. An elusive example with CAC approval at this lofty level. Population: 74 in 68 (2 in 68+), 1 finer (2/16). NGC ID# 27DN, PCGS# 5077

ROOSEVELT DIMES

3806 1950-S MS67+ Full Bands PCGS. This high-end Superb Gem exhibits well-detailed design elements, with Full Bands definition on the torch, and impeccably preserved, lustrous surfaces with traces of sea-green, magenta, and amber toning. Population: 42 in 67 (10 in 67+) Full Bands, 4 finer (2/16). NGC ID# 23KZ, PCGS# 85096

1961-D Dime, MS67+ Full Bands

3807 1961-D MS67+ Full Bands PCGS. The obverse of this frosty Superb Gem exhibits delicate peripheral gold toning that is concentrated along the upper border. The reverse is brilliant and untuned. The full torch bands on the reverse point to a sharp strike. Population: 20 in 67 (4 in 67+) Full Bands, 1 finer (2/16). NGC ID# 23LV, PCGS# 85123

TWENTY CENT PIECES

3808 1875 MS64 PCGS. The right edge of the 1 in the date points to the right of the shield point, the sole pick-up point to identify the BF-1 variety. Curved die lines near Liberty's head suggest the die was recently repolished to strike proofs as well as business strikes. The semiprooflike surfaces reveal only tiny, incidental marks and a razor-sharp strike throughout. A hint of gold toning occupies the margins. Population: 66 in 64 (3 in 64+), 29 finer (1/16). *From The Jim Hilands Collection.* NGC ID# 23R5, PCGS# 5296

3809 1875-S MS64 PCGS. A silvery and cream-gray near-Gem example of this available date for type-collection purposes, showing light dabs of pale toning and a couple of small charcoal-toned areas. The 1875-S twenty cent, at 1.15 million pieces struck, was the only series issue that can really be considered high-mintage. NGC ID# 23R7, PCGS# 5298

3810 1875-S MS64 PCGS. BF-5, R.2. Early die state. Both sides of this attractive Choice Mint State piece have frosty silver luster with hints of champagne toning. The strike shows weakness at the usual locations, especially at the top of the left (facing) wing. *Ex: New York Signature (Heritage, 3/2012), lot 3303.* NGC ID# 23R7, PCGS# 5298

- 3811 1875-S MS65 NGC. BF-2, R.4.** A frosty Gem with bold mint luster and strong eye appeal. The silver-white surfaces display a few almond-gold toning accents. The strike is sharp but weak at TWENTY CENTS, a characteristic of the BF-2 reverse die as it approached the end of its third use. Scarce any finer. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR64 Attractive Field-Device Contrast

- 3812 1875 PR64 PCGS. BF-1, R.1.** A pleasing first-year proof twenty cent, suitable for type purposes. This Choice 1875 displays reflective fields with lavender and aquamarine accents. The color is otherwise champagne-gray. The strike is sharp, and eye appeal is surprisingly high for the PR64 level. Housed in a green label holder and moderately contrasted, particularly on the reverse. Population: 63 in 64, 33 finer (2/16). NGC ID# 27GZ, PCGS# 5303

1878 Twenty Cent, PR62 Sharp, Collectible Example

- 3813 1878 PR62 PCGS. BF-1, R.3.** A pleasing lower-end example of this final proof-only issue in the twenty cent series. The strike is sharp throughout, although cameo contrast is minimal — scattered hairlines define the grade and slightly dull the mirroring of the fields. Tinges of amber-gold toning around the peripheries accentuate the eye appeal. NGC ID# 27H5, PCGS# 5306

EARLY QUARTER

- 3814 1807 B-2, R.3, VF20 ANACS.** Tompkins Die State 3-4/3. Splashes of electric-blue, plum-red, and tan-gold overlie the predominantly stone-gray surfaces. A loupe reveals minor reverse marks near the 25 and right shield corner. NGC ID# 23RF, PCGS# 38941 Base PCGS# 5316

BUST QUARTERS

- 3815 1818 B-5, High R.4 — Cleaning — PCGS Genuine. Unc Details.** The Browning-5 die pair is among the most challenging of the 1818 quarter varieties, ranking with the B-7 and B-9 as the issue's scarcest. This B-5 example was cleaned at one time and it is now largely untuned with bright, silver surfaces. There are no distracting hairlines or abrasions, though, and the strike is essentially full with some remaining luster. A slight planchet streak runs from star 6 to the neck.
From The Jim Hilands Collection. NGC ID# 379H, PCGS# 38946 Base PCGS# 5322

1819 Browning-1 Capped Bust Quarter, AU53 Late Die State, Scarce Large 9 Variety

- 3816 1819 Large 9, B-1, Low R.5, AU53 NGC.** Tompkins Die State 3/2. Large 9; Flat Base 2, Normal 5 denomination. Both the Tompkins reference and the Rea-Koenings-Haroutunian Census suggest the B-1 is rare in AU or finer conditions, with this example solidly within the top 10 known examples for the variety. Album-toning with amber-gold and brownish patina at the margins surround pale gunmetal-blue accents toward the silver-gray centers. Light abrasions and slight wear account for the assigned grade. PCGS# 38956 Base PCGS# 5326
- 3817 1819 Small 9, B-3, R.1, XF45 NGC.** Tompkins Die State 4/3. Golden-brown and jade-green toning clings to the stars and lettering, but most of this well-defined example is pearl-gray. There are no significant abrasions. A pleasing type coin.
Ex: Long Beach Signature (Heritage, 6/2006), lot 1301, which realized \$1,236.25. NGC ID# 23RK, PCGS# 402646 Base PCGS# 5325
- 3818 1831 Small Letters, B-3, R.5, AU50 PCGS.** Splashes of orange-gold and pearl-gray dominate, but the margins occasionally offer cobalt-blue toning. This is a lightly circulated example of this nondescript but rare Browning die marriage. Marks are inconsequential though we note a slender grease streak near star 13. NGC ID# 23RW, PCGS# 38982 Base PCGS# 5348
- 3819 1834 O Over F in OF, B-1, FS-901, R.1, MS62 NGC.** Tompkins Die State 1/4, but we note that Tompkins overlooked the die crack from 1 o'clock to Liberty's cap. Medium to deep steel-blue and autumn-brown toning embraces inoffensively marked surfaces. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353
- 3820 1834 B-2, R.4, MS61 NGC.** The northwest point of star 7 is slightly recut on this scarce variety. A small projection at the base of the C in the denomination confirms the attribution. This Mint State piece has light silver-gray surfaces with delicate peripheral gold toning. NGC ID# 23RZ, PCGS# 38993 Base PCGS# 5353
- 3821 1835 B-1, R.1, AU58 PCGS.** The 1835 boasts the highest mintage of the small diameter Capped Bust type (nearly 2 million coins), and is highly popular for type representation. This near-Mint example displays satiny luster in the fields beneath deep olive-gold and gunmetal-gray toning. The strike is bold, and little high-point friction appears on the devices. NGC ID# 23S2, PCGS# 38997 Base PCGS# 5354

1838 Quarter, B-1, MS63
Lustrous Final-Year Type Coin

- 3822 1838 B-1, R.1, MS63 NGC.** Only a single die marriage is known. This is a lustrous straw-gold example of the final-year Bust quarter date — well struck except for star 6, and the few faint hair-thin obverse marks are unimportant to the grade. It was the quarter's turn to move from Capped Bust to Seated motifs in 1838. The half dime and dime transitioned in 1837, and the half dollar would follow in 1839. Census: 26 in 63, 23 finer (2/16).
Ex: ANA Signature (Heritage, 8/2010), lot 4657; New York Signature (Heritage, 3/2012), lot 3316. NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

SEATED QUARTERS

- 3823 1845 MS64 PCGS.** Light silver brilliance appears at the centers of this Choice Mint State Seated quarter, with blue, sea-green, and gold toning closer to the borders. Both sides have an excellent strike with satin luster. This early No Motto Seated type is challenging in the finer Mint State grades, regardless of issue. Population: 16 in 64, 4 finer (2/16). NGC ID# 23SV, PCGS# 5408

1850 Seated Quarter, MS64
Choice, Surprisingly Elusive Issue

- 3824 1850 MS64 NGC. Briggs 1-A.** A large silver melt in 1853 may have something to do with the scarcity of this Philadelphia issue despite a reasonable mintage of 190,800 pieces. Silver coinage in general from half dimes to dollars were melted for their silver content in the early 1850s. This softly frosted, boldly struck near-Gem survivor is untuned with a pleasing, silver-white sheen. As seen on most 1850 quarters, the base of a 1 is misplaced on the obverse rim at 6:30. Census: 7 in 64, 3 finer (1/16). NGC ID# 23T4, PCGS# 5415
- 3825 1853 No Arrows VG8 ANACS. Briggs 1-A, FS-301.** Traces of a previous 3 appear inside the top loop of the 3 on this famous repunched date variety that is sometimes misdescribed as an overdate. Ivory surfaces have brilliant light blue toning at the centers. Three letters of LIBERTY are clearly visible as expected for the grade. NGC ID# 23TA, PCGS# 5421

1853 Arrows and Rays Quarter, MS64
Satiny Mint Luster

- 3826 1853 Arrows and Rays MS64 PCGS. CAC.** An unidentified die pair from literally dozens upon dozens of possibilities, with at least 119 obverse dies and 120 reverse dies prepared for usage when more than 15 million quarters with the Arrows and Rays motifs were struck in 1853. This sharp near-Gem is well-struck and extremely lustrous. The obverse stars show detail at their centers from one extent to another, with the right-hand stars not quite as sharp as those on the left. Liberty is well-struck at the head and throughout the portrait. The eagle shows full plumage. Intermittent smoke-gray toning adds original appeal to the mostly brilliant, silver-white surfaces. CAC-endorsed. PCGS reports just 29 numerically finer pieces (1/16). NGC ID# 23U4, PCGS# 5426

- 3827 1854-O Huge O, Briggs 1-A, FS-501, Fine 12 PCGS.** The hand-cut Huge O mintmark on the reverse of this scarce and popular variety is unmistakable, filling much of the space above the R. in the denomination. This light silver-gray example has pleasing surfaces for the grade, exhibiting traces of delicate gold toning. NGC ID# 23U7, PCGS# 5434

1858-S Quarter, Choice XF
Excellent Color and Detail
Scarce This Fine

- 3828 1858-S XF45 PCGS. Briggs 2-B.** The 1858-S is a better date, boasting a little mintage of 121,000 coins. Only two Mint State submissions — an MS62 at each service — are reported, and these may represent only a single coin. This Choice XF alternative is boldly detailed with original toning. Both sides display copper-brown and amber toning over light champagne-gray surfaces. There are no distracting imperfections. Population: 10 in 45, 8 finer (2/16). NGC ID# 23TK, PCGS# 5447
- 3829 1859 MS64 PCGS. CAC.** This impressive Choice example exhibits well-detailed design elements, with a touch of the usual softness on the stars and arrow fletching, and lustrous, lightly marked surfaces under shades of golden-brown and lavender-gray toning. Population: 41 in 64 (1 in 64+), 13 finer (2/16). NGC ID# 23TL, PCGS# 5448
- 3830 1862 MS64 NGC.** The 1862 is among the more plentiful Civil War-era Seated quarters, although pieces grading finer than MS64 are scarce. This Choice example displays bold design elements set against semiprooflike fields. Soft rose, gold, and aquamarine toning graces each side, and a few marks on Liberty's left (facing) arm are the only abrasions of note. Housed in a prior generation holder. Census: 42 in 64 (2 in 64+), 22 finer (1/16). NGC ID# 23TV, PCGS# 5456

- 3831 1865-S AU53 NGC. Briggs 1-A.** Although San Francisco delivered 675,000 half dollars in 1865, the mintage of quarters at the facility was a much smaller 41,000 pieces. Survivors are scarce, and typically encountered in VF or lower grades. The present lightly circulated silver-gray example is minimally marked save for slight reverse rim nicks near 1 and 2 o'clock. NGC ID# 23U3, PCGS# 5462
- 3832 1868 MS63 PCGS. CAC. Briggs 1-A.** The 1868 Seated quarter is a better date with a low 29,400-coin mintage. Uncirculated examples are rare. This Select piece displays champagne-tinted luster and bold detail. The frosty devices show modest contrast with prooflike fields. A few light marks do not hinder the CAC endorsement. Housed in a first generation holder. Population: 6 in 63, 14 finer (1/16). *From The Dr. John Young Collection.* NGC ID# 23UF, PCGS# 5472
- 3833 1873 Arrows MS64 NGC. Briggs 3-B.** Struck from lightly clashed dies, this Open 3 Arrows quarter is exceptionally free of marks or imperfections. The frosty, brilliant surfaces radiate mint luster that showcases a virtually full strike. Doubling on the denomination and reverse legend is "Longacre" doubling from the diemaking process. A high-end near-Gem coin. Census: 34 in 64, 16 finer (1/16). NGC ID# BZMG, PCGS# 5491
- 3834 1874-S Arrows MS64 PCGS.** The well-detailed design elements of this attractive Choice specimen show a touch of softness on the stars on the right. The lightly marked lustrous surfaces display pleasing shades of greenish-gold and lavender-gray toning. Population: 63 in 64, 90 finer (2/16). NGC ID# 23VY, PCGS# 5495

1876 Quarter, MS66
Attractive Two-Sided Toning

- 3835 1876 MS66 PCGS. CAC. Type Two Reverse.** The curved top of an errant digit is visible in the dentils below the 7 in the date. The centers are only lightly toned, but rich ocean-blue and rose-gold hues encompass the peripheries. This Seated type coin is highly lustrous and nearly free from marks. Although close to 18 million pieces were struck, remarkably few coins exceed this Premium Gem in eye appeal or surface quality. CAC endorsed. Population: 26 in 66 (4 in 66+), 8 finer (1/16). NGC ID# 23V2, PCGS# 5501
- 3836 1877-S MS65 PCGS. CAC. Briggs reverse F** (with a die scratch through the N in IN) is paired with a Briggs-unlisted obverse. Dove-gray and golden-brown toning blankets satiny and sharply struck surfaces. The right obverse field exhibits wispy grazes. Population: 35 in 65, 26 finer (2/16). NGC ID# 23V7, PCGS# 5506
- 3837 1878-CC MS64 NGC. Briggs-Unlisted.** Vibrant, frosty luster cartwheels beneath warm sun-gold toning on this Choice 1878-CC Seated quarter, illuminating well-struck design elements and minimally abraded surfaces. The 1878-CC is conditionally scarce this fine and infrequently seen finer. Census: 51 in 64, 31 finer (1/16). NGC ID# 23V9, PCGS# 5509
- 3838 1881 MS65 PCGS. Briggs 1-A.** Rose-gold and ocean-blue toning enriches the peripheries. The centers and the prooflike fields are nearly brilliant. Well preserved, and the strike is crisp save for the uppermost stars. A mere 12,000 pieces were struck, since the Mint was occupied with Morgan dollar production. Population: 16 in 65, 24 finer (1/16). NGC ID# 23VD, PCGS# 5513

- 3839 1890 MS66 PCGS. CAC. Briggs 2-B.** A beautifully preserved, frosty 1890 Seated quarter dollar with well-struck motifs and original toning. Interiors of sun-gold and lavender cede to sky-blue peripheries. A few tiny grazes on the high points of Liberty's leg are all that limit the grade. Conditionally scarce this fine. CAC-approved in an old green label holder. Population: 23 in 66 (1 in 66+), 24 finer (1/16). CAC lists six endorsements in MS66 and six finer. *From The Dr. John Young Collection.* NGC ID# 23VP, PCGS# 5523

PROOF SEATED QUARTERS

- 3840 1874 Arrows PR64 PCGS. Briggs 5-D.** Vivid concentric toning bathes this deeply mirrored Choice proof in rings of mint-gold, turquoise, ocean-blue, violet, and sun-orange. Considerable cameo contrast is seen on the obverse, less so on the reverse. The design elements are boldly struck. NGC ID# 23XS, PCGS# 5575
- 3841 1874 Arrows PR64 PCGS.** This Choice proof exhibits gorgeous gold and iridescent toning with noticeable field-to-device contrast, although without a deserved Cameo designation. Careful examination reveals faint hairlines that prevent a higher grade. NGC ID# 23XS, PCGS# 5575
- 3842 1875 PR65 PCGS. CAC.** The 1875 proof quarter is seldom seen at the Gem grade level. This piece is fully struck and displays deep mirroring beneath old-time mint-green and lavender-gray toning on both sides. The obverse shows considerable cameo contrast emerging from beneath the patina, the reverse less so. Population: 10 in 65, 4 finer (1/16). NGC ID# 23X7, PCGS# 5576

1880 Quarter, PR67 Cameo
Colorful CAC-Endorsed Surfaces

- 3843 1880 PR67 Cameo PCGS. CAC. Briggs 2-B. Ex: Benson.** Seldom seen at the Superb Gem level and rarely so with cameo contrast. This CAC-endorsed 1880 Cameo quarter boasts vivid ocean-blue, amber, and sun-gold border toning around near-brilliant interiors — the obverse toning is more extensive than the reverse. Boldly struck and starkly contrasted. Population: 12 in 67 Cameo, 1 finer (1/16). NGC ID# 23XC, PCGS# 85581
- 3844 1882 PR66+ NGC.** A stunning Premium Gem proof, this example has lovely turquoise and violet toning on the obverse, with gold toning at the center of the reverse gradually changing to brilliant blue. Exceptional eye appeal is the result. Census: 43 in 66 (4 in 66+, 3 in 66 ★), 20 finer (2/16). NGC ID# 23XE, PCGS# 5583
- 3845 1884 PR66 NGC. Briggs 2-B.** A delightful Premium Gem proof, from a mintage of 875 pieces, this coin exhibits sharply detailed design elements and well-preserved surfaces with deeply reflective fields. Hints of pale gold and lavender toning add to the outstanding eye appeal. Census: 41 in 66, 18 finer (2/16). NGC ID# 3TWH, PCGS# 5585
- 3846 1885 PR65 PCGS. Briggs 3-B.** Rich cobalt-blue, apple-green, and golden-brown toning embraces this fully struck and undisturbed Gem. Both sides exhibit a partial wire rim. One of only 930 proofs produced. NGC ID# 23XH, PCGS# 5586

BARBER QUARTERS

3847 1894-O MS65+ PCGS Secure. CAC. An undeniable Gem, this high-end 1894-O Barber quarter displays luminous surfaces with original sea-green, lavender, and champagne toning. The eagle's right (facing) talons and clutched fletchings are incomplete, but the other trouble areas are pleasantly well-defined. A conditionally rare coin with sublime eye appeal. Population: 11 in 65 (1 in 65+), 10 finer (1/16). NGC ID# 23Y2, PCGS# 5608

3848 1895-O MS65 NGC. This impressive Gem exhibits sharply detailed design elements and satiny mint luster, with well-preserved surfaces that show hints of lavender toning. Census: 10 in 65, 5 finer (1/16). NGC ID# 23Y5, PCGS# 5611

1896 Quarter, Lightly Toned MS66+

3849 1896 MS66+ PCGS. A nice sharp strike on this Premium Gem 1896 quarter provides good detailing in all of the star radials and outlines the fine, often-unseen details in the hair above Liberty's brow and the outlines of the olive leaves in her headdress. The reverse appears fully struck, or virtually so. Lightly toned and attractive. Population: 14 in 66 (3 in 66+), 5 finer (1/16). NGC ID# 23Y7, PCGS# 5613

3850 1896-S — Polished — PCGS Genuine. VF Details. A well-detailed but unnaturally bright example of this key San Francisco issue, showing pewter-gray color and a few scattered marks. The 1896-S is among the "big three" keys in the Barber quarter series, boasting a mintage of only 188,039 pieces. NGC ID# 23Y9, PCGS# 5615

3851 1897-O AU58 PCGS. Although it is often overshadowed by the three key date Barber quarters, the 1897-O is an important series key in its own right, and few examples have been certified at this popular grade level. This piece has brilliant silver surfaces with virtually full luster broken only by slight rub on Liberty's cheek. NGC ID# 23YB, PCGS# 5617

3852 1900 MS65 PCGS. This final-year 19th century type coin boasts Gem-quality surfaces with bright, satiny luster. Several right-hand stars are weak, as are the eagle's right (facing) talons, although the remaining relief elements are well-defined. Population: 38 in 65, 17 finer (1/16). NGC ID# 23YK, PCGS# 5625

3853 1903-O MS64 PCGS. Deep tan-gray toning attests to the originality of this Choice 1903-O Barber quarter, representative of an issue that is rarely seen finer. The eagle's right (facing) talons and fletchings are soft, but the remainder of the strike is well-rendered. Population: 28 in 64 (1 in 64+), 20 finer (1/16). NGC ID# 23YW, PCGS# 5635

3854 1906-O MS65 PCGS. CAC. Satiny, champagne luster adorns both sides of this CAC-approved Gem quarter. The surfaces are well-preserved, with sharp definition in most details, though some typical softness is noted in the olive leaves around Liberty's head and a couple of the obverse stars. Population: 35 in 65, 30 finer (1/16). NGC ID# 23Z7, PCGS# 5644

3855 1909-D MS66 PCGS. Splendid dappled forest-green, peach-gold, and lilac toning embraces this lustrous and conditionally rare Barber quarter. Obverse star 11 and the fletchings show minor incompleteness. Population: 19 in 66 (1 in 66+), 4 finer (2/16). NGC ID# 43NY, PCGS# 5654

3856 1911 MS66 PCGS. This impressive Premium Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, under shades of lavender-gray and golden-brown toning. Population: 25 in 66 (8 in 66+), 1 finer (2/16). NGC ID# 23ZN, PCGS# 5659

1915-S Quarter, MS66 Vibrant Luster, Few Known So Fine

3857 1915-S MS66 PCGS. A slightly better date with a mintage of only 704,000 pieces. This Premium Gem example is conditionally rare, and finer coins are prohibitively so. Liberty's portrait, the stars, and the eagle all display razor-sharp definition, and the radiantly lustrous surfaces yield a hint of light golden color. Population: 15 in 66 (1 in 66+), 3 finer (1/16). NGC ID# 2424, PCGS# 5672

3858 1916-D MS66 PCGS. Mottled toning in shades of crimson, cobalt-blue, and reddish-violet surround frosted central motifs on this flashy, boldly rendered Premium Gem. Satiny luster radiates over impeccably preserved surfaces. A final-year Denver issue with broad appeal. PCGS lists 15 finer representatives (2/16). NGC ID# 2426, PCGS# 5674

3859 1916-D MS66 NGC. The obverse of this Premium Gem boasts an untuned frosty appearance, while the reverse shows a tinge of rose patina creeping in toward the right side. Both obverse and reverse, however, show a splendid strike and excellent preservation, including the star centers and the wreath. NGC reports 15 in higher grades (1/16). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

3860 1892 PR66 PCGS. Type Two Reverse. The 1892 proof quarters are surprisingly scarce in PR65 or finer grades, especially as the first year of issue. This is a sharp and attractive Premium Gem proof with ivory-gold patina and fleeting blue accents. The 2015 *Bowers Barber Silver Coins* reference suggests no more than 85 examples of the 1892 Barber quarter proofs remain in Gem or finer grades. Population: 30 in 66 (1 in 66+), 15 finer (1/16).
From The Jim Hilands Collection. NGC ID# 2427, PCGS# 5678

1893 Quarter, Contrasted PR67 Outstanding Color and Surfaces

3861 1893 PR67 NGC. CAC. The 1893 proof is scarce at the Superb Gem level, particularly with cameo contrast. This piece is housed in a prior generation, non-Cameo holder but showcases obvious contrast on both sides. The devices are cast in warm champagne toning, and the mirrored fields display violet, peach, and ocean-blue hues. The stars and the eagle's talons and shoulder are sharp. CAC has endorsed five coins in this grade and two finer. Census: 19 in 67 (2 in 67 ★), 12 finer (2/16).
From The Dr. John Young Collection. NGC ID# 2428, PCGS# 5679

- 3862 1894 PR64 PCGS. CAC.** Razor-sharp design elements are thickly frosted on this Choice proof 1894 quarter, contrasting starkly against the deeply mirrored fields. A tinge of amber toning warms the peripheries. This eye-catching proof is CAC-endorsed in a first generation holder. NGC ID# 2429, PCGS# 5680

**1895 Quarter, Sharp PR66
Picturesque Obverse Toning
Green CAC, Old Green Label Holder**

- 3863 1895 PR66 PCGS. CAC.** A razor-sharp Premium Gem 1895 proof with mirrored fields and incredible old-time toning. The picturesque obverse displays almost unimprovable color in concentric rings of sun-gold, mint-green, ocean-blue and lavender around a champagne interior. The reverse is more deeply toned in blended olive-green, lavender, and gold hues. Both sides show modest contrast, although the obverse is more prominent. There is a microscopic mark in the right obverse field that limits the grade. CAC-endorsed in an old green label holder. Population: 19 in 66, 16 finer; CAC: 6 in 66, 13 finer (2/16).
From The Dr. John Young Collection. NGC ID# 242A, PCGS# 5681

**1900 Barber Quarter, PR66
Elusive CAC-Approved Example**

- 3864 1900 PR66 NGC. CAC.** This impressive Premium Gem 1900 proof showcases razor-sharp detail and satiny devices. The fields are deeply reflective, although cameo contrast is hindered by rich old-time toning — each side is cast in a blend of tan-gray, lavender, mint, and sky-blue. The CAC population for this issue is significantly smaller than are the certified totals: green labels have been awarded to only seven non-Cameos in PR66 and four finer. This coin is housed in a prior generation holder. Census: 39 in 66, 27 finer (2/16).
From The Dr. John Young Collection. NGC ID# 43VN, PCGS# 5686

1900 Quarter, Contrasted PR67 Cameo

- 3865 1900 PR67 Cameo PCGS.** Bright, beaming ice-white devices contrast boldly against the inky-black reflective fields on both sides of this attractive and stunningly preserved Superb Gem Cameo proof. A couple of tiny contact marks are perhaps all that preclude an even finer grade. Population: 12 in 67 Cameo, 4 finer (1/16). NGC ID# 242F, PCGS# 85686

**1901 Quarter, Contrasted PR66
Old Green Holder, Gold CAC**

- 3866 1901 PR66 PCGS. Gold CAC.** A starkly contrasted turn-of-the-century proof Barber quarter, showing near-brilliant white-on-black contrast. The coin is housed in an old green label holder without a Cameo designation. A halo of light golden toning surrounds the peripheries. The strike is sharp, and the preservation is outstanding; the gold CAC label denotes that in the opinion of CAC this Premium Gem is undergraded — only one other 1901 proof has received a gold sticker, also graded PR66. Population: 18 in 66, 10 finer (2/16).
From The Dr. John Young Collection. NGC ID# 242G, PCGS# 5687

- 3867 1901 PR65 Cameo NGC.** Peach-gold toning deepens near the rims but cedes to a window of brilliance on the central reverse. The eagle provides prominent contrast, and the portrait is also nicely frosted. A scant 813 proofs were produced. Census: 7 in 65 Cameo (1 in 65 ★ Cameo), 31 finer (2/16).
Ex: FUN Signature (Heritage, 1/2008), lot 1205. NGC ID# 242G, PCGS# 85687

**1901 Quarter, PR67 Cameo
Exquisitely Struck and Pleasing**

3868 1901 PR67 Cameo NGC. The 1901 quarter comes with a proof mintage of 813 pieces, of which a fairly large number have survived to the present day. As expected, Cameos are in the minority, especially in the higher grade levels. This piece is exquisitely struck, showing well-preserved surfaces exhibiting a trace of milky-gray reverse color. Census: 18 in 67 Cameo (4 in 67 ★ Cameo), 5 finer (1/16). Ex: ANA Signature (Heritage, 3/2008), lot 549; PNG Invitational Signature (Heritage, 10/2014), lot 3473. NGC ID# 242G, PCGS# 85687

**1903 Quarter, CAC-Approved PR67
Modest Obverse Contrast**

3869 1903 PR67 NGC. CAC. By 1903, proof die manufacture nearly eliminated the production of Cameo coins. This Superb Gem is noticeably contrasted on the obverse, although the reverse is more deeply toned. The obverse is rose-gold and champagne in color, while the reverse displays deep aquamarine hues. Housed in an old no line "fatty" holder and among just three CAC-endorsed coins in this grade with one finer. Census: 40 in 67 (1 in 67 ★), 9 finer (2/16). From The Dr. John Young Collection. NGC ID# 242J, PCGS# 5689

**1904 Quarter, Vividly Toned PR67
Colorfully Contrasted**

3870 1904 PR67 NGC. CAC. The 1904 proof is rare in Cameo grades and unknown in Ultra Cameo. This Superb Gem shows subtle field-device contrast on each side through bold violet, sun-orange, and ocean-blue toning. The prior generation NGC holder does not offer a Cameo designation. This piece is conditionally scarce and immaculately preserved. Only three 1904 proofs in this grade have CAC green labels, and there is only one finer. Census: 33 in 67 (2 in 67 ★), 6 finer (2/16). From The Dr. John Young Collection. NGC ID# 242K, PCGS# 5690

**1905 Barber Quarter, PR66 Cameo
Richly Toned**

3871 1905 PR66 Cameo PCGS. CAC. Gorgeous toning graces both sides of this PR66 Cameo specimen. Among the colors present are gold, orange, teal, and plum. The contrast is readily apparent on this lovely piece exhibiting a strong degree of design detail. Population: 4 in 66 (1 in 66+) Cameo, 8 finer (2/16). NGC ID# 242L, PCGS# 85691

**1906 Quarter, PR67
Subtle Field-Motif Contrast**

3872 1906 PR67 PCGS. CAC. The 1906 proof is unknown in Deep Cameo and extremely rare in Cameo. This high-end non-Cameo is housed in an old green label holder and displays modest contrast beneath light toning, undesignated on the insert. Areas of olive and steel-blue toning grace lightly champagne mirrors. The strike is sharp. The CAC green label heightens the appeal of this coin as a Registry candidate. Population: 23 in 67, 3 finer; CAC: 9 in 67, 4 finer (2/16).

From The Dr. John Young Collection. NGC ID# 242M, PCGS# 5692

**1910 Barber Quarter, PR66
Undesignated Cameo Contrast
Old Green Holder, Gold CAC**

3873 1910 PR66 PCGS. Gold CAC. A remarkable Premium Gem proof in an old green label holder from the late-1989 period. This is the only 1910 proof with a CAC Gold label. The preservation is truly outstanding, but the chief visual attribute is stark white-on-black contrast that is undesignated by the old green insert. The strike is razor-sharp, and light golden toning warms each side. A magnificent coin in a seldom seen holder style with a CAC Gold label — a unique "triple threat" for the issue. Population: 17 in 66, 20 finer (2/16).

From The Dr. John Young Collection. NGC ID# 242S, PCGS# 5696

- 3874 1912 PR65 Cameo NGC.** The design elements of this remarkable Gem display razor-sharp definition throughout, and the deeply mirrored fields contrast boldly with the frosty devices. Eye appeal is tremendous. Census: 14 in 65 Cameo (1 in 65+ Cameo), 20 finer (2/16). NGC ID# 242U, PCGS# 85698

**1913 Quarter, PR67
Dazzling Obverse Color**

- 3875 1913 PR67 PCGS. CAC.** High-end and conditionally scarce. This Superb Gem 1913 proof quarter boasts incredible multicolor toning over the obverse, while the reverse shows blended amber-gold and sea-green hues. Eye appeal is outstanding, and the strike is bold. The fields showcase deep mirroring. Liberty's portrait is modestly contrasted with the fields, although the old green label PCGS holder does not consider a Cameo designation. Population: 12 in 67 (2 in 67+), 3 finer; CAC: 7 in 67, 2 finer (2/16). From The Dr. John Young Collection. NGC ID# 242V, PCGS# 5699

STANDING LIBERTY QUARTERS

- 3876 1916 — Improperly Cleaned — NGC Details. Good.** This lower-end 1916 Standing Liberty quarter will appeal to cost-conscious collectors seeking an example of this key date. The level of detail is excellent for the Good grade, although the date is nearly worn away. Both sides show smooth battleship-gray color and evidence of harsh cleaning. NGC ID# 43XR, PCGS# 5704

**1916 Standing Liberty Quarter, Fine 12
Collector-Grade Coin**

- 3877 1916 Fine 12 PCGS.** Although most collectors consider the 1918/7-S to be an essential acquisition for a complete Standing Liberty quarter collection, the 1916 is the rarest regular circulation-strike issue in the series in circulated grades. This collector-grade example displays pleasing battleship-gray color and even wear. The date is weak at the top, as usual, but plain to the unaided eye. NGC ID# 43XR, PCGS# 5704
- 3878 1917 Type One MS66 Full Head PCGS.** This Premium Gem Type One quarter displays unusually frosty, vibrant luster rather than the usual mattelike texture. The strike is expectedly sharp, and the surfaces yield outstanding preservation. Golden peripheral toning fades of light champagne over the interiors. NGC ID# 242Z, PCGS# 5707
- 3879 1917 Type One MS66 Full Head PCGS. CAC.** The strike is especially sharp on this frosty, carefully preserved Premium Gem Type One quarter. Blended shades of pale champagne and ice-blue encompass each side, giving this piece exceptional eye appeal, fit for a high-end type or date set. NGC ID# 242Z, PCGS# 5707

**1917 Standing Liberty Quarter, MS67 Full Head
Budget-Friendly Type One Issue**

- 3880 1917 Type One MS67 Full Head PCGS. CAC.** A magnificent Superb Gem representative of the final year of the short-lived Type One motif, this coin exhibits razor-sharp definition on Liberty's head and all the shield rivets are bold. The impeccably preserved, brilliant surfaces radiate vibrant mint luster throughout. Population: 86 in 67 (5 in 67+) Full Head, 0 finer (1/16). NGC ID# 242Z, PCGS# 5707
- 3881 1917-D Type One MS66 Full Head NGC.** A boldly struck, satiny example of this Type One Denver issue, showing deep, mottled toning in amber, russet, gold, and olive-gray hues. There are no bothersome abrasions, and the eye appeal is outstanding. Census: 73 in 66 (4 in 66+) Full Head, 28 finer (1/16). NGC ID# 2432, PCGS# 5709

**1917-S Type One Quarter, MS66 Full Head
Luminous Golden Surfaces**

- 3882 1917-S Type One MS66 Full Head PCGS.** Glistening mint luster rolls over delicately preserved surfaces on this Premium Gem Type One quarter, illuminating warm rose-gold and iridescent toning. Slight weakness along the leading edge of the eagle's left (facing) wing is the only sign of strike deficiency. The 1917-S is the most elusive Type One issue in high-grade Full Head. PCGS lists only 15 Superb Gems finer than this piece (1/16). NGC ID# 2433, PCGS# 5711
- 3883 1917-S Type Two MS64 Full Head PCGS.** Glistening luster underscores vivid rose-gold and amber toning on this Choice Full Head 1917-S Type Two quarter. This is the first issue in the series that is seen less often in Full Head Mint State grades than in non-Full Head, making the present representative an important acquisition for the series student. Bold definition is seen throughout, and the surfaces are free of distractions. NGC ID# 2436, PCGS# 5719
- 3884 1918-D MS64 Full Head PCGS.** A lovely near-Gem with the desirable Full Head designation, this coin exudes appealing luster. Both sides reveal toning, with a largely champagne background and splashes of richer russet color. Portions of the design exhibit minor incompleteness, including the rivets on the shield, but the date is sharp. NGC ID# 3TWU, PCGS# 5723
- 3885 1918-S MS64 Full Head PCGS.** A light lavender-gold cast enlivens both sides of this near-Gem Full Head 1918-S quarter, an elusive date in Mint State and far more so with Full Head designation. Even though a couple of shield rivets are weak, there is sufficient definition on Liberty's profile and hair for the coveted designation. Only minor ticks preclude an even finer grade. Population: 97 in 64 (2 in 64+) Full Head, 51 finer (1/16). NGC ID# 2439, PCGS# 5725

3886 1918-S MS64 Full Head PCGS. Uncommonly well-struck at the date, head, central torso, and reverse stars. Satiny luster displays light golden toning, and there are no significant abrasions. The 1918-S is elusive in the finer Full Head grades, particularly those above MS64. NGC ID# 2439, PCGS# 5725

3887 1919 MS65 Full Head PCGS. Satiny luster yields warm amber-gold toning on the obverse and deeper olive-gray and russet over the reverse. This Gem Full Head 1919 quarter boasts a uniformly sharp strike and lacks distracting abrasions. Light contact along the figure of Liberty appears to be the chief grade-limiting factor. NGC ID# 243B, PCGS# 5729

3888 1920 MS66+ PCGS. CAC. A beautifully preserved, high-end Premium Gem example of this popular issue, showing warm golden toning over satiny luster. The weak points on this issue are typically Liberty's temple and the date, and the present coin is slightly lacking in the former but the date has above-average clarity. CAC-approved and eye-appealing. There are 22 finer non-Full Head coins at PCGS (2/16). NGC ID# 243E, PCGS# 5734

3889 1920 MS65 Full Head PCGS. Free of distracting abrasions and boldly struck throughout the head, shield, and eagle. This Gem Full Head 1920 quarter displays frosty champagne luster overall with a dappling of olive overtones on the obverse. A tinge of sun-orange appears near the lower reverse border. PCGS has seen 42 finer Full Head examples (1/16). NGC ID# 243E, PCGS# 5735

1920 Quarter, MS66 Full Head Exceptional Eye Appeal

3890 1920 MS66 Full Head PCGS. This Premium Gem 1920 Standing Liberty quarter is remarkable for its needle-sharp strike throughout the head, the shield including all rivets, the gown, and the eagle's feathers. The only mentionable weakness is in the pedestal-exposed date, due to a design flaw that was corrected a few years later, in 1925. The surfaces are largely untuned and show splendid preservation and exceptional eye appeal. Population: 35 in 66 (4 in 66+) Full Head, 7 finer (1/16). NGC ID# 243E, PCGS# 5735

1920-D Quarter, Iridescent MS66 Uncommonly Well-Struck

3891 1920-D MS66 PCGS. CAC. This Premium Gem 1920-D boasts rich, satiny luster illuminating soft champagne and lilac-blue hues over each side. Liberty's temple is a trifle soft, but the shield rivets, stars, and date numerals are uncommonly well-defined. CAC-endorsed and undeniably eye-appealing. Population: 32 in 66, 3 finer (1/16). NGC ID# 243F, PCGS# 5736

3892 1920-S MS65 NGC. Despite the recorded mintage of 6.4 million pieces, the 1920-S Standing Liberty quarter is an elusive issue in high grade. This impressive Gem offers well-detailed design elements and well-preserved, lustrous surfaces. Census: 38 in 65, 22 finer (2/16). NGC ID# 243G, PCGS# 5738

1921 Standing Liberty Quarter, MS65 A Popular Date

3893 1921 MS65 PCGS. A favorite date among many collectors of this popular series, the 1921 Standing Liberty quarter saw a mintage of 1.9 million pieces at the start of the Roaring Twenties. This Gem features well-preserved surfaces that are golden-gray on the obverse and rose-colored on the reverse, with sprinkled charcoal accents on both sides, an original appearance. The strike is decent, and few marks appear on either side. PCGS reports only 30 non-Full Head examples finer (1/16). NGC ID# 243H, PCGS# 5740

1923-S Quarter, CAC-Endorsed MS66 Incredible Luster and Surface Preservation

3894 1923-S MS66 PCGS. CAC. While high-grade Full Head examples of this key San Francisco issue are actively traded, the more affordable non-Full Head pieces are rarely seen and comparably underrated. This coin is almost immaculate, as the CAC endorsement recognizes. The glistening, frosty surfaces yield traces of champagne color and show uncommonly bold central detail. Weakness on Liberty's head seems out of place with the rest of the strike. Population: 37 in 66 (1 in 66+), 6 finer (1/16). NGC ID# 243K, PCGS# 5744

3895 1924 MS66 PCGS. This is a lovely Premium Gem 1924 quarter, showing luminous surfaces with warm champagne toning. Additional amber and olive-green hues surround the peripheries. The coin is struck from rusted dies, as is often seen on this issue, but the textured surfaces are free of major abrasions. Liberty's temple and the inner shield rivets are slightly soft, as is the leading edge of the eagle's left (facing) wing. The date and stars are bold. Population: 37 in 66 (6 in 66+), 15 finer (2/16). NGC ID# 3TWY, PCGS# 5746

3896 1924 MS66 Full Head PCGS. The 1924 is marginally available in Full Head, but seldom is such a piece seen this fine. This piece displays impressively sharp detail on the shield, head, date, and stars, and the softly frosted surfaces yield lovely pastel toning. Population: 59 in 66 (6 in 66+) Full Head, 13 finer (1/16). NGC ID# 243L, PCGS# 5747

3897 1924-S MS64 NGC. This is a well-struck example of this slightly better San Francisco issue, although Liberty's head is a trifle soft in the vicinity of the ear. Small russet and bluish accents appear in the fields amid otherwise light champagne toning. There are no severe abrasions. NGC ID# 243N, PCGS# 5750

3898 1926 MS65 Full Head PCGS. A bold strike features a Full Head and a full shield on this lovely Gem. Both sides have frosty silver luster beneath delicate gold toning. A few small toning specks appear on both sides. NGC ID# 243R, PCGS# 5755

3899 1927-S — Improperly Cleaned — NGC Details. AU. This 1927-S quarter is pleasantly free of the heavy clash marks that typically affect the issue, and hints of luster remain in the recesses. The interiors are bright, but gold toning warms the peripheries. Moderate hairlines confirm past cleaning. Liberty's head and other design elements show slightly above-average sharpness for the issue. NGC ID# 243W, PCGS# 5764

3900 1928-S MS66 Full Head PCGS. Rarely encountered with Full Head details, this Premium Gem is a lovely example with frosty luster and untuned silver surfaces. The shield details are also nearly complete, enhancing the importance of this piece. PCGS has only certified 20 finer examples (2/16). NGC ID# 243Z, PCGS# 5771

3901 1929-D MS64 Full Head PCGS. In addition to the Full Head details, this piece also has sharp shield details with only two missing rivets. A splendid piece with satiny silver surfaces and delicate champagne toning. NGC ID# 2443, PCGS# 5775

3902 1930 MS66 Full Head PCGS. This final-year type coin displays satiny luster with a hint of iridescent toning. The shield and head are sharp, and bold definition characterizes the eagle's feathers. The 1930 Standing Liberty quarter is available in this grade but infrequently seen finer. NGC ID# 2445, PCGS# 5779

1930 Quarter, MS67 Full Head Virtually Unimprovable Type Coin

3903 1930 MS67 Full Head PCGS. A satiny Superb Gem Full Head example of the go-to type-coin issue in the recessed date portion of the series. This 1930 Standing Liberty quarter is devoid of mentionable abrasions and shows delicate ice-blue and olive-gold toning. Although plentiful in the absolute sense, this final-year issue is scarce at the Superb Gem level. Population: 44 in 67 (1 in 67+) Full Head, 1 finer (1/16). NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

3904 1932-D MS63 PCGS. Brilliant luster and sharp motifs are accentuated by a hint of light golden toning on this Select 1932-D Washington quarter. A few trivial marks on the obverse define the grade. Eye appeal is excellent for the grade. NGC ID# 2448, PCGS# 5791

3905 1932-D MS64 PCGS. This Choice Mint State Denver key has lovely gold, blue, and iridescent toning over the entire obverse, with the reverse brilliant and untuned. PCGS has only certified 85 finer examples of this issue (2/16). NGC ID# 2448, PCGS# 5791

1934-D Medium Motto Quarter, MS67 Lightly Toned

3906 1934-D Medium Motto MS67 NGC. The motto IN GOD WE TRUST is clear, neither faint nor conspicuously heavy. This Superb Gem's watery luster brims beneath a faint layer of patina that is largely silver-blue but shows touches of champagne, olive, and golden-brown closer to the rims. Neither NGC nor PCGS has graded an MS68 Medium Motto example (2/16). NGC ID# 244C, PCGS# 5796

3907 1935 MS67+ PCGS. CAC. With only a single MS68 coin finer at both services, this Plus-graded MS67 1935 Washington quarter is an essential Registry candidate. CAC-approved surfaces are nearly flawless, cast in frosty luster with champagne and ice-blue toning. The strike is bold, and eye appeal is high. NGC ID# 244D, PCGS# 5797

3908 1936-D MS66 PCGS. CAC. This brilliant Premium Gem semi-key Washington quarter exhibits ivory mint luster with dappled peripheral toning. PCGS has only certified 19 finer examples. CAC: 27 in 66, 3 finer (2/16). NGC ID# 244H, PCGS# 5801

3909 1936-D MS66 PCGS. CAC. This MS66 1936-D quarter trails 18 Superb Gems at PCGS (10/15), but the eye appeal is in no way subpar. Bold definition characterizes the devices, and seemingly pristine, satiny luster glows beneath soft champagne toning. An outstanding representative of this conditionally better date. NGC ID# 244H, PCGS# 5801

1937 Quarter, Tied-for-Finest MS67+ Frosty With Iridescent Rim Toning

3910 1937 MS67+ PCGS. CAC. The obverse displays frosty silver centers complementing a near-complete ring of iridescent patina, while the reverse shows a more demure toning palette of pale rose-silver with slightly deeper rim color. The preservation is extraordinary throughout. A tied-for-finest example of this high-mintage P-mint issue. Population: 83 in 67 (8 in 67+), 0 finer (1/16). NGC ID# 244K, PCGS# 5803

**1941-S Quarter, MS67+
Tied for Finest at PCGS**

3911 1941-S MS67+ PCGS. Registry collectors have a number of Superb Gem 1941-S quarters from which to choose, but Plus-graded coins are few and far between. This top-grade PCGS coin boasts sharp detail and satin luster. The interiors are brilliant, and the peripheries display russet, amber, and olive toning. Population: 76 in 67 (7 in 67+), 0 finer (1/16). NGC ID# 244Z, PCGS# 5816

3912 1944-D MS67+ PCGS. CAC. Vibrant mint luster and sharply detailed design elements are the calling cards of this Plus-graded Superb Gem, with impeccably preserved surfaces that show attractive highlights of magenta, greenish-gold, and amber toning. PCGS has graded two numerically finer examples (1/16). NGC ID# 2459, PCGS# 5825

3913 1945-D MS67 PCGS. CAC. Among the finest certified at PCGS and conditionally rare at this lofty level with a CAC endorsement. The surfaces display vibrant, frosty luster and brilliant silver-white color. Boldly struck and free of abrasions. Population: 42 in 67 (3 in 67+), 0 finer (1/16). NGC ID# 245C, PCGS# 5828

3914 1950-S/D FS-601 MS65 PCGS. An upper-end Registry-grade example of this important *Guide Book* variety. This Gem is boldly rendered with warm champagne luster that exhibits lavender and russet accents on the reverse. Worn dies produce faint metal flow lines in the fields, which deliver a vibrant cartwheel effect. NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

3915 1950-S/D FS-601 MS65 PCGS. A popular *Guide Book* variety that is scarce in Gem condition. This 1950-S/D quarter displays frosty luster and light champagne toning. The surfaces are surprisingly unabraded, even for the MS65 level. Only a few faint lines are seen beneath a loupe. NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

**1950-S/D Quarter, Frosty MS66
Incredible Eye Appeal**

3916 1950-S/D FS-601 MS66 PCGS. Glistening, frosty luster rolls over almost immaculate surfaces on this Premium Gem FS-601 quarter. The S Over D mintmark variety is highly popular among Washington quarter enthusiasts, and this Premium Gem example is among the finer-known. A trace of champagne toning warms the luminous surfaces and bold relief elements. Housed in a green label holder. Population of S Over D variety: 41 in 66 (7 in 66+), 5 finer (1/16). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

3917 1950-S/D FS-601 MS66 PCGS. Light almond-gold toning graces this lustrous and well struck overmintmarked quarter. Pristine save for a solitary field graze near the profile. A popular *Guide Book* variety. Population: 42 in 66 (7 in 66+), 5 finer (2/16). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

**1950-S/D Quarter, MS66+
Stellar Luster and Surfaces**

3918 1950-S/D FS-601 MS66+ PCGS. CAC. Surface quality on this Premium Gem 1950-S/D quarter is nearly fine enough to warrant an MS67 designation. Sharp motifs are set aglow by frosty, radiant luster. Each side exhibits soft champagne toning with occasional lilac and amber overtones around the peripheries. The dies are deteriorating; moderate erosion softens some of the finer details, while die breaks occur on Washington's nose, eyebrow, crown, and neckline. Population: 41 in 66 (7 in 66+), 5 finer (1/16). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

3919 1952-D MS67 PCGS. A top-graded Registry coin, this Superb Gem 1952-D Washington quarter displays potent luster that illuminates boldly rendered design elements and immaculate surfaces. Pale champagne toning graces much of each side, save for a tinge of russet and amber-gold along the right-hand borders. Population: 18 in 67, 0 finer (1/16). NGC ID# 2462, PCGS# 5850

3920 1952-D MS67 PCGS. An extraordinary Superb Gem with brilliant silver surfaces, this frosty example features a bold strike and excellent eye appeal. Population: 18 in 67, 0 finer (2/16). NGC ID# 2462, PCGS# 5850

**1964-D Quarter, MS67+
Dazzling Registry Coin**

3921 1964-D MS67+ PCGS. CAC. Plus-graded and CAC-approved, this Superb Gem 1964-D Washington quarter is tied for the finest at either service. The strike is bold, and the surfaces are virtually flawless save for a couple of microscopic ticks on the eagle's neck and wing. Much of each side is brilliant and satiny, although a tinge of amber-olive toning appears over the left obverse margin. Population: 59 in 67 (6 in 67+), 0 finer (1/16). NGC ID# 246V, PCGS# 5877

PROOF WASHINGTON QUARTERS

3922 1950 PR67 Cameo PCGS. A superb Cameo example of this conditionally elusive proof Washington quarter issue, showing dazzling luster on the devices and deep mirroring in the fields. A thin halo of sun-gold toning surrounds the extreme outer peripheries, leaving the interiors brilliant. Population: 23 in 67 (1 in 67+) Cameo, 6 finer (1/16). NGC ID# 27VA, PCGS# 85982

3923 1953 PR67 Deep Cameo PCGS. Deep Cameo examples of this proof Washington quarter issue are scarce. This Superb Gem is starkly contrasted and untoned, yielding full white-on-black eye appeal. The preservation is outstanding. Population: 12 in 67 Deep Cameo, 9 finer (1/16). NGC ID# 4C5K, PCGS# 95985

- 3924 1956 PR69 Deep Cameo PCGS.** A stunning example with extraordinary contrast, this brilliant Superb Gem is tied for the finest certified 1956 quarters. The definition of a black-and-white proof. Population: 45 in 69 Deep Cameo, 0 finer (2/16). NGC ID# 27J2, PCGS# 95988

EARLY HALF DOLLARS

1795 Half Dollar, VF25 O-125, Two Leaves

- 3925 1795 2 Leaves, O-125, T-13, R.4, VF25 NGC.** Tompkins Die State 1/1. While the variety is not particularly scarce in comparison to other 1795 Flowing Hair halves, sharply defined examples are in the minority. This VF25 example displays deep bronze toning and strong definition throughout, including a bold strike to the left of the date area. The surfaces are remarkably clear for the grade with the exception of a faint raised, lateral mark that runs from star 6 past Liberty's chin and a small dig between E and R of LIBERTY. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

1795 Half Dollar, XF40 O-125, T-13, Two Leaves

- 3926 1795 2 Leaves, O-125, T-13, R.4, XF40 PCGS Secure.** A deeply toned, slate-gray example of the Overton-125, Tompkins-13 variety with slight wear on the bust tip, wing ends, and eagle's breast. Liberty's hair strands are sharply impressed for the grade. Tiny abrasions are visible with magnification, but no significant marks are seen. Some non-distracting, minor planchet streaks are noted on the reverse, but no adjustment marks are visible on either side of this pleasing early half. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052
- 3927 1795 2 Leaves, O-130, T-8, Low R.5, Fine 15 PCGS.** A scarce variety with seven berries in the left branch and 10 in the right branch, a diagnostic feature of the reverse die. This example has medium gray field patina with lighter gray devices. A few scattered surface marks are expected at this grade level. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

1801 O-101 Heraldic Eagle Half Dollar, VF25 Much Better Early Date

- 3928 1801 O-101, T-2, R.3, VF25 PCGS.** A single obverse was paired with two reverses to produce 30,289 1801 halves. This O-101 (T-2) example is from a reverse die showing rust and pitting in the reverse fields, including a large resultant lump near the arrowheads beneath N of UNITED and another near the eagle's left (facing) wing. A and M of AMERICA are joined to confirm the variety. Pleasing light, golden-gray toning deepens to slate-gray at the margins. Moderate wear is grade-consistent, with full rims nice definition on Liberty's hair. There are no distracting abrasions or adjustment marks. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

1806 Draped Bust Half, AU58 O-106, Knob 6, Small Stars, With Stem

- 3929 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU58 NGC.** Tompkins Die State 2/1. The leaf tip between the I and C of AMERICA on the reverse confirms the O-106 (T-4) Knob 6, Small Stars variety. The obverse is shared with O-107 (T-3) and O-108 (T-2). In near-Mint State, all Knob 6 Small Stars varieties are rare. This example displays faint gold toning across both sides, with deep-gray accents. The 8 in the date is repunched and leans right. Weakness at the star centers, bust drapery, and clouds is diagnostic of the variety. Steve Herrman's Autumn, 2015 listing shows four AU58 pieces tied for third in the Census behind two MS63 examples (1/16). NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075
- 3930 1806 6 Over Inverted 6, O-111a, T-11, R.4, VF20 PCGS.** Tompkins Die State 3/5. The new Tompkins reference shows an interesting photo progression of the O-111 (T-11) die stages. This is one of the "must have" varieties among Draped Bust halves — as well as one of the better-known engraver's blunders in the entire federal series. The later die state, the more interesting variety becomes for collectors. This middle stage (Overton-111a) shows a pronounced cud over TED of UNITED, while the inverted underdigit is clear. Traces of golden luster remain at the obverse stars and reverse legend, with nice eye appeal and quality for the grade. NGC ID# 24EL, PCGS# 39337 Base PCGS# 6078
- 3931 1806 Pointed 6, Stem, O-114a, T-16, R.4, XF40 PCGS.** The later die state with a bold die crack between the E in AMERICA and the left (facing) wingtip. Rotation beneath a light reveals powder-blue, lilac, and olive-green toning. A small flan flaw is noted on the obverse near star 3. NGC ID# BK8V, PCGS# 39316 Base PCGS# 6071

- 3932 1807 Draped Bust, O-105, T-4, R.1 — Cleaning — PCGS Genuine. AU Details.** Retoned nicely from an old cleaning, this crescent-toned Draped Bust half retains considerable eye appeal and sharp definition on the motifs. The hair strands, ribbon, and drapery lines are particularly bold. Pale reddish-gold color yields to deep, gunmetal blue accents below Liberty and above the clouds. An opportunity for perceptive bidders despite the net AU PCGS grade.
From The Jim Hilands Collection. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

BUST HALF DOLLARS

- 3933 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU53 PCGS.** Slight wear shows on the well-detailed design elements, but the undertype 2 in the denomination is plainly visible to the left of the primary digit. The lightly abraded surfaces retain much of their original mint luster, under pleasing shades of greenish-gold and lavender-gray toning. Population (for the variety): 5 in 53, 13 finer (2/16). NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086
- 3934 1807 Capped Bust, Large Stars, O-114, R.3, XF40 PCGS.** Most 1807 Capped Bust, Large Stars half dollars are the blundered denomination variety (O-112). O-114 has a normal denomination and is a better *Guide Book* variety. The present example displays deep tan-brown and steel-gray toning. The nicely defined surfaces are smooth save for a tick on Liberty's neck. NGC ID# 24EN, PCGS# 39361 Base PCGS# 6088

1808/7 O-101 Capped Bust Half Borderline Mint State

- 3935 1808/7 O-101, R.1, AU58+ PCGS.** Only the Overton-101 variety shows the second 8 punched over a 7, one of the notable *Guide Book* overdates in the Bust half series. The secondary 7 is especially prominent on this high-end, borderline Mint State example, with evidence of the 7 within both the top and bottom loops of the primary 8 as well as serifs of the underdigit boldly visible outside of the left upper loop edge. On the reverse, the O-101 shows a gap between the right-side eagle feathers and the shield border — a situation unique to the variety. Ash-gray toning displays remaining silver luster on the sharply struck devices. Abrasions and wear are minimal for this attractive, sole Plus-graded example by PCGS. Population: 17 in 58 (1 in 58+), 20 finer (1/16). NGC ID# 24EP, PCGS# 39378 Base PCGS# 6091

1811/10 O-101 Half, AU55 Still-Lustrous Surfaces, Dotted Date

- 3936 1811/10 O-101, R.1, AU55 NGC.** The die dot between the 8 and 1 in the date — with the visible undertype of the last two digits — confirms the O-101 variety. This Choice About Uncirculated piece is well-detailed and lightly worn, with bright silver luster on both sides that complements sparse gray-gold toning. Census (for O-101): 6 in 55, 11 finer (2/16).
Ex: Sacramento Signature (Heritage, 3/2011), lot 4425. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1811 Half Dollar, MS63 Small 8, O-108

- 3937 1811 Small 8, O-108, R.2, MS63 NGC.** Deep and consistent walnut-brown toning blankets this satiny and unabraded Capped Bust type coin. Slightly off center toward 2:30, affecting only the width of dentils. Struck from rotated and clashed dies. Overton-108 is often attributed by a short mint-made spike near the right (facing) wingtip.
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3376, which realized \$2,152.60. NGC ID# 24EU, PCGS# 39431 Base PCGS# 6097
- 3938 1812 Large 8, O-103, R.1, AU55 PCGS.** A horizontal die line near the clasp and some vertical die lines between the left wing and head of the eagle identify the O-103 variety. This Choice AU specimen displays just a trace of wear on the well-detailed design elements and the lightly abraded, lustrous surfaces are blanketed in shades of pale gold and lavender-gray toning. Population (for the variety): 5 in 55, 7 finer (2/16). NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100
- 3939 1812 Large 8, O-103, R.1, AU58 NGC.** Primarily brilliant with splashes of deep russet toning in the fields surrounding Liberty, this near-Mint example retains strong mint luster and sharp central motifs despite evidence of well-worn dies. The icy-silver sheen dominates both sides. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

**1812 O-107 Half Dollar, MS64
Sharp Early Die State**

3940 1812 Large 8, O-107, R.1, MS64 NGC. The first “jumping” 1 is much higher in the date than the rest of the digits. This is an early die state for O-107, as the die lump near the eagle’s right wing is not yet detectable and the die line across the eagle’s head is still present. The strike is sharp in most regions, though some usual softness is noted on stars 8 to 11. Splashes of deep blue and teal toning accent golden-gray color overall, with satiny underlying mint luster. A highly attractive near-Gem, struck from mildly rotated dies. NGC ID# 24EW, PCGS# 39452 Base PCGS# 6100

3941 1817 O-113, R.2, AU55 PCGS. The early state of this die marriage, without the eventual die crack through UNITED STA. Deep cream-gray embraces this unabraded and attractive Choice AU Bust half. Liberty’s cheek and hair display only slight wear, the eagle even less.
Ex: FUN Signature (Heritage, 1/2010), lot 3437. NGC ID# 24F6, PCGS# 39508 Base PCGS# 6109

3942 1818/7 Large 8, O-101, R.1, AU55 PCGS. A trace of rub visits the high points on each side of this Choice AU half dollar. The surfaces have virtually full luster beneath wispy gold toning. A popular variety for its naked-eye overdate. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

3943 1818 O-104a, R.3, MS62 ANACS. Pleasing deep, powder-blue and almond-gold toning embrace this gently shimmering and exactly struck representative. O-104a has many lengthy obverse cracks that allow quick attribution. The surfaces are exceptionally devoid of marks for the grade. Housed in an early generation ANACS holder.
Ex: Long Beach Signature (Heritage, 2/2008), lot 558; Summer FUN Signature (Heritage, 6/2008), lot 983. NGC ID# 4FKU, PCGS# 39518 Base PCGS# 6113

3944 1818 O-107, R.1, AU55 PCGS. A pair of tiny prongs from the top of the eagle’s beak attribute the collectible O-107. This brilliant example appears Mint State upon cursory inspection, although the bust tip exhibits a hint of wear. Minor marks are relegated to the upper reverse field. Housed in an old green label holder. NGC ID# 24F9, PCGS# 39523 Base PCGS# 6113

3945 1819/8 Large 9, O-105, R.2, AU55 PCGS. Listed on the PCGS insert as a Small 9 (O-101), but this is the Large 9 “overdate” Overton-105. Some numismatists believe it is not a true overdate, but rather a graver’s slip or bar joining the ball of the 9 to the upper loop. O-105 is distinctive among the so-named overdates for the high pointed 1s, similar to the normal 1819 die pairs. Nice silver luster remains on both sides of this Choice About Uncirculated example, with only light marks including some abrasions above the denomination. Faint areas of golden-gray toning deepen at the margins and near the date. NGC ID# 24FC, PCGS# 39561 Base PCGS# 6119

**1823 Broken 3 Half Dollar
Scarce O-101, Choice About Uncirculated**

3946 1823 Broken 3, O-101, R.3, AU55 PCGS. A *Guide Book* variety, the O-101 Broken 3 variant is scarcer than its later-state counterpart, the O-101a Patched 3. The Broken 3 leans sharply to the right as if repelled from the adjacent 2 in the date. This Choice About Uncirculated example displays bright silver fields with fleeting olive-gray accents. Sharp definition remains on the devices with exception of the stars, which lack the central details from an incomplete strike. Plentiful mint luster remains. NGC ID# 24FJ, PCGS# 39620 Base PCGS# 6132

3947 1824/4 O-109, R.2, AU55 PCGS. Medium lilac, gunmetal, and chestnut shades embrace this lightly circulated but partly lustrous half dollar. Perceptible marks are limited to faint field lines near the arrowheads. NGC ID# 24FK, PCGS# 39643 Base PCGS# 6140

**1824/4 Bust Half, MS65
O-110, Widely Repunched 4**

3948 1824/4 O-110, R.2, MS65 NGC. The present satiny Gem displays dusky autumn-gold and gunmetal-gray toning. Refreshingly free from contact, and well struck except on the right-side stars and the right (facing) claw. The eagle’s left wing shows minor strike doubling. O-110 is one of two 1824/4 *Guide Book* varieties, readily attributed by either the repunched 4 in the date or the pelletlike die dot on the reverse field beneath UNUM. This example is solidly within Steve Herrman’s Condition Census for the O-110 variety as of the Autumn, 2015 listing.
Ex: Houston Signature (Heritage, 11/2012), lot 3635. NGC ID# 47PA, PCGS# 39644 Base PCGS# 6140

3949 1824 O-115, R.2, MS61 NGC. Sharply struck and lustrous, this moderately toned example of O-115 displays grayish-blue overtones on luminescent, pale-gold fields and devices. High rims surround razor-sharp stars. A tiny die lump between the left scroll edge and the left wing confirms the variety. NGC ID# 24FK, PCGS# 39637 Base PCGS# 6137

3950 1824 O-115, R.2, MS61 PCGS. A free-floating die dot between the left scroll end and the wing shoulder is the pick-up point for identifying the Overton-1115 die pair. The large stars are well-formed with sharp centers. Frosty silver luster gleams through faint orange-gold patina on the obverse, with the toning increasing intensity on the reverse. NGC ID# 24FK, PCGS# 39637 Base PCGS# 6137

**1825 Half Dollar, MS65
Better Overton-117 Variety, Tied for Finest**

- 3951 1825 O-117, R.4, MS65 NGC.** A repunched upright on the 5 in 1825 helps attribute this scarcer Overton variety. Medium chestnut-gold and steel-gray patina visits lustrous and beautifully preserved surfaces. The strike is full except on the uppermost stars. The Stephen J. Herrman listing (Autumn 2015) for the variety is topped by two NGC examples: the present piece, and another NGC coin with several auction appearances.
Ex: *Baltimore Signature* (Heritage, 7/2003), lot 7448; *Central States Signature* (Heritage, 4/2013), lot 2146. NGC ID# 24FL, PCGS# 39664 Base PCGS# 6142

**1826 O-118a Half Dollar, MS65
Colorful Album Toning**

- 3952 1826 O-118a, R.1, MS65 NGC.** O-118a, R.1. Ruby-red, orange-gold, and navy-blue enrich the borders of this lustrous Gem, which presumably spent years reposing in a Wayne Raymond-style holder. Those folders contained sulphur within the cardboard, which originally toned the rims of any inserted silver coins. The present magnificent example has unabraded surfaces and a decidedly above average strike. The late die state with die cracks above the reverse legend is more available in high grades than the early state of the dies. Nevertheless, this example just makes the Condition Census for the variety according to Steve Herrman's analysis.
Ex: *Los Angeles Signature* (Heritage, 8/2009), lot 1588; *Houston Signature* (Heritage, 12/2009), lot 686. NGC ID# 24FM, PCGS# 39692 Base PCGS# 6143

**1827 O-105 Half Dollar, MS63
Square-Base 2**

- 3953 1827 Square Base 2, O-105, R.3, MS63 PCGS.** The tip of the 5 is recut on the reverse of this scarce variety. That die is shared with the rarer O-116. This impressive Select Mint State piece exhibits frosty silver luster with delicate peripheral gold toning. Scattered marks are trivial and only visible with a magnifier. NGC ID# 24FN, PCGS# 39697 Base PCGS# 6144

- 3954 1828 Curl Base 2, No Knob, O-101, R.1, MS62 NGC.** A gorgeous, well-struck example with rich original blue and copper-orange coloration with vibrant, full mint luster. The surfaces are nicely preserved and display a minimal number of small marks, mainly on the shield and the upper reverse field near the eagle's head. A sharp tine from Liberty's drapery helps confirm the O-101 variety. NGC ID# 6E93, PCGS# 39754 Base PCGS# 6148

- 3955 1831 O-108, R.1, MS62 PCGS.** Rich cherry-red and navy-blue toning embraces portions of both sides, but a majority of the coin is straw-gold and dove-gray. A satiny, colorful, and unblemished Capped Bust half dollar. NGC ID# 24FV, PCGS# 39844 Base PCGS# 6159

- 3956 1831 O-109, R.1, MS63 PCGS.** Rich sea-green, mahogany-red, and gunmetal toning blankets this satiny and minimally marked Select Capped Bust type coin. A late die state with a distorted appearance to the letters in UNITED and AMERICA. NGC ID# 24FV, PCGS# 39845 Base PCGS# 6159

**1831 O-109 Bust Half
Smooth and Lustrous Near-Gem**

- 3957 1831 O-109, R.1, MS64 PCGS.** A small tine above the R of LIBERTY is the primary pick-up point for the variety, although the 18 of the date is noticeably higher than 31 as well. A tiny lump in the field near star 5 confirms the obverse. The reverse shows a line 2 of stripe 1 joined to line 3. The obverse stars are larger on this variety than the similar O-111. Album-toned with blue at the margins surrounding caramel-gold centers, only a few insignificant ticks are visible on the frosty, lustrous surfaces. The scroll is weak at LURI of PLURIBUS. NGC ID# 24FV, PCGS# 39845 Base PCGS# 6159

1831 O-111 Half Dollar, Brilliant MS64

- 3958 1831 O-111, R.1, MS64 PCGS.** A brilliant and untuned representative of this relatively available Overton-111 variety. Most examples display a die crack at the base of the date and through stars 1 through 7, as well as a faint crack through stars 8 through 10. A scant few examples of the die marriage are uncracked, newly identified as O-111' (prime) — believed to be R.7 in the pristine, uncracked state. This coin is of the more readily obtainable die state, with the diagnostic cracks and weakness at the scroll beneath STA of STATES. Stripe 1 of the vertical shield lines appears to be a 2-line stripe, where lines 2 and 3 of the stripe are merged at the bottom. Brilliant silver luster covers both sides of this near-Gem half.
Ex: *ANA Signature* (Heritage, 8/2015), lot 1223. NGC ID# 8Z74, PCGS# 39848 Base PCGS# 6159

3959 1832 Large Letters, O-101, R.2, AU58 PCGS. CAC. Overton-101 is the sole Large Letters variety for the 1832 issue, confirmed by a strong die break joining the tail feathers to the left (facing) wing and recutting on the lower inside loop of the 8 in the date. This near-Mint example shows light rub on the cheek, but obvious originality of the surfaces with rich, lilac-gray toning and attractive rose highlights. NGC ID# 24FW, PCGS# 39885 Base PCGS# 6161

3960 1832 Small Letters, O-115, R.1, MS62 PCGS. This attractive MS62 example displays well-detailed design elements and lightly marked, lustrous surfaces under shades of golden-tan and lavender-gray toning. Population (for the variety): 1 in 62, 0 finer (2/16). NGC ID# 24FW, PCGS# 39874 Base PCGS# 6160

3961 1832 Small Letters, O-115, R.1, MS63 NGC. A series of light die lines exist in the narrow opening beneath the breast feathers above the topmost right (facing) talon — a reverse shared with O-114. Slight weakness on stars 1 to 5 interrupt an otherwise sharp strike. Richly toned in copper-orange shades with blue-green overtones on both sides. This Select Uncirculated Bust half shows a few tiny marks on the high points but no serious abrasions. NGC ID# 24FW, PCGS# 39874 Base PCGS# 6160

3962 1834 Large Date, Small Letters, O-107, R.1, MS63 NGC. A small triangular die break at the top of I in LIBERTY and the straight left upright of M in AMERICA, cut over a curved upright, identifies the O-107 variety. The lightly marked surfaces of this attractive Select example retain much of their original mint luster, under shades of lavender-gray and golden-brown toning. NGC ID# 24FY, PCGS# 39911 Base PCGS# 6165

1834 O-109 Half Dollar, MS63 Designated Prooflike Surfaces

3963 1834 Small Date, Small Letters, O-109, R.1, MS63 Prooflike NGC. Lovely golden-violet and sky-blue toning appears on both sides of this Select Mint State Capped Bust half dollar. The fields are fully mirrored, further enhancing the already wonderful eye appeal. This piece will appeal to variety specialists as well as date and type collectors. NGC reports a single Prooflike example at the MS63 level, and one finer Prooflike (1/16).

Ex: Long Beach Signature (Heritage, 9/2013), lot 3798. NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

3964 1835 O-108, R.3, MS62 PCGS. Always found with a die crack over the cap, this scarce variety also features a recut I in UNITED. Typically weak on Liberty's curls, this example has full luster beneath light gold and iridescent toning. NGC ID# 24FZ, PCGS# 39934 Base PCGS# 6168

3965 1835 O-109, R.2, MS63 PCGS. Crisp definition of the hair curls, cap, and bust drapery offset some minor weakness at the scroll at RIB of PLURIBUS. The stars are reasonably sharp with recutting on star 7. Small die lines extend downward into the field beneath the eagle's left (facing) wing to confirm the O-109 variety. Attractive gunmetal-blue toning encircles almond-gold centers. NGC ID# 24FZ, PCGS# 39935 Base PCGS# 6168

1836 O-106a Half Dollar, MS64+ Beaded Reverse Border

3966 1836 Beaded Reverse, O-106a, R.3, MS64+ PCGS. This late die state example has a prominent reverse die crack from the border through the upper two arrowheads, meeting the eagle's left (viewer's right) wing in die chips, and continuing through that wing and the upper field to the bottom of the scroll below the S in PLURIBUS. An exceptional example with frosty mint luster, this half dollar has ivory surfaces with peripheral gold toning. NGC ID# 24G2, PCGS# 39967 Base PCGS# 6169

3967 1836 Lettered Edge, O-120, Low R.4, MS62 NGC. CAC. The extension of the stripes of vertical line 3 below the bottom shield border helps identify this very scarce 1836 Lettered Edge half dollar, an appealing last-year type issue. This piece shows attractive rose color on surfaces that are minimally abraded and quite appealing. For the 1836 Lettered Edge, this is one of only five in this grade with the CAC approval, although 34 are finer (2/16). NGC ID# 24G2, PCGS# 39961 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

3968 1836 Reeded Edge, GR-1, R.2 — Tooled — PCGS Genuine. Unc Details. The field beneath STATES is tooled, but the rest of this well-struck half dollar is pleasing. A hint of golden patina visits the margins. A scarce and historic issue, although more available than implied by the traditional mintage of 1,200 pieces. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

3969 1837 MS62 NGC. GR Variety Unidentified. Perhaps an unlisted die pair for this 1837 Reeded Edge half, with the reverse showing characteristics of GR-6, but paired with a different obverse. Deep, frosty silver luster shines from both sides, with bold central motifs but weakness at the lower right-hand stars. A thin band of reddish-gold toning encircles the margins. NGC ID# 24G4, PCGS# 6176

3970 1837 GR-8, R.4, MS62 PCGS. The diagnostic short "spike" at the top of the cap and faint die clashing beneath the wings help with the GR-8 variety attribution. Sharply struck on the central elements but weak at the peripheries from die erosion, this example lacks the centers on some of the stars and displays loss of some letter tops on the reverse legend. Olive-gray toning of varying intensity blankets both sides, yet silver luster shines through. PCGS# 531054 Base PCGS# 6176

3971 1838 GR-12, R.4, MS62 NGC. Caramel-gold and steel-blue endow coruscating and minimally abraded surfaces. The borders show occasional incompleteness of strike, but the major devices are well defined. A better die variety distinguished by a diagonal crack between the AL in HALF. NGC ID# 24G5, PCGS# 531093 Base PCGS# 6177

3972 1839-O GR-1, R.1, VF35 PCGS. Distinctive violet, gray, and blue toning visits the silver surfaces of this important New Orleans half dollar, the only collectible Capped Bust issue from that Mint. This is the usual variety with a jagged die crack through the date. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

3973 1839-O GR-1, R.1, XF45 NGC. A late die state example of this often-seen variety, showing a shattered reverse and a bold peripheral crack on the obverse. Detail is pleasing for the grade, but the chief attribute is the rich toning that blankets the interiors in mint-gray and champagne hues while the peripheries display deeper amber, violet, and ocean-blue. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

3974 1841-O Large O, WB-101, Die Pair 8, R.3, MS62 PCGS. CAC. A heavy die crack travels from the dentils between A and L of HALF to the eagle's claw, then upward through the eagle's left side and out of the wing shoulder past the eagle's beak. A second crack between the final A of AMERICA and the top arrowhead runs from a dentil to the right wing. Die lines (or perhaps misplaced digits) are visible below the date. This is a softly lustrous, warm-gray example — minimally marked — with frosty surfaces and a near-full strike. CAC endorsed. Population (all varieties): 12 in 62, 16 finer (1/16). NGC ID# 24GS, PCGS# 572009 Base PCGS# 6237

3975 1850-O WB-101, Die Pair 6, R.5, MS63 PCGS. This Select 1850-O half is largely untuned and frosty, showing abundant luster amid a few small scrapes. A scarce variety, with doubling on the upper vertical obverse shield lines and shield edge. Two knocks on Liberty's knees are the only mentionable marks, making this an appealing and well-struck candidate for a type, date, or variety set. Population (all varieties): 13 in 63, 28 finer (1/16). NGC ID# 24HH, PCGS# 572076 Base PCGS# 6265

1853 Arrows and Rays Half Dollar Lustrous Near-Gem, One-Year Type

3976 1853 Arrows and Rays, WB-101, MS64 NGC. Seldom available any finer — NGC and PCGS combined report just 51 pieces in finer grades (2/16) — this lustrous and lightly toned example is Choice for the grade. A bare minimum of marks can be found even with a strong glass, a sharp strike approaches full details on the central motifs. Frosty gold toning covers both sides, with a few orange accents near the rims. A great example of this one-year type with the Rays on the reverse. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

1853 Arrows and Rays Half Dollar, MS64 Pleasing Eye Appeal, One-Year Type

3977 1853 Arrows and Rays, WB-101, MS64 NGC. Near Gem is the highest grade most collectors are likely to encounter of this popular type coin. Indeed, NGC and PCGS have graded only 53 specimens finer (1/16). Lustrous surfaces display soft mauve patination and all design elements are well-struck. A few minute marks preclude Gem classification. Very pleasing eye appeal. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

3978 1854 Arrows, WB-101, MS64 NGC. The popular first year of a two-year design variation of the Seated Liberty type with Arrows at the date, but without the reverse rays that appeared the previous year. This Choice Mint State piece has lovely blue and gold toning over satin luster. Census: 32 in 64, 12 finer (2/16). PCGS# 572087 Base PCGS# 6279

1855-O Arrows Half Dollar Semiprooflike Near-Gem, Obverse Unlisted

3979 1855-O Arrows, WB-101, MS64 PCGS. Unlisted Die Pair. Brilliant, semiprooflike fields stand out on this lustrous and sharply struck New Orleans Arrows half, which is faintly toned a translucent, tangerine-gold hue with sparse blue accents at the margins. The razor-sharp central devices are starkly silver and pristine, with only a handful of insignificant, tiny field marks visible through a lens. Struck from an unlisted die pair, with the obverse not matching any of those shown in the Bugert reference, paired with Reverse D. Despite a huge mintage of nearly 3.7 million pieces, just 30 coins are shown numerically finer at PCGS (1/16). *From The Jim Hilands Collection.* NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

3980 1856 WB-101 MS63 PCGS. CAC. Housed in a first generation PCGS holder with CAC endorsement, this Select Uncirculated 1856 is original and lustrous. Areas of golden-gray patina give the coin a pleasing, natural look, while bright silver luster shines across both sides. Sharply struck with only minimal light abrasions, with die clashing beneath Liberty's elbow and within the reverse shield. The obverse star centers are bold. Population: 10 in 63, 23 finer (2/16). *From The Dr. John Young Collection.* NGC ID# 24HN, PCGS# 572092 Base PCGS# 6287

3981 1858 Type One Reverse, WB-101, MS64 PCGS. Bold mint luster and a sharper strike than usual add crispness to the definition of this often strike-challenged issue. More than 4.2 million pieces were struck, many from worn or clashed dies. This example is semireflective with die polish lines beneath the attractive, reddish-gold toning. A few tiny marks determine the near-Gem grade. Population: 60 in 64, 21 finer (1/16). NGC ID# 24HV, PCGS# 572108 Base PCGS# 6293

3982 1861 WB-101 MS63 PCGS. Strong, satiny mint luster is evident on both sides of this sharply detailed Select specimen. A short contact on Liberty's chin is the only mark of note, while an inconsequential, narrow band of faint tan toning runs past the eagle's beak — perhaps remnants of a bit of struck-in grease. *Ex: Long Beach Signature (Heritage, 6/2011), lot 3651.* NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

3983 1861 WB-101 MS64 PCGS. Orange-gold toning hugs the borders, while the central fields and motifs are brilliant -white. Only a few tiny ticks, hair-thin lines, and faint abrasions are seen across the frosty, lustrous surfaces. A sharply struck near-Gem coin with nice eye appeal in all regards. *From The Jim Hilands Collection.* NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

3984 1861-O Bisected Date, WB-103, Die Pair 13, R.2, MS63 PCGS. According to Bill Bugert's *A Register of Liberty Seated Half Dollar Varieties*, volume IV, Die Pair 13 coins were struck by the Confederacy after the New Orleans Mint was seized in 1861. This well-detailed Select specimen offers lightly marked lustrous surfaces, under shades of golden-brown and lavender-gray toning. Population: 38 in 63, 47 finer (2/16). PCGS# 572147 Base PCGS# 6303

**1861-O WB-104 Seated Half, MS64
Speared Olive Bud Reverse**

- 3985 1861-O Speared Olive, WB-104, Die Pair 15, R.2, MS64 PCGS. CAC.** While the 1861-O half dollars were struck under three different authorities as the country marched into Civil War, the varieties struck by Confederacy hold special interest for Seated half specialists. Seven distinct die pairs make up the C.S.A. varieties, and while a few die pairs show the well-known "Confederate" die cracks, the Speared Olive Bud varieties have great collector appeal as well. This near-Gem is an example of Die Pair 15 (Randy Wiley's W-15), with two parallel lines through the uppermost olive bud on the reverse. The obverse is a Confederate reuse of Obverse 1, the only obverse die with appearances on varieties struck under all three authorities: U.S., State of Louisiana, and C.S.A. Attractive and Choice, the coin is sharply struck and richly toned in shades of blue, pink, lime-green, and olive-gray. Abrasions are limited to a few light lines. PCGS# 572148 Base PCGS# 6303

- 3986 1869 Repunched Date, WB-102, MS62 PCGS. CAC.** The fields are partially prooflike and a sharp strike reveals strong definition throughout. The date is noticeably repunched north on the 1 and less boldly so on the 8. A brilliant and attractive example for the MS62 grade, with a few light abrasions but no heavy marks. Some fleeting gold highlights add appeal to the lustrous surfaces. Housed in a green label holder with CAC endorsement. Population: 16 in 62, 33 finer (1/16). PCGS# 572186 Base PCGS# 6325

- 3987 1875 WB-101 MS64 PCGS.** The reflective fields contrast boldly with the richly frosted, snow-white raised elements of this vibrant, near-Gem half. A faint glimmer of translucent reddish-gold toning rides the rims. A dramatically contrasted Seated half, supremely lustrous for the grade with great visual impact. The eagle's left leg and talon display minor weakness, entirely secondary to the overall eye appeal. Population: 52 in 64 (1 in 64+), 20 finer (1/16). *From The Jim Hilands Collection.* PCGS# 572226 Base PCGS# 6349

**1875-S Seated Liberty Half, MS65
Exceptionally Original Surfaces**

- 3988 1875-S Very Small S, WB-101, Die Pair 8, R.3, MS65 NGC.** Shades of lavender-gray and sea-green toning blanket the well-preserved surfaces of this strongly detailed Gem example. The very small mintmark identifies the WB-101 variety, while an extensive network of reverse die cracks and a diagnostic die line in the left wing defines the reverse die. The fields are reflective and virtually unmarked, while the strike is sharp despite the advanced state of the reverse die. Census (All 1875-S varieties): 30 in 65, 12 finer (2/16). *Ex: The Eric P. Newman Collection, Part II (Heritage, 11/2013 as MS64 NGC. CAC), lot 33739.* PCGS# 572229 Base PCGS# 6351

- 3989 1876-S Open Bud, Very Small S, WB-102, MS63 PCGS. CAC. Unlisted Die Pair.** The fields of this Select Uncirculated half are semireflective and brilliant with strong silver luster. A sharp strike covers the frosty central motifs, with only slight weakness at star 8. Liberty's hair is well-detailed. The Very Small S mintmark is repunched slightly south, from a die pair that does not match any of those listed in the Wiley-Bugert reference. The WB reference lists 43 varieties for 1876-S with the caveat that more will be discovered. Housed in a green label holder with CAC endorsement. NGC ID# BNVD, PCGS# 572242 Base PCGS# 6354

- 3990 1877 Closed Bud, WB-103, MS64 PCGS. CAC.** This attractive Choice specimen shows a Closed Bud below the branch, characteristic of the new Tail Hub 2. The design elements are well-detailed and the lightly marked surfaces are blanketed in shades of lavender and gray toning. Population: 50 in 64, 47 finer (2/16). NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

- 3991 1878 WB-101 MS63 PCGS. CAC.** the 1878 can be thought of as the final "legitimate" mintage of the series, before the Mint's focus switched to silver dollars. Mostly nominal production of Seated halves followed until the end of the series. Still, the 1878 Philadelphia issue is an underrated date in Select Uncirculated and finer grades. This lustrous example is brilliant and frosty with faint golden-gray accents. Housed in a green label holder with CAC endorsement. Population: 17 in 63, 35 finer (1/16). PCGS# 572256 Base PCGS# 6358

**1880 Seated Half, MS65
Brightly Mirrored Fields**

- 3992 1880 Closed Bud, WB-102, MS65 PCGS.** The 1879-1890 half dollar series is a popular one because of the uniformly low mintages. The coins, when encountered, are often far above average in terms of preservation for the grade. This is a solid Gem circulation strike with brightly reflective fields. Dusky gray-lilac patina is scattered across each side. Fully struck in all areas. Population: 20 in 65 (2 in 65+), 31 finer (2/16). NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

- 3993 1889 WB-101 MS63 PCGS.** Attractive satin luster glows from both sides of this album-toned Seated half. Just 12,000 circulation strikes and 711 proofs were struck of the 1889, and while many were preserved by collectors, few can equal the eye appeal of this Select Uncirculated example. Orange and blue border toning surrounds caramel-gold fields and silver central motifs. A sharp strike attends smooth surfaces that show just a few wisplike abrasions. PCGS# 572274 Base PCGS# 6371

PROOF SEATED HALF DOLLARS

- 3994 1862 PR63 PCGS.** Fully struck with razor-sharp definition on the motifs, this mildly contrasted Select proof is essentially mark free except for the faint vertical die polish lines and a few scattered lines from handling that impart a slightly cloudy, ivory-silver patina. The Mint reduced the number of proofs to 550 pieces in 1862, a reaction to the overly optimistic proof productions of 1860 and 1861 when many went unsold. NGC ID# 27TN, PCGS# 6416

1881 Seated Half, PR65 Cameo Deep, Silvery Mirrors

- 3995 1881 PR65 Cameo NGC.** Only 975 proofs were produced in 1881, and today an estimated 90 pieces survive in Gem or better Cameo condition. This example would have graded even higher if not for a planchet irregularity on Liberty's hand and pole as well as a few planchet problems elsewhere on Liberty. Possibly struck through something, two streaks start below the left leg and travel up into the field. The devices show excellent contrast on the deeply mirrored proof fields. Census: 19 in 65 Cameo (1 in 65 ★ Cameo), 20 finer (2/16). NGC ID# 27UG, PCGS# 86442

1884 Seated Half, PR66 Cameo Glassy Mirrors, Bold Contrast

- 3996 1884 PR66 Cameo PCGS. WB-101.** Satiny devices are boldly contrasted atop glasslike mirroring in the fields. The interiors are near-brilliant, and the peripheries deepen to lavender-gold and sea-green hues. A lack of contact marks or obvious hairlines is consistent with the Premium Gem grade, a level at which this proof Seated half dollar is rarely seen with a Cameo designation. Population: 16 in 66 (1 in 66+) Cameo, 2 finer (1/16). NGC ID# 27UK, PCGS# 86445

- 3997 1885 PR64 PCGS.** Flashes of brilliance mingle with dappled cobalt-blue, rose, crimson, and gold patina of this well-preserved near-Gem proof. Like its contemporaries, the 1885 enjoys added date pressure because of the issue's low total mintage. The Mint satisfied collector demand by striking 930 proofs in 1885, plus 5,200 circulation strikes. NGC ID# 27UL, PCGS# 6446

1886 Seated Liberty Half, Colorful PR67 Just One Piece Finer at NGC

- 3998 1886 PR67 NGC.** A polychromatic palette of rainbow colors encircles the obverse of this Superb Gem, while the reverse coloration is less concentric but even more intense. Electric blue, magenta, and fawn-gold hues predominate over the deeply mirrored fields, while the equally toned motifs are frosted and pristine. The mintage of 886 proofs supplements a circulation strike production of just 5,000 pieces, putting pressure on coins of both formats in the highest grades. PCGS and NGC combined report eight examples at the PR67 level with one finer. NGC Census: 4 in 67, 1 finer (1/16). NGC ID# 27UM, PCGS# 6447

1888 Seated Liberty Half, PR65 Cameo Frosty, Boldly Contrasted Devices

- 3999 1888 PR65 Cameo PCGS. CAC.** Exciting cameo contrast is noted on both sides of this Cameo Gem. The centers are very nearly untuned while some light cinnamon coloration clings to the rims. The fields are nearly free of toning, providing stark white-on-black contrast. A bold strike defines each detail, and consistent with the Gem grade, there is nary a mark worthy of individual mention. Population: 11 in 65 Cameo, 5 finer (1/16). Ex: FUN Signature (Heritage, 1/2008), lot 1639. NGC ID# 5H74, PCGS# 86449

1889 Half Dollar, PR66 Just 711 Proofs Struck

- 4000 1889 PR66 PCGS. CAC.** A splendid Premium Gem proof, beautifully preserved with a razor-sharp strike and attractive, porthole toning on both sides. The brighter areas display pale reddish-gold color, while the more richly toned lower portions of the coin meld shades of sea-green, azure-blue, violet, and amber-gold. The central motifs are lightly frosted while immersed in the consistent toning pattern. CAC endorsed with outstanding mirrorlike appeal. Population: 15 in 66 (2 in 66+), 3 finer (2/16). NGC ID# 27UR, PCGS# 6450

BARBER HALF DOLLARS

- 4001 1892 MS65 NGC. CAC.** Golden-gray and forest-green encompass this first-year Barber half Gem, though glimpses of brilliance persist. Lustrous and well-struck with a pristine reverse and only trivial obverse grazes. The 1892 was saved more than most subsequent issues, but originally toned examples of the present quality are always sought for type purposes. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

1892-O Half Dollar, MS64+ Attractive Toning

- 4002 1892-O MS64+ PCGS.** First-year New Orleans Barber halves (390,000 coins minted) are seldom seen in Uncirculated condition, and Choice representatives comparable to this piece are very scarce. The design features are typically struck with attractive sea-green, cobalt-blue, and crimson toning that frames partly brilliant, softly frosted centers. The fields are deeply prooflike. Population: 45 in 64 (4 in 64+), 22 finer (2/16). NGC ID# 27UW, PCGS# 6462
- 4003 1892-O Micro O, FS-501, PCGS Genuine.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AG specimen that is minutely porous. The environmental damage is not immediately evident on this attractive light gray example that shows ebony patina around the devices.
- 4004 1897-S XF45 PCGS.** Well-struck with little loss of detail from wear. This Choice XF 1897-S Barber half displays pleasing champagne toning on the obverse and deep olive-gray over the reverse. A small planchet lamination at the F in OF is the only mentionable surface characteristic. This San Francisco issue is a challenging semikey in the upper circulated grades. NGC ID# 24M2, PCGS# 6479

1899 Barber Half Dollar, MS65 Popular Type-Coin Issue

- 4005 1899 MS65 PCGS. CAC.** The 1899 Barber half dollar is popular as the final issue of the 1800s and is often chosen for type purposes. This delightful Gem exhibits pinpoint definition on all design elements, and the well-preserved, lustrous surfaces are blanketed in shades of pale gold and lavender-gray toning. Population: 25 in 65 (2 in 65+), 12 finer (1/16). NGC ID# 24M6, PCGS# 6483

- 4006 1902-O MS63 PCGS.** The 1902-O Barber half dollar was not a well-produced issue and most examples seen are softly struck, with insipid mint luster. This attractive Select example is well-detailed for the issue, with a touch of the usual softness on the central reverse. The lightly marked surfaces are toned in shades of magenta, greenish-gold, and gray. A challenging New Orleans issue. Population: 14 in 63, 23 finer (2/16). NGC ID# 24MG, PCGS# 6493
- 4007 1905-O MS63 PCGS.** A lustrous Select example of this slightly better New Orleans issue, showing dusky olive-gold toning over lightly marked surfaces. The eagle's right (facing) wing junction is weak, as expected, but the talons and stars are sharp. NGC ID# 24MS, PCGS# 6502
- 4008 1906 MS64+ PCGS.** While Gems are rare, this high-end Choice 1906 Barber half remains within the grasp of most series enthusiasts. The stars and Liberty's portrait are well-defined, while the eagle's right (facing) talons and wing junction show typical softness. Both sides are lustrous and toned light golden. NGC ID# 24MU, PCGS# 6504
- 4009 1906-D MS64 PCGS.** Flashy silver-white surfaces provide this specimen with strong visual appeal. Only faint hints of toning are present. The strike is sharp, with minor weakness at the eagle's left talon. The few marks and grazes appearing do not pose a distraction. Population: 58 in 64 (1 in 64+), 27 finer (1/16). NGC ID# 24MV, PCGS# 6505

1907 Half Dollar, MS66 Frosty Original Luster

- 4010 1907 MS66 PCGS. CAC.** As with most issues in the Barber half dollar series, the 1907 becomes conditionally rare above MS65. This frosty example is Registry Set quality. Exceptional preservation emerges from beneath warm champagne toning with a few russet flecks near the borders. The eagle's right (facing) wing junction is predictably weak, although the obverse is better defined. Population: 5 in 66, 1 finer (1/16). NGC ID# 24MY, PCGS# 6508
- 4011 1911 MS64 NGC.** Stone-cold, brilliant surfaces are brightly lustrous and sharply struck on the obverse, with the usual blending at the right shield/wing junction, leg, and claw on the reverse. A few light marks and lines determine the near-Gem level. Relatively few 1911 halves achieve a higher grade. Census: 58 in 64, 30 finer (1/16). NGC ID# 24ND, PCGS# 6521

1912-S Half Dollar, MS65
Pleasing Luster

- 4012 1912-S MS65 PCGS. CAC.** The 1912-S may seem like a common-date Barber half dollar: the original mintage of 1.3 million pieces is not low for the series, and survivors are relatively available in grades up to and including the MS63 level. In the finer Mint State grades, however, the 1912-S is a noteworthy rarity, and few examples match the technical quality of the current example. The luster is satiny, and the strike is bold in most areas. The otherwise olive-gray surfaces reveal blushes of dappled light-purple patina on the obverse, while a small abrasion on the upper right portion of the eagle's shield is noted as the only possible distraction. Population: 23 in 65, 8 finer (2/16).
Ex: New York Signature (Heritage, 11/2003), lot 6808. NGC ID# 24NJ, PCGS# 6526

- 4013 1915-D MS64 PCGS.** This available final-year issue is popular among type collectors. On the present example, Liberty's portrait is well brought up, and the eagle shows bold definition. Satiny luster displays pleasant champagne toning with speckled russet overtones in the margins. NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

- 4014 1897 PR64 PCGS.** This attractive proof shows considerable cameo contrast on the reverse but less so on the obverse. Light golden interiors warm bold design elements, while the peripheries display vivid amber-orange and ocean-blue toning. NGC ID# 24NZ, PCGS# 6544
- 4015 1900 PR63 Cameo PCGS.** Untoned and boldly struck, this Select Cameo proof will appeal to a range of type collectors. Field-device contrast is considerable. Light hairlines in the fields limit the grade. Challenging in the Cameo category. Population: 12 in 63 Cameo, 74 finer (1/16). NGC ID# 24P4, PCGS# 86547
- 4016 1902 PR63 PCGS.** Dappled shades of sea-green and lilac toning blanket the lightly marked surfaces of this impressive Select example, with reflective fields that shine through the patina. The design elements are sharply detailed except for a touch of softness on the shield point. NGC ID# 24P6, PCGS# 6549
- 4017 1905 PR63 PCGS.** Vividly toned in lemon-gold, aquamarine, and lavender-gray hues, this Select 1905 proof half dollar displays bold design elements and a hint of cameo contrast. Scattered hairlines on Liberty's cheek are the most noticeable grade-limiting factor. NGC ID# 24P9, PCGS# 6552
- 4018 1908 PR64+ PCGS. CAC.** A mid-level example of this popular proof issue, coming from a small 545-coin mintage. This Plus-graded near-Gem displays modest contrast beneath light golden toning. A few trivial hairlines limit the grade but have little impact on the eye appeal. Population: 40 in 64 (4 in 64+), 56 finer (1/16). NGC ID# 24PC, PCGS# 6555

WALKING LIBERTY HALF DOLLARS

- 4019 1917 MS66 PCGS.** Satiny luster runs over both sides of this lightly toned Premium Gem, showing only scattered, grade-consistent minor ticks along with a bold strike and excellent eye appeal. This high-mintage issue of more than 12 million coins is often chosen for type purposes. Population: 96 in 66 (1 in 66+), 3 finer (1/16). NGC ID# 24PP, PCGS# 6569

- 4020 1917-D Obverse MS64 ANACS.** The prevailing rose-gray surfaces deepen in color a tad on the reverse, but both sides show ample luster, a good strike, and few marks for the grade, the delimiting factor being, rather, a few minor ticks, chiefly in the right obverse field. NGC ID# 24PR, PCGS# 6570

- 4021 1917-D Obverse MS64 PCGS.** Satiny luster displays warm golden toning on this Choice Obverse Mintmark 1917-D half dollar, while the surfaces reveal only minimal abrasions. The strike is well-executed, and the eye appeal is pleasing for the grade. NGC ID# 24PR, PCGS# 6570

- 4022 1917-D Obverse MS64 PCGS. CAC.** This satiny 1917-D Obverse Mintmark half is well-struck and minimally abraded. Both sides exhibit soft golden toning overall with deep russet overtones in portions of the recesses. The CAC endorsement will add to the appeal for many collectors. CAC: 37 in 64, 13 finer (1/16). NGC ID# 24PR, PCGS# 6570

- 4023 1918-D AU58 PCGS. CAC.** Substantial luster remains in the fields of this near-Mint 1918-D Walker, a CAC-endorsed example of this slightly better Denver issue. Liberty's thigh and the eagle's central feathers show moderate weakness, as is typical of the date. There are no major abrasions. NGC ID# 24PW, PCGS# 6575

- 4024 1920-D AU58 PCGS.** A trace of rub appears on the high points of this near-Mint example with virtually full silver luster on the untuned surfaces. A matching set of Walking Liberty half dollars at this grade level will pose a challenge. NGC ID# 24R4, PCGS# 6581

- 4025 1920-S AU58+ PCGS.** There were relatively few West Coast collectors in 1920, and as a result, most 1920-S half dollars are well worn. The present lustrous half dollar displays only a hint of straw-gold and pearl-gray toning. Marks are absent and many collectors would accept the coin as Mint State. NGC ID# 24R5, PCGS# 6582

- 4026 1927-S MS63 PCGS. CAC.** Bright, satiny luster illuminates this Select 1927-S half dollar, a slightly better 1920s issue. The strike is sharp, and faint, mint-made die striae spread across the fields. Half dollar coinage was sporadic during this decade, and in 1927, only the San Francisco Mint struck the half dollar denomination. NGC ID# 24RA, PCGS# 6587

- 4027 1929-D MS64+ PCGS. CAC.** This attractive Plus-graded Choice example displays well-detailed design elements, with just a touch of the usual softness on Liberty's wreath hand, and well-preserved lustrous surfaces. NGC ID# 24RC, PCGS# 6589

1929-D Walking Liberty Half, MS65
Green Label Holder, Green CAC

- 4028 1929-D MS65 PCGS. CAC.** Walking Liberty half dollars were coined exclusively at the branch Mints in 1929. This lovely Gem is housed in a green-label PCGS holder and exhibits frosty silver luster with minimal marks on each side. The surfaces host light gold toning with a few faint splashes of deeper gold on each side. PCGS has certified 66 finer examples of this conditionally scarce issue (2/16).
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3689. NGC ID# 24RC, PCGS# 6589
-

**1929-D Walker, MS66
Almost Unavailable Finer**

- 4029 1929-D MS66 PCGS.** The 1929-D was the first half dollar issued from that mint since the recession-induced halt of coinage in 1921. This Premium Gem example is conditionally scarce, and finer pieces are almost unobtainable. The design elements are boldly rendered and reside amid satiny, luminous fields. A hint of light champagne toning graces each side. Population: 65 in 66 (2 in 66+), 1 finer (1/16). NGC ID# 24RC, PCGS# 6589

- 4030 1934-D MS66 PCGS.** A delightful example from the first year of the so-called "Short Set" of Liberty Walking half dollars, this Premium Gem exhibits frosty silver luster beneath wispy champagne toning. PCGS has only certified four finer examples (2/16). NGC ID# 24RG, PCGS# 6593

- 4031 1934-D MS66 PCGS.** Small D. Delicate chestnut toning visits this high grade Great Depression-era half dollar. Booming luster dominates well-struck surfaces. Wispy grazes on the front wing and right obverse field decide the grade. PCGS has seen four finer examples, NGC only one (1/16). NGC ID# 24RG, PCGS# 6593

**1935 Half Dollar, MS67
Prohibitively Rare Any Finer**

- 4032 1935 MS67 PCGS.** CAC. Superb Gem 1935 Walkers are scarce, and fewer than two dozen are CAC-endorsed. This magnificent, lightly champagne-toned example displays mostly bold design definition and beautifully preserved fields. Only Liberty's branch hand and the eagle's trailing leg show measurable weakness. Eye appeal is excellent. Population: 50 in 67 (3 in 67+), 1 finer (1/16). NGC ID# 24RJ, PCGS# 6595

- 4033 1938 MS67 PCGS.** This impressive Superb Gem displays well-detailed design elements, with some separation between Liberty's thumb and finger, and impeccably preserved surfaces that radiate satiny mint luster. Population: 93 in 67 (1 in 67+), 1 finer (1/16). NGC ID# 24RU, PCGS# 6604

- 4034 1938 MS67 PCGS.** This delightful Superb Gem displays well-detailed design elements with a trace of the usual softness on Liberty's wreath hand and the eagle's leg. The well-preserved surfaces radiate vibrant mint luster. Population: 93 in 67 (1 in 67+), 1 finer (1/16). NGC ID# 24RU, PCGS# 6604

- 4035 1939-D MS67 PCGS.** CAC. This delightful Superb Gem exhibits well-detailed design elements and impeccably preserved surfaces with vibrant mint luster on both sides. The mostly brilliant surfaces display a crescent of vivid greenish-gold and amber toning along the lower obverse. Population: 85 in 67 (4 in 67+), 2 finer (1/16). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

- 4036 1940 MS67+ PCGS.** CAC. Pastel apple-green, rose-red, and straw-gold toning enriches this lustrous and crisply struck Superb Gem. The fields are unabrased and the eye appeal is magnificent. Although a small number are certified finer, the present piece will satisfy even the most demanding specialist. NGC ID# 24RZ, PCGS# 6609

- 4037 1942-D MS67+ PCGS.** An impressive, high-end Superb Gem — only slightly removed from the finest at PCGS. The strike is decidedly above average for the 1942-D, with sharp head definition and some thumb separation on the branch hand. The eagle's trailing leg lacks about 30% of its plumage detail. Faint golden toning enriches the satin-smooth, lustrous surfaces. Population: 6 in 67+, 5 finer (1/16). NGC ID# 24S7, PCGS# 6615

- 4038 1942-S MS66+ PCGS.** CAC. The fields display satin-smooth appeal and are fully lustrous with an umbrella of tan-gold toning. The toning pattern is flip-flopped on the reverse, with deeper amber-gold shades added to the palette. Silver luster counterbalances the toning. Sharply struck for the issue, which has yielded precious few high-end Premium Gems and even fewer finer examples. Population: 55 in 66+, 9 finer (2/16). NGC ID# 24S8, PCGS# 6617

- 4039 1943-S MS66+ PCGS.** CAC. FS-101. Finer examples of this late-series San Francisco issue are scarce. This Plus-graded Premium Gem displays rich, frosty luster and unmarred surfaces. Liberty's branch hand and the eagle's trailing leg show slight weakness. Each side is slightly golden in color. FS-101 is a lesser *Cherrypickers'* variety that shows light doubling on the obverse from a doubled working hub. Many 1943-dated halves show this characteristic. NGC ID# 24SB, PCGS# 6620

- 4040 1943-S MS67 ★ NGC.** Trumpet Tail S. IN GOD WE TRUST is boldly hub doubled, a feature common to many 1943 Walking Liberties. A thin iridescent crescent of copper and indigo toning graces the obverse, with a touch of color on the lower reverse. Somewhat flatly struck through the centers, but exhibiting superior satiny luster. A couple of hidden scratches are noted on the eagle. Census: 26 in 67 (1 in 67 ★), 0 finer (2/16). NGC ID# 24SB, PCGS# 6620

- 4041 1944 MS67 PCGS.** A Registry-grade Superb Gem example of this plentiful Philadelphia issue, showing bold motifs and frosty luster. Much of each side displays dusky silver color, while the obverse periphery shows deep amber, crimson, and gold toning. PCGS has seen only one MS68 coin finer (2/16). NGC ID# 24SC, PCGS# 6621

- 4042 1944 MS67 PCGS.** CAC. A lustrous butter-gold Superb Gem. The strike is exceptionally sharp on the high points of Liberty, and a loupe reveals only trivial imperfections. Certified in a green label holder. CAC: 63 in 67, 0 finer (2/16). NGC ID# 24SC, PCGS# 6621

- 4043 1944-S MS66+ PCGS.** CAC. The Plus designation sets this high-end Premium Gem apart from its peers, and finer coins are rarely seen. The strike is sharp in most regions but characteristically incomplete on Liberty's branch hand and the eagle's trailing leg. Frosty luster shows a hint of light golden color emerging from the peripheries. PCGS lists eight finer representatives (2/16). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

**1946 Half Dollar, MS66
Doubled Die Reverse**

- 4044** 1946 Doubled Die Reverse, FS-801, MS66 PCGS. CAC. Bold die doubling is evident on all reverse design elements, making this *Guide Book* variety popular among collectors. The strike is well-executed, and the satiny surfaces display soft champagne-gold toning. A few tiny ticks are not out of line for the grade. Population: 14 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 24SJ, PCGS# 145152 Base PCGS# 6632

**PROOF WALKING LIBERTY
HALF DOLLARS**

**1936 Half Dollar, PR66
Near-Cameo Contrast**

- 4045** 1936 PR66 PCGS. This extraordinary Premium Gem proof exhibits rich iridescent toning along the lower obverse and upper reverse borders. The fields are deeply mirrored around lustrous devices. Although undesignated, this piece has noticeable cameo contrast. PCGS has only certified 38 finer proofs of this issue (2/16). NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, PR66+
Attractive Original Toning**

- 4046** 1936 PR66+ PCGS. A beautifully preserved example of the most conditionally scarce issue in the proof Walker series. This high-end Premium Gem displays a fully rendered strike with milky-gold toning over the interiors and vivid multicolor hues around the obverse periphery. PCGS has seen 38 finer submissions, including possible duplication (2/16). NGC ID# 27V4, PCGS# 6636

- 4047** 1937 PR67 PCGS. CAC. A scarce early proof that is often overlooked as it is chronologically next to the key 1936. Only 5,728 proofs were struck — few can equal the technical preservation and originality of this lovely piece. Deeply mirrored with slight haziness around the margins and a dash of russet at the top of the eagle's right (facing) wing.
Ex: Long Beach Signature (Heritage, 2/2007), lot 4055; Long Beach Signature (Heritage, 5/2012), lot 4166. NGC ID# 5ESS, PCGS# 6637

- 4048** 1939 PR67+ NGC. CAC. This spectacular Plus-graded Superb Gem displays virtually pristine surfaces with deeply mirrored fields and delicate shades of pale gold toning. The design elements are sharply detailed throughout and eye appeal is terrific. NGC ID# 5ESU, PCGS# 6639

FRANKLIN HALF DOLLARS

- 4049** 1949-S MS67 PCGS. CAC. An almost flawlessly preserved 1949-S Franklin half dollar, showing rich forest-green, crimson, and golden-gray toning on the obverse with lighter champagne-gray and speckled olive over the reverse. The lower bell is ill-defined, but the eye appeal is hardly hindered. Population: 9 in 67, 0 finer (1/16). NGC ID# 24SV, PCGS# 6655

- 4050** 1951-S MS66+ Full Bell Lines PCGS. With only five Superb Gems finer (1/16), this Plus-graded Full Bell Lines Premium Gem is well-within the ranks of Registry Set considerations. The strike is bold, and the surfaces display frosty luster. The obverse is light champagne with russet borders, while the reverse shows warm golden toning. NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

- 4051** 1951-S MS66+ Full Bell Lines PCGS. CAC. The 1951-S Franklin half dollar is a scarce issue in MS66, with the Full Bell Lines designation, and finer examples are very rare. This Plus-graded Premium Gem offers well-detailed design elements and well-preserved, lustrous surfaces under shades of sea-green, violet, and lavender-gray toning. PCGS has graded five numerically finer examples (1/16). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

**1952 Half Dollar, MS67 Full Bell Lines
Rare, Tied for Finest Certified**

- 4052** 1952 MS67 Full Bell Lines PCGS. One of 20 Superb Gem 1952 Franklin halves that rank as the finest in Full Bell Lines at PCGS (1/16). This piece is boldly struck, and displays frosty, largely unabraded luster. Dusky ice-blue and grayish toning dominates each side but cedes to olive-gold overtones around the borders. Ideal for Registry Set purposes. NGC ID# 24T3, PCGS# 86661

- 4053** 1952-D MS66+ Full Bell Lines PCGS. CAC. With only two coins finer at PCGS (2/16), this Plus-graded 1952-D Franklin half is well-within the ranks of Registry Set contenders. The strike is bold, and the frosty surfaces are free of severe abrasions. Each side is cast in light champagne-gold toning with a ring of deeper color around the outer obverse periphery. NGC ID# 24T4, PCGS# 86662

- 4054** 1953-D MS66+ Full Bell Lines PCGS. CAC. An exceptionally well-preserved Full Bell Lines example of this conditionally elusive Denver issue. This CAC-endorsed, Plus-graded Premium Gem boasts lovely pastel toning and frosty luster. Only two Superb Gems are finer at PCGS (1/16). NGC ID# 24T7, PCGS# 86665

- 4055 1953-S MS67 PCGS. CAC.** A blush of deep sun-gold toning covers much of the obverse of this top-grade 1953-S half, while the reverse shows crimson and forest-green peripheral hues around champagne interior regions. The lower bell is weak, although the obverse portrait is well-defined. NGC ID# 24T8, PCGS# 6666

KENNEDY HALF DOLLAR

- 4056 1964-D MS67 PCGS.** Type Two Reverse. A Registry coin through and through, this Superb Gem 1964-D Kennedy half is second to only a single finer coin at PCGS. The obverse portrait is sharp, and both sides display unabraded, satiny luster. Champagne toning blankets most of the surfaces, although the obverse has additional amber-gold, olive, and burnt-orange hues around the left margin. Population: 41 in 67, 1 finer (1/16). NGC ID# 24U3, PCGS# 6707

MODERN BULLION COINS

- 4057 1986 Half-Ounce Gold Eagle MS70 NGC.** The debut half-ounce Gold Eagle of 1986 is in high demand at the perfect MS70 grade level. The Roman Numeral date was retained on this issue and on each succeeding issue until 1992. This piece is fully struck and beautifully preserved with satiny golden luster. NGC ID# 28Y8, PCGS# 9805

1987 Half-Ounce Gold Eagle, MS70 Rare in Perfect Condition

- 4058 1987 Half-Ounce Gold Eagle MS70 NGC.** The 1987 half-ounce Gold Eagle bullion issue has proven difficult to certify at the perfect MS70 level. NGC has so-graded only 35 coins, PCGS just six (2/16). This example shows full detail and frosty golden luster. The preservation and eye appeal are comparably unsurpassable. NGC ID# 26N8, PCGS# 9812

- 4059 1987 One-Ounce Gold Eagle MS70 NGC.** The 1987 Gold Eagle had a mintage in excess of 1 million coins, but pieces certified MS70 are scarce. This example displays glistening, satiny luster with untouched surfaces and full detail. Outstanding eye appeal. NGC ID# 26PB, PCGS# 9814

1989 Tenth-Ounce Gold Eagle, MS70 Rare So Fine at PCGS

- 4060 1989 Tenth-Ounce Gold Eagle MS70 PCGS.** Although this Roman Numeral-dated tenth-ounce gold bullion issue had a substantial mintage of nearly 265,000 pieces, PCGS has only seen 17 submissions that qualify for the perfect MS70 grade (2/16). This piece is fully struck and displays satiny golden luster. Eye appeal is excellent. NGC ID# 26KY, PCGS# 9828

- 4061 1990 Half-Ounce Gold Eagle MS69 NGC.** A lovely and lustrous lemon-gold representative. The strike is full, and imperfections are confined to a minuscule lint mark on the upper reverse field. A popular low mintage issue. NGC ID# 26NB, PCGS# 9842

- 4062 1990 Half-Ounce Gold Eagle MS69 PCGS.** Among half-ounce gold eagle issues struck for bullion buyers, the 1990 has one of the lowest mintages. This high-grade example has a complete strike and vibrant cartwheel luster. A powerful loupe reveals only inconsequential imperfections. NGC ID# 26NB, PCGS# 9842

- 4063 1991 Quarter-Ounce Gold Eagle MS70 NGC.** The 1991 quarter-ounce gold eagle has an unusually low mintage, particularly when compared with the 726,031 pieces struck in the introductory year of 1986. At the MS70 level, the 1991 is scarce yet collectible. This coruscating sun-gold example offers a precise strike and ideal preservation. NGC ID# 26M7, PCGS# 9850

1991 Half-Ounce Gold Eagle, MS69 Final Issue With Roman Numeral Date

- 4064 1991 Half-Ounce Gold Eagle MS69 NGC.** This near-Perfect 1991 half-ounce Gold Eagle will appeal to Registry collectors as well as bullion coin enthusiasts and folks acquiring birth-year sets. This was the final quarter-ounce issue featuring the Roman Numeral date, and it had a moderately small mintage of 36,100 coins. Pieces grading finer than this coin are seldom seen. This piece displays sharp detail and virtually perfect preservation. NGC ID# 26NC, PCGS# 9852

1991 Half-Ounce Gold Eagle, MS70 Scarce Top-Grade Example

- 4065 1991 Half-Ounce Gold Eagle MS70 NGC.** Despite thousands of coins in lower grades, NGC has seen only 77 1991 half-ounce Gold Eagles in perfect MS70 condition (2/16). This piece is fully struck and flawlessly preserved. The Gold Eagle collector will recognize the scarcity of this piece. NGC ID# 26NC, PCGS# 9852

- 4066 1995 Half-Ounce Gold Eagle MS69 PCGS.** This immaculate and intricately impressed representative offers booming luster and outstanding eye appeal. A blush of tan toning is noted near the talons of the flying eagle. A better issue, since bullion investors in 1995 generally preferred to purchase one-ounce eagles. NGC ID# 26NG, PCGS# 9892

- 4067 1996 Half-Ounce Gold Eagle MS69 NGC.** Among non-mintmarked half ounce gold eagles, the 1996 has the third-lowest mintage. Fewer than 40,000 pieces were issued. This coruscating example is fully defined and shows only the faintest obverse contact. NGC ID# 26NH, PCGS# 9906

- 4068 1997 Tenth-Ounce Platinum Eagle MS70 PCGS.** From a mintage of 70,250 coins, PCGS has certified only 26 pieces in perfect MS70 condition (2/16). This tenth-ounce 1997 Platinum Eagle displays rich silvery luster with stark contrast. Eye appeal is superb. NGC ID# 26S5, PCGS# 99754

**1999-W Tenth-Ounce Gold Eagle, MS70
FS-401, Unfinished Proof Dies**

- 4069 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 PCGS.** The five dollar counterpart to the quarter-ounce 1999-W Gold Eagle that was struck with an unfinished West Point die pair. West Point Gold Eagle dies typically produced proof coinage in 1999, but a small run of regular bullion pieces were inadvertently struck with the W mintmark. This perfectly preserved example is fully struck and lustrous. PCGS has seen 43 examples in this perfect condition (2/16). NGC ID# 26LB, PCGS# 99940

- 4070 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** A blunder at the West Point Mint led to the unauthorized appearance of the W mintmark on select quarter-ounce gold eagles during the Y2K frenzy of 1999. A similar error occurred on the tenth-ounce issue. Both issues have estimated mintages of a few thousand pieces. This lustrous sun-gold ten-dollar example is intricately struck and immaculate. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 4071 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** During the Y2K year of 1999, the West Point mintmark was intended only on proof bullion issues. Nonetheless, Uncirculated finish tenth-ounce and quarter-ounce pieces emerged bearing inadvertent W mintmarks. They remain scarce relative to their sans-mintmark counterparts. The present honey-gold example appears pristine and fully struck. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 4072 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** A popular *Guide Book* variety, struck with unfinished proof dies showing the West Point mintmark. Only six coins are finer than this example at PCGS (2/16). The strike is sharp, and the satiny golden surfaces show virtually flawless preservation. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 4073 2001 Half-Ounce Gold Eagle MS70 PCGS.** This fully struck butter-gold example is as made save for a fleck above the flying eagle's shoulder. After the Y2K fears of 1999 failed to materialize, mintages of half-ounce eagles declined in subsequent years. The 2001 is a better issue with a production of less than 50,000 pieces. Surprisingly few have attained the ideal grade at PCGS. Population: 41 in 70 (1/16). NGC ID# 26SV, PCGS# 9957

- 4074 2002 Half-Ounce Gold Eagle MS70 PCGS.** Despite a mintage exceeding 70,000 pieces, the 2002 half-ounce Gold Eagle is elusive in PCGS-graded MS70. Registry collectors have only 27 coins from which to choose at this level (2/16). This piece is fully struck with flawless golden luster. Highly eye-appealing. NGC ID# 26NN, PCGS# 9962

**2006-W One-Ounce Gold Eagle
PR70 Deep Cameo
20th Anniversary, First Strike**

- 4075 2006-W One-Ounce Gold Eagle, 20th Anniversary Set, First Strike, PR70 Deep Cameo PCGS.** The famous 20th Anniversary sets included three formats for the one ounce gold coin: the reverse proof, burnished, and regular proof. This incredible specimen represents the regular proof issue, with fully struck frosty devices and deeply mirrored fields that show no visible flaws. An important opportunity to secure an unimprovable representative of this limited edition modern bullion proof issue. NGC ID# 28ZH, PCGS# 89997

- 4076 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 NGC.** The iconic 2006 20th anniversary reverse proof one-ounce gold eagle. This piece is flawlessly preserved and beautifully struck, showing thick mint frost in the fields and gleaming golden mirroring over the relief elements. NGC ID# 28ZH, PCGS# 89994

**2009 Ultra High Relief Twenty, MS70
First Strike**

- 4077 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, First Strike, MS70 PCGS.** The First Strike coins were those issued within the first 30 days of production for the 2009 Ultra High Relief twenty dollar bullion issue. Perfectly preserved examples such as this PCGS coin are in high demand. This piece displays full relief detail with satiny golden luster and perfect preservation. For the collector who missed a brief opportunity to acquire this issue directly from the Mint in 2009, here is an outstanding second chance. NGC ID# 2TY2, PCGS# 407405

**2009 Ultra High Relief Twenty Dollar
Full Detail, MS70 Prooflike**

- 4078 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** The 2009 Ultra High Relief gold twenty dollar continues to be among the most popular issues of the modern era. Its double-thick, eagle-sized planchet is unique among modern bullion coinage, and the old-time resurrection of the original Saint-Gaudens design only adds to the appeal. This piece is fully prooflike and perfectly preserved. NGC ID# 26S4, PCGS# 506602

**2009 Ultra High Relief Gold Twenty
MS70 Prooflike**

- 4079 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** A glimmering Prooflike example of this famous modern issue, showing full design rendering in the original 1907 high relief that Saint-Gaudens envisioned. Preservation is flawless, and the eye appeal is correspondingly superb. Arguably one of the most sought-after modern issues from the United States Mint. NGC ID# 26S4, PCGS# 506602

COINS OF HAWAII

**1847 Hawaii Cent, MS63 Red
Well-Struck and Pleasing**

- 4080 1847 Hawaii Cent MS63 Red PCGS. Medcalf 2CC-2.** Crosslet 4, 15 Berries. A pleasing example of this scarce 1847 Hawaii cent, encapsulated in a green-label PCGS holder. Much red remains, although portions of each side may also be beyond the usual definition. A well-struck piece, free of any mentionable impairments aside from a linear planchet flaw that runs near the collar. Population: 10 in 63 Red, 4 finer (1/16).
Ex: Dallas Signature (Heritage, 10/2006), lot 1948, brought \$4,600; Central States Signature (Heritage, 5/2007), lot 5503, realized \$3,680. NGC ID# 2C52, PCGS# 10967

- 4081 1883 Hawaii Quarter MS66 NGC.** The 1883 Hawaiian quarter is elusive at the Premium Gem level and genuinely rare any finer. This piece displays tack-sharp detail, illuminated by radiant cartwheel luster. Hints of amber-gold toning accent otherwise bright surfaces. No distracting abrasions are present. NGC lists seven finer representatives (1/16). NGC ID# 2C5B, PCGS# 10987

- 4082 1883 Hawaii Half Dollar MS63 PCGS.** Full luster appears underneath deep gold, ebony, and iridescent toning on this Select Mint State half dollar, known as a "hapalua" in Hawaii. This piece is sharply detailed and attractive. NGC ID# 2C5B, PCGS# 10991

SO-CALLED DOLLAR

- 4083 1909 Hendrik Hudson Gold So-Called Dollar, HK-371, DeLorey-75, MS64 PCGS.** The Hudson-Fulton Exposition was held in New York City in 1909. Noted numismatist Thomas Elder issued two medal designs, one for explorer Hudson, and the other for inventor Fulton. Both were offered in various diameters and alloys. The mintage for the 15 mm matte-finish Hudson gold "dollar" was 50 or 100 pieces, with both figures reported in various Elder catalogs. The present well-struck example is unmarked and offers superior eye appeal for the designated grade.

MINT SETS

- 4084 1947 Double Mint Set Uncertified.** This double Mint Set includes 28 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1947 (San Francisco did not strike half dollars that year). The coins are in the original cardboard holders and the outer kraft envelope is present. The mailing envelope is absent. The coins range between lightly toned and richly toned. The most attractive toning is on the reverse of a Philadelphia half dollar. The coins average MS64 in grade. (Total: 28 coins)

- 4085 1948 Double Mint Set Uncertified.** San Francisco did not coin Franklin halves during 1948, but the present double mint set includes two each of the other Philadelphia, Denver, and San Francisco issues struck for circulation that year. The coins are housed in the issued cardboard holders. The outer kraft envelope is present, but the mailing envelope is absent. The coins are lightly to moderately toned. The average grade is MS64 to MS65. (Total: 28 coins)

- 4086 1949 Double Mint Set Uncertified.** This double Mint Set includes 28 coins, two of each denomination issued by the three active mints in 1947. San Francisco did not strike half dollars in 1949. The coins are in the issued cardboard holders and the outer kraft envelope is present. No mailing envelope is included. The coins range between lightly toned and extensively toned. The grades range between MS63 and MS65. (Total: 28 coins)

- 4087 1953 and 1956 Double Mint Sets Uncertified.** This lot includes a 1953 PDS double mint set and a 1956 PD double mint set. No 1956-D half dollars were struck. The outer kraft envelopes are included but no mailing envelopes are present. The coins are minimally to moderately toned, with the 1956 and 1956-D cents displaying particularly attractive colors. The coins are well preserved, and typically grade between MS64 and MS65. (Total: 48 coins)

GSA DOLLARS

- 4088 1878-CC GSA MS64 NGC. CAC.** Brilliant and beautiful with vibrant luster and a bold strike. The cheek exhibits only delicate contact, and the fields are predominantly smooth. The GSA box and certificate are included.
From The Lenny Reiner Collection, Part III. NGC ID# 253M, PCGS# 518845 Base PCGS# 407080
- 4089 1878-CC GSA MS64 NGC. CAC.** A glimpse of orange-gold toning visits the obverse margin at 9 o'clock. The remainder of this lustrous near-Gem is stone-white, save for a small spot near the left (facing) wing. A crisply struck Choice Carson City dollar. A GSA box and certificate are included.
From The Lenny Reiner Collection, Part III. NGC ID# 253M, PCGS# 518845 Base PCGS# 407080
- 4090 1878-CC GSA MS64 NGC. CAC.** A hint of sun-gold patina endows the date area of this otherwise stone-white near-Gem. Vibrant luster and a sharp strike further confirm the quality. The left obverse shows only wispy contact, and the remainder of the coin is nearly unabraded. The certificate and box of GSA issue are included.
From The Lenny Reiner Collection, Part III. NGC ID# 253M, PCGS# 518845 Base PCGS# 407080
- 4091 1878-CC GSA, Lines in Wings, MS64 NGC. CAC. VAM-11.** A Top 100 Variety. A popular VAM noteworthy for its many straight die lines within the eagle's wings. A well struck, lustrous, and brilliant near-Gem. The obverse field is smooth, and the cheek displays light marks. Reverse contact is minor aside from a tick on the G in GOD. The box and certificate are included.
From The Lenny Reiner Collection, Part III. NGC ID# 253M, PCGS# 518845 Base PCGS# 407080
- 4092 1880-CC 8/7 Reverse of 1878, VAM 7, GSA Hoard MS65 NGC.** A Hit List 40 Variety. Frosty, brilliant luster rolls over Gem-quality surfaces on this VAM-7 GSA Morgan, illuminating boldly rendered design elements. Faint remnants of an underlying 7 beneath the second 8 in the date identify this die pairing. Housed in original GSA box with certificate of authenticity. PCGS# 546079 Base PCGS# 7110
- 4093 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64 NGC. CAC.** A Top 100 Variety. Rich olive-gold toning graces the left obverse, but the remainder of the coin is close to brilliant. A well-struck near-Gem with sweeping luster and a few delicate facial grazes. VAM-4 is the most prominent overdate of the Morgan series, although VAM-5 and VAM-6 are also impressive. The GSA box and certificate are included.
From The Lenny Reiner Collection, Part III. NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108
- 4094 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64 Prooflike NGC.** A Top 100 variety. The overdate feature is clearly visible on this Choice Prooflike VAM-4 Morgan. The strike is razor-sharp, and the untuned surfaces yield stark snow-on-glass contrast. A few trivial grazes limit the grade but hardly impact the eye appeal. In original GSA box with COA. NGC ID# AP7P, PCGS# 518923 Base PCGS# 518922
- 4095 1880-CC 8 Over Low 7, VAM-6, GSA, MS65 NGC.** A Top 100 Variety. The underlying 7 is plainly visible in the loops of the second 8 in the date. This VAM-6 GSA coin displays a boldly executed strike with frosty, mint-fresh luster that is devoid of toning. There are no severe abrasions, only a few faint grazes on Liberty's cheek that limit the grade. Housed in a GSA box with COA. NGC ID# 2542, PCGS# 518857 Base PCGS# 407100
- 4096 1880-CC GSA MS65 NGC. CAC.** A frosty, brilliant example of this popular GSA issue, showing Gem-quality surfaces and radiant cartwheel luster. Slight strike softness is seen on the eagle's breast and the central obverse, as is occasionally seen on this issue. Widely sought in original GSA plastic. This piece is housed in its original GSA box with COA.
From The Lenny Reiner Collection, Part III. NGC ID# 2542, PCGS# 518851 Base PCGS# 407100
- 4097 1880-CC GSA MS65 NGC. CAC. VAM-8.** A bold die line within the M in AMERICA identifies VAM-8. Splashes of peach, violet-red, and navy-blue toning grace the lower right obverse, but the remainder of this lustrous Carson City Gem remains white. The centers lack a full impression although peripheral elements are crisp. A box and certificate of GSA issue accompany the lot.
From The Lenny Reiner Collection, Part III. NGC ID# 2542, PCGS# 518851 Base PCGS# 407100
- 4098 1881-CC GSA MS66 NGC. CAC. VAM-2.** A whisper of gold patina adorns this lustrous high-grade Carson City dollar. Well struck and attractive with only incidental marks. On VAM-2, the upper loops of the 8s in the date exhibit die fill. The box and certificate of GSA issue are included.
From The Lenny Reiner Collection, Part III. NGC ID# 2547, PCGS# 518863 Base PCGS# 407126
- 4099 1881-CC GSA MS66 NGC. CAC. VAM-2.** More than half of the 296,000-piece mintage was dispersed through the GSA sales, and of those relatively few pieces can match the quality of this brilliant, sharply struck example. The fields and cheek are smooth, with mint-fresh silver luster and frosty appeal. Just 34 GSA Hoard pieces are listed in a higher numeric grade at NGC(1/16). CAC endorsed. The box and certificate accompany this lot.
From The Lenny Reiner Collection, Part III. NGC ID# 2547, PCGS# 518863 Base PCGS# 407126
- 4100 1882-CC GSA MS66 NGC. VAM-2C2.** A Hit List 40 Variety. The date is doubled at 882, with the outer top loop of the second 8 sharply so. Liberty's upper lip is widely counterclashed. A break at the back of the Phrygian cap confirms the late die state. Sharply struck with nearly full hair and talon detail, this is a lustrous, semiprooflike example — brilliant and frosty on the motifs, and nearly unmarked. Housed in its original GSA holder with black box and numbered certificate. To our knowledge, it is the sole-finest certified VAM-2C2 in a GSA holder by NGC (1/16). Designated R.6 by VAMworld.
From The Lenny Reiner Collection, Part III. NGC ID# 254B, PCGS# 518866 Base PCGS# 407134
- 4101 1882-CC GSA MS64 Deep Mirror Prooflike NGC.** A few light abrasions are noted, yet this untuned, glassy-mirrored near-Gem offers excellent white-on-black contrast. The strike is needle-sharp. A singular contact on the cheek is the sole mark that requires individual mention. Housed in its original, black plastic holder and band-certified by NGC, accompanied by its box and numbered certificate.
From The Lenny Reiner Collection, Part III. NGC ID# 254B, PCGS# 518868 Base PCGS# 497135
- 4102 1882-CC GSA MS64 Deep Mirror Prooflike NGC. CAC.** This is a high-contrast Morgan dollar from the famous Carson City Mint, with deeply mirrored fields and frost-white raised elements to create a stunning white-on-black cameo effect. Just a few light abrasions away from full Gem quality. Band certified in the original black GSA holder and box, with numbered card, with CAC endorsement.
From The Lenny Reiner Collection, Part III. NGC ID# 254B, PCGS# 518868 Base PCGS# 497135
- 4103 1883-CC GSA MS66 NGC. VAM-5A.** A popular Carson City VAM with various interesting clash marks, die gouges, and die scratches. Lustrous, crisply struck, and brilliant save for glimpses of olive-gray toning beneath the right (facing) wing. The fields are well preserved. No box or certificate is included with the lot. NGC ID# 254H, PCGS# 518869 Base PCGS# 407144
- 4104 1883-CC GSA MS66 NGC.** A delightful Premium Gem Morgan dollar, with sharply detailed devices and well-preserved surfaces that radiate vibrant mint luster. Band certified by NGC in the original GSA plastic holder. NGC ID# 254H, PCGS# 518869 Base PCGS# 407144

4105 1883-CC GSA MS66 NGC. CAC. VAM-5A. Struck from clashed dies with doubling at the date, a dash under the second 8, a clearly clashed N, a die scratch on the right wing, a die gouge at the beak, and many other interesting die anomalies. This is a splendid Premium Gem example, with frosty silver luster across creamy-smooth surfaces and virtually unmarked central devices. Brilliant and untoned. Housed in the original GSA packaging with box and numbered certificate.

From The Lenny Reiner Collection, Part III. NGC ID# 254H, PCGS# 518869 Base PCGS# 407144

4106 1883-CC GSA MS66 NGC. CAC. VAM-5B. Die polishing removes most of the clash marks visible on VAM-5A, and the dash under the second 8 of the date is nearly gone. This is a brilliant and frosty Premium Gem example of a middle die state for the VAM-5 variety. Sharply struck, the abrasions are minimal and the eye appeal is exceptional. CAC-endorsed in the original GSA holder with box and certificate.

From The Lenny Reiner Collection, Part III. NGC ID# 254H, PCGS# 518869 Base PCGS# 407144

4107 1883-CC GSA MS66 NGC. CAC. VAM-5B. The fields are somewhat prooflike with a minimum of marks, while Liberty's portrait shows only slight grazes and ticks. The strike is sharp on both sides, and the surfaces are brilliant save for a small area of deep toning above L of DOL. Vibrant cartwheel mint luster supports the Premium Gem grade and CAC endorsement. The eye appeal is outstanding. Band-certified by NGC in the GSA holder with box and numbered certificate.

From The Lenny Reiner Collection, Part III. NGC ID# 254H, PCGS# 518869 Base PCGS# 407144

4108 1884-CC GSA MS66+ NGC. This high-end Premium Gem is sharply detailed and impeccably preserved, with vibrant mint luster and outstanding eye appeal. Band certified by NGC in the original GSA plastic holder. NGC ID# 254L, PCGS# 518872 Base PCGS# 407152

4109 1884-CC GSA MS66 NGC. CAC. VAM-3. The "Doubled 188 Left" variety, most famous for being the dies used to strike the 1884-CC branch mint proofs. A brilliant example with vibrant, frosty luster, this high-grade GSA Carson City Premium Gem shows minimal contact and displays outstanding eye appeal. The strike is sharp throughout. A box and numbered certificate are included with the lot, which is housed in its original GSA holder, now band-certified by NGC with CAC endorsement.

From The Lenny Reiner Collection, Part III. NGC ID# 254L, PCGS# 518872 Base PCGS# 407152

4110 1884-CC GSA MS66 NGC. CAC. A softly lustrous Premium Gem example of this available Carson City Morgan dollar, sharp over the ear and crisply detailed on the eagle. Few marks exist on the satiny, smooth surfaces. Subtle silver-gray patina blankets both sides, with a crescent of deeper toning at the lower-right obverse. Housed in its original GSA hard plastic holder with box and numbered certificate included.

From The Lenny Reiner Collection, Part III. NGC ID# 254L, PCGS# 518872 Base PCGS# 407152

4111 1884-CC GSA MS66 Prooflike NGC. This radiant Premium Gem offers sharply detailed, frosty design elements and deeply reflective prooflike fields that show few signs of contact. Band certified by NGC in the original GSA plastic holder. NGC ID# 254M, PCGS# 518873 Base PCGS# 407153

4112 1885-CC GSA MS65 NGC. Light tan toning adorns this lustrous and low mintage Carson City Gem. The strike is good, the reverse is well preserved, and the left obverse displays minor grazes. A GSA box and certificate are included.

From The Lenny Reiner Collection, Part III. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

4113 1885-CC GSA MS65 NGC. Rare in circulated grades, the low-mintage 1885-CC is available in nice Mint State courtesy of the 1970s GSA auctions. The present boldly struck Gem has vibrant luster and faint olive-gray toning. The left obverse displays wispy contact, and the rest of the coin is nearly as made. A GSA box and certificate accompany the lot.

From The Lenny Reiner Collection, Part III. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

4114 1885-CC GSA MS63 Deep Mirror Prooflike NGC. CAC. A sharply defined Select Uncirculated example of this popular low-mintage issue, with brilliant surfaces and bold field-device contrast suitable for the Deep Prooflike designation. Numerous light marks account for the MS63 grade, but eye appeal remains on this CAC-endorsed example. Band certified in the original black GSA holder and box, with numbered card.

From The Lenny Reiner Collection, Part III. NGC ID# 254M, PCGS# 518877 Base PCGS# 497161

1890-CC GSA Dollar, MS61 VAM-6, Repunched Date

4115 1890-CC GSA MS61 NGC. CAC. VAM-6. The 1 in the date is lightly repunched north. A hint of wheat-gold toning visits this lustrous and sharply struck Carson City dollar. Attractive for the designated grade, since the reverse is smooth and no obverse marks distract. The 1890-CC is a much better GSA issue. The box and certificate of GSA issue are included.

From The Lenny Reiner Collection, Part III. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

1890-CC Silver Dollar, MS61 Scarce GSA Issue

4116 1890-CC GSA MS61 NGC. CAC. A brilliant example with booming luster and a smooth obverse field. The cheek and reverse field exhibit scattered small marks. The strike is good except for the hair above the ear and the eagle's breast, which are softly brought up. The 1890-CC is elusive in GSA format. A GSA box and certificate are included.

From The Lenny Reiner Collection, Part III. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

**1890-CC Silver Dollar, MS62
Sharp and Minimally Marked**

- 4117** 1890-CC GSA MS62 NGC. CAC. VAM-6. The 1 and the 8 of the date are repunched at the top (the 1 more so than the 8) to confirm the VAM-6 variety. Bagmarks are the bane of 1890-CC dollars, yet this example shows remarkably few marks for the assigned grade. Sharply struck and brilliant, the coin displays a hint of powder-gray patina that does not hinder the strong cartwheel silver luster. CAC endorsed, one of the relatively few examples at this level to earn the award.
From The Lenny Reiner Collection, Part III. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

- 4118** 1890-CC GSA MS62 NGC. CAC. VAM-9. Light streaks of straw-gold toning overlie this mostly white scarcer date GSA dollar. Typically struck, but lustrous and pleasing for the MS62 level. VAM-9 is a near date variety with a tiny "hangnail" below the fletchings. The GSA certificate and box are included.
From The Lenny Reiner Collection, Part III. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

**1890-CC GSA Dollar, MS62
VAM-9A, Die Break Left Stars**

- 4119** 1890-CC GSA MS62 NGC. CAC. VAM-9A. A die break from the lowest left obverse star distinguishes this Rarity-6 VAM variety. But all 1890-CC GSA dollars are desirable, since they are rare relative to their Carson City cousins from the 1880s. Smooth for the grade, but the centers are lightly struck, usual for the die pair. A faint fingerprint fragment is noted near the M in UNUM. A box and certificate of GSA issue accompany the lot.
From The Lenny Reiner Collection, Part III. NGC ID# 255D, PCGS# 518878 Base PCGS# 407198

**1891-CC Silver Dollar, MS61
Scarce GSA Issue**

- 4120** 1891-CC GSA MS61 NGC. CAC. A brilliant example with dynamic luster and moderate blending of impression at the centers. No abrasions are of singular relevance. Comparatively few 1891-CC dollars appeared in the GSA auctions, which were dominated by Carson City issues from the 1880s. The GSA box and certificate are included.
From The Lenny Reiner Collection, Part III. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

**1891-CC Morgan Dollar, MS61
Top 100 'Spitting Eagle' VAM-3**

- 4121** 1891-CC GSA, Spitting Eagle, MS61 NGC. VAM-3. A Top 100 Variety. A nearly brilliant Carson City silver dollar. Lustrous and suitably struck with a smooth reverse and moderate obverse grazes. Most "Spitting Eagle" dollars are the near date VAM-3, although rare examples are the far date VAM-7. A GSA box and certificate are included, although the certificate lacks a serial number. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

**1891-CC GSA Dollar, MS61
VAM-3 'Spitting Eagle'**

- 4122** 1891-CC GSA, Spitting Eagle, MS61 NGC. CAC. VAM-3. A Top 100 Variety. A lustrous and practically brilliant better-date GSA dollar. The strike is good and the reverse is minimally abraded. The obverse displays marks commensurate with the grade. A near date example of the well-known "Spitting Eagle" variety. The box and certificate of GSA issue accompany the lot.
From The Lenny Reiner Collection, Part III. NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

1891-CC VAM-3 GSA Dollar, MS62
Near Date 'Spitting Eagle'

- 4123** 1891-CC GSA, Spitting Eagle, MS62 NGC. CAC. VAM-3. A Top 100 Variety. The specialist-familiar Near Date "Spitting Eagle" variety with a die lump below the beak. Brilliant and lustrous with a smooth reverse and the expected number of wispy marks on the portrait. The box and certificate of GSA issue accompany the lot. *From The Lenny Reiner Collection, Part III.* NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

1891-CC VAM-3 Dollar, MS62
Top 100, 'Spitting Eagle'

- 4124** 1891-CC GSA, Spitting Eagle, MS62 NGC. CAC. VAM-3. A Top 100 Variety. The mintmark is lightly repunched, but the die lump below the eagle's beak garners all the attention. A brilliant, lustrous, and nicely struck Carson City Morgan with good eye appeal for the MS62 level. A GSA box and certificate accompany the lot. *From The Lenny Reiner Collection, Part III.* NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

1891-CC Dollar, MS62
'Spitting Eagle,' Top 100

- 4125** 1891-CC GSA, Spitting Eagle, MS62 NGC. CAC. VAM-3. A Top 100 Variety. The 1891-CC is a better GSA issue, much scarcer than the 1882-CC through 1884-CC. The "Spitting Eagle" variety, named after the small die flaw near the beak. Only a wisp of tan patina visits this lustrous and nicely struck silver dollar. A GSA box and certificate are included. *From The Lenny Reiner Collection, Part III.* NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

1891-CC 'Spitting Eagle' Dollar
MS62, VAM-3, Top 100

- 4126** 1891-CC GSA, Spitting Eagle, MS62 NGC. CAC. VAM-3. A Top 100 Variety. A lightly toned and lustrous Carson City representative. The strike is good and no marks are distracting. Perhaps a majority of the 1891-CC GSA issue was the Near Date "Spitting Eagle" variety, although the total was tiny relative to the quantity of GSA dollars bearing dates from the 1880s. A GSA certificate and box are included. *From The Lenny Reiner Collection, Part III.* NGC ID# 255H, PCGS# 518881 Base PCGS# 407206

End of Session One

Lot 5045

SESSION TWO

EARLY DOLLARS

1795 B-5, BB-27 Flowing Hair Dollar
Choice Fine, Three Leaves

4127 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 PCGS. Collectors of Flowing Hair dollars soon learn to distinguish B-5 at arm's length, by the die line or "bar" behind Liberty's highest neck curl. The present example has stone-gray fields and motifs, although aquamarine and golden-brown toning embraces protected areas. Abrasions are surprisingly inconsequential. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

4128 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Graffiti — NGC Details. VF. Die State I. This well-detailed BB-51 dollar displays excellent olive-gray toning that lightens over portions of the devices. Rather ornately engraved lettering appears on Liberty's shoulder, the eagle's breast, and in the field between STATES and OF. Much more crudely executed letters are seen in the right obverse field. An interesting coin with attractive color and detail.

4129 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VG10 PCGS. Bowers Die State III. Stars 11 and 12 are widely spaced, helping distinguish this sole use of the obverse die from BB-122, which is otherwise quite similar. The Blundered Stars reverse, with the field stars in a line pattern overlapping some of the clouds. This well-circulated example displays a light, golden-gray patina with moderate central wear but strong-for-the-grade rims, denticles, and legends. Most abrasions are smoothed by wear. NGC ID# 24X6, PCGS# 40041 Base PCGS# 6873

4130 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VF20 PCGS. Bowers Die State IV. The "Blundered Stars" reverse, with field stars punched too high overlapping the clouds. Considerable wear from circulation exists on the raised elements. Alternating areas of deep-brown and reddish-tan toning cover both sides. Marks are less prominent than expected for the amount of circulation, although a pair of repeating, cigar-shaped marks are noted above and below Liberty's eye. NGC ID# 24X6, PCGS# 40041 Base PCGS# 6873

4131 1799 7x6 Stars, B-12, BB-160, R.3, VF20 NGC. Bowers Die State III. Stone-white motifs rise above charcoal-gray fields, creating the pleasant "circulation cameo" effect. Abrasions are minimal, although close inspection reveals minor hairlines. The stars above the M in UNUM exhibit blurry definition. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

1799 Draped Bust Dollar, XF40
B-17, BB-164, Large Berries

4132 1799 7x6 Stars, B-17, BB-164, R.2, XF40 ANACS. Bowers Die State III. Slightly mottled olive-gold toning blankets both sides, with nice definition on the motifs for the XF level. Traces of mint luster remain. A prominent die crack crosses UNITED, the eagle's wingtip, through the top of STA in STATES. The branch stem through the eagle's right claw is shorter on BB-164 than any other 1799 variety, and the berries are larger. Marks are few for the grade, although a minor rim bump is noted at 3 o'clock on the reverse. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

1800 Silver Dollar, VF30
Rare B-2, BB-182 Variety

4133 1800 B-2, BB-182, R.6, VF30 NGC. Bowers Die State II. A notably rare Bust dollar — unknown in Uncirculated condition, the B-2, BB-182 goes missing from many collections. As few as 30 to 50 pieces exist, apparently all in circulated grades. Perhaps only half that number can equal or exceed this solid VF30 example. A pleasing silver-gray patina displays fields, while an area of deep-brown toning exists from the eagle's breast across the head and field stars to the clouds. Bold definition remains on the moderately circulated surfaces, sheltered by high rims and strong denticles. Marks are few for the grade, where a series of small digs at Liberty's upper bust are the sole abrasions of note. Census: 2 in 30, 6 finer (1/16). NGC ID# 24X9, PCGS# 40068 Base PCGS# 6887

4134 1800 AMERICA!, B-19, BB-192, R.2, VF20 NGC. Bowers Die State III with wave-like clash marks above and below the date, and a thin die crack through the tops of LIB in LIBERTY. This popular variety is recorded in the Guide Book. A pleasing example with a few minor handling marks that include a light scratch behind Liberty's head. Deep gray surfaces exhibit lighter gray devices. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

4135 1800 B-13, BB-193, R.4, Fine 15 PCGS. Bowers Die State III. Bolender assigned the B-18 number to 1800 dollars with the die characteristics of this coin, although it is really just a late die state of B-13, BB-193 with die clashing and a die break on the reverse legend at OF AMERICA. Medium golden-gray surfaces show a pair of short scrapes in the right obverse field and numerous light abrasions, but the surfaces are pleasing with nice definition for the grade. A scarce variety in higher grades, but not so much at this level. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

4136 1800 Dotted Date, B-14, BB-194, R.3, VF25 ANACS. Bowers Die State II, the earliest observed die state. A popular *Guide Book*-listed variety, the Dotted Date has heavy rust marks concentrated around the first 0. A pleasing example with light grayish-brown patina over muted silver surfaces. NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

4137 1800 12 Arrows, B-17, BB-196, R.1 — Cleaning — PCGS Genuine. VF Details. Bowers Die State IV. A nicely defined slate-gray representative with minutely granular surfaces. The borders display traces of golden toning. No marks are noticeable, and the sole flan imperfection is minor and located near the T in UNITED. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

4138 1800 12 Arrows, B-17, BB-196, R.1, VF30 PCGS. Bowers Die State IV with a delicate curved crack above the hair ribbon. A charming stone-gray and powder-blue example. No marks are noticeable, though we note a small spot on the left border of the eagle's banner. NGC ID# 24X9, PCGS# 40079 Base PCGS# 6890

4139 1801 B-2, BB-212, R.3 — Damage — PCGS Genuine. XF Details. Bowers Die State III with a single "collar" clash above the cleavage. The obverse exhibits numerous minuscule marks, but this steel-gray and golden-brown Heraldic Eagle dollar has only moderate wear. A scarce Bolender variety and an uncommon date. NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

1802/1 Draped Bust Dollar, VF30 B-3, BB-234, Wide Date

4140 1802/1 Wide Date, B-3, BB-234, R.3, VF30 PCGS. A wider gap between the 8 and the 0 in the date differentiates this variety of the overdate from other die pairs. The underdigit 1 is particularly bold on BB-234. A terrific collector coin, this VF30 example is smooth and attractive with glossy surfaces and only inconsequential marks. Delightful old-silver patina covers both sides — darker at the borders, lighter on the raised devices. Sharp definition remains on all of the motifs with nice centering and strong rims. Housed in a green label holder. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

SEATED DOLLARS

4141 1843 AU58 NGC. Partially lustrous fields accentuate the near-Mint grade of this No Motto Seated dollar type coin. Slight weakness on Liberty's head and the surrounding stars is not unusual for the issue. The fields are modestly reflective, and there is little evidence of high-point friction. Traces of light champagne toning add to the eye appeal. NGC ID# 24YD, PCGS# 6929

4142 1844 AU53 PCGS. Flynn DDO-001. A lightly circulated but problem-free No Motto dollar. The dove-gray surfaces are unblemished. The "Quad Stripes" variety with doubling on the obverse shield. The central reverse is interesting for its many fine die lines. The 1844 has a business mintage of only 20,000 pieces, all of which were struck by the same die pair. NGC ID# 24YE, PCGS# 6930

4143 1848 AU50 NGC. This is an attractive collector-grade example of this low-mintage Seated dollar date, showing the expected high-point wear on attractive grayish-rose surfaces with scattered minimal marks. A typical grade for certified survivors. Census: 9 in 50, 53 finer (1/16). NGC ID# 24YK, PCGS# 6935

1850-O Seated Dollar, AU50 Green CAC, Green Label Holder

4144 1850-O AU50 PCGS. CAC. The second of four New Orleans issues in the Seated dollar series, the 1850-O had a moderately small mintage of 40,000 coins and is a slightly better date in high grade. This CAC-endorsed AU example boasts choice original surfaces with lavender-gray and aquamarine toning. The strike is bold, and minor high-point wear leaves sharp detail on the design elements. Housed in a green label holder. Population: 29 in 50, 44 finer (1/16). NGC ID# 24YN, PCGS# 6938

4145 1855 — Damage — PCGS Genuine. AU Details. A better-date Seated dollar, boasting a small 26,000-coin mintage. This piece shows little wear, as much of the weakness on Liberty's head and portions of the eagle is due to a deficient strike. Each side displays uniform golden toning and an array of insignificant minor marks. A single small nick in the right obverse field near stars 12 and 13 appears to be the only singularly notable imperfection. NGC ID# 24YU, PCGS# 6943

1856 Seated Dollar, Well-Detailed XF45

4146 1856 XF45 NGC. A less often seen pre-Civil War issue, coming from a limited 63,500-coin mintage. This 1856 Seated dollar displays pleasing detail with remnants of luster in the reverse fields, although most of each side has mottled lavender-gray and aquamarine toning. The surfaces are relatively smooth, making this piece somewhat appealing. NGC ID# 24YV, PCGS# 6944

1859-O Seated Liberty Dollar, MS62+ Ideal Mintmark Type Coin

4147 1859-O MS62+ PCGS Secure. From a mintage of 360,000 pieces, the 1859-O Seated Liberty dollar is relatively available in grades up to the MS62 level, but Select specimens are scarce. This high-end MS62 example is a good balance of quality and value. The design elements are sharply detailed in most areas, but some of the star radials are a little weak. The lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 24YY, PCGS# 6947

4148 1860-O MS62 PCGS. This frosty Mint State example has delicate champagne toning on both sides with excellent design definition and trivial field marks that account for the grade. The 1860-O was found in large quantities in the Treasury Hoard and is an ideal type candidate. NGC ID# 24Z3, PCGS# 6950

4149 1867 AU50 PCGS. A bluish-gray patina covers the slightly reflective surfaces of this About Uncirculated silver dollar, with a normal 1 in the date repunched over a smaller 1 and lesser repunching visible on the other digits. Nice detail remains for the grade, with minor marks visible including a pair of small nicks on the reverse rim at 7 and 8 o'clock. An elusive date in the series, with just 46,900 pieces struck. NGC ID# 24ZA, PCGS# 6960

4150 1868 AU55 PCGS. A prooflike example, richly toned in hues of tangerine-orange, magenta, and blue over both sides. Numerous light bagmarks and contacts are revealed with a glass, with a pair of reeding marks by Liberty's knee and a cluster of small marks near the date. The 1 in the date is slightly recut north, with traces of the underdigit below the base and flag. Sharply struck with clearly original surfaces. Population: 19 in 55, 48 finer (1/16). NGC ID# 24ZB, PCGS# 6961

1870-CC Seated Dollar, Attractive VF30

4151 1870-CC VF30 PCGS. An essential for collectors of Carson City Seated dollars and the first-year key to the series, the 1870-CC saw a production of around 12,000 pieces — different sources vary. Although it is the most available of the four CC-mint Seated dollar issues, its status as a historic Western issue — these were the first coins ever struck in Carson City — the 1870-CC sees ceaseless demand. The present VF30 PCGS example is extremely attractive, lightly toned, and showing some moderate abrasions on each side that befit a considerable spate in circulation. The VF grade range is typical for the average certified survivor. NGC ID# 24ZE, PCGS# 6964

4152 1872-CC — Damaged — NGC Details. VF. A well-detailed VF-level 1872-CC dollar, showing gunmetal-gray and lavender surfaces on the obverse and light golden toning over the reverse. Scattered surface marks and an occasional scratch preclude a numeric grade from NGC but leave this an acceptable coin for the budget-conscious collector. NGC ID# 24ZK, PCGS# 6969

1872-CC Dollar, XF Details Pleasing Detail

4153 1872-CC — Improperly Cleaned — NGC Details. XF. As are most examples of this semikey Carson City issue, this XF-level 1872-CC dollar is moderately abraded. The surfaces show aggressive cleaning, as is often encountered. Light olive-gold toning covers both sides, and the design elements are well-detailed. The budget-conscious collector may find this piece satisfactory. NGC ID# 24ZK, PCGS# 6969

1872-CC Dollar, AU Details Smooth Surfaces

4154 1872-CC — Plugged, Whizzed — NGC Details. AU. Both sides of this 1872-CC dollar are uniformly smoothed with a dusky steel-gray hue. A well-hidden plug appears near star 8. There are no other impairments, and the design elements are well-detailed. This Carson City issue is in high demand, and most surviving examples exhibit cleaning, damage, or other various imperfections. NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

4155 1860 — Cleaning — PCGS Genuine. Proof, Unc. Details. A sharply struck specimen bathed in autumn-brown and gunmetal-blue patina. The fields display patches of hairlines, but the piece is nonetheless impressive. The 1860 has the highest proof production of the series, but according to Duncan Lee, "only 527 proofs were sold and the remainder was melted." NGC ID# 252E, PCGS# 7003

1860 Seated Dollar, PR62 Sharp and Reflective

4156 1860 PR62 NGC. A faint presence of reddish-gold patina defines the raised elements of this otherwise brilliant-silver proof. Sharp everywhere except for the definition on Liberty's hair strands, this gleaming proof displays glassy-mirrored reflectivity. Some delicate lines are visible when the coin is rotated in light, but they do little to distract the eye. Nice for the PR62 grade. NGC ID# 252E, PCGS# 7003

4157 1869 PR62 PCGS. A popular proof issue with a moderately low 600-coin mintage. This is a pleasing lower-grade example, suitable for the budget-conscious collector seeking a proof type coin. The strike is full, and the mirrored fields display medium olive-gold toning. Scattered hairlines limit the grade. NGC ID# 252R, PCGS# 7017

**1873 Seated Dollar, PR62
Lightly Toned**

- 4158 1873 PR62 PCGS.** A pleasing lower-grade proof example of the final issue in the Seated dollar series. This gleaming, fully struck 1873 shows a blush of sea-green and mint-gold toning on the obverse with lighter champagne over the reverse. Stray hairlines limit the grade, but there are no distracting contact marks. NGC ID# 252V, PCGS# 7021

**1873 Seated Dollar, PR64 Cameo
Attractive Final-Year Type Coin**

- 4159 1873 PR64 Cameo PCGS.** The 1873 is the final issue in the proof Seated dollar series. Examples with cameo contrast are occasionally seen, but any representative above PR64 is rare. This Choice Cameo is inherently attractive but remains within the financial grasp of most collectors. A blush of golden toning warms stark white-on-black contrast, and the mirrored fields reveal few hairlines. A tinge of olive toning appears above the eagle's head. The reverse is boldly die doubled on this proof marriage. Population: 23 in 64 Cameo, 9 finer (1/16).
From The Jim Hilands Collection. NGC ID# 252V, PCGS# 87021

TRADE DOLLARS

- 4160 1873-CC — Improperly Cleaned — NGC Details. Unc.** Just 124,500 pieces were struck in Carson City of the 1873 Trade dollars, with remarkably few survivors in Uncirculated condition. Most of the mintage went to China, never to return. This example is lightly hairlined from cleaning and it is softly struck on the eagle's right leg. The fields were prooflike at one time, and they now display somewhat muted silver-gray color but very few marks. Always desirable as the first-year CC-Mint Trade dollar issue. NGC ID# 252X, PCGS# 7032

1875-S Trade Dollar, Lustrous Near-Gem

- 4161 1875-S Type One Reverse MS64 PCGS.** Berry under claw (the usually seen variety), Large S mintmark. The 1875-S through 1877-S date are the "go-to" issues for type purposes, due to their large production figures. This near-Gem example boasts attractive luster on lightly toned gold- and rose-tinged surfaces. Abrasions are few but the strike is weak on the lower reverse and upper obverse, where some roller marks appear in the planchet. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

**1875-S Trade Dollar, MS64
Popular Type-Coin Issue**

- 4162 1875-S Type One Reverse MS64 PCGS.** Large S mintmark. An available date but seldom seen above the MS64 level. This Choice example displays soft, satiny luster glowing beneath tan-gray toning. There are no severe abrasions, although moderate strike weakness appears on Liberty's head and the surrounding stars, as well as the eagle's right (facing) talons. There are 43 finer submissions recorded at PCGS (1/16). NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

**1875-S/CC Trade Dollar, Toned AU58
FS-501, Wide Undermintmark Variant**

- 4163 1875-S/CC FS-501 AU58 NGC.** Of the two S/CC variants, this is the more frequently seen. The second C in the undermintmark is set wider to the right of the S on FS-501 and is much more easily seen than the FS-502 overmintmark. The S/CC is very scarce in high grades with AU examples generally the finest obtainable. This piece has finely speckled gray-lilac patina over each side, and shows just the slightest trace of handling. Well, but not completely struck up. Census: 14 in 58, 26 finer (2/16). NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

- 4164 1877 MS62 PCGS.** Cream-gray centers complement deeper russet patina along the rims on both sides of this nicely lustrous and relatively unabraded Trade dollar, an excellent candidate for a Mint State type set. NGC ID# 253C, PCGS# 7044

- 4165 1877 MS62 PCGS.** The 1877 Trade dollar is significantly scarcer in Mint State than its San Francisco counterpart, but lower-end examples remain collectible for most enthusiasts. This Uncirculated piece displays satiny cartwheel luster with mottled lavender-gray toning that clings mostly to the edges of the relief elements. Slight softness on Liberty's head and the surrounding stars is typical of the issue. NGC ID# 253C, PCGS# 7044

**1877-CC Trade Dollar, MS61
Chop Mark, Repunched Date**

- 4166 1877-CC Chop Mark MS61 PCGS. Breen-5817.** A single chop is present on the beak of the eagle. A lustrous, brilliant, and crisply struck Carson City representative. Minor obverse hairlines are noted, but the eye appeal surpasses the numerical grade. The base of the 1 in the date is repunched. The Bowers silver dollar encyclopedia mentions a Medium CC variety, but all encountered by this cataloger exhibit a Tall CC mintmark. PCGS# 87045
- 4167 1877-S MS64 NGC.** Large S mintmark. This Choice 1877-S Trade dollar is ideal for type representation. The strike is sharp throughout, and the satiny surfaces display a hint of reflectivity in the fields. Medium golden-gray toning blankets each side. Seldom available finer. NGC ID# 253E, PCGS# 7046
- 4168 1878-S MS63 PCGS.** The final circulation strike Trade dollar was issued in 1878 during the transitional period that saw the Morgan dollar debut. This example from San Francisco has an excellent strike with full mint frost beneath gold and pale blue toning. NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

1874 Trade Dollar, PR64 Cameo

- 4169 1874 PR64 Cameo PCGS.** Both sides of this Choice Cameo proof exhibit deeply mirrored fields and lustrous, boldly defined devices, all beneath stunning electric-blue, violet, and iridescent toning. This impressive example is absolutely original and highly attractive. Population: 21 in 64 Cameo, 5 finer (2/16). NGC ID# 27YK, PCGS# 87054

1883 Trade Dollar, Richly Toned PR65

- 4170 1883 PR65 PCGS.** A richly toned specimen of the last broadly distributed proof Trade dollar issue, modestly contrasted through a rich drape of interior peach patina with blue-to-violet hues around much of the borders. As impressively preserved as it is eye-catching, and much more elusive at the next grade level. Population: 50 in 65, 22 finer (1/16). NGC ID# 5DP8, PCGS# 7063

MORGAN DOLLARS

- 4171 1878 8TF VAM-2, MS63+ Deep Mirror Prooflike NGC. CAC.** The 7 in the date shows minor doubling on this eight tailfeathers VAM variety. As a date representative, this CAC-endorsed Deep Mirror Prooflike coin showcases intense white-on-black contrast with seemingly infinite depth of mirroring in the fields. The outer peripheries show light golden toning, but the interiors are brilliant. Light, scattered grazes determine the grade. PCGS# 40120 Base PCGS# 97073
- 4172 1878 8TF Pierced Eyelid, VAM-6, MS65 NGC.** The reverse is lightly die doubled on this eight tailfeathers variety, plainly detected on IN GOD WE TRUST and the lower wreath. As a date, the eight tailfeathers Morgan is seldom seen finer than MS65. This Gem is boldly struck and brilliant save for a tinge of gold along the upper-right reverse border. A few faint grazes on Liberty's cheek limit the grade. NGC ID# 76LZ, PCGS# 133789 Base PCGS# 7072
- 4173 1878 8TF Doubled LIBERTY, VAM-15, MS64 PCGS.** A Top 100 Variety. Obverse die doubling is most prominent on LIBERTY on this sought-after VAM variety. This Choice example displays boldly rendered design elements and nearly prooflike fields. A few trivial marks do not interrupt the eye appeal, and the only noticeable toning is a hint of gold around the outer periphery. NGC ID# 253H, PCGS# 133816 Base PCGS# 7072
- 4174 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** LIBERTY is lightly die doubled on this eight tailfeathers VAM variety. Finer examples of the date in general are scarce. This Gem representative displays bold relief elements and frosty original luster. Tinges of amber toning appear around the peripheries but leave the interiors brilliant. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 4175 1878 7TF Reverse of 1878, VAM-31, Lines Through Leg MS65 PCGS.** The date is faintly recut on this variety, but the chief diagnostic is heavy die lines that appear behind the fletchings and talons on the reverse. This Gem first-year Morgan is well-struck and toned light golden with reflective semiprooflike fields. Eye appeal is excellent for the variety. NGC ID# 2TY3, PCGS# 134031 Base PCGS# 7074
- 4176 1878 7TF Reverse of 1878 MS64 Deep Mirror Prooflike PCGS.** Short Nock, 7 Parallel Tailfeathers. Fully struck, with light abrasions on the deeply reflective fields but a relatively clean, frosted cheek on Liberty. A brilliant coin with gleaming appeal — scarce in near-Gem condition with the Deep Mirror Prooflike designation, entirely untuned. NGC ID# 253K, PCGS# 97075
- 4177 1878-CC MS65 PCGS.** An ideal combination of prooflike reflectivity and cartwheel luster deliver outstanding eye appeal on this Gem 1878-CC Morgan. The surfaces are brilliant, and intricate detail characterizes the finest design features on the eagle's breast and Liberty's hair. No severe abrasions are present. NGC ID# 253M, PCGS# 7080

4178 1878-CC MS65 PCGS. This sharp, semiprooflike 1878-CC Morgan dollar displays radiant cartwheel luster beneath dusky champagne toning. The preservation is exceptional. The debut Carson City Morgan is a better date in high grade, infrequently seen above the Gem level. NGC ID# 253M, PCGS# 7080

4179 1878-CC MS65 PCGS. The Carson City Mint struck both Trade and Morgan dollars in 1878, both of which are highly popular among collectors. This Gem Morgan displays a razor-sharp strike and frosty mint luster. Much of each side has warm sun-gold toning, while the obverse borders also exhibit sky-blue. NGC ID# 253M, PCGS# 7080

4180 1878-CC MS65 PCGS. VAM-9. Mintmark Tilted Right. Glimpses of russet-red toning at the rims emphasize the stark silver, semireflective fields and frost-white central motifs of this interesting VAM-9 dollar. A group of random, raised die lines beneath the tailfeathers, bow, and around the downsloping mintmark identify the variety. A sharply struck, minimally abraded Gem coin. *From The Jim Hilands Collection.* NGC ID# 253M, PCGS# 7080

4181 1878-CC MS65 PCGS. A spectacular branch mint Gem from the first year of the Morgan design, this coin displays sharply detailed design elements and well-preserved, lustrous surfaces under shades of champagne-gold and lavender toning, with some streaks of amber on the reverse. NGC ID# 253M, PCGS# 7080

4182 1878-CC MS65 PCGS. A first-year Gem from the famous Carson City Mint, this coin exhibits sharply detailed design elements throughout. The well-preserved surfaces are visited by shades of gray, golden-tan, and pale violet toning, with most of the color on the reverse. NGC ID# 253M, PCGS# 7080

1878-CC Dollar, MS64 Deep Mirror Prooflike Eye-Catching Contrast

4183 1878-CC MS64 Deep Mirror Prooflike PCGS. CAC. CAC-endorsed and undeniably high-end for the Choice grade level. This Deep Mirror Prooflike 1878-CC Morgan displays dazzling luster and frosty, razor-sharp design elements. The fields are deeply reflective. A few trivial ticks on Liberty's cheek are almost unnoticed amid the outstanding eye appeal. Cameo contrast is framed by a halo of light golden peripheral color, while the interiors are untuned. NGC ID# 253M, PCGS# 97081

1878-S Morgan, MS66 Prooflike Sharp Strike, Stark Contrast

4184 1878-S MS66 Prooflike PCGS. CAC. A conditionally rare Prooflike Premium Gem example of this debut San Francisco Morgan. Frost-white luster blankets the razor-sharp design elements, setting them apart from the deeply mirrored, brilliant fields. A trace of light golden toning appears around the extreme outer peripheries. Population: 12 in 66 Prooflike, 2 finer (1/16). NGC ID# 253R, PCGS# 7083

4185 1879 MS66 PCGS. The 1879 Philadelphia issue becomes scarce in MS66 and very rare any finer. This satiny, untuned Premium Gem radiates glowing mint luster. Slight softness over the ear is offset by exceptionally smooth and unabraded surfaces. Just four pieces are numerically finer at PCGS (1/16). NGC ID# 253S, PCGS# 7084

1879-CC Dollar, Partially Lustrous AU55 Better Carson City Issue

4186 1879-CC AU55 PCGS. The 1879-CC remained a semikey of the Carson City short set after the GSA sales of the 1970s, when significant quantities of the issue failed to be represented. This Choice AU example displays near-brilliant surfaces with remnants of luster in the protected regions of the fields. The strike is bold, and wear is minimal. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, Lustrous AU58

4187 1879-CC AU58 NGC. Normal Mintmark. A satiny 1879-CC with traces of light champagne toning over each side. A brush of friction on the eagle's breast and the hair above Liberty's ear is all that precludes a Mint State designation. The strike is well-executed, and surface chatter is at a minimum. The 1879-CC is a slightly better Carson City issue, even without the "Capped Die" reverse. NGC ID# 253U, PCGS# 7086

4188 1879-S Reverse of 1878 MS64+ PCGS. The obverse of this brilliant Choice Mint State 1879-S Reverse of 1878 Morgan silver dollar exhibits frosty mint luster and the reverse displays reflective fields around lustrous devices. A lovely example and elusive any finer. NGC ID# 253W, PCGS# 7094

4189 1879-S Reverse of 1878 MS64+ PCGS. CAC. Both sides of this important variety exhibit brilliant and untuned silver surfaces with reflective fields around frosty devices. The strike is bold with sharp breast feathers and nearly full hair detail over Liberty's ear. CAC: 64 in MS64, 6 finer (2/16). NGC ID# 253W, PCGS# 7094

4190 1879-S MS67+ PCGS. CAC. Iridescent shades of greenish-gold and violet toning visit the impeccably preserved surfaces of this high-end Superb Gem, with most of the color on the obverse. Razor-sharp definition is evident on all design elements and vibrant mint luster shines through the patina. NGC ID# 253X, PCGS# 7092

4191 1879-S MS67+ PCGS. CAC. Prooflike cameo contrast on the obverse definitely warrants the Plus designation from PCGS, while the reverse is pleasantly illuminated by frosty, vibrant luster. Neither side exhibits perceptible toning, and the strike is bold. CAC-endorsed with great eye appeal. NGC ID# 253X, PCGS# 7092

- 4192 1879-S MS67+ PCGS. CAC.** Light butter-gold toning adorns the peripheries of this thoroughly lustrous and precisely struck Superb Gem. The fields and motifs are brilliant. A small strike-through (as coined) on Liberty's cheek is the sole apparent imperfection. NGC ID# 253X, PCGS# 7092
- 4193 1880 MS66 PCGS.** This Premium Gem 1880 Morgan dollar is among the finest at PCGS (2/16), displaying radiant, frosty luster with a hint of champagne color near the borders. The strike is sharp, and the only mentionable abrasions are few field marks above the eagle's head on the reverse. NGC ID# 253Y, PCGS# 7096
- 4194 1880 8/7 Ears, VAM-8, AU50 PCGS.** A Top 100 Variety. VAM-8 shows faint remnants of an underlying 7 along the top edge of the second 8 in the date. This About Uncirculated example displays partially lustrous fields and light golden toning. Minor surface chatter is in keeping with the grade. NGC ID# 253Y, PCGS# 133873 Base PCGS# 41097
- 4195 1880-CC 8/7, Reverse of 1878, VAM-7A, MS65 PCGS.** A Hit List 40 Variety. The heavily clashed, late die state variant of VAM-7. A bold strike is accentuated by crisp, brilliant mint frost over each side. A few minor ticks on Liberty's cheek appear to be all that limit the grade. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110
- 4196 1880-CC MS66 PCGS. VAM-3, Dash Under 8.** An untuned silver-white reverse with beaming luster contrasting against a multicolor obverse, pale rose-gold, jade-green, and pale blue, all beautifully preserved and gorgeously presented. PCGS reports only 33 in higher grade levels (1/16). NGC ID# 2542, PCGS# 7100
- 4197 1880-CC MS66 PCGS.** Glowing, vibrant mint luster casts this Premium Gem 1880-CC Morgan dollar in extravagantly original eye appeal that boasts traces of warm golden toning. Slight strike softness appears on the central high points, but a lack of bothersome abrasions balances the eye appeal. PCGS has seen 33 finer submissions (1/16). NGC ID# 2542, PCGS# 7100
- 4198 1880-O MS64 NGC.** Although plentiful in MS64, the 1880-O Morgan dollar is a famous rarity any finer. This near-Gem displays unusually well-struck design elements with satiny luster and a blush of light golden toning. Trivial, scattered surface grazes limit the grade. NGC has seen 28 numerically finer submissions (1/16). NGC ID# 2543, PCGS# 7114
- 4199 1880-O MS64 PCGS.** Bright, satiny luster graces each side of this Choice 1880-O Morgan dollar, while a few trivial grazes on Liberty's cheek limit the grade. The eagle's breast and the hair above Liberty's ear are slightly soft, as is typical of this New Orleans issue. Finer examples are rarely seen. NGC ID# 2543, PCGS# 7114
- 4200 1880-O MS64 PCGS. CAC.** Small or Micro O mintmark. Sharply struck and brightly lustrous with rich, one-sided toning, this attractive near-Gem example shows few marks and abundant eye appeal. Sea-green, blue, and amber-gold toning covers the obverse, while the reverse is brilliant. Razor-sharp over the ear and throughout the eagle's plumage. NGC ID# 2543, PCGS# 7114
- 4201 1880-O 8 Over 7 Ear, VAM-6, Die 1, MS62 Prooflike PCGS. CAC.** A Top 100 Variety, showing an "ear" at the top-left corner of the 8, which is the remnant of an underlying 7. Gleaming, brilliant fields frame frost-white, sharply struck devices, giving this Mint State 1880-O Morgan bright cameo contrast. A few scattered abrasions define the grade. PCGS# 514835 Base PCGS# 7115
- 4202 1880-S MS67+ PCGS.** A high-end Superb Gem specimen of this popular type issue, with razor-sharp definition on all design elements and vibrant, frosty mint luster throughout. The brilliant surfaces are free of mentionable distractions. NGC ID# 2544, PCGS# 7118
- 4203 1880-S MS67+ PCGS.** Dazzling mint-fresh luster adorns both sides of this high-end Superb Gem 1880-S Morgan dollar type coin. The design elements are boldly rendered, and the brilliant surfaces are virtually free of imperfections. NGC ID# 2544, PCGS# 7118
- 4204 1880-S MS67+ PCGS. CAC.** The 1880-S Morgan is a favorite among type collectors, and this Plus-graded Superb Gem is an ideal candidate for such a collection. Well-struck design elements are set amid glowing, frosty mint luster that is devoid of bothersome abrasions. Traces of light golden toning accent the eye appeal. NGC ID# 2544, PCGS# 7118
- 4205 1880-S MS67+ PCGS. CAC.** Dazzling cartwheel luster combines with semiprooflike mirroring in the fields of this Superb Gem type coin, delivering the incredible eye appeal and modest cameo contrast that achieved a Plus designation and a CAC endorsement. The interiors show little toning, although the peripheries have occasional sun-gold and amber accents. NGC ID# 2544, PCGS# 7118
- 4206 1880-S MS66+ Prooflike PCGS. CAC.** A blush of light golden toning warms stark white-on-black contrast on each side of this high-end Prooflike Premium Gem. The 1880-S is a favorite type-coin issue, as the eye appeal and technical quality of this piece demonstrate. NGC ID# 2544, PCGS# 7119

**1880-S Dollar, MS67+ Prooflike
Cameo-Contrasted Obverse**

- 4207 1880-S MS67+ Prooflike PCGS. CAC.** A remarkable Superb Gem, high-end for the grade. The obverse displays deeply prooflike mirroring in the fields with stark cameo contrast against the sharp, frost-white device. The reverse is slightly less reflective without noticeable contrast. This CAC-approved type coin boasts brilliant surfaces and exuberant eye appeal. There are 20 finer Prooflike coins at PCGS (2/16). NGC ID# 2544, PCGS# 7119
- 4208 1880/79-S Medium S, VAM-8, MS66 Deep Mirror Prooflike PCGS. CAC.** A Top 100 Variety. A prominently mirrored and fully brilliant Premium Gem. The strike is intricate and the eye appeal is imposing. Overdate specialist Ted Clark is credited with discovery of the VAM in late 1968. Population: 1 in 66 Deep Mirror Prooflike, 1 finer (2/16). NGC ID# 2544, PCGS# 41502 Base PCGS# 97121
- 4209 1880/9-S VAM-11 MS67 PCGS.** A Hot 50 Variety. Remnants of a 9 are visible within the 0 of the date. This Superb Gem example is unsurpassed in eye appeal, showing full prooflike fields and cameo contrast on the obverse with frosty luster over the reverse. A hint of champagne toning warms each side, complimenting the outstanding preservation. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122
- 4210 1881 MS66+ PCGS.** While its San Francisco counterpart is plentiful, the 1881 Morgan dollar is scarce in Premium Gem condition and genuinely rare any finer. This Plus-graded coin displays a bold strike and frosty cartwheel luster. There is no measurable toning. NGC ID# 2546, PCGS# 7124
- 4211 1881-CC MS65 PCGS Secure. VAM-2. Ex: Simpson.** Remarkable peach-gold, fire-red, and aquamarine patina consumes the obverse, while the reverse is brilliant save for a honey-gold periphery. A sharply struck and carefully preserved low-mintage Carson City dollar. Ex: *Stamford Coinfest Signature (Heritage, 10/2010), lot 4211.* NGC ID# 2549, PCGS# 7126
- 4212 1881-CC MS66 PCGS.** A single dark toning spot on the reverse is the only distraction on this Premium Gem Carson City dollar. Both sides exhibit fully brilliant silver surfaces with frosty mint luster and exceptional eye appeal. NGC ID# 2549, PCGS# 7126

- 4213 1881-CC MS66 PCGS. CAC. VAM-2.** Small die chips are seen inside the upper loops of the 8s in the date on this lesser VAM variety. This Premium Gem 1881-CC Morgan boasts vibrant, frosty luster and untoned, unabraded surfaces. The strike is sharp, and the eye appeal is outstanding. NGC ID# 2549, PCGS# 7126
- 4214 1881-O MS65 PCGS.** The 1881-O Morgan dollar is not too difficult to locate at the Gem level, but finer coins are decidedly elusive. This sharply detailed MS65 example displays pristine surfaces with vibrant mint luster and highlights of champagne-gold toning. There are 29 finer coins at PCGS (1/16). NGC ID# 2548, PCGS# 7128
- 4215 1881-O MS65 PCGS. CAC.** To the unaided eye, this Gem 1881-O silver dollar possesses eye appeal characteristic of a higher grade, although a loupe reveals trivial lines in the left obverse field that preclude such an assignment. Bold motifs and semiprooflike fields accentuate lavender-gold toning that appears over much of each side. PCGS has seen only 29 finer representatives (1/16). NGC ID# 2548, PCGS# 7128
- 4216 1881-S MS67+ PCGS.** A satiny Superb Gem from the San Francisco Mint, this plentiful issue is an ideal type candidate for the collector who seeks exceptional quality. Both sides are smooth and brilliant with pristine surfaces beneath wispy champagne toning. NGC ID# 2549, PCGS# 7130
- 4217 1881-S MS67+ PCGS. CAC.** A Plus-graded Superb Gem 1881-S dollar is an ideal type coin for many collectors, and the present PCGS example has the added appeal of a CAC green label. The strike is sharp, and each side displays radiant luster. Deep sun-orange, violet, and sky-blue hues appear over the left obverse and around the reverse periphery. NGC ID# 2549, PCGS# 7130
- 4218 1881-S MS67+ PCGS. CAC.** More than 2,000 1881-S silver dollars have achieved the MS67 grade at PCGS and another 4,000+ at NGC, so the twin awards of the PCGS Plus and CAC endorsement help set this delightful, high-end Superb Gem above the crowd. A thin band of rainbow toning hovers above Liberty's head, and the fields are smooth and semiprooflike. A fully struck, virtually unblemished example. NGC ID# 2549, PCGS# 7130
- 4219 1881-S MS67 Prooflike PCGS.** A seldom seen Prooflike Superb Gem example of this otherwise plentiful type-coin issue, showing brilliant surfaces with modest white-on-black contrast. The strike is sharp, and the preservation is outstanding. Population: 79 in 67 (3 in 67+) Prooflike, 4 finer (1/16). NGC ID# 26G7, PCGS# 7131
- 4220 1882 MS66 PCGS.** Toning enthusiasts will find their interest piqued by this Premium Gem 1882 Morgan dollar featuring waves of jade, rose, and ice-blue patina amid stunning luster and excellent preservation. PCGS reports only nine submitted in MS67 (one MS67+) (1/16). NGC ID# 254A, PCGS# 7132
- 4221 1882 MS66 PCGS.** A soft golden halo surrounds the outer periphery, while the interiors display frosty, brilliant luster. The strike is sharp, and abrasions are trivial. PCGS has seen only nine Superb Gems finer (2/16). NGC ID# 254A, PCGS# 7132
- 4222 1882 MS66+ PCGS.** Gold and ocean-blue hues cling to the outer peripheries of this high-end Premium Gem, leaving the interiors with a hint of champagne color. The strike is sharp, and grade-limiting flaws are trivial. PCGS lists nine coins finer (2/16). NGC ID# 254A, PCGS# 7132
- 4223 1882 MS64 Deep Mirror Prooflike PCGS. CAC.** Outstanding reflectivity with champagne border-toning deepening to peach on the reverse. Light frost over well-struck devices adds to the contrasted appearance of this near-Gem. PCGS has graded just 25 numerically finer Deep Mirror Prooflike pieces (2/16).
Ex: Central States Signature (Heritage, 4/2011), lot 5662; Chicago Signature (Heritage, 8/2011), lot 4521. NGC ID# 254A, PCGS# 97133
- 4224 1882-CC MS66+ PCGS. CAC.** A Plus-graded Premium Gem from the famous Carson City Mint, this coin exhibits well-detailed design elements and well-preserved surfaces, with vibrant mint luster on both sides. Shades of golden-brown and violet toning visit the reverse. PCGS has graded 76 numerically finer examples (1/16). NGC ID# 254S, PCGS# 7134

- 4225 1882-CC MS66+ PCGS. CAC.** Spectacular, mint-fresh luster rolls over untouched surfaces on this high-end Premium Gem Carson City dollar. The eye appeal generated by the cartwheel effect is staggering, and under a loupe the surfaces are even more attractive. Boldly struck with CAC approval. The 1882-CC is infrequently seen finer. NGC ID# 254S, PCGS# 7134

1882-CC Dollar, MS66 Deep Mirror Prooflike Exceptional Preservation

- 4226 1882-CC MS66 Deep Mirror Prooflike PCGS.** Scarce in Deep Mirror Prooflike at the MS66 level and virtually unobtainable any finer, this untuned example shows only minor scuffs and tiny marks distributed across the high-contrast, sharply struck surfaces. Great preservation and eye appeal clinch the well-deserved Premium Gem grade. Population: 73 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (1/16). NGC ID# 254B, PCGS# 97135
- 4227 1882-O MS65+ PCGS.** An absolutely splendid Morgan silver dollar with an above average strike showing some hair details over Liberty's ear, and partial feather detail on the eagle's breast. This Gem exhibits frosty silver luster with untuned surfaces. PCGS has certified 37 of these in MS65+, and 55 finer (2/16). NGC ID# 254C, PCGS# 7136
- 4228 1882-S MS65 Deep Mirror Prooflike PCGS.** The 1882-S is one of the best produced, if not *the* best produced Morgan dollar. The mint luster is always exceptional and the strike is invariably full. This is a beautiful deeply mirrored coin, struck from heavily basined dies, that shows thick mint frost over the devices. The brilliant finish shows a few faint, hazy spots on the right side of the obverse. Population: 32 in 65 (1 in 65+) Deep Mirror Prooflike, 9 finer (2/16).
Ex: Long Beach Signature (Heritage, 9/2006), lot 5095. NGC ID# 254E, PCGS# 97141
- 4229 1883-CC MS66+ PCGS. CAC.** A Plus-graded Premium Gem, with sharply detailed design elements throughout and virtually pristine untuned surfaces that radiate vibrant mint luster on both sides. Eye appeal is incredible. NGC ID# 254J, PCGS# 7144
- 4230 1883-CC MS66+ PCGS. CAC.** Flashy silver-white surfaces are untuned and booming with frosty luster amid excellent preservation. The strike is inexact on the hair above the ear but this is a gorgeous CC dollar overall. Wispy peripheral die cracks run through the date and other areas. NGC ID# 254J, PCGS# 7144
- 4231 1883-CC MS65 Deep Mirror Prooflike PCGS.** The deeply mirrored fields of this delightful Gem contrast dramatically with the sharply detailed frosty design elements, creating a stunning cameo effect when the coin is tilted in the light. The brilliant surfaces show only minor signs of contact. NGC ID# 254H, PCGS# 97145
- 4232 1883-S MS62 PCGS.** The 1883-S Morgan dollar is more difficult to locate in high grade than its mintage of 6.2 million pieces would suggest. This impressive MS62 example offers well-detailed design elements and lustrous surfaces with the expected number of minor contact marks for the grade. Shades of golden-brown, pink, and violet toning visit both sides. NGC ID# 254K, PCGS# 7148
- 4233 1883-S MS63 NGC.** The obverse alternates rose-gold and silver patina while the reverse is largely untuned, but both sides show only minor, undistracting ticks that separate this semikay Morgan dollar from an even finer grade. The cheek of Liberty show two reeding marks but is relatively clean overall. Sharply struck and attractive. NGC ID# 254K, PCGS# 7148

- 4234 1883-S MS63 ANACS.** Encapsulated in an old-style ANACS white holder, this MS63 1883-S Morgan dollar boasts generous eye appeal through its frosty luster over untuned silver-white centers complemented by lovely pastel iridescent rim patina. The few abrasions are distant from the focal points. NGC ID# 254K, PCGS# 7148
- 4235 1883-S MS63 NGC. CAC.** Radiant cartwheel luster emerges from beneath dusky lavender-gold toning on each side of this Select 1883-S Morgan dollar. The strike is sharp, and the CAC green label confirms the outstanding quality for the grade. A better date in Uncirculated condition despite a mintage of more than 6 million coins. NGC ID# 254K, PCGS# 7148
- 4236 1883-S MS63 PCGS. CAC.** Impressively radiant, softly frosted luster layers this Select 1883-S Morgan dollar in brilliant luminance. The strike is sharp, and surface abrasions are at a minimum, as denoted by the CAC green label. This San Francisco issue is challenging in finer grades. NGC ID# 254K, PCGS# 7148
- 4237 1884 MS66+ PCGS. CAC.** Seldom is a finer example of the 1884 Morgan dollar seen. This Plus-graded Premium Gem boasts sharp motifs and frosty, untuned cartwheel luster. A few faint, scattered grazes on the obverse surfaces are all that preclude a Superb Gem designation. NGC ID# 254L, PCGS# 7150

**1884 Dollar, MS67+
Low Superb Gem Population**

- 4238 1884 MS67+ PCGS. CAC. Ex: Coronet.** Conditionally scarce in this grade, the 1884 Morgan dollar is extremely rare finer. Incredible, frosty luster glistens over each side of this Plus-graded Superb Gem, yielding a tinge of light champagne toning near the borders. Slight weakness on the hair above Liberty's ear is typical of the issue. This piece is beautifully preserved and attractive. Population: 49 in 67 (8 in 67+), 3 finer (1/16). NGC ID# 254L, PCGS# 7150

**1884 Morgan Dollar, MS65
Deep Mirror Prooflike**

- 4239 1884 MS65 Deep Mirror Prooflike PCGS.** Both sides of this brilliant Gem are essentially untuned although a hint of gold appears along the upper obverse and lower reverse borders. This lovely Morgan dollar displays deeply mirrored fields that surround its frosty silver devices. Population: 35 in 65 (1 in 65+) Deep Mirror Prooflike, 5 finer (2/16). NGC ID# 254L, PCGS# 97151

- 4240 1884-CC MS66 PCGS. CAC. VAM-4A.** This 1884-CC will appeal to the specialist not only for its color and die characteristics, but also for its Premium Gem surface quality and sharp strike. Sky-blue, sun-gold, and copper-orange toning with ruby red and violet accents adorn the obverse. The reverse is brilliant — silver-white and untuned. The VAM-4A designation signifies a repunched stand on the 1 in the date, with the “pinned wing” die gouge on the reverse. A die crack above AMERICA branches at the top serif of E, where a raised lump approaches VAM-4B. Housed in a green label holder with CAC endorsement. NGC ID# 8BBF, PCGS# 7152
- 4241 1884-CC MS66+ PCGS. CAC. VAM-6.** Doubling shows on the right sides of the 1 and (more broadly) the first 8, with a “gouge dot” between the ninth and 10th wing feathers from the bottom of the eagle's right (facing) wing and die lines below the tailfeathers. A beautifully preserved, untuned, sharply struck coin. NGC ID# 8BBF, PCGS# 7152
- 4242 1884-CC MS66+ PCGS. CAC.** Radiant, mint-fresh luster rolls over frosty, untuned surfaces on this high-end Premium Gem Carson City dollar, illuminating boldly struck design elements. The preservation is exceptional, and the eye appeal is superb. NGC ID# 8BBF, PCGS# 7152
- 4243 1884-CC MS65 Deep Mirror Prooflike PCGS.** A brilliant, deeply mirrored Gem cameo example of this plentiful Carson City issue. Few marks affect the mirrored fields, and the frost-white design elements show well-executed strikes. NGC ID# 254M, PCGS# 97153

**1884-O Dollar, MS66 Deep Mirror Prooflike
Near-Impossible Any Finer**

- 4244 1884-O MS66 Deep Mirror Prooflike PCGS.** The outstanding white-on-black contrast tends to overshadow the remarkably uncluttered surfaces of this deeply frosted, glassy-mirrored Premium Gem dollar. The strike is tack-sharp over the ear and across the eagle's breast, legs, and talons. We seldom see an 1884-O with the “full package” of these attributes, as witnessed by the scant number of similarly graded survivors. Population: 54 in 66 (1 in 66+) Deep Mirror Prooflike, 1 finer (1/16). NGC ID# 256X, PCGS# 97155
- 4245 1884-S AU58 PCGS.** The lightly abraded surfaces of this attractive near-Mint Morgan dollar retain almost all of their original mint luster and the sharply rendered design elements show just a trace of friction on the high points. NGC ID# 254P, PCGS# 7156
- 4246 1884-S AU58 NGC.** Moderate reflectivity replaces conventional luster in the fields of this light golden 1884-S Morgan dollar, while the satiny design elements reveal traces of high-point friction that define the grade. The strike is well-executed. NGC ID# 254P, PCGS# 7156
- 4247 1884-S AU58 NGC.** Substantial luster illuminates the fields of this golden-toned 1884-S Morgan dollar, while trivial high-point friction on the devices determines the grade. The 1884-S Morgan is a better date in Uncirculated condition and highly sought-after in the finer AU grades. NGC ID# 254P, PCGS# 7156
- 4248 1884-S AU58 NGC.** Crisply struck for an 1884-S, with substantial cartwheel mint luster remaining over the brilliant silver-white surfaces. Abrasions are limited to faint hair-thin lines and a few small, high point marks. A sharp representative of the near-Mint grade. NGC ID# 254P, PCGS# 7156

4249 1884-S AU58 NGC. Hints of sea-green and pink toning highlight the mostly brilliant surfaces of this lightly abraded near-Mint specimen. The design elements show just the slightest trace of wear on the high points. The 1884-S Morgan dollar is an elusive issue in high grade. NGC ID# 254P, PCGS# 7156

4250 1884-S AU58 PCGS. The 1884-S Morgan dollar is surprisingly elusive in high grade. This attractive near-Mint specimen exhibits just a trace of friction on the sharply detailed design elements and the lightly abraded surfaces retain much original mint luster. NGC ID# 254P, PCGS# 7156

4251 1884-S AU58 PCGS. Fully lustrous fields illuminate bold design elements that show a trace of high-point friction. This near-Mint 1884-S Morgan dollar is among the finest that most budget-conscious collectors will be able to acquire, as Mint State coins are significantly more elusive and valuable. A few light marks and a trace of champagne toning complete the description. NGC ID# 254P, PCGS# 7156

4252 1885 MS66+ Prooflike PCGS. Although the date is plentiful in the absolute sense, the 1885 Morgan is hard to find in the upper Prooflike grades. This high-end Premium Gem boasts razor-sharp detail and brilliant surfaces that have distinct cameo contrast. No obvious marks interrupt the mirrored fields. Population: 79 in 66 (7 in 66+) Prooflike, 4 finer (1/16). NGC ID# BYWR, PCGS# 7159

4253 1885 MS66 Deep Mirror Prooflike NGC. The sharply detailed design elements of this spectacular Premium Gem have a thick coat of mint frost that contrasts boldly with the deeply reflective fields. This surfaces are well-preserved and show subtle hints of pale gold toning. NGC has graded six numerically finer examples (1/16). NGC ID# 254R, PCGS# 97159

4254 1885-CC MS66 PCGS. A touch of rose patina is more prominent on the obverse of this unabraded Premium Gem 1885-CC, the highest grade readily obtainable for this Carson City issue that appeared in droves in the Treasury releases decades ago. A sharply struck and well-preserved example. NGC ID# 254S, PCGS# 7160

4255 1885-CC MS66 NGC. A brilliant, frost-white example of this low-mintage Carson City issue, which is readily available in Uncirculated grades through MS66 but suddenly scarce any finer. PCGS has graded just 74 pieces in a numerically finer grade (1/16). This example offers a clean cheek, flashy cartwheel luster, and a pinpoint-sharp strike with very few marks. NGC ID# 254S, PCGS# 7160

1885-CC Dollar, Impeccable MS66+

4256 1885-CC MS66+ PCGS. The 1885-CC Morgan dollar had the highest percentage survival rate in the great GSA releases of a few decades ago, but this MS66+ PCGS example is nonetheless among the few finest of its ilk; the average certified survivor is in an MS63 holder. This untuned piece boasts incredible luster and impeccable preservation. The last example we handled in this grade was lot 4232 in our Summer FUN Signature (Heritage, 7/2015), which brought \$2,820. NGC ID# 254S, PCGS# 7160

1885-CC Morgan, MS66+ Fantastic Toning

4257 1885-CC MS66+ PCGS. Fantastic teal, rose, and gold coloring complements some untuned silver-gray areas on this stunning Premium Gem 1885-CC Morgan dollar, one of the highest-survival dates in the great GSA sales but also one of the overall best-preserved issues. Liberty's cheek is clean and free of roller marks or mentionable contact, and the strike is exemplary overall. PCGS reports only 74 in Superb Gem grades (1/16). NGC ID# 254S, PCGS# 7160

4258 1885-O MS67 PCGS. A spectacular Superb Gem representative of this popular branch mint issue, with razor-sharp definition on all design elements and virtually pristine surfaces that display a mix of vibrant mint luster and prooflike reflectivity. PCGS has graded only one numerically finer example (1/16). NGC ID# 254T, PCGS# 7162

4259 1885-S MS65 PCGS. Rose-red, electric-blue, and apricot-gold shades dominate this multicolor Morgan dollar. The strike is good and no marks are of any interest. The flashy fields appear prooflike, although undesignated as such by PCGS. NGC ID# 254U, PCGS# 7164

4260 1886 MS67 PCGS. Housed in a first-generation PCGS holder, this remarkable Premium Gem dollar is frosty and essentially without fault. Liberty's cheek and neck are pristine, and there are simply no marks of significance anywhere on the coin. The centers are untuned with brilliant-silver luster, while a thin band of gold toning hugs the inside rims. Just seven coins are numerically finer at PCGS (2/16). NGC ID# 254V, PCGS# 7166

4261 1886 MS67 NGC. CAC. A shining Superb Gem with dramatic toning. Chartreuse, rose, violet, and blue patina forms a partial square pattern, as found at the end of a roll, while the reverse has more traditional bands and arcs of the same colors around a pale silver-gray center. NGC has graded 30 numerically finer examples (1/16). NGC ID# 254V, PCGS# 7166

4262 1886 MS67 PCGS. CAC. Few 1886 Morgan dollars are finer than this satiny Superb Gem. The strike is razor-sharp, and the champagne-tinted surfaces yield a pleasant cartwheel effect. It is difficult to identify grade-limiting marks. PCGS lists seven finer coins (2/16). NGC ID# 254V, PCGS# 7166

4263 1886 MS67+ PCGS. CAC. Gorgeous toning on both sides of this Superb Gem comprises largely rose and lilac with tinges of jade and gold. The sharp strike and top-notch luster are blatant pluses. Population: 36 in 67+, 7 finer (1/16). NGC ID# 254V, PCGS# 7166

4264 1886-O MS61 NGC. Radiant, brilliant luster rolls over frosty surfaces on this Mint State 1886-O Morgan dollar. The eagle's breast and the hair above Liberty's ear are slightly soft as typical, and scattered abrasions limit the grade. NGC ID# 254W, PCGS# 7168

4265 1886-O MS61+ NGC. The Plus designation sets this piece apart from most other lower-grade Mint State examples of this slightly better New Orleans issue. A hint of champagne toning graces the satiny surfaces, and abrasions are not particularly distracting. Slight high-point softness in the centers is typical of the issue. NGC ID# 254W, PCGS# 7168

- 4266 1886-O MS62 NGC.** Light chatter on Liberty's cheek limits the grade, but the eye appeal is remarkably close to that of higher-grade pieces. This 1886-O Morgan displays partially reflective fields and lovely champagne toning. The central high points show above-average definition. NGC ID# 254W, PCGS# 7168

**1886-O Dollar, MS63
Appealing for the Grade**

- 4267 1886-O MS63 NGC.** The 1886-O Morgan dollar is far scarcer in Mint State than its mintage of more than 10 million coins would suggest. This Select example is within the grasp of most collectors, but finer pieces will prove to be out of reach for many. There are no significant abrasions, although a few marks on Liberty's cheek are hidden beneath the toning. Each side displays tan-gold and champagne hues. The central detail is sharper than average. NGC ID# 254W, PCGS# 7168

- 4268 1886-O MS63 ANACS.** This high-mintage New Orleans issue (more than 10.7 million coins struck) is disproportionately scarce in Mint State. The present Select example displays an above-average strike with satiny luster and minimal abrasions. The obverse is brilliant in the center with gold and blue peripheral hues, while the reverse displays uniform champagne toning. NGC ID# 254W, PCGS# 7168

- 4269 1886-S MS65+ PCGS. CAC.** Splashes of amber-gold toning blanket portions of the satiny silver-gray surfaces on this high-end Gem 1886-S Morgan dollar. Well-struck with a clean cheek. PCGS has seen 48 finer examples, including possible resubmissions (2/16). NGC ID# 254X, PCGS# 7170

- 4270 1886-S/S VAM-2, Top 100, MS65 PCGS Secure.** A Top 100 Variety, showing the mintmark lightly recut with split serifs. This Gem example is semiprooflike and radiantly lustrous. The strike is bold, and both sides display light champagne toning. Few seen in this grade with comparable eye appeal. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170

- 4271 1887 MS67 NGC.** Nearly flawless preservation combines with semiprooflike fields and bold design elements to vault this 1887 Morgan dollar to the lofty MS67 grade level. Essentially brilliant with incredible eye appeal. The 1887 is occasionally seen in this grade, but finer coins are prohibitively rare — NGC lists three pieces so-graded, PCGS only one (1/16). NGC ID# 27Y3, PCGS# 7172

- 4272 1887 MS67 PCGS. CAC.** This spectacular Superb Gem displays pinpoint definition on all design elements and the impeccably preserved surfaces exhibit especially vibrant mint luster. Overall eye appeal is terrific. NGC ID# 27Y3, PCGS# 7172

- 4273 1887 MS67 PCGS. CAC.** The design elements of this delightful Superb Gem are sharply detailed and an interesting die crack travels through the stars on the lower left. The well-preserved brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. PCGS has graded one numerically finer example (1/16). NGC ID# 27Y3, PCGS# 7172

- 4274 1887 MS67 PCGS. CAC.** This Superb Gem 1887 Morgan is brilliant throughout the satiny interiors and shows vivid orange-gold toning around the outer peripheries. The strike is a trifle soft on the eagle's breast and the hair above Liberty's ear. CAC-endorsed with outstanding eye appeal. PCGS lists only one coin numerically finer (2/16). NGC ID# 27Y3, PCGS# 7172

- 4275 1887 VAM-12, 'Alligator Eye,' MS65 Deep Mirror Prooflike NGC.** A Top 100 Variety, showing doubling of Liberty's eye that gives it the impression of a reptilian pupil. This Gem Deep Mirror Prooflike example is well-struck and deeply reflective with brilliant surfaces. There are no bothersome abrasions. NGC ID# 254Y, PCGS# 42829 Base PCGS# 97173

**1887/6-O Morgan Dollar, MS64
Only One Finer PCGS Coin**

- 4276 1887/6-O VAM-3 MS64 PCGS. CAC.** A Top 100 Variety. The 1887/6-O Morgan variety requires a glass to view, unlike its Philadelphia counterpart that is visible without a glass. This example has frosty champagne luster with rich peripheral gold and violet toning. PCGS has only certified one finer MS65 piece (2/16). NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

- 4277 1887-O MS65 ANACS.** Well-preserved with satiny luster and champagne-gray toning. The peripheries display deeper sea-green and amber hues. Some mild strike weakness is seen on the central high points, as is typical of this New Orleans issue. The 1887-O is rarely seen finer. NGC ID# 2547, PCGS# 7176

- 4278 1887-O MS65 ANACS.** A lovely, frosty Gem example of this conditionally elusive New Orleans issue. This piece is pleasantly well-struck with largely untouched, brilliant surfaces. A few trivial grazes on Liberty's cheek are all that preclude an even finer grade. Higher-grade pieces are rarely seen, with just 14 so-designated at PCGS and NGC combined (1/16). This ANACS coin represents tremendous value. NGC ID# 2547, PCGS# 7176

- 4279 1887-S/S VAM-2 MS65 PCGS.** A Top 100 Variety, showing the mintmark repunched within the loops of the S. The 1887-S Morgan is scarcely seen finer than MS65. This Gem example displays bold definition and satiny luster. Orange-gold, violet, and ocean-blue toning surrounds the obverse periphery and blankets the entire reverse. PCGS lists 29 finer 1887-S dollars (2/16). NGC ID# 2554, PCGS# 133915 Base PCGS# 42937

- 4280 1888 MS66+ PCGS. CAC.** CAC-approved and high-end for the grade, this Plus-designated Premium Gem boasts excellent definition and radiant, satiny luster over near-brilliant surfaces. Appears almost a grade point finer to the naked eye, although 10x magnification reveals a few faint marks on the cheek. PCGS lists 37 Superb Gems finer (1/16). NGC ID# 26KF, PCGS# 7182

- 4281 1888-O Doubled Arrows, VAM-9, Top 100, MS66 PCGS.** A Top 100 Variety, showing most reverse elements lightly die doubled. This toned Premium Gem is among the finest 1888-O Morgans at PCGS (1/16). The reverse is light golden with rose-amber hues around the peripheries, and the obverse displays mottled amber, violet, gold, and aquamarine hues. Well-struck and semiprooflike. NGC ID# 2556, PCGS# 133920 Base PCGS# 7184

1888-S Morgan Dollar
Seldom-Seen MS64 Deep Mirror Prooflike

4282 1888-S MS64 Deep Mirror Prooflike PCGS. The 1888-S Morgan dollar is a popular date within the series; in addition to its “lucky” connotation in Oriental cultures, it is seen far less often than some of the ubiquitous S-mints from the late 1870s-early 1880s. This rim-toned near-Gem boasts superb deep contrast between frosty devices and well-mirrored fields. Scattered small marks are trivial. Population: 45 in 64 (1 in 64+) Deep Mirror Prooflike, 3 finer (1/16). NGC ID# 27MY, PCGS# 97187

4283 1889-CC VF30 NGC. Flat tan-gray toning covers both sides of this midgrade 1889-CC Morgan dollar, while the design elements show pleasing detail for the grade. A relatively problem-free collector-grade example of this key Carson City issue. NGC ID# 2559, PCGS# 7190

4284 1889-CC VF35 PCGS. Smooth tan-gray surfaces characterize this Choice VF 1889-CC Morgan dollar, while rotating the coin beneath a light reveals traces of luster in the protected peripheral fields. Well-detailed for the grade and a pleasing example of this key Carson City issue. NGC ID# 2559, PCGS# 7190

4285 1889-CC — Improperly Cleaned — NGC Details. AU. A lightly toned and partly lustrous key-date Carson City Morgan. Both sides are somewhat subdued, and a faint vertical mark is noted on the field above Liberty's nose. Wear is chiefly confined to the eagle's breast and the hair above the ear. NGC ID# 2559, PCGS# 7190

4286 1889-CC — Obverse Damage — NGC Details. AU. A cluster of reed marks on Liberty's cheek and a small gouge behind the eye define the Details grade from NGC. Nonetheless, this 1889-CC Morgan is well-detailed and partially lustrous. Bright surfaces are free of toning. NGC ID# 2559, PCGS# 7190

4287 1889-CC — Filed Rims — PCGS Genuine. AU Details. The outer rims are filed on this well-detailed 1889-CC Morgan, although there are no other serious imperfections. The fields are bright and modestly reflective, and the peripheries display hints of amber toning. The devices are well-struck and show little wear. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU53
High-End Collector-Grade Coin

4288 1889-CC AU53 NGC. Partial luster highlights the fields on this About Uncirculated 1889-CC Morgan, illuminating grayish-gold toning on each side. The surfaces are mostly unabraded, and wear is light. The 1889-CC has long been one of the biggest keys in the series, and it is the most challenging issue in the Carson City short set. NGC ID# 2559, PCGS# 7190

4289 1889-O MS64+ PCGS. CAC. Vibrant mint luster shines through delicate shades of lilac and greenish-gold toning on the well-preserved surfaces of this high-end Choice specimen. The design elements are well-detailed and eye appeal is outstanding. NGC ID# 255A, PCGS# 7192

4290 1890 MS65 PCGS. MS65 is the last somewhat-available grade before the 1890 becomes prohibitively expensive. This Gem example displays original sea-green and rose toning that covers both sides. Bold silver luster shines through the slightly iridescent patina. Well-struck for the issue, which seldom comes sharp. PCGS reports just four finer examples (2/16). NGC ID# 255C, PCGS# 7196

1890 Silver Dollar, MS65+
Extremely Rare Any Finer

4291 1890 MS65+ PCGS. The 1890 Morgan dollar is highly popular in Gem condition, as finer pieces are prohibitively rare for many collectors. This Plus-designation piece will be of heightened importance. The frosty surfaces are free of significant abrasions and display light champagne toning. Slight strike weakness on the central high points is typical of the issue. PCGS lists only four finer representatives (2/16). NGC ID# 255C, PCGS# 7196

1890 Dollar, MS64+ Deep Mirror Prooflike
Moderately Contrasted

4292 1890 MS64+ Deep Mirror Prooflike PCGS. CAC. An elusive Choice Deep Mirror Prooflike example of this conditionally better date, showing modest cameo contrast. The Plus designation and CAC green label combination further heighten the appeal. Liberty's portrait and the eagle are boldly defined, and each side is essentially brilliant. Only nine Deep Mirror Prooflike coins are finer at PCGS (2/16). NGC ID# 3VX7, PCGS# 97197

4293 1890-S MS66 PCGS. Impressive fire-red, jade-green, and apricot-gold toning consumes the obverse. The reverse is also fully patinated, and exhibits lemon and aqua shades. Lustrous and boldly struck with a smooth obverse and minor marks below the left (facing) wing. NGC ID# 255F, PCGS# 7202

4294 1891-CC MS64 PCGS. A pleasing example for the grade, showing frosty luster with a touch of golden toning. A few minor abrasions are all that preclude Gem classification. The eagle's breast and the central obverse are better defined than typically seen on this late Carson City Morgan. NGC ID# 255H, PCGS# 7206

4295 1891-CC MS64+ PCGS. A high-end Choice specimen of this popular branch mint issue, with sharply detailed design elements and lightly marked brilliant surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 255H, PCGS# 7206

1891-S Dollar, MS66
Semiprooflike on Both Sides

4296 1891-S MS66 PCGS. Both sides display modest reflectivity in the fields, but a Cameo designation is just out of reach. This brilliant, satiny Premium Gem boasts sharp design elements and is free of major abrasions. The 1891-S is a better date in high grade, scarce in MS66 and rare finer. PCGS has seen eight higher-grade submissions (2/16). NGC ID# 255K, PCGS# 7210

4297 1892-CC AU58 PCGS. An attractive near-Mint example with sharp interior details. Slight evidence of rub on Liberty's cheek precludes an Uncirculated grade. Smooth, satiny surfaces have iridescent champagne-gray toning. NGC ID# 255M, PCGS# 7214

4298 1892-CC MS64 PCGS. This near-Gem survivor of the 1892-CC Morgan dollar issue is far finer than normally seen for the issue, as many examples are circulated and/or rather heavily bagmarked. The surfaces of this piece are relatively distraction-free including on the cheek of Liberty. Generous luster appears on surfaces that are untuned silver-white in the centers with a daub of rose rim toning. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, Toned MS64

4299 1892-CC MS64 PCGS Secure. The 1892-CC is a better Carson City date in high grade, particularly in Gem or finer condition. This near-Gem example remains within the grasp of budget-conscious enthusiasts. The strike is slightly soft on the central high points, but dusky lavender-gray and sun-gold toning masks this to the naked eye. Light, scattered marks limit the grade. NGC ID# 255M, PCGS# 7214

4300 1892-S AU53 NGC. Moderate luster remains in the fields of this About Uncirculated 1892-S Morgan dollar, illuminating unusually smooth surfaces. The central devices are well-struck but show slight wear over the high points, consistent with the grade. NGC ID# 255P, PCGS# 7218

1892-S Dollar, Partially Lustrous AU55

4301 1892-S AU55 PCGS. Pleasing surfaces display smooth, iridescent toning over steel-gray coloration. Glimpses of luster remain in the fields. This Choice AU 1892-S silver dollar displays trivial high-point wear and is free of severe abrasions. The rarity of this issue in Mint State makes high-end AU coins highly sought-after. NGC ID# 255P, PCGS# 7218

4302 1893-CC — Improperly Cleaned — NGC Details. AU. Pastel almond-gold and ice-blue patina adorns this somewhat flashy and richly detailed semikey Carson City dollar. Abrasions are surprisingly absent, although careful inspection reveals faint field hairlines.

4303 1893-O AU58 NGC. VAM-3A. One or two marks occur on each side, including one nick on Liberty's jawline, but there is scarcely a trace of perceptible rub on this lightly circulated better-date Morgan dollar. Untoned and with a decent strike for the issue. NGC ID# 255T, PCGS# 7224

4304 1893-O AU58 NGC. Barely a trace of friction is evident on this thoroughly lustrous 1893-O Morgan dollar, showing minimal abrasions in the fields. Traces of light golden toning emerge from the peripheries. As expected for the issue, slight weakness appears on the central high points. NGC ID# 255T, PCGS# 7224

4305 1893-O AU58 PCGS. An attractive near-Mint specimen of this low-mintage branch mint issue, with lustrous, lightly abraded surfaces and just a trace of wear on the design elements. A few highlights of lavender and greenish-gold toning add to the pleasing presentation. NGC ID# 255T, PCGS# 7224

4306 1893-O AU58 PCGS. CAC. A thoroughly lustrous near-Mint example of this semikey New Orleans issue, coming from a mintage of just 300,000 coins. This light golden-toned 1893-O Morgan would have qualified for a Mint State designation were it not for a brush of friction on Liberty's cheek and the eagle's breast. NGC ID# 255T, PCGS# 7224

1893-O Dollar, Lustrous MS61

4307 1893-O MS61 NGC. An above-average strike complements smooth, satiny luster on this Uncirculated 1893-O Morgan dollar. Hints of golden toning emerge from the peripheries, but the interiors are largely brilliant. Light chatter on Liberty's cheek is all that precludes a finer grade from NGC. From a mintage of 300,000 coins. NGC ID# 255T, PCGS# 7224

4308 1893-S — Rim Damage — NGC Details. VG. A relatively pleasing coin for a Details grade, showing original gunmetal-gray fields and tan-gray relief elements that produce the desirable "circulation cameo" appearance. Old rim bumps are mostly worn away and pose little distraction. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, Appealing VG8

- 4309 1893-S VG8 PCGS. CAC.** This is a wholesome-appearing rose-gray example of this famous key date. There are no major marks, just extensive circulation wear. The CAC approval will make this already-appealing coin that much more so to many collectors. Full rims and bold interior detail remaining are among many pluses here. This is among only 40 in this grade with the CAC approval (1/16). NGC ID# 255U, PCGS# 7226

1893-S Dollar, Pleasing Fine 12

- 4310 1893-S Fine 12 NGC.** Evenly circulated with tan-gray toning that deepens in the fields and lightens over the relief elements. The surfaces are smooth, and eye appeal is pleasing for the grade. The key-date 1893-S is one of the main stoppers to a circulated date and mintmark Morgan dollar collection, with mid-level pieces such as this in high demand. NGC ID# 255U, PCGS# 7226

- 4311 1893-S — Whizzed — NGC Details. VF.** A stone-gray and butter-gold representative of the rarest business issue of the series. No abrasions are of any consequence, but the fields exhibit a uniform textured appearance associated with whizzing. NGC ID# 255U, PCGS# 7226

- 4312 1894 AU55 NGC.** Lustrous fields balance with light surface chatter on this Choice AU 1894 Morgan dollar. The strike is sharp, and high-point wear is minimal. Traces of light golden toning add to the appeal. The 1894 is the scarcest Philadelphia issue in the series, boasting a small 110,000-coin mintage. NGC ID# 255V, PCGS# 7228

- 4313 1894-S MS63 PCGS.** Thoroughly lustrous and cast in warm champagne toning, this Select 1894-S Morgan dollar displays radiant luster and well-defined design elements. A touch of chatter on Liberty's cheek limits the grade in the absence of any singular abrasions. NGC ID# 255X, PCGS# 7232

1894-S Morgan Dollar, Attractive MS64+ Ideal Collector Quality

- 4314 1894-S MS64+ PCGS.** Perfectly positioned at the high end of the optimal collecting grade, this Plus-graded near-Gem dollar exudes quality. Brilliant cartwheel luster rolls across the nearly mark-free, smooth surfaces. Glimpses of golden-gray toning do little to diminish the bold silver flash. Everything is sharp, but especially the eye appeal and upside of this Choice dollar. NGC ID# 255X, PCGS# 7232

- 4315 1895-O AU53+ PCGS.** Elements of luster illuminate the fields of this About Uncirculated 1895-O Morgan dollar, while the satiny motifs display a touch of high-point wear. Light surface chatter is consistent with the grade beneath light golden toning. The Plus designation adds additional appeal to this piece — one of two so-graded at PCGS (1/16). NGC ID# 255Y, PCGS# 7236

- 4316 1895-O AU55 NGC.** Mostly lustrous fields backlight the satiny devices of this Choice AU 1895-O Morgan dollar. The strike is above-average for the issue, showing trivial high-point friction that precludes a Mint State designation. NGC ID# 255Y, PCGS# 7236

- 4317 1895-O AU55 PCGS. CAC.** From a low mintage of 450,000 coins, this Choice AU 1895-O Morgan dollar displays substantial original luster in the fields with light golden toning over the high points of the devices that show friction. The strike is sharp, and there are no bothersome abrasions. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, AU58 Low-Mintage New Orleans Issue

- 4318 1895-O AU58 NGC.** The pronounced difference in value between Mint State and near-Mint coins inflates the number of 1895-O submissions and swells the ranks of About Uncirculated coins, yet this example is deserving of its borderline Uncirculated designation. Faint, vertical slide marks on the obverse are among the few marks, and sharp definition remains on the central devices. Mint luster survives at the obverse border and more extensively across the reverse fields. NGC ID# 255Y, PCGS# 7236

- 4319 1896-O MS61 NGC.** Smooth luster rolls over each side of this Mint State 1896-O Morgan, illuminating champagne-gray toning. The strike is slightly soft on the central high points, as usual, but grade-limiting abrasions are minimal. NGC ID# 272U, PCGS# 7242

- 4320 1896-O MS62 PCGS.** The 1896-O Morgan dollar is one of the most challenging issues of the series in high grade, but circulated examples are easily available. This attractive MS62 example displays lightly marked surfaces under shades of lavender-gray and golden-brown toning. NGC ID# 272U, PCGS# 7242

- 4321 1896-O MS62 PCGS.** Satiny luster shows a trace of champagne coloration on this Mint State 1896-O Morgan dollar. The hair above Liberty's ear and the eagle's breast show only trivial incompleteness. A few small marks on the cheek limit the grade. NGC ID# 27ZU, PCGS# 7242

**1896-O Dollar, MS62
Rich, Variegated Toning**

- 4322 1896-O MS62 PCGS.** A melange of russet, gray, and bluish-green patination runs over each side of this Morgan. Its luster is subpar and the design elements softly struck in spots, such as the hair above Liberty's ear and the eagle's breast feathers, contributing to the coin's limited grade. These factors are, unfortunately, characteristic of the 1896-O. NGC ID# 27ZU, PCGS# 7242
- 4323 1896-S AU58 ANACS.** An attractive near-Mint example of this challenging date, with just a trace of wear on the high points of the design elements and much prooflike reflectivity in the fields. The surfaces are moderately abraded for the grade. NGC ID# 2564, PCGS# 7244

- 4324 1897 MS66+ PCGS. CAC.** This high-end Premium Gem displays sharply detailed design elements and vibrant mint luster throughout, with well-preserved surfaces that exhibit a few highlights of pink toning. PCGS has graded 31 numerically finer examples (1/16). NGC ID# 27P5, PCGS# 7246

- 4325 1897-O MS62 PCGS.** An elusive and popular issue in Mint State grades as most of the 4 million coins struck at New Orleans in 1897 entered circulation as opposed to later years beginning in 1898 when most examples remained in Treasury storage. This pleasing piece has rich gold and gray toning over its lustrous silver surfaces. NGC ID# 2565, PCGS# 7248

- 4326 1897-S MS65 Prooflike PCGS. CAC.** The PCGS Plus designation is particularly important for this Gem San Francisco dollar — one of two such MS65 coins to earn the high-end award. Untoned and brilliant-white, the fields are nicely reflective and smooth mint frost blankets the central motifs. Abrasions are nearly nonexistent on the sharply struck surfaces. CAC endorsed. Population: 2 in 65+ Prooflike, 38 finer (1/16). NGC ID# 267S, PCGS# 7251

- 4327 1897-S MS66 Prooflike PCGS. CAC.** A hint of ice-blue toning seems to emerge from the reflective fields of this Premium Gem Prooflike 1897-S dollar, accentuating the modest cameo contrast on each side. The strike is bold, and the eye appeal is excellent. Rarely seen so fine and reflective. Population: 34 in 66 (2 in 66+) Prooflike, 4 finer (1/16). NGC ID# 267S, PCGS# 7251

- 4328 1899-S MS65 NGC.** Both sides of this Gem San Francisco Mint Morgan dollar display bold design motifs and excellent eye appeal, the result of satiny mint luster and reflective fields. NGC ID# 256D, PCGS# 7262

- 4329 1899-S MS65 PCGS.** The 1899-S is moderately scarce San Francisco dollar in Gem or finer condition. This silver-white example is brilliant, frosty, and fully struck. A thin sheen of almond-gold patina floats amid the cartwheel luster. NGC ID# 256D, PCGS# 7262

- 4330 1901 AU58 PCGS.** Vibrant luster remains in the fields of this near-Mint 1901 Morgan dollar, showing traces of light golden toning near the outer peripheries. The strike is sharp, and wear is trivial. Light grazes on the cheek accompany the grade. A pleasing collector-grade example of this famous condition rarity. NGC ID# 256J, PCGS# 7272

- 4331 1901-S MS64 PCGS.** To the unaided eye, this 1901-S Morgan dollar appears a grade point finer, but a loupe reveals mine surface grazes on Liberty's cheek and in the adjacent field that preclude Gem classification. Each side displays satiny, champagne-tinted luster. Central strike weakness is typical of the issue. NGC ID# 256L, PCGS# 7276

- 4332 1901-S MS65 NGC.** An elusive issue in high grades, with MS65 representing the optimum compromise between quality and price. This brilliant Gem has frosty silver luster and untuned surfaces. NGC has only certified six finer examples (2/16). NGC ID# 256L, PCGS# 7276

- 4333 1902 MS66 PCGS. CAC.** A sharply struck, brilliant, and frosty Premium Gem with sharp definition throughout Liberty's hair and few marks (none of any consequence) on the cheek or in the fields. Cartwheel luster abounds. PCGS reports just 31 numerically finer examples of the 1902 Philadelphia issue (2/16). NGC ID# 256M, PCGS# 7278

**1902 Morgan Dollar, Untoned MS67
Tied for Finest Graded**

4334 1902 MS67 NGC. Gleaming cartwheel luster on untoned surfaces and pristine preservation are the hallmarks of this immaculate Superb Gem 1902 Morgan dollar, tied for the finest certified at either service. Liberty's cheek is virtually mark-free, as is the eagle's breast. Census: 19 in 67 (2 in 67 ★), 0 finer (1/16). NGC ID# 256M, PCGS# 7278

4335 1902-O MS66+ PCGS. CAC. The 1902-O Morgan dollar becomes conditionally rare in grades above MS66, making this high-end Premium Gem a good balance of quality and value. The design elements are well-detailed and the well-preserved surfaces radiate vibrant mint luster. PCGS has graded 20 numerically finer examples (1/16). NGC ID# 256N, PCGS# 7280

**1903 Morgan Dollar, Top-Grade MS67
With CAC Approval**

4336 1903 MS67 PCGS. CAC. The 1903 Morgan dollar is not an absolute rarity by any means, given its mintage exceeding 4.6 million coins, but Superb Gems such as this piece are the finest certified at both services, discounting two outliers (or one submitted twice) at NGC. The untoned surfaces boast bold cartwheel luster and top-notch preservation. One noticeable nick appears in the center of the eagle's breast, not overt. Population: 94 in 67 (2 in 67+), 0 finer. CAC: 31 in 67, 0 finer (1/16). NGC ID# 256R, PCGS# 7284

4337 1903 MS64 Deep Mirror Prooflike NGC. Ex: Gold & Silver Pawn. A rare Deep Mirror Prooflike example of this otherwise plentiful issue, graded near-Gem and displaying deep reflectivity. Light golden toning deepens toward the peripheries. The design elements are well-struck, and abrasions are minimal. Census: 10 in 64 Deep Mirror Prooflike, 4 finer (2/16). NGC ID# 256R, PCGS# 97285

4338 1903-O MS66+ PCGS. CAC. One of the "colorful dates" in the Morgan series, the 1903-O is a former great rarity. This untoned Premium Gem boasts a clean cheek on Liberty and a better-struck obverse than usually seen on this issue. Population: 37 in 66+, 76 finer (1/16). NGC ID# 256S, PCGS# 7286

4339 1903-S AU53 PCGS. This About Uncirculated 1903-S dollar is deeply toned in olive-gray and sun-gold hues, while allowing tinges of original luster to emerge from the protected portions of the peripheral fields. A few light marks are consistent with the grade. The 1903-S is a famous key to the 20th century portion of the series. NGC ID# 256T, PCGS# 7288

4340 1903-S — Improperly Cleaned — NGC Details. Unc. The 1903-S is a much better date, elusive in all grades. This unworn example is slightly subdued but nonetheless exhibits unbroken cartwheel luster. Bagmarks are inconsequential and the eye appeal is surprisingly attractive. NGC ID# 256T, PCGS# 7288

4341 1904 MS65 PCGS. The supply of silver at the three mints finally exhausted, the Philadelphia Mint struck 2,788,650 pieces with little concern for quality. This Gem example is an exception, with nearly mark-free surfaces and soft satin luster. The strike is uniformly sharp for the issue, with splashes of blue, gold, and deep-gray toning. Just 24 pieces are numerically finer at PCGS (2/16). NGC ID# 256U, PCGS# 7290

4342 1904 MS65 PCGS. More than 570,000,000 Morgan dollars were minted between 1878 and 1904 under legislation initiated by the Bland-Allison Act at all mints combined. This lustrous and attractive Gem shows a clean cheek with a tiny pair of ticks on the chin, but otherwise no marks to mention. A well-struck Morgan — toned at the borders in purple and russet shades. PCGS reports just 24 coins in a finer numeric grade (2/16). NGC ID# 256U, PCGS# 7290

4343 1904-O MS66 Prooflike PCGS. An exquisite green-label PCGS example, this Premium Gem has fully prooflike fields around its satiny silver devices. Both sides are brilliant and untoned. Population: 75 in 66 (2 in 66+) Prooflike, 1 finer (2/16). NGC ID# 256V, PCGS# 7293

4344 1921 MS66+ PCGS. Although common in low grades, the 1921 Morgan dollar is seldom seen this fine. The Plus grade assigned this coin denotes its outstanding luster and preservation — very nearly Superb Gem quality. The surfaces are untoned, and Liberty's cheek is impressively clean and frosty. The strike is above-average. PCGS lists 11 finer examples (2/16). NGC ID# 256X, PCGS# 7296

4345 1921 MS66+ PCGS. CAC. Among the finest for the grade, boasting both a Plus designation and a CAC green label. This 1921 Morgan dollar type coin displays vibrantly frosted luster and mint-fresh brilliance. The eagle's breast and portions of the wreath are soft, but the strike is nonetheless above-average. PCGS lists only 11 coins finer (2/16). NGC ID# 256X, PCGS# 7296

4346 1921-D MS66+ PCGS. CAC. The satiny surfaces of this Premium Gem are untoned silver-white and laden with flashy luster throughout. Marks are minimal, including a pristine cheek on Liberty. One of the nicest available. Population: 50 in 66+, 11 finer. CAC (which ignores Plus grades) has stickered only four MS67 finer (1/16). NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

**1892 Morgan Dollar, PR64
Light Golden Patina**

4347 1892 PR64 NGC. A light touch of golden patina embraces the high points of surfaces that are otherwise untoned silver-white, showing deep reflectivity in the fields and nicely frosted devices, even if insufficient for a Cameo designation. The strike is inexact for a proof, showing a lack of detail in the hair over the ear, and a few contact marks on Liberty and the eagle contribute to the grade. NGC ID# 27ZM, PCGS# 7327

**1901 Morgan Dollar, PR64
Light Champagne Toning**

- 4348 1901 PR64 NGC.** With so few Mint State 1901 silver dollars extant, it is little wonder that the similarly dated proofs are accorded special status in the Morgan series. Uniformly brilliant, as befits the Mint's method of proof production in the early 20th century, this Choice quality example shimmers beneath moderate olive-tan iridescence. The toning yields to brilliance in the center of the reverse, although a few swirls of deeper color are seen on that side at the E in STATES. Both sides are boldly struck with no outwardly noticeable handling marks.

Ex: *Santa Clara Signature* (Heritage, 11/2002), lot 6810. NGC ID# 27ZZ, PCGS# 7336

PEACE DOLLARS

- 4349 1921 MS65 PCGS, VAM-1G.** The obverse die for VAM-1G struck matte proofs. The pick-up point is a curly die line above the right half of the V in TRVST. The present coruscating Gem displays olive-gray toning and a few wispy grazes on Liberty's neck and the field near the profile. NGC ID# 2U4E, PCGS# 7356
- 4350 1921 MS65 NGC.** Intense, mint-fresh luster rolls over this Gem High Relief Peace dollar, illuminating wisps of golden toning and revealing few surface abrasions. The central strike is superior to that of most examples, and the overall eye appeal is superb. Infrequently seen finer. NGC ID# 2U4E, PCGS# 7356
- 4351 1922-D MS66 PCGS.** This amazing Premium Gem exhibits rich gold and iridescent toning over frosty mint luster on both sides. Sharply struck and uniquely attractive. Conditionally rare with only three finer PCGS certified examples (2/16). NGC ID# 257D, PCGS# 7358
- 4352 1922-D MS66 PCGS, CAC.** The design elements of this spectacular Premium Gem exhibit razor-sharp definition throughout and the well-preserved, brilliant surfaces radiate vibrant mint luster. Overall eye appeal is tremendous. PCGS has graded three numerically finer examples (1/16). NGC ID# 257D, PCGS# 7358
- 4353 1924 MS66+ PCGS, CAC.** This brilliant and lustrous Peace dollar sits on the cusp of a higher grade. The 1924 is a somewhat available Philadelphia issue in MS66, but it is notably rare any finer. The twin awards of the PCGS Plus designation and CAC endorsement confirm the high-end quality of this well-struck Premium Gem. Population: 68 in 66+, 32 finer (1/16). NGC ID# 257J, PCGS# 7363

**1924 Peace Dollar, MS67
Intense Luster and Eye Appeal**

- 4354 1924 MS67 NGC.** The 1924 is among the few Peace dollar issues that are marginally available in Superb Gem condition. This example showcases stunningly untouched surfaces with intense mint frost as a result of being struck with finely rusted dies. The detail is sharp. Both sides are champagne-toned in the centers but display deeper amber, russet, and olive hues around the peripheries. Census: 90 in 67 (1 in 67+, 1 in 67 ★), 1 finer (2/16). NGC ID# 257J, PCGS# 7363

- 4355 1924-S MS64+ PCGS.** The fields are partially reflective and the strike is particularly sharp on this appealing, Plus-graded Choice Peace dollar. The 1924-S is a strike-challenged date, yet this shows bold definition throughout. Untoned except for a central band of pale-gold patina on each side, with strong, cartwheel silver luster. NGC ID# 257K, PCGS# 7364

**1925 Peace Dollar, MS67
Prohibitively Rare Finer**

- 4356 1925 MS67 PCGS.** For type purposes, this Superb Gem 1925 Peace dollar is difficult to beat. Sharp design elements reside amid frosty luster, which is warmed by light champagne toning. There are no abrasions, and the eye appeal is outstanding. While the common dates of the Morgan dollar series are plentiful in this lofty grade, the available issues in the Peace dollar series are scarce so fine. PCGS has seen only one 1925 coin finer (2/16). NGC ID# 257L, PCGS# 7365
- 4357 1927-D MS64 PCGS.** A sharply struck Choice, better-date Peace dollar with only widely scattered minor marks and bold silver luster. Essentially untoned and Choice. A horizontal die crack crosses the bust tip. NGC ID# 257T, PCGS# 7371

**1927-D Peace Dollar, Fully Struck MS65
Amazingly Clean Example**

4358 1927-D MS65 PCGS. Among the two and a half bags of this issue that were sold at public auction in 1992, only 50 or so pieces qualified as MS65; the vast majority were in the MS60-63 grade range. This is an amazingly clean coin, lacking mentionable or even noticeable abrasions on either side. Fully struck, as one would expect, the surfaces have rich, satiny mint luster and are covered with a light haze of oyster-gray patina. This is a 1927-D worth stretching for. PCGS lists 10 finer representatives (1/16).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2830; Central States Signature (Heritage, 4/2012), lot 5851. NGC ID# 257T, PCGS# 7371

4359 1927-S MS64 NGC. An impressive Choice Mint State example of this condition rarity, exhibit gold and iridescent toning over frosty mint luster on both sides. A sharply struck and impressive example. NGC has only certified 82 finer examples (2/16). NGC ID# 26J6, PCGS# 7372

4360 1927-S MS64+ PCGS. This better Peace dollar issue had a small 866,000-coin mintage, and few survivors are known at the Gem level. This Plus-graded Choice example boasts satiny luster and boldly rendered motifs. Light champagne toning blankets each side. NGC ID# 26J6, PCGS# 7372

4361 1928 MS64 PCGS. A satiny Choice example of the key 1928 Peace dollar, showing well-struck design elements and pleasing preservation. Whereas many examples of this issue show rather dull yellowish toning, this piece displays a dusting of silvery champagne. NGC ID# 257V, PCGS# 7373

4362 1928 MS64 NGC. This attractive Choice specimen exhibits sharply detailed design elements and well-preserved brilliant surfaces with vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 257V, PCGS# 7373

4363 1934-S AU58 PCGS. Overall, the 1934-S is the scarcest Peace dollar issue in Mint State, making this near-Mint example highly appealing among budget-conscious collectors. Substantial luster glows in the fields, and there is little high-point friction. The central devices show trivial strike softness. Traces of champagne color appear on each side. NGC ID# 257Z, PCGS# 7377

4364 1935 MS66 NGC. This final-year Peace dollar issue is scarce at the Premium Gem level and is extremely rare finer. The present example displays impressively sharp detail with frosty luster and light golden toning. There are no mentionable abrasions. Census: 70 in 66, 5 finer (2/16). NGC ID# 2582, PCGS# 7378

**1935 Dollar, Brilliant MS66
Among the Finest at PCGS**

4365 1935 MS66 PCGS. CAC. The 1935 Peace dollar is only marginally elusive in MS66, but no Superb Gems are known at PCGS (2/16). This CAC-endorsed example displays vibrant, brilliant luster and untouched surfaces. The strike is bold, and eye appeal is outstanding. The Registry collector would be hard-pressed to locate a finer example in a PCGS slab. NGC ID# 2582, PCGS# 7378

4366 1935-S MS65 PCGS. CAC. Three Rays below ONE. A seemingly flawless Gem in terms of surface quality and eye appeal. The brilliant, smooth fields and sharply struck motifs radiate silver mint luster with a mere sprinkling of reddish-gold patina. Rightfully CAC endorsed. NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLARS

4367 1972 Type Two, FS-901, MS65 PCGS. A high-end example of this elusive variety, identified by the formation of the Caribbean islands on the small globe on the reverse. The Gem-quality surfaces yield satiny luster and light golden toning with minimal abrasions. Second to few in terms of quality. PCGS# 510592 Base PCGS# 97409

**1972-D Eisenhower Dollar, MS67
Tied for Finest Certified**

4368 1972-D MS67 PCGS. Remarkably few 1972-D Eisenhower dollars are certified at the Registry-essential Superb Gem level. This satiny, multicolor example is tied with a dozen others as the finest at PCGS (1/16). The strike is bold, and the nickel surfaces are devoid of noticeable flaws. Only four coins are numerically comparable at NGC (1/16). NGC ID# 2588, PCGS# 7410

1976 Type Two Bicentennial Dollar
Top-Grade MS67

- 4369** 1976 Type Two MS67 PCGS. The more often seen Type Two variant of the Bicentennial Eisenhower dollar, showing slimmer lettering on the reverse. This Superb Gem example is one of 10 tied at the top of the PCGS *Population Report* (1/16), an essential acquisition for the Registry enthusiast. Both sides are toned in blended gold, lavender, and aquamarine hues. NGC ID# B76M, PCGS# 7419

1977 Eisenhower Dollar, MS67
Sole Finest at CAC

- 4370** 1977 MS67 PCGS. CAC. This Registry-grade 1977 Eisenhower dollar is tied with 16 others as the finest at PCGS, but it is more importantly *the only coin in this grade with a CAC green label* (1/16). An essential acquisition for the competitive collector, this boldly struck, unabraded Superb Gem displays warm golden toning that emits vivid rose undertones when tilted beneath a light. NGC ID# 258M, PCGS# 7423

PROOF EISENHOWER DOLLAR

- 4371** 1971-S Silver PR70 Deep Cameo PCGS. Type Two Reverse. The PCGS *Population Report* shows 52 submissions of 1971-S 40% silver Eisenhower dollars have received the top grade of PR70 (1/16), and every one of those submissions are designated Deep Cameo. Like all the others, this piece has extraordinary mint frost on the devices within a frame of deeply mirrored fields. Both sides are brilliant and untoned. NGC ID# 258S, PCGS# 97428 Base PCGS# 999138

SUSAN B. ANTHONY DOLLAR

1979-P Susan B. Anthony Dollar, MS67
FS-301, Wide Rim

- 4372** 1979-P Wide Rim, FS-301, MS67 PCGS. This popular *Cherrypickers'* variety shows an unusually wide rim, with the date nearly touching it. Superb Gem examples are genuinely rare. This piece displays satiny luster with nickel-gray and champagne coloration. The strike is sharp, and there are no bothersome abrasions. Population: 17 in 67 (1 in 67+), 0 finer (2/16). NGC ID# 2593, PCGS# 145367 Base PCGS# 99571

SACAGAWEA DOLLAR

2000-P Sacagawea Dollar, MS68
FS-902, 'Cheerios' Prototype Reverse

- 4373** 2000-P Cheerios, FS-902, MS68 NGC. The prototype or "Cheerios" reverse Sacagawea dollar, showing sharp details on the eagle's tailfeathers. Examples are scarce in all grades, and the variety is ranked 14th in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. The present example is almost flawlessly preserved, showing radiant golden luster and sharp design elements. Eye appeal is exceptional. Census: 11 in 68, 0 finer (1/16). NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

GOLD DOLLARS

- 4374** 1849 No L, D-1, Normal Stars, MS64 PCGS. Only one die pair exists for the No L, Open Wreath variety. It is readily identified by the two widely repunched stars below the bust. This beautiful honey-gold near-Gem is fully struck and exhibits only trivial contact, along with a trace of struck-in grease on the obverse exergue. PCGS# 521670 Base PCGS# 7501
- 4375** 1849 Open Wreath, With L, D-2, Normal Stars, MS63 PCGS. The scarce Open Wreath, With L subvariety with a prominently repunched star at 5 o'clock. A lustrous example with attractive peach-gold toning. The hair near the ear is lightly brought up, but the remainder of the strike is bold. PCGS# 521674 Base PCGS# 7502
- 4376** 1849 Open Wreath, D-3, Distant Stars, MS63 PCGS. Scarcer than the D-4 Close Stars subvariety. The stars are distant from the bust device, and close to the dentils. This well struck orange-gold and rose-red representative offers coruscating luster and lightly marked fields. PCGS# 521675 Base PCGS# 7502

- 4377 1849 Open Wreath, D-4, Close Stars, MS63 PCGS.** The stars are close to the bust, unlike its D-3 predecessor. Breen-6004 with thin date numerals. Nicely struck and lustrous with rich orange toning and a single moderate mark near the large 1.
Ex: Long Beach Signature (Heritage, 9/2013), lot 5018, which realized \$998.75. PCGS# 521671 Base PCGS# 7502
- 4378 1849 Closed Wreath, D-5, Close Stars, MS63 PCGS.** Breen-6005, his "Heavy Date" variety. Olive-green borders frame wheat-gold fields and devices. A well struck and coruscating gold dollar that has a smooth reverse and a couple of small marks on Liberty's cheek and hair.
Ex: Long Beach Signature (Heritage, 6/2013), lot 5529, which realized \$763.75. PCGS# 521672 Base PCGS# 7503
- 4379 1849 Closed Wreath, D-5, Close Stars — Clamshell Lamination — MS63 NGC.** A well struck and coruscating apricot-gold representative. Marks are confined to the reverse rim near 12 o'clock. We do not see any laminations on the present coin, but the obverse field is swollen near the profile. The reverse exhibits interesting peripheral cracks, and both sides display a partial wire rim. PCGS# 521672 Base PCGS# 7503

1849-C Gold Dollar, Unc Details Closed Wreath

- 4380 1849-C Closed Wreath — Cleaning — PCGS Genuine. Unc Details. Variety 1.** Like most Charlotte issues, the 1849-C Closed Wreath gold dollar is a rarity in Mint State. This piece is lightly cleaned, making it more affordable for the budget-restricted collector. The strike is boldly executed, and the fields display modest reflectivity. The bright yellow-gold surfaces show only light chatter consistent with an old cleaning. NGC ID# 25BC, PCGS# 7505
- 4381 1850 MS64+ PCGS. CAC.** The 1850 gold dollar is scarce in high grade compared to later Type One Philadelphia issues. This Plus-designated Choice example displays frosty green-gold luster and original surfaces. The design elements are boldly rendered, and the eye appeal is high. Population: 39 in 64 (5 in 64+), 21 finer (1/16). NGC ID# 25BF, PCGS# 7509

1850 Gold Dollar, Conditionally Rare MS65

- 4382 1850 MS65 PCGS.** The 1850 gold dollar is moderately scarce in Mint State but conditionally rare in MS65 and nearly unavailable finer. The lustrous surfaces of this Gem display yellow-gold patina imbued with splashes of apricot. The design features are sharply struck, and neither side reveals significant abrasions. Population: 17 in 65, 4 finer (1/16). NGC ID# 25BF, PCGS# 7509

- 4383 1850-C — Improperly Cleaned — NGC Details. Unc. Variety 1.** The 1850-C has a minimal mintage of 6,966 pieces, and examples with Uncirculated sharpness are rarely encountered. The present butter-gold Charlotte dollar is mildly bright and has a mint-made lamination near the 10 o'clock star. NGC ID# 25BG, PCGS# 7510
- 4384 1851-C AU58 PCGS. Variety 1.** A wheat-gold Charlotte type coin that boasts lustrous borders and unmarked surfaces. Triple-clashed within the wreath, and both sides display delicate lint marks, as made. The strike is pleasing for the antebellum branch facility, although the curls near the ear are slightly soft. NGC ID# 25BL, PCGS# 7514
- 4385 1852 MS64+ NGC.** A lovely near-Gem Type One gold dollar, showing razor-sharp detail and frosty wheat-gold luster. A pleasant lack of distracting abrasions confirms the Plus designation, which makes this 1852 gold dollar highly appealing. NGC ID# 25BP, PCGS# 7517
- 4386 1853 MS64+ PCGS. CAC.** This high-end near-Gem is an ideal type coin for the average collector. The strike is razor-sharp, and the yellow-gold surfaces display glistening luster. CAC-approved, this appealing coin is free of major abrasions. NGC ID# 25BU, PCGS# 7521

1853 Gold Dollar, MS65 Frosty, Bold Gem

- 4387 1853 MS65 NGC. CAC.** More than 4 million gold dollars were struck by the Philadelphia Mint in 1853, bolstered by an influx of California gold. The current coin is a perfect example for any Gem set — brilliantly lustrous, with greenish accents over frosty, rich-gold coloration. There are no significant abrasions or flaws to report. Despite the highest mintage of the gold dollar series, attractive Gem and finer representatives are scarce. NGC lists just 47 finer pieces (2/16). NGC ID# 25BU, PCGS# 7521
- 4388 1854 Type Two MS61 PCGS.** The first year of the short-lived Type Two gold dollar from a transitional year, this piece has brilliant yellow-gold surfaces and excellent eye appeal. Scattered field marks are expected at this grade. NGC ID# 32EH, PCGS# 7531
- 4389 1855 Type Two MS61 PCGS.** Noticeable die clashing occurs on lustrous honey-gold surfaces on each side of this appealing Type Two date, intermingling with scattered ticks and thin grazes, none of them of particular import. A collectible example of this elusive gold type. NGC ID# 25C4, PCGS# 7532
- 4390 1855 Type Two MS61 NGC.** This lovely Mint State piece is an exceptional type coin with fully lustrous light yellow-gold surfaces and good overall eye appeal. Trivial clash marks are noted alongside minimal surface marks. NGC ID# 25C4, PCGS# 7532
- 4391 1855 Type 2 MS62 NGC.** Both sides of this frosty Mint State Type Two gold dollar exhibit rich orange luster with moderate clash marks that attest to its authenticity. A splendid example for the advanced collector. NGC ID# 25C4, PCGS# 7532

4392 1855 Type Two MS62 PCGS. This Mint State Type Two gold dollar displays excellent original luster with satiny olive-gold on the obverse and frosty rose and honey hues over the reverse. Liberty's portrait is better-defined than normal. Grade-limiting abrasions are trivial, with a thin old hairline scratch in the left obverse field being the only one individually mentionable. NGC ID# 25C4, PCGS# 7532

4393 1873 Open 3 MS65 NGC. This boldly struck Gem exhibits a copper toning spot at the A in STATES, and a smaller spot below the D in UNITED. Otherwise, both sides are pristine. Both sides exhibit brilliant yellow-gold luster. Census: 49 in 65 (1 in 65 ★), 11 finer (2/16). NGC ID# 25DB, PCGS# 7573

4394 1873 Open 3 MS65 NGC. A fully brilliant Gem with frosty yellow-gold surfaces and excellent eye appeal. Light clash marks are evident on both sides. A coin of extraordinary eye appeal. Census: 49 in 65 (1 in 65 ★), 11 finer (2/16). NGC ID# 25DB, PCGS# 7573

4395 1881 MS67 Prooflike NGC. The proof mintage for this issue consisted of only 87 coins, with the estimated number of surviving examples ranging between 40 and 50. This adds considerable appeal to prooflike business strikes, such as the present Superb Gem. Rich yellow-gold color and flashy surfaces are among the attributes that define this coin's eye appeal. A few tiny splashes of orange appear on the obverse. Both sides reveal as-made strike-throughs, but they are small. Census: 4 in 67 (2 in 67 ★) Prooflike, 1 finer (2/16). NGC ID# 25DK, PCGS# 77582

4396 1882 MS65 PCGS. This sharply struck gold dollar survives from a circulation strike mintage of only 5,000 pieces in 1882. Both sides have bold design elements with satiny yellow-gold luster that creates excellent eye appeal. NGC ID# 25DL, PCGS# 7583

4397 1884 MS66 PCGS. Only 5,230 circulation strike gold dollars were minted in 1884, and few remain in numismatic circulation today. This example features a sharp strike with reflective fields and satiny devices and exhibits a hint of contrast. Population: 20 in 66, 27 finer (2/16). NGC ID# 25DN, PCGS# 7585

CLASSIC QUARTER EAGLES

4398 1834 Large Head, Breen-6140, Variety 4, R.3, AU58 PCGS. Star 2 is dramatically repunched, the eagle has a tongue, and the M in AMERICA lacks a right diagonal, identifying the popular Variety 4. This attractive near-Mint example offers lightly abraded antique-gold surfaces that retain much original mint luster. Only a trace of wear shows on the strongly impressed design elements. NGC ID# 25FS, PCGS# 7692

4399 1835 XF45 NGC. Breen-6141, Variety 6, R.2. A pleasing collector-grade Classic Head type coin, this Choice XF 1835 quarter eagle displays medium olive-gold surfaces with light, even wear. The strike is well-executed, and there are no individually bothersome abrasions. NGC ID# 25FT, PCGS# 7693

4400 1838 AU53 NGC. Breen-6146, Variety 19, R.2. Only one die pairing is known for the 1838 quarter eagles, and examples are frequently encountered. Both dies appear to be perfect, and the rich orange-gold surfaces show only unobtrusive abrasions. A pleasing example for a date or type collection. NGC ID# 25FY, PCGS# 7696

LIBERTY QUARTER EAGLES

1841-C Quarter Eagle, AU55 Pleasing Color, Scarce Issue

4401 1841-C AU55 PCGS. Variety 1. A better Charlotte quarter eagle with fewer than 175 pieces believed extant, the 1841-C is sought-after in all grades. This Choice AU representative displays minor softness on the central hair curls and the eagle's neck and leg, but little wear is present. Hints of luster remain in the protected regions of the fields amid pleasing olive and orange-gold patina. Light surface chatter is as expected for the issue. Population: 12 in 55, 7 finer (2/16). NGC ID# 54TU, PCGS# 7721

1843-D Quarter Eagle, AU58 Excellent Coloration

4402 1843-D Small D AU58 NGC. Variety 4-F. A boldly struck, barely circulated example of this early Dahlonega quarter eagle, showing rich orange, violet, and apricot-gold coloration. Examples of this issue are fairly plentiful in the absolute sense — Doug Winter estimates as many as 400 to 500 survive — but Mint State pieces are rare. This near-Mint coin will appeal to a range of collectors. Census: 42 in 58, 20 finer (1/16). NGC ID# 25GP, PCGS# 7730

4403 1846-D/D — Cleaning — PCGS Genuine. AU Details. Variety 7-L. The faint remnant of a repunched D mintmark is evident in the field above the 1 in the fraction. This partially lustrous green-gold example is unusually sharp throughout the design elements and displays smooth, pleasing surfaces. Faint hairlines are the only evidence of light cleaning. NGC ID# 25H3, PCGS# 97742

4404 1847-C — Cleaning — PCGS Genuine. AU Details. Variety 1. A few light scrapes are noted running parallel to the nose and forehead, but evidence of the noted cleaning is minimal and traces of reflectivity remain around the stars and legend. Greenish-gold color reveals faint areas of yellow-gold luster at the borders. The 1847-C is readily available and the unanimous choice for Charlotte quarter eagle type. NGC ID# 25H6, PCGS# 7745

**1848-C Two and a Half, AU53
Scarce in High Grade**

4405 1848-C AU53 PCGS. Variety 1. The 1848-C quarter eagle has a fairly substantial survival for issues from this mint of 200-250 coins, but most examples are well-circulated or have various problems. This AU coin is scarce. Partial luster in the fields complements the bright yellow-gold surfaces, while scattered chatter makes its expected appearance. Some minor high-point softness is due mostly to strike, rather than wear. Population: 13 in 53, 18 finer (1/16). NGC ID# 25HB, PCGS# 7750

4406 1849 AU58 PCGS. This is a seldom seen and underrated pre-Civil War Philadelphia issue, boasting a small mintage of 23,294 coins and a comparably low survival rate in high grade. Few Mint State pieces are known finer than this AU58 example. The eagle's neck and left (facing) leg show minor weakness, as usual, but the obverse is well-defined. Light surface chatter limits the grade but lacks singular abrasions. Population: 4 in 58, 15 finer (1/16). NGC ID# 25HD, PCGS# 7752

4407 1852 MS63 PCGS. CAC. CAC-approved with frosty green-gold luster and well-struck design elements. This softly lustrous 1852 quarter eagle is free of obvious abrasions — only faint, scattered hairlines limit the grade. Finer pieces are significantly harder to locate. NGC ID# 25HR, PCGS# 7763

4408 1854 MS63 PCGS. Clash marks from the eagle's outspread wings on the reverse appear beneath Liberty's chin and behind her head on this attractive yellow-gold Select Mint State quarter eagle. The sharp strike and generous luster make this piece a good type-coin candidate. Population: 47 in 63 (1 in 63+), 41 finer (1/16). NGC ID# 25HX, PCGS# 7769

4409 1854 MS63 PCGS. Slightly scarcer than the usual quarter eagle type candidates, the 1854 becomes more challenging in Select Uncirculated condition than, for example, the 1853. This example is especially strong for the grade, with medium-gold color showing a hint of Gold Rush green, and brilliant frosty mint luster across both sides. The strike is bold except at the eagle's left leg, while die clashing is less overt than normally seen. A few light lines and small contacts determine the MS63 grade. Population: 48 in 63 (1 in 63+), 41 finer (1/16). NGC ID# 25HX, PCGS# 7769

4410 1855 MS63 PCGS. This impressive Select specimen offers well-detailed design elements, slightly sharper on the obverse, and lightly marked orange-gold surfaces with vibrant mint luster. Population: 23 in 63, 23 finer (1/16). NGC ID# 25J4, PCGS# 7774

1858 Quarter Eagle, Seldom-Seen MS63

4411 1858 MS63 PCGS. The mintage of quarter eagles in 1858 was a meager 47,377 pieces for circulation, less than one-fourth that of the previous year's total. The average certified survivor is an AU55 to AU58 coin. This Select example boasts considerably finer surfaces, showing good luster and peach-gold color with a few scattered ticks, most noticeable among them one small nick in the horizontal shield stripes on the reverse. This issue is seldom seen in this grade, and a nicer example would be difficult to find. Population: 14 in 63, 7 finer (1/16). NGC ID# 25JG, PCGS# 7786

4412 1860 New Reverse, Type Two, MS61 NGC. The smaller letters and arrowheads help identify the Type Two New Reverse quarter eagles, featuring an updated reverse hub die introduced by the Mint in 1859. Both new and old reverses were struck in 1860, and apparently most were of the new variety. This sharp example is pleasing for the grade, with natural orange-gold color and only widely scattered tiny marks. Census: 26 in 61, 19 finer (2/16). NGC ID# 25JS, PCGS# 7791

4413 1861 New Reverse, Type Two, MS63 PCGS. With a 1.2 million-piece mintage split between the Type One and Type Two reverses, the 1861 is surprisingly scarce in MS63 or finer conditions. This example is sharply produced, with natural, deeply frosty greenish-gold surfaces and remarkably few marks for the assigned grade. NGC ID# 25JX, PCGS# 7794

4414 1870 AU58 PCGS. This low-mintage issue saw a meager emission of 4,520 strikes for circulation. This near-Mint State example offers much prooflike reflectivity remaining on amber-gold surfaces that show a few scattered ticks, most of them relegated to the reverse field above the eagle. Population: 16 in 58, 9 finer (1/16). NGC ID# 25KE, PCGS# 7811

4415 1876 AU55 NGC. The low mintage of 4,176 circulation strikes for this Centennial issue ensured its scarcity from the day it was struck. This piece shows some light chatter and rub on surfaces that remain quite appealing. Census: 21 in 55, 58 finer (1/16). NGC ID# 7JS6, PCGS# 7824

4416 1893 MS64 PCGS. Pleasing for the near-Gem grade with Choice surfaces and gleaming, medium-gold color. Fully struck with minimal marks, the surfaces radiate bold mint luster and great eye appeal. Just 77 pieces are numerically finer at PCGS (1/16). NGC ID# 25LH, PCGS# 7845

4417 1893 MS64+ PCGS. CAC. The Philadelphia Mint coined just 30,000 circulation strike quarter eagles in 1893. One of those is the present near-Gem example with frosty yellow luster and delicate orange overtones. CAC: 17 in 64, 21 finer (2/16). NGC ID# 25LH, PCGS# 7845

4418 1896 MS64 PCGS. An sharp and attractive near-Gem, with frosty yellow-gold luster and only light abrasions. Mint luster beams boldly from the centers. Just 19,070 pieces were struck and the date is scarce in all grades, yet it is priced like one of the readily available subsequent issues. NGC ID# 25LL, PCGS# 7848

1898 Two and a Half, MS66
Attractive, Frosty Surfaces

4419 1898 MS66 PCGS. CAC. Razor-sharp detail and frosty luster adorn this Premium Gem 1898 quarter eagle, while the CAC green label endorses the immense eye appeal. The interiors are yellow-gold, and the peripheries show slightly deeper peach coloration. A loupe fails to reveal noteworthy abrasions. The 1898 had a small 24,000-coin mintage, but Premium Gem examples remain marginally available for type purposes. Population: 39 in 66 (2 in 66+), 11 finer (1/16). NGC ID# 25LN, PCGS# 7850

4420 1899 MS65 PCGS. A scarce (but not impossible) Philadelphia date to locate in Gem condition. This example is crisply struck, minimally marked, and frosty, with sun-gold color and radiant mint luster. Just 27,200 pieces were struck, and a mere 30 pieces are reported by PCGS in a finer grade (2/16). NGC ID# 25LP, PCGS# 7851

4421 1900 MS66 NGC. Razor-sharp detail and frosty wheat-gold luster give this Premium Gem type coin impressive eye appeal. A loupe reveals a few microscopic grazes on Liberty's cheek, but there are no other grade-limiting imperfections. NGC lists 38 Superb Gems finer (1/16). NGC ID# 25LR, PCGS# 7852

1902 Quarter Eagle, Fully Struck MS67+
Sole Finest at PCGS

4422 1902 MS67+ PCGS. CAC. Late-series P-mint Liberty Head gold coinage in high grades ranks among the glories of American numismatics, for example this high-end Superb Gem 1902 quarter eagle with a full strike and basically no marks of any import. A stunningly beautiful coin for type-set purposes, this piece is the sole finest certified at PCGS. Population: 47 in 67 (1 in 67+), 0 finer. CAC: 17 in 67, 0 finer (1/16). NGC ID# 25LT, PCGS# 7854

4423 1905 MS65 NGC. Boldly struck and lustrous with satiny yellow-gold surfaces. This 1905 Liberty Head type coin presents almost a grade point finer to the naked eye, but a few stray lines seen under a loupe determine the Gem designation. Outstanding for the grade and issue. NGC ID# 267S, PCGS# 7857

4424 1905 MS66+ NGC. CAC. This high-end Premium Gem exhibits sharply detailed design elements and vibrant mint luster, with well-preserved orange-gold surfaces that show a few hints of rose and outstanding eye appeal. Finer examples are occasionally seen but may be out of reach for many collectors. NGC ID# 267S, PCGS# 7857

1905 Quarter Eagle, MS67
Exceptional, Fully Struck Example

4425 1905 MS67 PCGS. This is a remarkable Superb Gem example with intensely lustrous honey-gold surfaces and exceptional, full strike definition that includes precise delineation of the eagle's talons, arrows, fletchings, and leg feathers. Both sides of the coin are impressively preserved and virtually immaculate. Population: 82 in 67 (4 in 67+), 3 finer (1/16). NGC ID# 267S, PCGS# 7857

INDIAN QUARTER EAGLES

4426 1908 MS64 NGC. A pleasing Choice example of the available first-year issue, showing satiny straw-gold luster and well-struck design elements. The diagnostic softness on the eagle's wing is due to inadequate die engraving, not strike. The obverse is nearly a grade point finer, the reverse shows a few small marks in the field behind the eagle's head. NGC ID# 288Y, PCGS# 7939

4427 1908 MS64 PCGS. An attractive Choice example of this popular first-year type coin, with well-detailed design elements and well-preserved orange-gold surfaces that radiate satiny mint luster on both sides. NGC ID# 288Y, PCGS# 7939

1908 Indian Quarter Eagle, MS65+
Exemplary Strike and Luster

4428 1908 MS65+ PCGS. CAC. A delightful high-end Gem example of this first-year type-coin issue. The 1908 Indian quarter eagle is famous for indistinct wing feathers on the eagle — a product of the engraving and not the strike. This piece is razor-sharp throughout the headdress feathers and displays frosty yellow-gold luster as if just ejected from the dies. Finer examples are infrequently seen. NGC ID# 288Y, PCGS# 7939

**1908 Two and a Half, MS66
Two Coins Finer at PCGS**

- 4429 1908 MS66 PCGS.** An exceptional Premium Gem example of this first-year Indian Head type-coin issue, likely set aside at the time of issue as a novelty. The 1908 is the only date in the series that is usually available in this high grade, although it is extremely rare any finer. This piece is free of distractions and displays satiny green-gold luster. Incomplete engraving of the eagle's wing feathers is a diagnostic trait of this issue. PCGS lists two finer coins (1/16). NGC ID# 288Y, PCGS# 7939

- 4430 1909 MS64 PCGS.** The obverse of this early Philadelphia type coin appears at least a grade point finer, though enough minor luster grazes are present in the reverse fields to preclude such an assignment from PCGS. The strike is bold throughout, and soft honey-gold luster gives this piece substantial visual appeal. A very high-end coin for the grade. NGC ID# 288Z, PCGS# 7940

- 4431 1909 MS64 PCGS.** Rich pumpkin-gold and olive-green toning embraces this sharply struck Choice Indian type coin. The coruscating surfaces lack mentionable marks. The left-side stars exhibit interesting die cracks. NGC ID# 288Z, PCGS# 7940

- 4432 1909 MS64 NGC. CAC.** Nice mint luster and splendid eye appeal make this near-Gem quarter eagle a candidate for an advanced set. The motifs are sharply struck throughout. Attractive, medium-gold color shows faint olive-gold toning on the upper-right obverse. The high point fields are remarkably unabraded save for a few light lines near the reverse margin at 1 o'clock. CAC endorsed. NGC ID# 288Z, PCGS# 7940

- 4433 1910 MS65 PCGS.** A technically superior Gem, the surface quality and strike are exceptional for the 1910 issue. Light-gold patina — the color of a new straw hat — covers both sides with mint-fresh appeal. A few tiny reverse lines are visible with a glass but do not distract. It is worth noting that PCGS reports just 11 coins in a numerically finer grade (2/16). NGC ID# 2892, PCGS# 7941

- 4434 1910 MS65 NGC.** The 1910 quarter eagle is challenging to find "nice," but this lustrous, orange-gold example answers the challenge with outstanding, smooth surfaces and excellent eye appeal. The strike is strong and abrasions are few for the issue. It is the radiant coloration, though, that best exemplifies the Gem quality of this vibrant two-and-a-half. NGC ID# 2892, PCGS# 7941

- 4435 1911-D — Improperly Cleaned — NGC Details. AU.** A richly detailed butter-gold key-date representative. The Denver mintmark is clear. The field near the Indian's profile is glossy from a wipe, but many collectors would be pleased to own this stopper to the series. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU58
Bold Mintmark, Satiny Luster**

- 4436 1911-D AU58 NGC.** Strong D. Wisps of peach and apricot color emerge from lemon-gold surfaces on this near-Mint 1911-D quarter eagle. The diagnostic wire rim along the upper-right obverse is sharp, and the mintmark is bold. The strike is intricately executed, and the eye appeal is pleasing. The 1911-D is a famous key date, and high-end AU coins are in constant demand. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half, AU58
Strong D, CAC-Approved**

- 4437 1911-D AU58 PCGS. CAC.** Strong D. A brush of friction on the Indian's cheek and the eagle's shoulder is all that separates this 1911-D quarter eagle from most lower-end Mint State pieces. The strike is bold, and the satiny yellow-gold surfaces are free of major abrasions. The CAC endorsement only adds to the appeal. NGC ID# 7KR7, PCGS# 7943

- 4438 1912 MS63 PCGS. CAC.** Satiny green-gold luster adorns the luminous surfaces of this well-preserved 1912 quarter eagle. Trivial hairlines in the fields limit the grade in the absence of serious abrasions. The 1912 is plentiful in this grade, suitable for type purposes. NGC ID# 7KR8, PCGS# 7944

- 4439 1912 MS64 NGC.** Well-struck with satiny yellow-gold luster, this Choice 1912 Indian quarter eagle is pleasantly eye-appealing. A few minor grazes in the fields limit the grade. Finer examples are scarce, making this coin ideal for the budget-conscious collector. NGC ID# 7KR8, PCGS# 7944

- 4440 1912 MS64 PCGS.** Despite a substantial mintage of 616,000 coins, the 1912 is elusive in better Mint State grades, with only 80 finer pieces certified at PCGS (2/16). This lovely Choice Mint State piece has brilliant light yellow luster and pristine surfaces. NGC ID# 7KR8, PCGS# 7944

- 4441 1914 MS62 PCGS.** A semikey date in high grade but widely sought at any Mint State level. This Uncirculated 1914 quarter eagle displays minimal abrasions over satiny bronze-gold luster. Trivial weakness on the lower headdress feathers is not unusual for the issue. NGC ID# 7KRA, PCGS# 7946

- 4442 1914 MS63 NGC.** This Select Mint State 1914 Indian quarter eagle, featuring Pratt's distinctive sunken relief design, exhibits full luster and rich orange-gold surfaces. The strike is well-executed, and there are no singularly mentionable abrasions. NGC ID# 7KRA, PCGS# 7946

**1914 Indian Quarter Eagle, MS64
Second-Lowest Mintage**

4443 1914 MS64 PCGS. With a production of 240,000 coins, the 1914 quarter eagle had the second lowest production of any coin in the Indian Head series. Although examples are readily located at the present grade level, anything finer approaches impossibility. PCGS has only certified 63 finer examples (2/16). This piece has brilliant yellow-gold surfaces and bold design elements with excellent eye appeal. NGC ID# 7KRA, PCGS# 7946

4444 1914-D MS63 PCGS. This appealing orange-gold quarter eagle represents one of the more challenging issues in the series behind the 1911-D and the 1914. The headdress feathers, eagle's shoulder, and leg exhibit crisp detail for the date. Wispy scattered marks preclude a near-Gem assessment. NGC ID# 2899, PCGS# 7947

4445 1914-D MS64 PCGS. The surfaces of this near-Gem quarter eagle are smooth and attractive with gleaming rich-gold color and only widely scattered, tiny marks. The strike is sharp except for slight blending on the lower-most headdress feathers. The issue ranks third-scarcest of the Indian Head series and it is rare when found in a numerically finer grade — just 49 such coins are reported by PCGS (92/16). NGC ID# 2899, PCGS# 7947

THREE DOLLAR GOLD PIECES

4446 1854 AU58 ANACS. The high points of Liberty's curls display a trace of wear, but this lightly abraded and well-struck sun-gold representative exhibits luster throughout the margins and motifs. A single-year design subtype with small DOLLARS. Housed in a scarce ANA cache holder. NGC ID# 25M3, PCGS# 7969

4447 1856-S XF40 PCGS Secure. Medium S. A caramel-gold example with mildly glossy fields and a smattering of unobtrusive field marks. The San Francisco issues comprise an underrated subset of the three dollar gold series. The 1856-S had a mintage of only 34,500 coins. NGC ID# 25M9, PCGS# 7975

4448 1856-S AU53 PCGS. The scarcer Small S variety. A pleasing AU example of this popular San Francisco issue, one of only six collectible branch mint issues in the series. Well-struck with bright yellow-gold surfaces that show minor chatter over each side. NGC ID# 25M9, PCGS# 7975

**1858 Three Dollar, Lightly Marked AU50
Low-Mintage Better Date**

4449 1858 AU50 PCGS. A couple of noticeable ticks occur along Liberty's jawline but otherwise the surfaces are free of major marks, showing instead light field chatter and slightly dimmed luster consistent with the grade. The 1858 issue, struck to the meager extent of only 2,133 circulation strikes, was the low-water mark for this already low-mintage series until the 1871 production of 1,300 pieces. Population: 18 in 50, 65 finer (1/16). NGC ID# 7K5J, PCGS# 7978

1866 Three Dollar, Reflective AU58

4450 1866 AU58 PCGS. This piece is a slightly better-than-average example among certified survivors of this fairly early three dollar gold issue, one usually seen in AU50 or AU55. Light rub shows on the high points of surfaces that boast few actual contact marks amid generous semiprooflike reflectivity and appealing yellow-gold to amber-gold color. Only 4,000 circulation strikes were made. Population: 24 in 58, 44 finer (1/16). NGC ID# 25MM, PCGS# 7987

**1867 Three Dollar, AU58
Beautifully Patinated**

4451 1867 AU58 NGC. Another in a string of low-mintage issues in this remarkable series, the 1867 was struck to the extent of 2,600 circulation strikes and 50 proofs. Most survivors are lightly circulated as is this piece, showing a good deal of prooflike reflectivity despite trivial high-point rub. The beautifully patinated surfaces range from yellow-gold to amber-gold with accents of lilac and deep orange. Census: 45 in 58, 26 finer (1/16). NGC ID# 25MN, PCGS# 7988

4452 1868 AU58 PCGS. A pleasing near-Mint example of this slightly better date, showing prooflike fields where minor friction has not softened the mirroring. The strike is bold, with particular notice given to the wreath bow. The surfaces are smooth. A small, curved strike-through on Liberty's neck should not be mistaken for a scratch. NGC ID# 25MP, PCGS# 7989

4453 1878 AU58 ANACS. Housed in an early ANACS holder, the surfaces of this three dollar gold retain nearly full frosty mint luster. A few small marks and high point blending on the wreath account for the assigned grade. Struck with a Doubled Die Reverse — most visible on LARS of DOLLARS and on the right-side cotton leaves — an unlisted but fairly common variety. The upper loops of both 8s show minor repunching. NGC ID# 25MZ, PCGS# 8000

4454 1878 MS62 NGC. Type collectors recognize the 1878 as one of the common dates in the three dollar gold series, and enough survive that examples are within reach of nearly any collector. This piece has rich orange-gold luster with frosty surfaces and minimal marks. NGC ID# 25MZ, PCGS# 8000

**1878 Gold Three Dollar, MS63
Pleasing Type Coin**

4455 1878 MS63 PCGS. Frosty orange-gold luster shimmers over the surfaces of this Select 1878 three dollar gold piece, while a few light grazes on Liberty's cheek and in the open areas of the fields define the grade. The wreath bow is predictably soft, but the remaining design elements are well-struck. This plentiful issue often has outstanding eye appeal as seen here and is a favorite among type collectors. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64
Excellent Type Coin**

4456 1878 MS64 NGC. Ex: Hilt Collection. The 1878 three dollar gold piece is relatively available in high grade, due to its mintage of 82,304 pieces. The issue is a favorite choice of type collectors. The lightly marked orange-gold surfaces of this sharply detailed MS64 example show ample mint luster and a few hints of rose. NGC ID# 25MZ, PCGS# 8000

**1879 Three Dollar Gold, MS62
Only 3,000 Circulation Strikes**

4457 1879 MS62 PCGS. Following a near-record production in 1878 when 82,304 circulation strike three dollar gold pieces were coined, the mintage dwindled to just 3,000 coins in 1879, and just 1,000 coins the following year. This lovely Mint State example exhibits reflective fields and brilliant yellow-gold luster with sharp design motifs and trivial marks. NGC ID# 25N2, PCGS# 8001

EARLY HALF EAGLES

**1800 Half Eagle, BD-2
XF Sharpness**

4458 1800 BD-2, High R.3 — Obverse Repaired — NGC Details. XF. Bass-Dannreuther Die State b/b, with die clashing on both the obverse and the reverse — especially noticeable around the letters of LIBERTY and less obviously around the date. The obverse fields appear smoothed including the date area, and a subsequent cleaning results in bright yellow-gold coloration. Still, sharp definition remains on the devices and this early half eagle will find many interested bidders despite the net grade. NGC ID# 25NW, PCGS# 45592 Base PCGS# 8082

**1812 Narrow 5D Half Eagle, BD-2
Choice About Uncirculated**

4459 1812 Narrow 5D, BD-2, High R.4, AU55 PCGS. Bass-Dannreuther Die State c/a. Choice definition and surface quality survives on this About Uncirculated Capped Bust Left five, with much remaining mint luster. John Reich's design displays mint freshness despite brief circulation complemented by bright, greenish-gold coloration. Abrasions are limited to a few tiny marks on both sides, with some faint diagonal adjustment marks at the top of the reverse across the legend and scroll. The BD-2 is scarce in context of the short-lived Capped Bust series, with between 80 to 100 pieces known. NGC ID# 25PL, PCGS# 507602 Base PCGS# 8112

CLASSIC HALF EAGLES

- 4460** 1834 Plain 4 AU55 PCGS. Breen-6501, McCloskey 1-A, R.3. First Head. The obverse of this plentiful variety has a delicate die crack through star 5, while the reverse appears perfect with out die cracks or clash marks. The attractive light yellow surfaces show minimal marks with a few trivial lines on each side. NGC ID# 25RR, PCGS# 8171
- 4461** 1834 Crosslet 4 VF20 PCGS. Breen-6503, McCloskey 5-D, R.4. Second Head. The elusive Crosslet 4 variety, an important *Guide Book* listed variant for 1834 half eagles. This pleasing piece has light greenish-gold surfaces with hints of pale orange on the obverse high points. NGC ID# 25RU, PCGS# 8172
- 4462** 1835 AU55 NGC. Breen-6504, McCloskey 1-A, R.2. This early Classic Head half eagle is an attractive representative of an underrated type, retaining a good deal of its original luster on caramel-gold surfaces that show minor circulation wear and only a few scattered ticks consistent with the Choice AU grade. NGC ID# 25RV, PCGS# 8173

1837 McCloskey 3-C Half Eagle, AU58
Small Date, Script 8

- 4463** 1837 AU58 PCGS. Breen-6513, McCloskey 3-C, R.4. The scarce Small Date, Script 8 variety; seldom found in any grade. This piece exhibits brilliant yellow-gold surfaces with considerable luster. Both dies are perfect with no die cracks or clash marks. A better issue in the Classic Head half eagle series, since 1834 and 1836 are the two common dates. NGC ID# 25RZ, PCGS# 8175

- 4464** 1838 — Scratch — PCGS Genuine. AU Details. Breen-6515, McCloskey 2-B, R.1. Small Arrows, Large 5. Faint scratches are noted in the right obverse field of this otherwise pleasing Classic Head half eagle. This piece is nicely detailed in greenish-gold with delicate orange overtones. NGC ID# 25S4, PCGS# 8176

1838 Classic Head Five, AU58
Partially Lustrous Fields

- 4465** 1838 AU58 NGC. CAC. Breen-6514, McCloskey 1-A, R.2. The 1838 is a slightly less often seen Classic Head five, but high-end AU coins remain within the grasp of type collectors. This CAC-endorsed near-Mint example displays sharp detail and green-gold surfaces with remnants of original luster in the fields. Light surface chatter adds to the old-time character of the coin. NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

- 4466** 1839 XF45 PCGS. CAC. The first year of the Liberty half eagles featured the Liberty Head design by Christian Gobrecht, in some ways a more artistic and refined obverse motif than that utilized in later years. This Choice XF piece displays natural, green-gold surfaces with scattered marks consistent with the grade. Technically, a one-year type coin. CAC endorsed.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4889. NGC ID# 25S7, PCGS# 8191
- 4467** 1844-D VF35 NGC. Variety 11-G. An original olive-green and peach-gold Dahlonega representative. Minor obverse edge knocks are noted at 8 and 6 o'clock, but the caramel-gold surfaces are otherwise pleasing for the Choice VF level. NGC ID# 25T9, PCGS# 8221
- 4468** 1848 MS61 PCGS. A beautifully preserved Mint State example of this early Liberty Head half eagle mintage exceeding a quarter-million pieces, showing attractive luster and color and displaying relatively few marks for the grade. What contact marks do appear are mostly on the small side. Population: 10 in 61, 15 finer (1/16). NGC ID# 42A7, PCGS# 8236

1848-D Five Dollar, AU53
Conditionally Scarce D-Mint Type Coin

- 4469** 1848-D AU53 NGC. Variety 21-N. A very rare Normal Mintmark variety that shows heavy diagonal die lines within the arrowheads on the reverse. The 1848-D half eagle is moderately available in the context of Dahlonega gold, but the population declines in AU, and Uncirculated coins are rare. This piece displays minor high-point wear with pleasing olive-gold and coppery-brown surfaces. Light chatter in the fields is consistent with the grade and issue. Census: 15 in 53, 45 finer (2/16). NGC ID# C5XA, PCGS# 8238

- 4470** 1850-D Weak D VF20 NGC. Variety 23-O. Doug Winter calls the 1850-D half eagle "scarce and undervalued," estimating a survival of 125-175 pieces. The mintmark was weakly entered into the die, and the present coin shows only the upper portion visible. Overall, the surfaces are well-worn but with unusually smooth texture and pleasing olive-gold color. A great collector coin. NGC ID# 25U4, PCGS# 98245 Base PCGS# 8245

- 4471** 1855-S XF45 PCGS. The first collectible San Francisco half eagle issue has a low mintage of 61,000 pieces, since the facility concentrated its efforts on double eagle production. The present almond-gold Choice XF example is slightly subdued but only minimally abraded. The strike is sharp on the eagle, although the curls show blending of impression. NGC ID# 25UU, PCGS# 8265

- 4472** 1859 AU50 PCGS. CAC. This is a lovely example of the low-mintage 1859 half eagle. Only 16,734 were coined at Philadelphia in 1859 and few of those survive today. Despite its trivial marks, this piece has good eye appeal with considerable luster. Population: 12 in 50, 23 finer. CAC: 3 in 50, 7 finer (2/16). NGC ID# 25VB, PCGS# 8280

4473 1860-D Medium D XF40 NGC. Variety 46-GG. The usual Medium D reverse. The 1860-D half eagle survives to the extent of 225-275 pieces but is still seen less often than some earlier dates from the Dahlonega Mint and is popular due to its proximity to the outbreak of the Civil War, which caused the Georgia branch mint to close. This collector-grade XF example displays pleasing olive-gold surfaces with hints of coppery color. Wear is even, and the patina is pleasantly smooth save for a few small marks on Liberty's cheek. NGC ID# 25VH, PCGS# 8286

**1875-CC Five Dollar, VF30
Elusive Carson City Issue**

4474 1875-CC VF30 PCGS. Variety 2-C. A seldom encountered Carson City issue. Despite a meager mintage of 11,828 pieces, three die marriages are confirmed and a fourth is alleged. Variety 2-C is readily identified by its level CC mintmark. The present mildly bright sun-gold example lacks any mentionable marks, although small abrasions are distributed. The strike shows blending on the curls, fletchings, and eagle's neck. NGC ID# 3Y4F, PCGS# 8337

4475 1881-CC VF30 PCGS. Variety 1-A. This is the only die pair for the 1881-CC half eagles, lasting for 13,886 cycles of the coinage press. A trace of luster remains despite moderate wear on both sides with trivial marks on each side. NGC ID# 25XE, PCGS# 8356

**1881-CC Five Dollar
Sharp AU Details**

4476 1881-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. Impressively sharp for an AU-level coin, as any high-point wear seems to be a result of the cleaning. This lightly hairlined 1881-CC half eagle displays bright straw-gold surfaces with a smooth, satiny sheen. The strike is bold in most regions, even if slightly incomplete on the eagle's neck feathers. Problem-free coins are scarce at this grade level.

4477 1882-CC XF40 PCGS. Variety 1-A. A charming butter-gold Carson City half eagle. Luster beckons from the borders and coronet. The curls and the eagle's neck are lightly brought up, but the wings are well defined and marks are refreshingly trivial. NGC ID# 25XH, PCGS# 8359

1882-CC Half Eagle, Caramel-Gold AU55

4478 1882-CC AU55 PCGS. Variety 1-A. Surprisingly, only a single die variety is known for the 82,817 examples struck of this issue. This Choice AU piece boasts caramel-gold surfaces with some lighter-colored reflective areas showing around the peripheries on each side. Considerable luster remains throughout. Population: 50 in 55, 82 finer (1/16). NGC ID# 25XH, PCGS# 8359

4479 1882-CC AU55 NGC. Variety 1-A. Rich orange-gold toning dominates, although occasional high points display steel-blue. A lightly circulated but unblemished Carson City half eagle. Only a single marriage is known from the mintage of 82,817 pieces, identified by die lines below WE and Liberty's eye. NGC ID# 25XH, PCGS# 8359

**1882-S Five Dollar, MS65
Scarce in Gem Condition**

4480 1882-S MS65 NGC. This lustrous peach-gold Gem has a nearly pristine appearance save for a single brief hair-thin line above the eagle's right (facing) shoulder. Though a common issue in typical Mint State grades, the 1882-S becomes an important condition rarity at the MS65 level. Census: 31 in 65 (2 in 65+), 3 finer (2/16). NGC ID# 25XJ, PCGS# 8360

**1883-CC Five Dollar, Choice XF
Smooth Surfaces, Great Color**

4481 1883-CC XF45 PCGS. Variety 1-A. An outstanding orange-gold example of this better Carson City five, showing light, grade-consistent wear over the high points of the motifs yet retaining unusually smooth surfaces. Glimpses of luster emerge from the protected regions of the fields. Eye appeal is exceptional. Population: 24 in 45, 63 finer (2/16). NGC ID# 25XL, PCGS# 8362

1884-CC Five, Partially Lustrous AU50

4482 1884-CC AU50 PCGS. Variety 1-A. This better Carson City issue is scarce in AU grades and rare in Mint State. The present coin displays well-detailed motifs with lightly abraded, yellow-gold surfaces. Bright luster shines in portions of the peripheral fields where protected by the stars and legends. Population: 24 in 50, 44 finer (2/16). NGC ID# 25XP, PCGS# 8365

4483 1884-S MS63 PCGS. This 1884-S half eagle is a well-struck example — particularly on the reverse — and offers generous luster on peach-gold surfaces that offer much eye appeal for the grade. Population: 54 in 63 (1 in 63+), 13 finer (1/16). NGC ID# 25XR, PCGS# 8366

1891-CC Half Eagle, MS62

Ex: Norweb

4484 1891-CC MS62 PCGS. Ex: Norweb. One of the lesser coins from the Norweb sales but nonetheless outstanding for the grade. This Uncirculated 1891-CC half eagle displays a bold strike and frosty wheat-gold luster with original mint-green hues near the borders. Light surface chatter limits the grade but hardly impedes the eye appeal.

Ex: Thomas L. Elder (9/20/1935); Norweb Collection, Part I (Bowers and Merena, 10/1987), lot 929. NGC ID# 25Y5, PCGS# 8378

1892 Half Eagle, Sharp MS66

4485 1892 MS66 NGC. High-grade examples of the 1892 half eagle are scarce despite the mintage of about three-quarters of a million coins. This reddish-orange Premium Gem shows a sharp strike on Liberty's hair, the beads, the star centers, and throughout the reverse. Abrasions are minimal, in concert with the grade. Census: 21 in 66 (1 in 66 ★), 8 finer (2/16). NGC ID# C5XG, PCGS# 8379

4486 1893-CC AU58 NGC. Variety 1-A. Only 60,000 half eagles left the Carson City Mint's presses in its final year of operation, and most survivors graded by third parties are AU to Choice AU. This near-Mint State example boasts ample luster remaining on orange-gold surfaces with a few minor ticks but scarcely a hint of rub, a well-struck and pleasing coin. NGC ID# 25YB, PCGS# 8384

4487 1896-S MS62 PCGS. A halo of vivid, reddish-orange toning around the portrait of Liberty adds dramatic eye appeal to this low-mintage, conditionally challenging San Francisco half eagle. Any Mint State example is considered a prize, particularly with the visual allure of the present lustrous, attractively toned representative. Population: 16 in 62, 12 finer (2/16). NGC ID# 25YL, PCGS# 8393

4488 1897 MS64+ PCGS. The lustrous surfaces of this frosty near-Gem display yellow-gold color imbued with hints of light green on the obverse and reddish-gold patina on the reverse. The design elements are sharply struck and each side reveals a few minor marks that are all that stand between this Plus-graded coin and a full Gem classification. Population: 6 in 64+, 31 finer (1/16). NGC ID# 25YM, PCGS# 8394

4489 1903-S MS64+ PCGS. CAC. Frosty original luster in greenish-gold hues illuminates the near-Gem surfaces of this 1903-S half eagle. The strike is sharp, and only a few trivial ticks are observed on the obverse to limit the grade. This is a suitable type-coin issue, although not touted as such so often as some other 20th century dates. NGC ID# 25Z3, PCGS# 8408

4490 1905-S MS63 PCGS. An elusive late-series San Francisco issue, scarcely seen in any Mint State grade. This Select example displays sharp devices and frosty, honey-gold luster. A few scattered abrasions limit the grade but are not overly distracting to the unaided eye. Population: 32 in 63, 35 finer (1/16). NGC ID# 25Z7, PCGS# 8412

4491 1906-D MS64+ PCGS. CAC. This is the first year of coinage at the Denver Mint, and the Liberty half eagle was only coined there for two years, with a total coinage of just 1.2 million pieces. This Choice Mint State example has rich orange-gold surfaces with frosty luster and excellent eye appeal. CAC: 43 in 64, 20 finer (2/16). NGC ID# 25ZA, PCGS# 8414

4492 1908 Liberty MS65 PCGS. CAC. A Gem example of this final Liberty half eagle issue, important among type collectors. Sharp design elements rise above frosty fields with peach interiors and green-gold peripheries. There are no significant abrasions, and finer coins are scarce. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

4493 1908-D MS63 PCGS. Resplendent mint luster provides substantial eye appeal for this Select Uncirculated Denver example, which often comes less-vibrant than the present coin. Variegated orange-gold color shows lilac and wheat-gold accents. A few light field marks and slight softness on the lower bonnet do not diminish the visual allure. NGC ID# 93KW, PCGS# 8511

4494 1909-D MS64 PCGS. Rich orange field and motifs cede to peripheral blushes of apple-green. The strike is exemplary, and the only mentionable mark is a thin line through the first U in PLURIBUS. Housed in a green label holder. NGC ID# 28DJ, PCGS# 8514

1910-D Indian Half Eagle, MS63
Sixth-Lowest Mintage

4495 1910-D MS63 PCGS. The Denver Mint coined 193,600 half eagles in 1910, the sixth lowest mintage in the Indian half eagle series. Although Select Mint State examples are available with a little patience, anything finer is elusive, with just 100 higher grade pieces certified by PCGS and NGC combined (2/16). This piece has scattered, grade-defining marks with complete and brilliant yellow luster. NGC ID# 28DL, PCGS# 8518

1910-D Half Eagle, MS63
Scarce Any Finer

4496 1910-D MS63 NGC. CAC. Satiny yellow-gold luster illuminates the minimally abraded surfaces of this Select 1910-D five. The devices are well-defined and the overall eye appeal is superior to that of many other equally graded examples. The 1910-D is a slightly better date in Mint State, scarcely seen in Choice or better condition. There are only 33 NGC-certified pieces finer than this coin (2/16). NGC ID# 28DL, PCGS# 8518

1910-S Indian Half Eagle, MS62
Very Scarce in Finer Grades

4497 1910-S MS62 NGC. The 1910-S Indian half eagle had a fairly substantial mintage of more than 770,000 pieces, but Mint State survivors are disproportionately scarce, and are rarely seen above the MS62 grade level. This sharply struck coin is lightly abraded, but is nonetheless appealing for its undeniably original patina that includes shades of olive, honey, and russet. NGC has graded 34 numerically finer examples (2/16). NGC ID# 28DN, PCGS# 8519

4498 1911-S MS62 PCGS. The 1911-S is a slightly better-date Indian half eagle in Mint State. This piece is well-struck with satiny green-gold luster. Scattered abrasions contribute to the grade, but none are individually bothersome. NGC ID# 25ZM, PCGS# 8522

1911-S Half Eagle, MS63
Stellar Quality for the Grade

4499 1911-S MS63 PCGS. The 1911-S had a mintage of more than 1.4 million coins, but Uncirculated pieces are disproportionately scarce in pleasing condition. Finer than MS63, this issue is rare. The present Select example boasts incredible eye appeal for the grade, showing a bold strike and uncommonly well-preserved fields that show only trivial lines at certain angles. A tinge of iridescence accentuates the rich honey-gold luster. PCGS has seen 32 finer submissions (1/16).

From The Jim Hilands Collection. NGC ID# 25ZM, PCGS# 8522

1912 Half Eagle, Sharply Struck MS64+

4500 1912 MS64+ PCGS. CAC. Subtle greenish-gold patina covers both sides of this high-end near-Gem, each of which displays pleasing luster and sharply struck design elements, including the feathers on the headdress and the eagle's shoulder. A handful of minute marks prevents Gem classification. Gems are very scarce and higher-grade specimens are virtually unobtainable. CAC has approved 55 examples in MS64, and just 11 finer (2/16). NGC ID# 28DS, PCGS# 8523

1913-S Half Eagle, MS61
Original Surfaces

4501 1913-S MS61 PCGS. Despite a mintage of 408,000 coins, the 1913-S Indian half eagle is among the scarcest issues in the series in Mint State. This lower-end example shows light surface chatter that limits the grade but is nonetheless well-struck and illuminated by satiny olive-gold luster. A pleasing representative, suitable for a budget-friendly date and mintmark set. NGC ID# 25ZP, PCGS# 8526

LIBERTY EAGLES

1839/8 Eagle, XF40 Type of 1838, Large Letters

- 4502 1839/8 Large Letters XF40 NGC.** All 1839 Type of 1838 eagles show an 1839/8 overdate. This XF example of the short-lived type displays medium yellow-gold patina with light, scattered chatter, as is typical of the grade. Wear is light and even. This issue had a mintage of just 25,801 coins and is elusive above the present grade level. NGC ID# 54XF, PCGS# 8576
- 4503 1850 Large Date AU53 PCGS.** The more often seen Large Date variety. Nonetheless, Mint State examples are scarce, making this AU piece appealing to a range of collectors. The strike is well-executed, and the yellow-gold surfaces show hints of luster in the protected regions. Light, scattered abrasions are normal for the grade. Population: 21 in 53, 33 finer (1/16). NGC ID# 2637, PCGS# 8603
- 4504 1851 AU58 NGC. CAC.** Despite the mintage of 176,328 pieces, the 1851 Liberty eagle is a notable condition rarity in the series. This attractive near-Mint specimen shows light wear on the design elements and the still-lustrous surfaces show a scattering of minor abrasions on both sides. Census: 32 in 58 (1 in 58+), 17 finer (2/16). NGC ID# 263A, PCGS# 8606
- 4505 1853/'2' AU53 NGC. FS-301.** Remnants of an apparent underdigit reside within the lower loop of the 3 in the date. The most recognized overdate variety of the Liberty eagle series, although both grading services now place quotation marks around the 2. A charming apricot-gold example with moderately marked surfaces. The upper reverse exhibits a prominent wire rim. NGC ID# C82G, PCGS# 8611
- 4506 1859 AU50 NGC.** A low mintage of 16,000 circulation strikes ensures the scarcity of this early Liberty Head eagle. The present AU example offers some luster remaining on each side with appealing amber-gold color. A couple of noticeable marks on Liberty are among scattered smaller abrasions. Census: 10 in 50, 88 finer (1/16). NGC ID# 263Z, PCGS# 8628
- 4507 1861 AU53 PCGS.** The 1861 is arguably the most plentiful Liberty eagle from the Civil War period, but Uncirculated coins are nonetheless scarce. This AU example displays hints of luster in the protected regions of the fields and has deep orange-gold color overall. Scattered abrasions are consistent with the grade. NGC ID# 2647, PCGS# 8633
- 4508 1861 AU55 NGC.** From a mintage of 113,100 pieces, the 1861 Liberty eagle is seldom available in high grade. This attractive Choice AU specimen is well-detailed and lightly worn, with minimally abraded surfaces that retain much of their original mint luster. NGC ID# 2647, PCGS# 8633
- 4509 1868 AU53 NGC.** The low mintage of 10,630 pieces for the 1868 eagle was typical for the era — among gold coins, only double eagles were produced in generous amounts in the years following the Civil War — but ensured the scarcity of high-grade survivors. This piece shows attractive color and luster with a few larger marks mostly relegated to the reverse fields. Census: 24 in 53, 63 finer (1/16). NGC ID# 264N, PCGS# 8653
- 4510 1873-S XF45 NGC.** Like many eagles from the 1860s and 1870s, the 1873-S is underrated and very scarce in virtually all conditions. Just 12,000 pieces were struck, and most coins circulated heavily. This is a bright, yellow-gold example with Choice XF definition and only the expected light marks smoothed by 15 points of wear. Census: 18 in 45, 38 finer (2/16). NGC ID# 53M7, PCGS# 8668
- 4511 1878 MS62 PCGS.** For the period, the 1878 eagle is fairly plentiful, but Mint State coins are scarce. This piece displays bold design elements and frosted honey-gold luster. Light, scattered abrasions contribute to the grade. Population: 45 in 62 (2 in 62+), 17 finer (2/16). NGC ID# 265J, PCGS# 8680
- 4512 1880-CC XF45 PCGS. Variety 1-A.** A single obverse die and three reverse dies are documented for the 1880-CC eagles. All three appear to be available without undue searching. This light yellow example has exceptional surfaces for the grade, and retains traces of mint luster. NGC ID# 265T, PCGS# 8688
- 4513 1881-CC AU53 PCGS. Variety 1-A.** Bright luster illuminates the eagle and peripheries. Small marks are scattered across nicely struck caramel-gold surfaces. A better Carson City issue with a scant production of 24,015 pieces. NGC ID# 265X, PCGS# 8692
- 4514 1883-S MS61 PCGS.** A scarce Uncirculated example of this conditionally elusive San Francisco issue. The strike is sharp, and the thoroughly lustrous surfaces yield rich honey-gold color. Scattered abrasions define the grade. Population: 23 in 61, 24 finer (1/16). NGC ID# 2669, PCGS# 8702
- 4515 1889 AU58 NGC.** The 1889 eagle stands out with its low mintage of 4,440 coins, and surviving examples are elusive. This near-Mint representative displays partial luster amid olive-gold patina. The design elements are sharp, and light surface chatter is not severe. Uncirculated examples exist but usually exhibit heavy abrasions. NGC ID# 266N, PCGS# 8715
- 4516 1891-CC AU55 NGC. Variety 1-A.** A briefly circulated caramel-gold example of this popular Carson City type issue. Marks are relatively minor aside from a bright area beneath the right (facing) wing. A diagonal die line in the lower half of the shield identifies the die pair, along with the mintmark location. NGC ID# 266U, PCGS# 8720
- 4517 1891-CC MS60 Prooflike NGC. Variety 1-A.** The second C in the mintmark is directly below the tip of the arrow feather on this plentiful variety. Diagonal die lines within the shield spaces confirm the attribution. This bright yellow-gold example has full mint luster with reflective fields and myriad field marks, none standing out among the others. NGC ID# 266U, PCGS# 78720
- 4518 1892-O MS61 PCGS. Variety 1.** While its Philadelphia counterpart has a bountiful mintage of 797,480 pieces, the 1892-O has a decidedly more miserly production of 28,688 pieces. Most examples in third-party holders grade AU55 to MS62, with the present well-struck coin near the higher end of that range. The green-gold surfaces display distributed small abrasions. NGC ID# 266X, PCGS# 8723
- 4519 1896-S MS62 NGC.** Scattered small ticks cannot defeat the strong eye appeal created by the bold strike and top-notch luster on peach-gold surfaces of this late-series S-mint issue, usually found in AU grades and surprisingly scarce in Mint State. A nice example for the grade. Census: 12 in 62 (1 in 62+), 4 finer (1/16). NGC ID# 267C, PCGS# 8736
- 4520 1899 MS64+ NGC. CAC.** Admirable luster enlivens the rich orange-red surfaces of this near-Gem late-series Liberty Head eagle, one showing tiny ticks and a small luster graze or two that separate it from Gem rank. A sharply struck and attractive coin. NGC ID# 267J, PCGS# 8742

4521 1900 MS64 PCGS. Rich orange-gold luster complements attractively preserved surfaces with minimal abrasions for the grade and a bold strike. The turn-of-the-century date will appeal to another market segment. Gems of this issue are elusive; PCGS reports only 24 submissions in MS65 or higher (two MS66 finest) (1/16). NGC ID# 7LD2, PCGS# 8745

4522 1901 MS64+ NGC. Ample luster appears on the orange-gold surfaces of this near-Gem, a grade level this piece narrowly misses by way of a few scattered ticks. The strike and eye appeal are nonetheless excellent throughout. NGC ID# 7LHF, PCGS# 8747

4523 1901 MS64 NGC. CAC. Pleasantly frosted mint luster rolls over both sides of this Choice 1901 gold eagle. The strike is sharp, and scattered abrasions are minimal in the visual impact. Both the 1901 and its San Francisco counterpart are available in high grade and boast incredible popularity among type collectors. NGC ID# 7LHF, PCGS# 8747

4524 1901 MS64 PCGS. CAC. Frosty peach-gold luster rolls over the Choice surfaces of this 1901 Liberty eagle type coin. The strike is sharp, and the grade-limiting abrasions are none other than a few small ticks on Liberty's cheek. At the Choice grade level, this CAC-endorsed coin is within the grasp of many budget-conscious collectors, whereas finer pieces climb out of reach quickly. NGC ID# 7LHF, PCGS# 8747

4525 1901-S MS64 PCGS. CAC. Like the Philadelphia issue of this debut 20th century year, the 1901-S Liberty eagle is an available date that is highly popular with type collectors. This piece is boldly struck and possesses potent luster. Scattered tiny ticks are nearly absorbed by the radiant cartwheel effect. NGC ID# 267S, PCGS# 8749

4526 1901-S MS64+ PCGS. CAC. Peach, honey, and mint-gold hues intermingle over the frosty surfaces of this high-end Choice 1901-S Liberty eagle. The strike is sharp, and grade-limiting marks are trivial and scattered. This CAC-endorsed type coin would be difficult to surpass below the Gem grade level. NGC ID# 267S, PCGS# 8749

1901-S Ten Dollar, MS65 In an Old Green Label Holder

4527 1901-S MS65 PCGS. The 1901-S Liberty eagle is available through MS65, making it a favorite among type collectors. This piece is especially pleasing for the grade, showing sharp motifs and vibrant orange-gold luster that offers tinges of mint-green and rose. A few microscopic ticks on the obverse limit the grade but have little impact on the eye appeal. Housed in an old green label holder, this Gem 20th century type coin boasts refreshingly original luster. NGC ID# 267S, PCGS# 8749

1902-S Eagle, MS65+ Rich Color and Luster

4528 1902-S MS65+ NGC. Top-notch luster and a full strike are among the many virtues of this Gem 1902-S eagle. Honey-gold color and only trivial marks consistent with the grade make this piece a keeper for type- or date-set purposes. The mintage of the 1902-S eagle was a tad under 470,000 pieces, but most certified survivors are no better than MS63. Census: 2 in 65+, 12 finer (1/16). NGC ID# 267U, PCGS# 8751

4529 1903-S MS63 PCGS. An exceptional Select Mint State piece and seldom encountered so fine, this 1903-S survives from a mintage of just over a half million coins. Full yellow-gold luster is evident with faint orange overtones. NGC ID# 267X, PCGS# 8754

4530 1906 MS63+ PCGS. CAC. This high-end Select specimen exhibits sharply detailed design elements throughout and the pleasing orange-gold surfaces show a scattering of minor contact marks, with vibrant mint luster on both sides. PCGS has graded 50 numerically finer examples (2/16). NGC ID# 7JHG, PCGS# 8759

4531 1906-D MS64 PCGS. While the surfaces are remarkably unabraded and only a handful of small marks exist anywhere on this near-Gem eagle, it is the sumptuous honey-gold color and frosty mint luster that make it a standout coin. While only moderately scarce in MS64, the sharp bidder will note just 28 1906-D tens are graded numerically finer by PCGS (2/16). NGC ID# 2685, PCGS# 8760

4532 1907 Liberty MS64+ PCGS. Great-looking wheat-gold surfaces brim with luster and show a sharp strike on this last-year Liberty eagle, a top-notch candidate for a type set. Minimal contact marks keep this coin, just barely, from a Gem grade, but the eye appeal is all there. Population: 26 in 64+, 27 finer (1/16). NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

4533 1907 No Motto MS63 PCGS. A pleasing Mint State example with original orange-gold luster and well-struck design elements. Scattered abrasions define the grade but none are individually noteworthy. The No Periods 1907 Indian ten is the most frequently seen No Motto issue in the series, popular among budget-conscious type and date collectors. NGC ID# 28GF, PCGS# 8852

**1907 No Periods Indian Ten, MS64+
Pleasing No Motto Type Coin**

4534 1907 No Motto MS64+ NGC. The ideal No Motto type-coin issue, the 1907 No Periods Indian ten is usually available in Mint State. This Plus-graded Choice example balances eye appeal and affordability at an ideal level. The design elements are well-defined, and the yellow-gold surfaces yield satiny cartwheel luster. Light grazes define the grade in the absence of noticeable abrasions. NGC ID# 28GF, PCGS# 8852

4535 1908 Motto MS63 PCGS. This Saint-Gaudens eagle shows bold definition on the design elements, and the lustrous orange-gold surfaces display a moderate number of contact marks for the grade. An attractive Select example of the first Indian Head issue with the popular motto IN GOD WE TRUST. NGC ID# 28GJ, PCGS# 8859

4536 1909 MS62+ PCGS. An attractive Plus-graded MS62 specimen, with lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides and sharply detailed design elements throughout. NGC ID# 28GM, PCGS# 8862

4537 1909-D MS61 PCGS. The 1909-D is a slightly better date in Mint State, compared to higher-mintage Indian eagles. This piece is well-struck with satiny orange-gold luster. Light chatter limits the grade in the absence of individually bothersome abrasions. NGC ID# 28GN, PCGS# 8863

4538 1909-D MS62 NGC. Satiny luster glimmers over granular straw-gold surfaces. The overall impression is strong with a trace of softness over the hair strands, lower headdress feathers, and upper portion of the eagle's wing — all normal for the date. A total of 121,540 coins makes up the entire 1909-D mintage, and survivors are scarcely seen finer. NGC ID# 28GN, PCGS# 8863

**1909-S Ten Dollar, MS62
CAC-Approved Quality and Appeal**

4539 1909-S MS62 NGC. CAC. The 1909-S was struck to the extent of 292,350 coins, but examples are scarcely seen in Uncirculated grades. MS62 is about the finest grade that can still be considered collectible. Select representatives are decidedly more challenging. Khaki-gold coloration and frosty luster combine over this CAC-approved example. Liberty's hair strands and lower headdress feathers are lightly impressed, but the eagle's shoulder and breast feathers are crisp. NGC ID# 28GP, PCGS# 8864

4540 1910-D MS64+ NGC. An exceptional example of this plentiful issue with brilliant and frosty yellow-gold surfaces showing hints of delicate orange overtones. The surfaces exhibit a few grade-limiting marks, mostly on the reverse. NGC ID# 28GS, PCGS# 8866

4541 1910-S MS60 PCGS. An Uncirculated example with light surface chatter over satiny orange-gold luster. Well-struck from eroded dies with moderate metal flow lines in the fields. Pleasing for the grade. NGC ID# 268D, PCGS# 8867

4542 1910-S MS61 PCGS. Well-struck with satiny luster. The surfaces display honey and green-gold hues with minimally abraded fields. A few small marks on Liberty's cheek and neck contribute to the grade. NGC ID# 268D, PCGS# 8867

4543 1911 MS64+ NGC. A Plus-graded Choice example of this popular early series issue, with sharply detailed design elements and lustrous reddish-gold surfaces that show only minor signs of contact. NGC ID# 28GT, PCGS# 8868

4544 1912-S MS61 PCGS. This impressive Mint State example displays vivid orange-gold surfaces, with a scattering of minor contact marks on both sides and much original mint luster. The design elements are well-detailed and the overall presentation is quite pleasant. NGC ID# 269G, PCGS# 8872

4545 1912-S MS61 NGC. Wheat-gold color prevails over each side of this frosty S-mint eagle. Blushes of reddish-gold appear at the upper reverse. A die crack encircles most of the obverse rim. Notable abrasions occur on Liberty's temple, neck, and headdress. An uneven strike shows softness over the lower feathers and the eagle's shoulder. NGC ID# 269G, PCGS# 8872

**1912-S Ten Dollar, MS62
Attractive and Original**

4546 1912-S MS62 NGC. Attractive deep orange patina with reddish accents and nicely struck surfaces characterize this S-mint eagle. A loupe reveals scattered contact marks on Liberty's cheek and chin, but only one thin scrape on the neck requires singular mention. Some charcoal-colored buildup (also seen only under a loupe) appears in a few letters at the reverse periphery. NGC ID# 269G, PCGS# 8872

4547 1913-S AU55 PCGS. A better date with a small mintage of 66,000 pieces. This Choice AU 1913-S Indian ten displays modest orange-gold luster with light chatter over each side. The well-struck design elements show wear only on the highest points. NGC ID# 28GZ, PCGS# 8874

4548 1913-S AU55 PCGS. Original wheat-gold luster glows in the fields of this Choice AU 1913-S Indian ten. The design elements are well-defined and have little wear. The '13-S is a semikey in all grades, boasting a scant mintage of 66,000 coins. NGC ID# 28GZ, PCGS# 8874

1913-S Indian Ten, AU58
Eye-Appealing for the Grade

4549 1913-S AU58 NGC. A better date with a mintage of only 66,000 coins, the 1913-S Indian eagle is scarce in Mint State. This nearly Uncirculated example remains within the grasp of budget-conscious collectors but possesses many of the attributes of a lower-end Mint State coin: soft luster, sharp motifs, and light surface chatter. Eye appeal is pleasing. NGC ID# 28GZ, PCGS# 8874

4550 1914-D MS63+ PCGS. CAC. This Plus-graded Select specimen exhibits well-detailed design elements and vivid orange-gold surfaces with a few scattered, minor contact marks. Mint luster is unbroken, but slightly subdued. NGC ID# 28H3, PCGS# 8876

1914-D Indian Eagle, MS64+
Attractive Luster and Sharpness

4551 1914-D MS64+ NGC. Unusually appealing for the grade and issue, this high-end Choice 1914-D Indian eagle displays vibrant wheat-gold luster and sharp design elements. There are no major abrasions, only light grazes on Liberty's cheek and the eagle's shoulder. Finer examples are scarce and out of reach for many collectors. NGC ID# 28H3, PCGS# 8876

4552 1914-S AU58 PCGS. CAC. From a mintage of 208,000 pieces, this attractive near-Mint specimen shows just a trace of wear on the well-detailed design elements, and the lustrous orange-gold surfaces are lightly abraded. NGC ID# 28H4, PCGS# 8877

4553 1916-S AU58 PCGS. Almost half of all PCGS-certified 1916-S tens are in circulated grades, which confirms that gold coins circulated on the West Coast during the early 20th century. The present peach-gold near-Mint ten has ample luster and good eye appeal despite a few unobtrusive abrasions. NGC ID# 28H7, PCGS# 8880

4554 1926 MS64 PCGS. CAC. A lustrous orange-gold example of this popular type-coin issue. Sharp detail characterizes the devices, and surface abrasions are minimal. The 1926 Indian eagle had a mintage of more than 1 million coins. Many were dispersed to the public prior to the gold confiscation of 1933, resulting in the issue's availability in high grade today. NGC ID# 28H9, PCGS# 8882

4555 1932 MS64 PCGS. CAC. The 1932 Indian eagle was heavily melted by the government, but the 1932 is an available type-coin issue that survived in quantity. This CAC-endorsed Choice example displays sharp detail and impressive coloration — peach, rose, and lilac-gold hues encompass the frosty surfaces. NGC ID# 28HB, PCGS# 8884

4556 1932 MS64 PCGS. CAC. Glistening golden luster emerges from the frosty fields of this Choice 1932 Indian eagle, illuminating bold relief elements and showcasing minimally marked surfaces. This available late-series issue is among the most popular With Motto type coins. NGC ID# 28HB, PCGS# 8884

4557 1932 MS64+ NGC. CAC. The 1932 Indian eagle is a popular type coin because attractive high-grade examples are usually readily available. This high-end Choice specimen offers well-detailed design elements and well-preserved surfaces with especially vibrant mint luster. NGC ID# 28HB, PCGS# 8884

4558 1932 MS64+ PCGS. CAC. The 1932, from a mintage approaching 4.5 million pieces, is the most common date in the Indian Head ten dollar series. Pleasing luster emanates from the yellow-gold surfaces of this high-end near-Gem, and the design features are well-impressed. Light scuffs prevent Gem classification. An excellent coin for a high-grade type collection. NGC ID# 28HB, PCGS# 8884

1932 Indian Eagle, MS65+
Lustrous, Variegated Toning

4559 1932 MS65+ PCGS. Delightful shades of orange, rose, and lemon-gold vie for attention across the frosted surfaces of this richly lustrous ten dollar gold. Always a candidate for type, the 1932 eagle was well-preserved from a large mintage of nearly 4.5 million pieces. This sharp example shows a few light marks on the reverse but exceptional eye appeal thanks to the dramatic coloration, earning the PCGS Plus designation. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1851-O Double Eagle, XF40
The Only Gold CAC Example

4560 1851-O XF40 PCGS. Gold CAC. This is the only 1851-O double eagle that has received a gold CAC sticker, and one of only 40 Type One twenties to receive Gold approval in all grades (2/16). This piece, housed in a green-label PCGS holder has rich yellow and orange-gold surfaces with splashes of deep orange patina that likely identify this coin as a treasure piece. The surfaces exhibit trivial grade-consistent marks. This New Orleans double eagle has exceptional eye appeal as the Gold CAC approval suggests. NGC ID# 268J, PCGS# 8905

**1852 Liberty Twenty, AU53
Nice for the Grade**

- 4561 1852 AU53 PCGS. CAC.** Enough gold flowed from the California gold fields to warrant a substantial, 2-million piece mintage of double eagles in Philadelphia. Even so, only the occasional AU coin is available with original, still-lustrous color. This example is smooth and attractive with sharp definition and great eye appeal, confirmed by the CAC endorsement. NGC ID# 268K, PCGS# 8906

**1852 Double Eagle, AU55
Gold Rush-Period Type Coin**

- 4562 1852 AU55 NGC.** Attractive green-gold surfaces show remnants of luster in the protected regions of the fields, accentuating the boldly struck, little worn design elements. A few minor marks are consistent with the grade. The 1852 double eagle is an available Type One issue, boasting a more than 2 million-coin mintage that was fueled by bullion deposits from the California Gold Rush. NGC ID# 268K, PCGS# 8906

- 4563 1853 XF45 PCGS. Breen-7161.** This 1853 twenty offers an interesting repunched date. Remnants of an initial logotype is clearly visible on an upward slope from the base of 1 to the lower ball of the 3. Undesignated on the holder, the Breen-7161 variety adds appeal to this Choice XF example. Numerous light abrasions and a pair of orange toning spots are noted. Some mint luster remains. NGC ID# 268M, PCGS# 8908

1853 Twenty Dollar, Orange-Gold AU58

- 4564 1853 AU58 NGC.** The surviving population of this issue comprises numerous examples in the AU58 grade that also include some coins that are shipwreck recoveries — from the *S.S. Central America* and *S.S. Republic*, although this piece is not specifically so provenanced — but Mint State examples are condition rarities. This example displays a touch of high-point wear on orange-gold surfaces that boast generous luster. Scattered moderate marks are present, along with one larger one in the right obverse field behind Liberty's head. Three large scrapes show below the shield on the reverse. NGC reports only 52 in MS60 and above (1/16). NGC ID# 268M, PCGS# 8908

- 4565 1854 Small Date AU53 PCGS.** The Mint used two different-size date logotypes for the 1854 Philadelphia double eagles. The Small Date is far more plentiful than the Large Date variety. This piece displays lightly abraded but attractive, yellow-gold surfaces with ample remaining mint luster. Nice, natural appeal for type or date collectors.
Ex: *ANA Signature (Heritage, 3/2011)*, lot 4907. NGC ID# 268R, PCGS# 8911

**1855-S Twenty Dollar, AU55
Partially Lustrous Surfaces**

- 4566 1855-S AU55 PCGS.** Attractive honey-gold surfaces display moderate luster in the protected regions of the fields with light chatter in the exposed interiors. The design elements are boldly struck and display little high-point wear. The 1855-S is scarce in Mint State and often comes heavily bagmarked at that level. This Choice AU coin will please numerous budget-conscious collectors. NGC ID# 268X, PCGS# 8916

**1856-S Double Eagle, AU55
Attractive and Lustrous**

- 4567 1856-S AU55 NGC.** Shipwreck discoveries have increased the availability of the 1856-S double eagle in recent decades, although collector demand has only increased along with it. This Choice AU example displays lustrous straw-gold fields and boldly detailed design elements. Light surface chatter on the cheek and in the open fields is typical for the grade. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, AU58
Nearly Mint State, Nice Appeal**

- 4568 1856-S AU58 NGC.** An impressive example — nearly Mint State, with a few light abrasions but no major marks. The orange-gold color and abundant remaining mint luster give this Type One twenty great eye appeal, while the lack of heavy marks exceeds the surface quality of many Mint State coins. NGC reports just 38 numerically finer examples (1/16). NGC ID# 2692, PCGS# 8919

- 4569 1859-S XF45 NGC.** An elusive San Francisco date in the series, especially when Uncirculated, although Choice XF coins are challenging with original patina and decent surfaces, too. This example fills the bill with glowing apricot-gold color and relatively minor marks, along with moderate wear. NGC ID# 269C, PCGS# 8928

**1860 Twenty Dollar, Choice AU
Bright Yellow-Gold Surfaces**

- 4570 1860 AU55 PCGS.** Surprisingly lustrous with bright lemon-gold surfaces. Faintly worn on the softly struck high points with small, scattered abrasions that appear on and near the portrait. This would make a nice AU type-coin representative of a Type One twenty.
Ex: *FUN Signature (Heritage, 1/2009)*, lot 5699. NGC ID# 269D, PCGS# 8929

1860 Double Eagle, MS61

- 4571 1860 MS61 PCGS.** This underrated issue had a mintage of only a little more than a half million coins and few have survived in Mint State grades. The piece offered here has the appearance of a higher grade. A few hairlines at the lower obverse limit the grade although they are not distracting. A bold strike and frosty luster ensure excellent eye appeal. Population: 31 in 61, 22 finer (2/16). NGC ID# 269D, PCGS# 8929

**1860-S Double Eagle, AU55
Lustrous and Smooth Surfaces**

- 4572 1860-S AU55 PCGS.** The rarity of the 1860-S twenty in Mint State produces strong demand for high-end AU coins such as this piece. The design elements retain nearly complete detail and reside amid uncommonly smooth surfaces. Substantial luster remains in the fields. An undeniably eye-appealing example of this challenging San Francisco issue. NGC ID# 269F, PCGS# 8931

**1860-S Twenty, AU55
Infrequently Seen Finer**

- 4573 1860-S AU55 NGC.** The 1860-S is a better Type One double eagle issue in high grade, rarely seen at any Mint State level. This Choice AU representative displays excellent detail for the grade and remnants of luminous luster in the protected regions of the fields. The surfaces are bronze-gold in color and have few significant abrasions. NGC ID# 269F, PCGS# 8931
- 4574 1861 VF30 PCGS. CAC.** It is unusual to find an 1861 double eagle with 30 points of wear, and even moreso to see one with CAC endorsement. Moderate wear — either from circulation, or as a pocket piece — does not disturb the natural orange-gold color or the undeniable eye appeal. PCGS reports just 11 pieces in this seldom-seen grade, a stubborn survivor from the mintage of nearly 3 million pieces (2/16). NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, AU58
Semiprooflike Fields**

- 4575 1861 AU58 PCGS.** Dazzling surfaces display semiprooflike fields and radiant cartwheel luster. For an AU coin, this near-Mint 1861 double eagle boasts incredible eye appeal. Light surface chatter is of little distraction, and the design elements are boldly rendered. Due to its ready availability, the 1861 Liberty Head twenty is a favorite for type representation. NGC ID# 269G, PCGS# 8932
- 4576 1861 — Cleaning — PCGS Genuine. Unc Details.** The 1861 is an ideal type candidate among Type One Liberty double eagles. This attractive example has pleasing orange-gold surfaces with faint hairlines from an old cleaning. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, MS61
Dethroned Type Candidate**

4577 1861 MS61 PCGS. At one time the 1861 was considered the only candidate for a type collection as it was the single common issue in the Type One double eagle series. However, the recovery of the *S.S. Brother Jonathan*, *Central America*, and *Republic* treasures changed the landscape. Today, the 1857-S double eagle is the common issue that is usually chosen for type collections. This 1861 is an attractive Mint State piece that has the appearance of a much higher grade. Once a glass is utilized, the microscopic grade-limiting hairlines come into focus. NGC ID# 269G, PCGS# 8932

4578 1863-S XF40 PCGS. CAC. A pleasing XF specimen of this popular Type One double eagle issue, with lightly abraded orange-gold surfaces that retain traces of original mint luster. The prong of the tiara and Liberty's hair show slight evidence of wear. NGC ID# 269R, PCGS# 8940

4579 1866-S Motto AG3 PCGS. CAC. The motto IN GOD WE TRUST was added to the design of the double eagle in 1866. This well-worn branch mint specimen shows all major design elements complete in outline, and the date and most lettering in the legends remain legible, but the rim on the reverse is worn smooth. NGC ID# 26B2, PCGS# 8950

4580 1873 Open 3 MS61+ NGC. CAC. This popular Type Two double eagle shows the later Open 3 in the date. The design elements are well-detailed and the lustrous orange-gold surfaces display the minimum number of minor abrasions for the grade. NGC ID# 26AL, PCGS# 8967

**1873 Open 3 Twenty, MS62
Flashy Type Two Issue**

4581 1873 Open 3 MS62 PCGS. CAC. A few marks are present but the grade is determined more by luster grazes, neither of the foregoing, however, managing to defeat the broad eye appeal from lovely golden-orange surfaces boasting flashy reflectivity and a bold strike. The 1873 Open 3 is a great Type Two issue that is hotly pursued for type-set purposes. NGC ID# 26AL, PCGS# 8967

4582 1876-CC VF25 PCGS Secure. Variety 4-A. A pumpkin-gold Carson City collector coin. The eagle's wings retain substantial detail, and the surfaces are minimally marked for the designated grade. The present coin may have been a pocket piece for someone seeking a connection to the Old West. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, AU Details
Collectible Carson City Twenty**

4583 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 5-A. An early-die-state coin, before the crack develops to the left of the date. Among Carson City issues, the 1876-CC is marginally available in high grade, ideal for the collector seeking a single representative from this mint. This piece shows pleasing detail and smooth surfaces with hints of luster in the protected regions. Scattered hairlines suggest a light cleaning. NGC ID# 26AW, PCGS# 8977

**1880 Double Eagle, Lustrous AU55
Low-Mintage Issue**

4584 1880 AU55 NGC. Richly colored surfaces show a scattering of light ticks but no major distractions. The Choice AU grade is determined by minor high-point wear, but considerable luster and some reflectivity remain on each side. The mintage of this issue was a surprisingly low 51,420 circulation strikes. NGC ID# 26BA, PCGS# 8992

**1880 Twenty Dollar, AU58
Elusive in Finer Grades**

4585 1880 AU58 NGC. The 1880 Liberty double eagle is only moderately scarce in AU58, but the rarity and generally low eye appeal of Mint State coins keeps demand high in this grade. The present piece is sharply detailed and partially lustrous with original green-gold coloration. Slight friction and mild surface chatter limit the grade. NGC ID# 26BA, PCGS# 8992

**1880 Double Eagle, Low-Mintage AU58
Great Color and Surfaces**

4586 1880 AU58 NGC. The mintage of this P-mint Liberty double eagle was a surprisingly low 51,420 circulation strikes, coming at a time when the Mint was consciously trying to expand the circulation of smaller-denomination eagles and half eagles. This scarcely circulated example offers top-notch surfaces and preservation, showing few marks of consequence amid deep, mellow orange-gold color. NGC ID# 26BA, PCGS# 8992

4587 1883-S MS61 PCGS. Small Squat S mintmark. Seldom available in grades higher than MS62, this lightly abraded MS61 example displays reflective fields with rich, sun-gold color and strong cartwheel luster. A small dig between stars 10 and 11 is the most noticeable mark. Sharply struck and pleasing for the grade. NGC ID# 26BJ, PCGS# 9000

4588 1887-S MS61 PCGS. More eye appeal is present than might be expected for the grade, with great luster showing on well-struck honey-gold surfaces. A couple of mentionable marks — one behind Liberty's nose, some reeding marks under the hairbun — combine with little ticks on the date to determine the grade. NGC ID# 26BS, PCGS# 9007

4589 1888-S MS62+ NGC. A few scrapes and luster grazes are largely confined to the obverse of this attractive orange-gold 1888-S twenty dollar. The S-mint Type Three double eagles are attractive coins that are underrated but found with excellent production qualities that in turn lead to good aesthetics on high-grade survivors. NGC ID# 26BU, PCGS# 9009

**1889 Twenty Dollar, MS62
Frosty Luster, Pleasing Color**

4590 1889 MS62 PCGS. This Type Three Philadelphia issue is occasionally in the lower Mint State grades, but pieces grading finer than this MS62 coin are rare. This representative displays frosty green-gold luster with peach and rose accents throughout. The strike is sharp, and scattered abrasions pose minimal distraction. PCGS has seen 30 finer examples (2/16). NGC ID# 2695, PCGS# 9010

4591 1889-S MS62+ PCGS. A thoroughly attractive example of this Type Three S-mint double eagle issue, showing lovely golden color, flashy luster, a good strike, and only scattered minimal marks that are less than usual. Two small reeding marks on Liberty's chin fail to diminish the appeal. NGC ID# 26BW, PCGS# 9012

4592 1890-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. The usual late die state with partially lapped tail feathers. Delicate hairlines cross both sides of this briefly circulated Carson City type coin. Unimportant marks are scattered but the sole reportable abrasion is on the obverse rim at 9:30. NGC ID# 26BY, PCGS# 9014

**1892-S Double Eagle, MS63
Seldom Seen in Finer Grades**

4593 1892-S MS63 PCGS. CAC. Double eagle production in San Francisco dipped below 1 million coins in 1892, but only slightly, with more than 930,000 pieces still produced. Examples can be easily found in MS62 and lower grades and in MS63 with only slight difficulty — but finer examples are elusive. This Select piece displays frosty green-gold luster with subtle rose accents in the centers. The strike is crisp throughout. Light surface grazes on Liberty's cheek limit the grade. NGC ID# 26C7, PCGS# 9021

4594 1895-S MS63 NGC. CAC. An attractive Type Three double eagle, with well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster. Overall eye appeal is outstanding. NGC ID# 26CE, PCGS# 9028

4595 1896-S MS63 NGC. CAC. An apricot and olive-gold Liberty twenty that boasts booming luster and a bold strike. Both sides exhibit unimportant alloy imperfections, but the preservation is exceptional for the MS63 level. Housed in a former generation holder. NGC ID# 26CG, PCGS# 9030

4596 1896-S MS63+ PCGS. CAC. A lustrous and meticulously struck example with canary-gold color. The reverse is well preserved, and the obverse is also clean for the assigned grade. The Plus designation and CAC green label make an enticing pair.
Ex: Central States Signature (Heritage, 5/2003), lot 7466; New York Signature (Heritage, 11/2003), lot 7901. NGC ID# 26CG, PCGS# 9030

4597 1897 MS63+ PCGS. Although plentiful in Mint State, the 1897 Liberty double eagle becomes increasingly scarce above MS63. This Plus-graded coin remains within the grasp of most budget-conscious collectors. The strike is sharp, and the frosty surfaces yield radiant orange-gold luster. Light chatter on Liberty's cheek limits the grade. NGC ID# 26CH, PCGS# 9031

4598 1897-S MS64 PCGS. CAC. The 1897-S Liberty double eagle is seldom seen in grades above the MS64 level. This attractive Choice example displays sharply detailed design elements and lightly marked orange-gold surfaces with outstanding eye appeal. PCGS has graded 11 numerically finer examples (1/16). NGC ID# 26CJ, PCGS# 9032

4599 1899 MS64+ PCGS. Splendid luster appears on the peach-gold surfaces of this near-Gem 1899 double eagle, showing a bold strike and scattered marks consistent with the grade. Population: 25 in 64+, 25 finer (1/16). NGC ID# 26CM, PCGS# 9035

**1899 Twenty, MS63 Prooflike
Few Known This Reflective**

- 4600 1899 MS63 Prooflike NGC.** Tied with one other as the finest of just 15 Prooflike coins at NGC (1/16). Modest cameo contrast heightens the eye appeal despite light surface abrasions that limit the grade. The strike is bold, and each side exhibits bright yellow-gold luster. An appealing example of this otherwise plentiful late 19 century type-coin issue. NGC ID# 26CM, PCGS# 79035
- 4601 1900 MS64+ NGC. CAC.** A high-end Choice example of this popular type issue, with sharply detailed design elements and lustrous orange-gold surfaces that show minimal signs of contact. Hints of lilac patina at the centers add to the outstanding eye appeal. NGC ID# 26CP, PCGS# 9037
- 4602 1903 MS64 PCGS.** The mintage of the 1903 double eagle issue was a modest 287,000 pieces in the year before the Brobdingnagian productions of 1904 in Philadelphia and San Francisco, but plenty survive in Mint State grades to satisfy demand. This is a splendid orange-gold near-Gem with plenty of luster and eye appeal. NGC ID# 26CW, PCGS# 9043
- 4603 1903-S MS62 PCGS.** A well-struck example, showing yellow-gold luster and grade-consistent, scattered abrasions. The fields are noticeably semiprooflike, heightening the eye appeal. NGC ID# 26CX, PCGS# 9044
- 4604 1904 MS64+ NGC. CAC.** The 1904 Liberty double eagle is one of the most available issues of the series in high grade, and a popular choice of type collectors. This high-end Choice specimen is sharply detailed throughout, with well-preserved orange-gold surfaces and vibrant mint luster. NGC ID# 26CY, PCGS# 9045

**1905 Double Eagle, MS61 ★
Sole Star-Graded Example**

- 4605 1905 MS61 ★ NGC.** The 1905 Liberty twenty is significant among 20th century issues for its low mintage of 58,919 pieces, and Mint State coins are always in demand. This lower-end example is distinctive as the only Star-designated example of the date in any grade. Prooflike fields and bold relief elements combine with minimally abraded straw-gold surfaces to deliver outstanding eye appeal for the MS61 level. NGC ID# 26D2, PCGS# 9047

SAINT-GAUDENS DOUBLE EAGLES

- 4606 1908 No Motto MS64+ NGC. CAC.** Long Rays Obverse. A high-end Choice representative of the short-lived No Motto design, this specimen offers well-detailed design elements and well-preserved reddish-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 26F6, PCGS# 9142
- 4607 1908 No Motto MS65 PCGS Secure.** Ex: Coll. Champagne Lanson. Long Rays obverse. The No Motto 1908 Saint-Gaudens double eagle is available throughout the Mint State grade range due largely to the discovery of the Wells Fargo Hoard. This Gem type coin displays bold design elements and satiny green-gold luster with few noticeable abrasions. NGC ID# 26F6, PCGS# 9142
- 4608 1908 Motto MS63 PCGS Secure.** Ex: Coll. Champagne Lanson. A lustrous Select example of this inaugural With Motto Philadelphia issue, showing rich orange-gold surfaces and well-defined motifs. Light, scattered abrasions define the grade. NGC ID# BNAK, PCGS# 9147
- 4609 1909 MS63 PCGS.** Blatantly original, brassy-gold color endows the sharply struck surfaces of this scarce Philadelphia twenty with great eye appeal. A scattering of minor contact marks is consistent with the grade. NGC ID# 26FC, PCGS# 9150
- 4610 1909-D AU58 NGC.** A near-Mint example of the scarcest Denver issue. The Denver Mint produced only 52,500 Double Eagles in 1909. This piece exhibits a sharp strike and attractive coloration in shades of yellow-gold, orange, and rose. None of the few scattered marks poses a distraction for the assigned AU58 grade. NGC ID# 26FD, PCGS# 9152
- 4611 1909-S MS64+ PCGS.** Rich orange-gold luster glows on each side of this high-end Choice 1909-S Saint-Gaudens double eagle. The strike is well-executed, and only a few minor abrasions are noted. Eye appeal is excellent. NGC ID# 26FE, PCGS# 9153
- 4612 1910-D MS65 PCGS.** This bright, yellow-gold Gem 1910-D Saint-Gaudens double eagle will appeal to a range of collectors, as finer coins are scarce. The strike is sharp, and there are no mentionable abrasions. NGC ID# 26FG, PCGS# 9155

**1911 Twenty Dollar, MS64
Attractive Luster**

- 4613 1911 MS64 PCGS.** A number of 1911 double eagles survive in Mint State, but most show moderate to extensive bagmarks. Above MS64, the issue is genuinely scarce. This Choice example remains within the grasp of many collectors but still offers pleasing eye appeal and well-preserved surfaces. The strike is bold, and luminous straw-gold luster rolls over each side. NGC ID# 26FK, PCGS# 9157
- 4614 1915 MS63 PCGS.** Satiny wheat-gold luster cartwheels around unusually well-preserved surfaces on this Select 1915 double eagle. The strike is well-executed, and there are no significant abrasions — faint hairlines and the occasional tick are all that limit the grade. NGC ID# 26FV, PCGS# 9167

**1915 Double Eagle, MS63+
Bright, Vibrant Mint Luster**

4615 1915 MS63+ PCGS. Compared to its San Francisco counterpart, the 1915 Saint-Gaudens double eagle is elusive in pleasing Mint State condition. This Select example is well-struck, with vibrant orange-gold luster and minimal abrasions. A single tiny alloy spot appears near the obverse rim at 8 o'clock. NGC ID# 26FV, PCGS# 9167

4616 1915-S MS64 NGC. CAC. An attractive Choice specimen of this popular Saint-Gaudens double eagle, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster. NGC ID# 26FW, PCGS# 9168

4617 1922 MS64+ PCGS. Typically well-struck and with excellent eye appeal, the 1922 double eagles are always a top selection for type. This high-end near-Gem is radiantly lustrous minimally abraded. The sharply struck, frosty surfaces glisten with honey-gold color. A faint grease mark (of Mint origin) is noted near the torch hand. NGC ID# 26G3, PCGS# 9173

4618 1924 MS66 PCGS Secure. Ex: Coll. Champagne Lanson. The go-to type-coin issue for many collectors, the 1924 Saint-Gaudens double eagle has a reputation as the most available date in the series in high grade. This Premium Gem displays frosted honey-gold luster and bold relief elements. A few trivial grazes are not out of line for the grade. Infrequently seen finer. NGC ID# 26G7, PCGS# 9177

**1927 Twenty Dollar, MS66+
Seldom Seen Finer**

4619 1927 MS66+ PCGS. A lovely green-gold representative that boasts sweeping luster and a good strike. A loupe reveals only incidental contact. Although saved in quantity as bullion by foreign banks, the 1927 double eagle becomes highly elusive at the MS66+ level. Many of the overseas hoard coins were loosely stored in bags and acquired numerous abrasions. PCGS lists 18 finer examples (2/16). NGC ID# 26GG, PCGS# 9186

4620 1928 MS64+ NGC. CAC. A Plus-graded Choice representative of this popular type issue, with sharply detailed design elements and well-preserved orange-gold surfaces. Vibrant mint luster adds to the exceptional eye appeal. NGC ID# 34VK, PCGS# 9189

4621 1928 MS65 NGC. A Gem type coin, this 1928 Saint-Gaudens double eagle displays sharp relief detail, with vibrant, frosty luster rolling over wheat-gold fields. Trivial marks on the high points of Liberty's figure are all that limit the grade. The 1928 is the last plentiful issue in the series for type collectors to consider. NGC ID# 34VK, PCGS# 9189

4622 1928 MS66 NGC. Brilliant luster shines forth from virtually unabraded strawberry-blond surfaces on this appealing Premium Gem, a great choice for type- or date-set purposes. A strongly struck coin throughout both sides. NGC ID# 34VK, PCGS# 9189

4623 1928 MS66 PCGS. CAC. The 1928 is the last available issue in the Saint-Gaudens double eagle series, often chosen for type representation by collectors seeking to stray from the ridiculously common 1924 and 1927 issues. This Premium Gem example displays bold motifs and frosty wheat-gold luster. A few faint grazes on the relief elements hardly impact the eye appeal. NGC ID# 34VK, PCGS# 9189

4624 1928 MS66 PCGS. CAC. Frosty original luster and clean fields are the hallmarks of this Premium Gem 1928 Saint-Gaudens double eagle. The strike is sharp. Although this Philadelphia issue is plentiful through MS66, finer pieces are scarce and out of reach for many collectors. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

4625 1893 Isabella Quarter MS65 PCGS. Dusky lavender-gray toning and olive-gold accents encompass each side of this Gem Isabella quarter, while the design elements yield pleasing definition. Among the most important issues in the classic commemorative series, with a limited distribution of 24,214 pieces. NGC ID# BYJ9, PCGS# 9220

4626 1900 Lafayette Dollar MS63 PCGS. CAC. DuVall 1-B. Ex: Teich Family Collection. Apple-green, walnut-brown, and cherry-red fill the borders but the fields and motifs remain brilliant. Marks are inconsequential, and the coin is high-end despite a faint fingerprint on the lower obverse.
Ex: *New York Signature (Heritage, 2/2014)*, lot 4378, which realized \$2,585. NGC ID# BYKW, PCGS# 9222

4627 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. Well-struck and lustrous with dusky olive-gold and lavender-gray toning over each side. Few noticeable abrasions are observed. The only silver dollar in the classic commemorative series, the Lafayette dollar is highly sought-after in all grades. NGC ID# BYKW, PCGS# 9222

4628 1936 Albany MS67+ NGC. CAC. A fully original Albany half dollar marking the 250th anniversary of the city charter. This Superb Gem exhibits lustrous ivory surfaces with delicate gold and iridescent peripheries. NGC has certified seven finer examples, and CAC has only approved one finer piece (2/16). NGC ID# 23WZ, PCGS# 9227

4629 1937 Antietam MS67 PCGS. CAC. A virtually pristine Superb Gem with dynamic luster and a crisp strike. The borders possess peach patina while the interiors are slate-gray. CAC-endorsed in an old green label holder. PCGS lists 19 numerically superior representatives (1/16). NGC ID# BYF4, PCGS# 9229

4630 1937 Antietam MS67 PCGS. CAC. Strong luster provides this sharply struck Superb Gem representative with a lovely degree of eye appeal. Faint toning is present in shades including olive-green, red, golden-brown, red-brown, red-pink, and mint-green. PCGS lists 19 finer coins (1/16). NGC ID# BYF4, PCGS# 9229

4631 1937 Antietam MS67 PCGS. CAC. An unusually frosty Superb Gem Antietam half dollar, showing bold relief detail and untouched surfaces. Each side is silvery-white with hints of champagne near the borders. Splendidly luminous surfaces. PCGS lists 19 finer representatives (2/16). NGC ID# BYF4, PCGS# 9229

4632 1935-D Arkansas MS67 PCGS. Dapples of reddish-gold and olive-green race over the lustrous surfaces of this Superb Gem commemorative. Boldly struck, carefully preserved, and all-around delightful. Population: 54 in 67 (7 in 67+), 1 finer (2/16). NGC ID# BYF6, PCGS# 9234

4633 1936 Arkansas MS67 PCGS. CAC. This spectacular Superb Gem is one of the finest survivors from a small distribution of 9,660 pieces. The design elements are well-detailed and the impeccably preserved surfaces display satiny mint luster throughout. Population: 16 in 67 (2 in 67+), 0 finer (1/16). NGC ID# BYHX, PCGS# 9237

4634 1939 Arkansas MS66 PCGS. An essentially brilliant example with satiny luster and unabraded surfaces. This sharp Premium Gem 1939 Arkansas half dollar is scarce at this grade level and is second to a paltry few finer pieces. Population: 62 in 66 (13 in 66+), 2 finer (1/16). NGC ID# BYFJ, PCGS# 9249

4635 1939-S Arkansas MS66+ PCGS. Frosty surfaces are untuned and highly appealing, showing an excellent strike and virtually impeccable preservation. The 1939-S Arkansas saw a net distribution of 2,105 pieces in sets in the fifth year of the 1935-39 run of this design — by which point collectors had completely lost interest. Population: 8 in 66+, 14 finer (1/16). NGC ID# BYFL, PCGS# 9251

4636 1936-S Bay Bridge MS67 PCGS. CAC. Satiny-silver centers radiate intense luster while deep iridescent toning occupies the borders of this Superb Gem half. Celebrating the opening of the San Francisco-Oakland Bay Bridge, this example shows few imperfections with great eye appeal. CAC-endorsed, with just 10 pieces certified numerically finer by PCGS (1/16). NGC ID# BYFM, PCGS# 9254

4637 1936-S Bay Bridge MS67 PCGS. CAC. Wispy champagne toning appears over part of the obverse and reverse of this highly lustrous Superb Gem. Both sides are frosty and sharply detailed. PCGS has only certified 11 finer examples (2/16). NGC ID# BYFM, PCGS# 9254

4638 1935/34-D Boone MS67 PCGS. CAC. A remarkable CAC-endorsed Superb Gem with untouched, satiny surfaces and bold design elements. Champagne-gray and lavender-gold hues encompass much of each side, but vivid orange-gold and amber toning is seen around the reverse periphery. Population: 63 in 67 (2 in 67+), 9 finer (1/16). NGC ID# BYFU, PCGS# 9263

4639 1937 Boone MS67+ PCGS. CAC. Often seen without color, the Boone commemorative takes on an added dimension with vibrant toning to embellish the satiny, pewterlike patina displayed by most coins. Vibrant orange shades merge into pleasant iridescence on this high end Superb Gem. Russet-brown hues grace the reverse. The strike is first-rate throughout. Population: 14 in 67+, 3 finer (1/16). NGC ID# BYG3, PCGS# 9270

4640 1937-D Boone MS67+ PCGS. Iridescent fire-red and jade-green toning adorns the borders of this otherwise cream-gray half dollar. Fully struck and satiny. Contact is limited to the field near the M in UNUM. The obverse legends are die doubled, most noticeably on DOLLAR and AMERICA. Population: 52 in 67 (4 in 67+), 4 finer (2/16). NGC ID# BYG4, PCGS# 9271

4641 1937-S Boone MS67 PCGS. CAC. Iridescent hues accent the sun-gold surfaces of this Superb Gem 1937-S Boone half dollar, delivering warm eye appeal and accentuating the bold design elements. CAC-approved with excellent surfaces for the grade. Extremely rare any finer. Population: 43 in 67 (4 in 67+), 2 finer (1/16). NGC ID# BYG5, PCGS# 9272

4642 1925-S California MS67 PCGS. Shades of violet and greenish-gold toning enhance the impeccably preserved surfaces of this magnificent Superb Gem, with sharply detailed design elements and vibrant mint luster throughout. PCGS has graded six numerically finer examples (1/16). NGC ID# BYGA, PCGS# 9281

4643 1925-S California MS67 PCGS. CAC. Two immediately recognized symbols of California are seen on this commemorative half dollar. The obverse depicts a “Forty-Niner” panning for gold while the reverse depicts a grizzly bear. Few surviving examples are finer than this Superb Gem. It has brilliant silver surfaces with frosty luster and attractive peripheral gold toning. PCGS has designated six examples in a higher numeric grade (1/16). Ex: ANA Signature (Heritage, 3/2011), lot 4247. NGC ID# BYGA, PCGS# 9281

1936-D Cincinnati Half, MS67 Smooth, Lustrous Example

4644 1936-D Cincinnati MS67 PCGS. CAC. This highly lustrous piece offers smooth, virtually unblemished surfaces. Each side has light gray patina with subtle accents of rose and emerald-green iridescence around the margins. Scarce as such because of the large, open surfaces of the coin's design. Population: 48 in 67 (6 in 67+), 2 finer (1/16).

Ex: FUN Signature (Heritage, 1/2003), lot 9603; New York Signature (Heritage, 11/2003), lot 9062; Long Beach Signature (Heritage, 2/2008), lot 931. NGC ID# BYCK, PCGS# 9284

4645 1936 Cleveland MS67 PCGS. CAC. Attractive toning appears on both sides of this Superb Gem example, primarily at the outer edges. The colors include gold, orange, red, and green. Lustrous surfaces add to the appeal of this piece. Population: 80 in 67 (10 in 67+), 1 finer (1/16). NGC ID# BYGB, PCGS# 9288

4646 1892 Columbian MS66+ PCGS. CAC. Waves of pale green, ocean-blue, and peach toning collapse on the central devices of this high-grade first-year Columbian half. Only a few wispy abrasions preclude an even finer grade. PCGS has graded 35 finer examples (1/16). NGC ID# BYGF, PCGS# 9296

4647 1893 Columbian MS66+ PCGS. CAC. Even a quick glance at each side of this high-end Premium Gem reveals what a lovely piece this is. The obverse center remains brilliant while attractive toning appears at the outer edges. The colors include golden-brown, rose-pink, violet, blue-green, and electric-blue. The reverse is largely untuned other than at the extreme periphery. Minimal abrasions are present. PCGS lists only 24 examples finer (1/16). NGC ID# BYGG, PCGS# 9297

1936 Gettysburg Half Dollar, MS67 Extremely Rare Any Finer

4648 1936 Gettysburg MS67 PCGS. CAC. The turning point of the Civil War, the Battle of Gettysburg, is remembered in the designs of this popular classic commemorative. The issue had a moderate distribution of 26,928 coins, but Superb Gem survivors are scarce. This piece is boldly struck and well-preserved. Champagne-gray luster reveals hints of amber, olive, and lavender around the borders. There are two MS68 coins finer at PCGS (1/16). NGC ID# BYGM, PCGS# 9305

**1922 Grant Memorial Half, MS67
CAC-Approved No Star Registry Coin**

4649 1922 Grant No Star MS67 PCGS. CAC. Among the finest No Star Grant halves at PCGS, this Superb Gem is beautifully preserved with iridescent luster that shows small olive-gold accents on the reverse. One of only 17 No Star Superb Gems with a CAC green label. The strike is bold, and the corresponding eye appeal is exceptional. Population: 52 in 67 (3 in 67+), 0 finer (1/16). NGC ID# BYGP, PCGS# 9306

4650 1928 Hawaiian — Cleaning — PCGS Genuine. Unc Details. Boldly struck with minimal abrasions and a vibrant cartwheel effect. This affordable Hawaiian half dollar displays bright, silver-white surfaces with faint hairlines detected beneath a loupe. From *The Jim Hilands Collection*. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half, MS65
Well-Struck With CAC Approval**

4651 1928 Hawaiian MS65 PCGS. CAC. One of the keys to the classic commemorative series, the Hawaiian Sesquicentennial half dollar had a limited distribution of 10,008 coins, including assay pieces. This Gem survivor displays a bold strike and excellent preservation — only a single small reed mark in left obverse field precludes a finer designation. Much of each side exhibits the usual greenish-gold toning. NGC ID# BYGR, PCGS# 9309

4652 1935 Hudson MS66 PCGS. CAC. A well-struck, satiny example of this Hudson, New York, Sesquicentennial half dollar. This piece is lightly toned in champagne and gold hues that deepen toward the rims. CAC-endorsed and with only 16 finer pieces at PCGS (1/16). NGC ID# BYGS, PCGS# 9312

**1946 Iowa Centennial Half, MS68
Incredible Quality and Eye Appeal**

4653 1946 Iowa MS68 PCGS. CAC. The Centennial of Iowa's statehood is commemorated on this little publicized commemorative half dollar. The present MS68 example is among the finest at PCGS and its CAC endorsement confirms what the viewer's eye sees: seemingly perfect preservation. The strike is sharp, and each side yields luminous satin luster. Lavender and ice-blue interiors transition to lemon-gold around the peripheries. Population: 82 in 68 (11 in 68+), 0 finer (1/16). NGC ID# BYGV, PCGS# 9316

4654 1918 Lincoln MS67 PCGS. CAC. Iridescent shades of lilac, lavender, and champagne-gold toning blanket the well-preserved surfaces of this sharply detailed Superb Gem. Vibrant mint luster adds to the tremendous eye appeal. PCGS has seen only two numerically finer submissions (1/16). NGC ID# BYGU, PCGS# 9320

4655 1936 Lynchburg MS67+ PCGS. CAC. Lynchburg, Virginia native son Senator Carter Glass appears on the obverse of this tastefully designed commemorative half. The former secretary of the Treasury would have appreciated the careful attention to detail by the Lynchburg Sesquicentennial Association, which authorized a 20,000-piece mintage (plus 13 pieces for assay) and sold them all. This softly lustrous Superb Gem displays rainbow iridescence from the borders into the central fields. There are no distracting marks to lessen the obvious appeal. None are finer at PCGS (1/16). NGC ID# BYDJ, PCGS# 9324

4656 1934 Maryland MS67 PCGS. CAC. This Superb Gem Maryland Tercentenary half dollar is among the finest at PCGS from a distribution of 25,015 pieces. The strike is bold, and the satiny surfaces display warm golden toning that deepens toward the borders. Population: 67 in 67 (5 in 67+), 0 finer (1/16). NGC ID# BYGZ, PCGS# 9328

4657 1921 Missouri 2x4 MS64 PCGS. CAC. The satiny surfaces of this Choice Uncirculated Missouri 2x4 half offer deep, blue-gray toning at the obverse border and faint golden-gray accents elsewhere. Sharply struck with no significant marks to mention, the coin displays pleasing, soft mint luster throughout. Housed in a green label holder with CAC endorsement. NGC ID# 2FE9, PCGS# 9331

4658 1921 Missouri 2x4 MS64+ PCGS. CAC. Both sides of this well-struck half dollar are frosty and fully lustrous with lovely golden-brown toning. CAC has approved 36 examples in MS65, and 53 in higher grades (2/16). NGC ID# 2FE9, PCGS# 9331

4659 1921 Missouri 2x4 MS65 PCGS. CAC. Bright silver luster shines through reddish-gray accents of this attractive Missouri 2x4 half dollar. An estimated total of 9,400 pieces were distributed with the 2x4 symbol, representing Missouri's admittance into the Union as the 24th state. The coin is sharply struck on the central motifs, which are often weak for the issue. Eye appeal is exceptional, confirmed by the CAC endorsement. NGC ID# 2FE9, PCGS# 9331

4660 1936 Norfolk MS68 PCGS. This remarkable Norfolk Bicentennial half dollar displays bold detail and luminous, satiny surfaces. A blush of iridescent toning is slightly deeper over the reverse. Housed in a green label holder. PCGS lists two MS69 coins finer (1/16). NGC ID# BYH5, PCGS# 9337

4661 1936 Norfolk MS68 PCGS. CAC. A sharply defined, technically superior Norfolk half, with dramatic bands of russet-red and coppery-gold color at the top and bottom obverse borders, matched by a thin band of color along the right reverse edge. Pearlescent silver centers gleam with mint luster between the toned accents. A Superb Gem, CAC-endorsed in a green label holder. Just two pieces are numerically finer at PCGS and one at NGC (2/16). NGC ID# BYH5, PCGS# 9337

4662 1933-D Oregon MS67 PCGS. CAC. This impressive Denver Mint issue was the only Oregon half dollar coined in 1933. The series had its starts and stops from 1926 through 1939. This piece has brilliant silver luster with frosty, untoned surfaces. PCGS has only certified two examples in higher grades (2/16). NGC ID# BYH9, PCGS# 9343

4663 1933-D Oregon, Tripled Die Obverse, FS-101, MS67+ PCGS. CAC. Plus-graded and CAC-endorsed, this Superb Gem 1933-D Oregon Trail half dollar displays a rare combination of almost flawless surfaces and rich old-time toning that surrounds the peripheries in olive-gold, amber, and violet hues and lightens to champagne-gray in the centers. The strike is bold. This available variety shows die tripling on most of the lower obverse legends. PCGS lists two finer representatives of the date (1/16). NGC ID# 39UD, PCGS# 145750 Base PCGS# 9343

4664 1936-S Oregon MS67+ PCGS. CAC. An impressive, razor-sharp type coin with satiny luster and superb surfaces. Both sides display iridescent champagne and lavender-blue toning. PCGS has seen only five finer representatives (2/16). NGC ID# BYHC, PCGS# 9346

4665 1937-D Oregon MS68 PCGS. CAC. A gorgeous example of this popular early silver commemorative type. Brick-red, green, and gold peripheral toning enhances the appearance on both sides. The surfaces are carefully preserved and seemingly pristine. A curious bit of strike weakness on the Indian's headdress, adjacent to the forehead and temple, is the only minor flaw that keeps this impressive Superb Gem from being perfect. Population: 54 in 68 (3 in 68+), 1 finer (1/16). NGC ID# BYHG, PCGS# 9347

4666 1938-S Oregon MS67+ PCGS. CAC. Glistening satin luster adorns the beautifully preserved, iridescently toned surfaces of this high-end Superb Gem 1938-S Oregon Trail half. The strike is fully rendered, even on the rearmost upright of the wagon. Eye appeal is superb. PCGS lists 14 finer representatives (1/16). NGC ID# BYHK, PCGS# 9350

4667 1939 Oregon MS67 PCGS. CAC. Impressively, this 1939 Oregon Trail half dollar is fully defined at the rear of the wagon and displays satiny luster with golden toning. A few small amber and iridescent overtones appear beneath a loupe. This CAC-approved Superb Gem is highly eye-appealing. PCGS lists five finer representatives (1/16). NGC ID# BYHL, PCGS# 9352

4668 1939-S Oregon MS67+ PCGS. CAC. Near-identical crescents of richly iridescent, rainbow toning appear on the right-hand border of both the obverse and the reverse. The balance of the coin displays delightful, pearlescent silver-gray patina. A high-end Superb Gem example of this popular issue — pinpoint-sharp — with just 3,005 pieces distributed. PCGS records only eight finer representatives (1/16). NGC ID# BYHN, PCGS# 9354

4669 1915-S/S Panama-Pacific, FS-502, MS65+ NGC. Rose-gold color enlivens the well-preserved surfaces of this Gem Panama-Pacific half, one of the keys to the 50-piece "design set" and usually seen in lower grades, even when certified. The obverse is one of Charles E. Barber's more admirable designs. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

1915-S/S Panama-Pacific Half, MS66 Original Toning

4670 1915-S/S Panama-Pacific, FS-502, MS66 PCGS. CAC. Unlike other legislation, the Congressional Act dated January 16, 1915, specified that the Panama-Pacific coinage was to be struck at the San Francisco Mint. Most commemorative coinage bills specified the "Mints" of the United States. This Premium Gem is a remarkable example of the S-Mint Panama-Pacific coinage with frosty silver luster and pleasing peripheral greenish-gold toning. Some strike weakness is typical. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

4671 1921 Pilgrim MS66+ PCGS. Sharply struck, brilliant, and lustrous. An exemplary example of the scarcer Pilgrim issue. The obverse field displays myriad die polish lines from a Mint attempt to remove clash marks. NGC ID# BYHS, PCGS# 9360

4672 1937 Roanoke MS66 Prooflike NGC. CAC. A scarce Prooflike Roanoke half dollar and a major condition rarity as such in the Premium Gem grade. This CAC-endorsed coin displays bold design elements and distinct mirroring in the fields. Both sides are untoned and unabraded. Census: 11 in 66 Prooflike, 2 finer (1/16). NGC ID# BYHW, PCGS# 89367

4673 1935-S San Diego MS67 PCGS. CAC. Minerva is flanked by a grizzly bear on the right and a shield proclaiming "Eureka" on the left, while the reverse shows the Chapel of St. Francis and the California Tower at the California Pacific International Exposition in San Diego. Well-produced with frosty surfaces, the margins show iridescent rainbow colors and plentiful silver luster. Only a few tiny ticks appear on the sharply struck central devices. PCGS lists just five numerically finer coins (1/16). NGC ID# BYHY, PCGS# 9371

4674 1935 Spanish Trail MS67 PCGS. CAC. Whispers of reddish-brown toning are occasionally seen around the borders of this Superb Gem. Both sides display intense luster and sharply struck design elements, and each is impeccably preserved. These attributes add up to pleasing eye appeal, affirmed by the CAC label. There are two finer coins at PCGS (1/16). NGC ID# BYJ5, PCGS# 9376

1937-S Texas Half, MS68 Condition Rarity With Spectacular Patina

4675 1937-S Texas MS68 NGC. Although many of the various 1934-38 Texas commemorative issues are available (to the extent of a few dozen pieces each) in MS67 at both NGC and PCGS, the MS68 level is the line of demarcation where each issue becomes a true condition rarity. This 1937-S in MS68 NGC is a case in point, one of only seven submissions in this top grade (1/16). Spectacular patina complements excellently preserved surfaces displaying lilac, burgundy, and sunset-orange patina amid some untoned silver areas remaining. The strike is sharp throughout. The last example in this exact grade that we handled was lot 2624 in our St. Louis Central States Signature (Heritage, 5/2007), which brought \$4,313 — nearly nine years ago. NGC ID# BYJK, PCGS# 9392

4676 1925 Vancouver MS67 PCGS. CAC. The original toning encompasses emerald and gold hues on the obverse with silver brilliance in the center. The reverse is a more-demure copper-gold around the margin, and ample luster runs over both sides of this well-preserved piece. Population: 61 in 67 (8 in 67+), 1 finer (2/16). NGC ID# BYJP, PCGS# 9399

4677 1925 Vancouver, Doubled Die Obverse, FS-102 MS65 PCGS. CAC. A well-known *Cherry-pickers'* variety, showing light die doubling on the date and WE TRUST. This Gem Vancouver half dollar is CAC-endorsed with satiny luster that shows a light golden hue. The strike is bold, and eye appeal is pleasing. PCGS# 145749 Base PCGS# 9399

4678 1927 Vermont MS66+ PCGS. Plentiful through MS66, the 1927 Vermont Sesquicentennial half dollar is scarce any finer. This Plus-designated Premium Gem displays bold design elements and satiny luster with olive-gold toning the deepens toward the right-hand borders. A few trivial ticks are not out of line for the grade. PCGS lists 43 finer representatives (1/16). NGC ID# BYJR, PCGS# 9401

4679 1927 Vermont MS66+ PCGS. CAC. CAC-endorsed Premium Gem examples of this one-year classic commemorative are scarce, and this Plus-designated piece possesses near-MS67 quality. The strike is bold, and the satiny surfaces are cast in light golden toning. PCGS lists 43 Superb Gems finer; CAC has endorsed only 12 finer coins from both services (1/16). NGC ID# BYJR, PCGS# 9401

4680 1950 Booker T. Washington MS67 PCGS. This frosted Superb Gem is tied for the finest certified of this small net distribution of 6,000 pieces. A trace of rim color accentuates the strong eye appeal. Note how clean the face of Booker T. Washington is, showing none of the abrasions usually seen even on Mint State coins. The reverse is similarly nice. Conditional rarities such as this piece are terribly underrated in today's market, but the new leadership at the *Coin Dealer Newsletter* aka Greysheet may help to perk up this market. Population: 19 in 67, 0 finer (1/16). NGC ID# BYK6, PCGS# 9420

1950-S Booker T. Washington Half, MS67 Prooflike Brilliant, Mirrored Surfaces

4681 1950-S Booker T. Washington MS67 Prooflike NGC. This sensational Superb Gem survives from a mintage of 62,091 coins. However, few of those can match the quality of this piece. Sharply struck with brilliant, untuned silver surfaces, this example is fully mirrored on the obverse and reverse. Although NGC has certified 75 examples in MS67 and two in MS68, this is the only MS67 prooflike piece they have certified, the finest graded with prooflike surfaces (2/16). NGC ID# BYK8, PCGS# 89422

4682 1952 Washington-Carver MS67 PCGS. CAC. The 1952 Washington-Carver half dollar saw the largest distribution by far of the various series issues, meaning the largest number remaining after unsold examples were melted. The net number disbursed was slightly more than 1.1 million pieces. Nonetheless, the issue has attained conditional rarity status in Superb Gem condition. This piece displays great eye appeal over pristine surfaces that are mostly pinkish with accents of jade and blue. A high-end example with the CAC endorsement, to boot. Population: 23 in 67 (3 in 67+), 1 finer (2/16). NGC ID# BYL3, PCGS# 9434

4683 1952 Washington-Carver MS67 PCGS. CAC. The 1952 Washington-Carver half dollar had the highest distribution of the series, estimated at more 1.1 million coins, ideal for type representation. This Superb Gem representative is among the finer-known survivors, which are conditionally rare at this lofty grade level. Radiant luster illuminates mottled lilac-gray, olive, and champagne toning, while the design elements are sharply struck, and the preservation is excellent. Population: 23 in 67 (3 in 67+), 1 finer (1/16). NGC ID# BYL3, PCGS# 9434

1936 Wisconsin Half Dollar, MS68 Extraordinary Quality

4684 1936 Wisconsin MS68 PCGS. CAC. The 1936 Wisconsin commemorative half is readily available through the Premium Gem level of preservation. The certified population decreases in MS67, but examples can still be located in that grade. The supply of this issue in the lofty grade of MS68, however, is severely limited. The highly lustrous surfaces of the present specimen are virtually perfect, and the sharply struck design elements serve to enhance the coin's overall eye appeal. Population: 34 in 68 (5 in 68+), 0 finer (1/16). NGC ID# BYKU, PCGS# 9447

COMMEMORATIVE GOLD

1903 Louisiana Purchase Gold Dollar Jefferson Head Obverse, MS67

4685 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. This satiny Superb Gem is seemingly flawless in regards to its surfaces, and when tilted beneath a light, the lemon-gold luster emits a lovely glow. The strike is bold. The 1903 Louisiana Purchase, Jefferson Head gold dollar is conditionally scarce in MS67, and finer pieces are unknown at PCGS (1/16). NGC ID# BYLD, PCGS# 7443

4686 1904 Lewis and Clark Gold Dollar MS64 PCGS. CAC. An attractive Choice specimen of this popular two-headed gold commemorative, with sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. NGC ID# BYLF, PCGS# 7447

4687 1905 Lewis and Clark Gold Dollar MS62 PCGS. Faint traces of pale blue toning appear on the satin surfaces of this lustrous Mint State commemorative gold dollar. Trivial hairlines are evident on both sides. NGC ID# BYLG, PCGS# 7448

4688 1915-S Panama-Pacific Gold Dollar MS66 PCGS. This glistening Panama-Pacific gold dollar is sharply struck with rich honey-gold luster. There are no detracting abrasions — only a few faint lines on the highest points of the design limit the grade. Finer coins are scarce. The Pan-Pac gold dollar had a distribution of 15,000 pieces and is the most plentiful of the gold issues in the Pan-Pac set. NGC ID# BYLH, PCGS# 7449

4689 1926 Sesquicentennial Quarter Eagle MS65 PCGS. The 1926 Sesquicentennial quarter eagle was the last gold commemorative authorized before President Roosevelt's executive order in 1933 that ceased gold coin production for the public. Pieces grading finer than this Gem are elusive. This coin displays well-struck motifs and frosty yellow-gold luster. A couple of tiny ticks on Liberty's hip are the only marks of note. NGC ID# 2FE9, PCGS# 7466

4690 1926 Sesquicentennial Quarter Eagle MS65 PCGS. CAC. Well-struck and frosty with glistening straw-gold surfaces. This Gem Sesquicentennial quarter eagle is highly eye-appealing, showing only a few tiny ticks on Liberty's figure that limit the grade. Infrequently available finer. NGC ID# 2FE9, PCGS# 7466

1926 Sesquicentennial Quarter Eagle, MS66 Outstanding Preservation and Eye Appeal

4691 1926 Sesquicentennial Quarter Eagle MS66 PCGS. The Sesquicentennial quarter eagle is infrequently seen at the Premium Gem level, and PCGS has not certified any finer examples (2/16). The present coin is well-struck and awash in frosty luster — peach and rose hues prevail in the centers, while the peripheries have less vivid mint-gold accents. Pleasantly free of abrasions. Housed in a green label holder. NGC ID# 2FE9, PCGS# 7466

TERRITORIAL GOLD

1861 Clark, Gruber Copper Dies Trial K-12c, VF Details

4692 1861 Clark, Gruber \$20 Copper Die Trial — Tooled — PCGS Genuine. VF Details. K-12c, R.6. This interesting dies trial was struck from the same dies used to strike the adopted K-8 1861 Clark, Gruber twenties. However, we note that unlike the adopted design, this copper striking lacks the recut V over N in DENVER, recutting on the date and a recut N in TWENTY. A crude attempt was made to efface die voids in the left obverse field by pinscratching. Otherwise, the surfaces are chocolate-brown (milk chocolate) with deeper accents surrounding the devices. NGC ID# ANM5, PCGS# 10153

S.S.C.A. RELIC GOLD MEDAL

2008 'Humbert Commemorative' Slug Pure Gold, Gem Proof Ultra Cameo

4693 2008 "Humbert Commemorative" Gem Proof Ultra Cameo NGC. A 2.5 ounce pure gold issue struck with "CALIFORNIA GOLD." The design and octagonal shape are modeled after the Humbert "slugs" of the Gold Rush period. The lower obverse shows the date "1852," while the reverse is inscribed: 2008. Watery depth in the mirrored fields delivers outstanding golden contrast against the sharp, frosty design elements. There are no bothersome marks.

CALIFORNIA FRACTIONAL GOLD

1872/1 Indian Octagonal Quarter BG-790, MS67 Prooflike

4694 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS67 Prooflike NGC. A beautiful lemon-gold Superb Gem that boasts mirrored fields and mark-free surfaces. A tiny strike-through (as made) is left of the fraction bar. The usual die state with double clash marks near the profile and a vertical crack through the left-side stars. Census: 2 in 67 Prooflike, 0 finer (2/16). NGC ID# 2BRA, PCGS# 710617

1872 Washington Head Round Quarter, BG-818, MS64

4695 1872 Washington Round 25 Cents, BG-818, Baker-A504, Low R.4, MS64 PCGS. A scarce Period Two round quarter dollar by Frontier & Bellemere, showing a Washington Head on the obverse instead of the usual Liberty portrait. This Choice example displays green-gold luster with peach and lilac accents. The wreath is well-defined, but the central areas are weak. Population: 33 in 64, 30 finer (2/16). NGC ID# 2BT9, PCGS# 10679

4696 1875 Indian Round 25 Cents, BG-878, R.3, MS66 Deep Mirror Prooflike NGC. A gorgeous example, this diminutive gold piece has brilliant yellow surfaces with deeply mirrored fields and extraordinary Cameo contrast. Few can equal the quality presented here. Census: 2 in 66 Deep Mirror Prooflike, 3 finer (2/16). NGC ID# 2BVD, PCGS# 910739 Base PCGS# 10739

4697 1871 Liberty Round 50 Cents, BG-1043, Low R.7, AU55 PCGS. Minor verdigris appears around the devices of this Choice AU fractional gold half dollar. A small mark is evident in the right obverse field. This scarce variety is difficult to find in any grade, and the present example will make a nice hole filler. NGC ID# 2BZS, PCGS# 10872

4698 1876 Indian Round 50 Cents, BG-1065, R.5, MS66 Deep Mirror Prooflike NGC. An orange-gold Premium Gem with prominently reflective fields. The strike is sharp except for minor weakness on the central reverse letters, placed opposite the Indian's bust. Another variety from industrious San Francisco jeweler Christopher Mohrig. Census: 5 in 66 Deep Mirror Prooflike, 0 finer (2/16). NGC ID# 2C2G, PCGS# 910894

4699 1870 Liberty Octagonal 1 Dollar, BG-1108, R.7, AU53 PCGS. Both sides of this important variety have distinct green-gold luster with prooflike fields and excellent eye appeal. NGC ID# 2C37, PCGS# 10919

4700 1876/5 Indian Octagonal 1 Dollar, BG-1128, R.5, MS62 NGC. The caramel-gold surfaces show a few ticks and scrapes, chiefly one thin scrape through the Indian's neck and lower hair and feathers. The strike is typical for this issue, not really an overdate but a 5 in the date crudely altered to a 6. Census: 3 in 62, 1 finer (1/16). NGC ID# 2C3W, PCGS# 10939

**Round 1870 Liberty Gold Dollar
BG-1202, Borderline Uncirculated**

4701 1870 Liberty Round 1 Dollar, BG-1202, High R.5, AU58 PCGS. A momentarily circulated apricot-gold representative of the scarce and popular round Liberty gold dollar type. Minute flan flecks are scattered but no marks are present. An unlisted late die state with obverse clash marks and a lapped reverse. The letters ORN in CALIFORNIA are partially effaced, as made. The G initial, found below the bust, stands for Robert B. Gray, a prolific issuer of Period Two varieties. NGC ID# 2C3Z, PCGS# 10947

4702 1870 Liberty Round 1 Dollar, BG-1203, Low R.5, AU58 PCGS. Traces of rub appear on the high points of this still lustrous California gold dollar with prooflike fields and trivial hairlines. Population: 7 in 58, 23 finer (2/16). NGC ID# 2C42, PCGS# 10948

PATTERNS

**1870 Standard Silver Half in Silver
Judd-951, PR64+ Cameo**

4703 1870 Standard Silver Half Dollar, Judd-951, Pollock-1094, R.5, PR64+ Cameo PCGS. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in silver with a reeded edge. Each side is brilliant and the fields are remarkably deep in reflectivity, yielding a strong cameo contrast against the thickly frosted devices. PCGS# 861197 Base PCGS# 61197

1879 Metric Dollar in Silver or Goloid, Judd-1617, PR55

4704 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR55 PCGS. William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls, similar in design to the half union patterns from 1877. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. Slight rub over the high points explain the AU55 designation. Mostly a "black and white" piece with the recesses charcoal gray and the open areas such as Liberty's cheek and the fields untuned. NGC ID# 2AH8, PCGS# 61995

End of Session Two

SESSION THREE

COLONIALS

1662 Oak Tree Twopence, MS61
Small 2, Noe-31, Ex: Reed Hawn, Partrick

4705 1662 Oak Tree Twopence, Small 2, MS61 NGC. CAC. Noe-31, W-240, Salmon 1-A, High R.6. 8.7 grains. Ex: Stack's, Donald G. Partrick Collection. A lovely chocolate-brown example. Wavy, as struck from a rocker press, with an incomplete strike near 3 o'clock on the obverse and opposite near 9 o'clock on the reverse. The obverse is misaligned toward 7 o'clock with a couple of letters partly off the flan, but the reverse has ideal centering. This final subvariety of Salmon 1-A is identified by die breaks from the 2 in the date. Ex: Reed Hawn Collection of Massachusetts Silver (*Stack's*, 5/1998), lot 20; Donald Groves Partrick (*Heritage*, 1/2015), lot 5558. NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

1652 Noe-4.5 Pine Tree Shilling, MS63
High Condition Census
The Roper-Hain-Partrick Example

4706 1652 Pine Tree Shilling, Large Planchet MS63 NGC. Noe-4.5, W-720, Salmon 4-D, R.4. 73.0 grains. Ex: Hain/Donald G. Partrick Collection. The top edge is nicely rounded from 10:30 to 1:30, while the other three sides are straight, the result of mint clipping. The 73.0-grain weight, one grain over the Massachusetts shilling weight standard, proves that this piece was clipped inside the Boston Mint, rather than outside the mint at a later date. The production method for the Massachusetts silver coinage, struck in strips using a rocker press, and then cut out with heavy shears, resulted in many oddly shaped pieces that look like they were clipped later by individuals trying to accumulate a small quantity of silver at the expense of others. However, the weight of the piece in question will always differentiate between the later clipped pieces, and those that were poorly shaped within the Mint. The former are undesirable, while the latter, such as this lovely Mint State piece, are charming.

The strike is exceptional except at the top of the reverse, where the rocker-press stretched the planchet and obscured the letters. This piece is the third finest known to us. Exceptional gray patina rests on fully lustrous surfaces with delicate gold and sky-blue overtones. Ex: John L. Roper, 2nd (*Stack's*, 12/1983), lot 29; *Stack's* (1/1992), lot 12; Hain Family Collection (*Stack's*, 1/2002), lot 102; Jon Hanson (1/15/2002); Donald Groves Partrick; FUN Signature (*Heritage*, 1/2015), lot 5574. NGC ID# BFMC, PCGS# 23

1722 Hibernia Pattern Halfpenny, AU58+
Rocks Right of Hibernia, W-12650

4707 1722 Hibernia Pattern Halfpenny, Rocks AU58+ PCGS. CAC. M. 1.1-A.1, W-12650, R.7. Miller 1.1-A.1 is the sole die marriage in the Hibernia series with rocks to the right of Hibernia. Given its rarity and unique design, the Rocks at Right variety is regarded as a pattern for the series, even though most survivors grade VF to XF. Ford VII:19 is the sole confirmed Uncirculated example, but the present piece comes close. Hibernia's knees and the harp statue show minor high-point blending. Traces of mint red linger in protected areas, and the mahogany-brown surfaces are minimally abraded. The king's cheek has a few small spots, and a loupe reveals occasional minor retained laminations, as made. Listed on page 44 of the 2016 *Guide Book*.

Ex: ANA Signature (Heritage, 8/2015), lot 3905. NGC ID# 2AT9, PCGS# 164

1788 Connecticut Double Strike, MS62 Brown
Draped Bust Left, Miller 16.4-L.2
Remarkable Double Strike With Brockage

4708 1788 Connecticut Copper, Draped Bust Left MS62 Brown NGC. M. 16.4-L.2, W-4620, High R.5. Ex: Eric P. Newman Collection. 92.6 grains. The cataloger's first response upon seeing this coin was to shake his head in amazement. The obverse shows two complete profiles, side-by-side. The right portion of the reverse design appears to the left, and right of that is an elliptical indented area that retains traces of incuse letters representing a brockage image. Eric P. Newman explains:

"Two blanks were in the coining press. The top one received the obverse and had a blank reverse. The bottom one conversely had a blank obverse and a struck reverse. The operator tried to remove both coins but got the lower one out and the upper one partly out from the die area. When the dies came together the top coin was partly restruck and the impression of the blank top of the lower coin was pressed into the upper coin."

Both sides exhibit lovely olive-brown surfaces with wispy blue overtones that accompany considerable original orange mint color. The two V-shaped areas on each side remain untouched by the dies, and clearly show the original planchet marks, illustrative of the planchet appearance before the Connecticut coppers were struck. Careful study of those areas will help the student to understand the difference between original planchet marks and later, or post-production imperfections.

The present specimen, a remarkable double strike with a brockage indent, is also the finest survivor that we have seen from the 16.4-L.2 dies. It is finer than the granular AU 1975 Pine Tree-EAC coin. It is clearly better than the XF Perkins coin, and far finer than those in Taylor, Norweb, or Ford. We have no hesitation in stating that this is the finest existing 1788 Miller 16.4-L.2 copper. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part IV (Heritage, 5/2014), lot 30170. NGC ID# 2B3D, PCGS# 409

1783 Chalmers Sixpence, Fine 15
W-1770, Large Date
Rare Chalmers Denomination
Ex: Picker-Partrick

4709 1783 Chalmers Sixpence, Large Date, Fine 15 NGC. CAC. Breen-1014, W-1770, R.6. Ex: Picker, Donald G. Partrick Collection. 25.3 grains. The Chalmers sixpence is much rarer than either the Short or Long Worm Chalmers shillings. There are three die marriages of Chalmers sixpence, and their attribution has long been murky. For example, W-1770 is known as the Period after Large variety, but the other Large Date variety, W-1765, also has a period after the date, and similar observations can be made regarding the period between the date. The base of the PE in PENCE is a better way to distinguish the two varieties. The smaller 8 identifies W-1775. W-1780 refers to Breen-1017, which denotes and plates only the ANS example, actually an example of W-1770. Thus, W-1780 is a duplicate listing of W-1770 that should be deleted.

The present piece shows a few pinscratches in the center obverse, and the reverse shows a single small, round indent in the center, but mostly just extensive wear appears on the medium-gray surfaces, with the usual off-center obverse and well-centered reverse strike. The NGC Census records only two Large Date sixpence examples (9/15).

Ex: Richard Picker (3/17/1971); Donald Groves Partrick Collection (Heritage, 1/2015), lot 5656. NGC ID# 2AUS, PCGS# 594

HALF CENTS

1793 Half Cent, VF30
C-1, First Half Cent Marriage

4710 1793 C-1, B-1, High R.3, VF30 PCGS. Cohen-1 is the first half cent variety struck and is also the scarcest variety of the year. A branch stem touches the U in UNITED, diagnostic for Cohen-1. This example provides medium lilac toning and lacks the granularity seen on most early half cents, although a pair of inconsequential spots are found near the obverse rim at 2 o'clock. HALF CENT is mostly worn, but all remaining legends are bold except for the final A in AMERICA. Each side has one or two faint thin marks unworthy of further comment. An important single-year type coin, since the bust faces right beginning in 1794. Our EAC grade Fine 12.
Ex: Gobrecht's Raisinet Collection (Heritage, 1/2008), lot 2653. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

1794 C-9 Half Cent, MS60 Brown, High Relief Head

- 4711 1794 High Relief Head, C-9, B-9, R.2, MS60 Brown PCGS.** Manley Die State 3.0, the terminal die state for this variety with a die crack through Liberty's cap and another through the tops of LIBERTY, and a reverse rim cud that covers several dentils at 6:30. The combination of die wear and a uneven strike yields considerable roughness as struck, with myriad original planchet marks evident on both sides. However, this outstanding piece retains cartwheel luster with splashes of original mint red on its olive-brown surfaces, and it is extremely rare as such. PCGS has only certified 31 Mint State 1794 half cents of all varieties (1/16). Our EAC grade AU55. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054

1795 C-6a Half Cent, XF45, No Pole, Thin Planchet

- 4712 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6a, R.2, XF45 PCGS.** Manley Die State 1.0. Cohen-6 is known on both thin and thick planchets, as well as on a cut-down Talbot, Allum & Lee token. This C-6a example is on a thin federal planchet. The obverse strike is slightly off-center toward 9 o'clock, but complete dentils surround the periphery. The design elements are evenly and boldly rendered. This piece is relatively smooth with varying olive-brown color, although a few trivial marks are seen around the TES in STATES. Our EAC grade VF25.
From The Jim Hilands Collection. NGC ID# 2225, PCGS# 35089 Base PCGS# 1018

1796 C-2, B-2 Half Cent
With Pole Obverse

- 4713 1796 With Pole, C-2, B-2, High R.4 — PCGS Genuine.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the coin has the details of a Good 04 specimen that has been corroded and scratched.

Two varieties of the 1796 half cent are known (With Pole and No Pole), with the Cohen-2 With Pole variant somewhat more available, yet scarce. The present example is deeply toned and granular with a mild but noticeable reverse scratch. The obverse shows nice definition but the reverse is weak and lacks most of its central details. Deep-brown color blankets both sides. Just 1,390 pieces were struck, and despite not having a numerical grade from PCGS this is an important opportunity to acquire the date and type. Our EAC grade AG3.

LARGE CENTS

1793 S-1, B-1 AMERI. Cent, Fine 12, Early Die State

4714 1793 Chain, AMERI., S-1, B-1, R.4, Fine 12 PCGS. The 1793 date and the other raised motifs show relatively sharp detail for the grade — a well-circulated example of the Sheldon-1 AMERI. variety, generally recognized as America's first large cent. Attractive medium-brown color covers both sides, interrupted by areas of corrosion and deep charcoal-gray build-up particularly on the reverse. Surface granularity and pitting as well as some light lines and marks are noted on both sides.

The Chain is sharply defined on the reverse, although the denomination and fraction are weak in places. The legend is complete, with a bulge above the U in UNITED where displaced metal resembles a cud. Certainly an acceptable and pleasing Chain cent, always the subject of intense collector demand. Our EAC grade Good 5. NGC ID# 223G, PCGS# 35432 Base PCGS# 1340

1793 Wreath Cent, S-11c, B-16c, Fine 15
Lettered Edge

4715 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3, Fine 15 PCGS. Although we are attributing this piece as S-11c, it could just as easily be S-11b, depending on the edge type that is presently covered by the green-label PCGS holder. An attractive olive-brown cent, this piece has hints of tan and blue. Both sides have slight surface granularity that fails to diminish the excellent eye appeal. Our EAC grade VG10. NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

1794 S-22 Cent, AU53
Well-Centered Head of 1794

4716 1794 Head of 1794, S-22, B-6, R.1, AU53 PCGS. Breen Die State V. Boldly detailed with a well-centered, even strike that produces complete dentils around each side. The central devices are sharp and show little wear. The reverse exhibits scattered, microscopic pits in the margins, but the chocolate-brown surfaces are otherwise problem-free. Clash marks and metal flow lines in the fields are consistent with the die state. Our EAC grade VF30. From *The Jim Hilands Collection*. NGC ID# 223P, PCGS# 35531 Base PCGS# 901374

**1794 Large Cent, MS62 Brown
Head of 1794, S-31**

- 4717 1794 Head of 1794, S-31, B-13, R.1, MS62 Brown PCGS.** Breen Die State II. The Obverse 10 die was heavily reworked to remove clash marks and a flaw on Liberty's neck. The vertical chip in the left obverse field is still prominent, making the die easily recognizable, and the Reverse G is easy to spot because of the extremely long fraction bar. The extensive reworking of the obverse die was unusual and may indicate a shortage of die steel at the time these coins were struck. Del Bland graded this example AU55, matching the sharpness grade assigned by Bill Noyes in 2013, with which we agree. We also concur with Noyes' net grade of AU50, and he evaluates the surfaces as average plus. The design elements are strongly impressed, but some hair detail is incomplete, due to the extensive die polishing. Hints of violet and blue-steel highlight the lightly marked brown surfaces.
Ex: Auction #22 (House of Davis McKinney, 1/1964), lot 220. NGC ID# 223P, PCGS# 35558 Base PCGS# 901374

**1794 S-48, B-38 Cent, AG Details
The Famous Starred Reverse**

- 4718 1794 Starred Reverse, S-48, B-38, R.5 — Environmental Damage — PCGS Genuine. AG Details.** This example is typical of most survivors from the Starred Reverse die pair, with sharp obverse details and weak reverse details. The obverse has Fine details, and the reverse has Fair details, with about one-third of the border still visible from 5 to 10 o'clock. This dark ebony-brown example has moderate corrosion on both sides. Certainly a suitable hole filler. Our EAC grade Fair 2. NGC ID# 223P, PCGS# 35705 Base PCGS# 1374

**1794 S-55 Cent, XF40
Head of 1794, Well Defined**

- 4719 1794 Head of 1794, S-55, B-47, R.2, XF40 PCGS.** Breen Die State II. A well-defined medium brown cent with generally pleasing surfaces. Tiny marks are scattered but none merit mention. Granularity is minor and mostly relegated to the margins. Among the more amateurishly engraved reverses from the early Philadelphia Mint. The E in ONE leans right, the A in STATES is entered high and tilted left, and the letters throughout are unevenly spaced. Our EAC grade VF25. NGC ID# 223P, PCGS# 35627 Base PCGS# 901374

1799/8 S-188, B-2 Cent, XF Details
Extremely Rare Terminal Die State

1803 S-258 Cent, MS63 Brown
Conditionally Scarce Draped Bust Type Coin

- 4720** 1799/8 S-188, B-2, R.4 — Environmental Damage — PCGS Genuine. XF Details. Breen Die State IV, the extremely rare terminal die state with heavy die cracks at the upper right obverse. When the Breen *Large Cent Encyclopedia* was published 15 years ago, there were only six known examples of this terminal die state. There were seven known when the Daniel W. Holmes Collection was sold in 2009. The finest of those is part of the ANS Collection and carries a grade of Fine 12 according to Del Bland. Three other late die state pieces carry a grade of 1. This piece, despite its greenish-ebony surfaces and moderate corrosion, has sharper design details than any other, and we place it in the second spot among the terminal survivors. Our EAC grade VG7. NGC ID# 2247, PCGS# 36131 Base PCGS# 1446

- 4721** 1803 Small Date, Large Fraction, S-258, B-17, R.1, MS63 Brown PCGS. Breen Die State IV. The arcing die crack from the 1 in the date to the rim at 9 o'clock is clear, while a loupe reveals clash marks on the reverse around ONE CENT — diagnostics of this late die state. The Small Date, Large Fraction subtype is moderately available, as evidenced by even this one variety being plentiful overall. Nonetheless, Mint State type coins are scarce. The present Select Brown example shows an even, well-centered strike with complete dentils around each side. The portrait is sharp, while the wreath leaves show typical softness. Softly lustrous fields show light chestnut-brown color without significant carbon spotting. There are no mentionable abrasions. Our EAC grade AU55. From *The Jim Hilands Collection*. NGC ID# 224G, PCGS# 36398 Base PCGS# 1485

1803 S-260, B-19 Cent, MS61 Brown
Small Date, Large Fraction

- 4722** 1803 Small Date, Large Fraction, S-260, B-19, R.1, MS61 Brown NGC. Breen Die State I, with a weak 3 in the date, and clash marks between the head and LIB. Both sides have subdued surfaces with intermingled golden-tan and dark olive-brown toning. An attractive example that is just outside the Condition Census, perhaps 10th finest. Our EAC grade AU50. From *The Adam Mervis Large Cent Collection* (Heritage, 1/2014), lot 2812. NGC ID# 224G, PCGS# 36404 Base PCGS# 1485

**1808 S-278 Cent, MS63 Brown
Lustrous First-Year Type Coin**

4723 1808 S-278, B-2, R.3, MS63 Brown PCGS. CAC. Breen Die State V, rim breaks below the date. Robert Scot's Draped Bust design was replaced in 1808 with the John Reich Classic Head motif. The metallic purity of the copper planchets also decreased, causing coins of this type to be struck with varying degrees of quality and subject to excessive impairment in circulation. Pleasing Mint State examples are extremely difficult to locate.

This Select Brown Sheldon-278 representative displays unusually appealing luster that glistens in the satiny fields. Die erosion around the peripheries is consistent with the die state, although the interior motifs remain well-defined. Burgundy-brown toning only partially masks the underlying coppery luster. Our EAC grade MS60. Population (all varieties included): 6 in 63 Brown, 11 finer (1/16). NGC ID# 224P, PCGS# 36460 Base PCGS# 1543

**1814 Plain 4 S-295 Cent, MS62 Brown
Extremely Late Die State**

4724 1814 Plain 4, S-295, B-2, R.1, MS62 Brown NGC. Breen Die State XIII-XIV (a holder tab covers the location of the differentiating rim break between these latest two die states). Both dies are severely deteriorated. The strike is nonetheless well-centered and sharp on the central devices. Both display problem-free, glossy surfaces with medium burgundy-brown luster. No bothersome abrasions are present. Our EAC grade MS60. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

**1823/2 Cent, N-1, AU50
Popular Guide Book Variety**

4725 1823/2 N-1, R.2, AU50 PCGS. Smooth chocolate-brown surfaces give this AU 1823/2 cent pleasing eye appeal, yielding occasional glimpses of luster in the protected regions. Trivial wear over the high points of the design elements defines the grade. A few small marks and scattered lines in the fields pose little distraction. Our EAC grade VF35. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630

**1829 Cent, Lustrous MS65 Brown
N-6, Large Letters**

4726 1829 Large Letters, N-6, R.1, MS65 Brown PCGS. CAC. Regardless of variety, Mint State 1829 large cents are scarce and are rare at the Gem level. This N-6 representative is boldly struck from unclashed dies, yielding silvery-blue luster over burgundy-brown surfaces. A few specks of carbon are hidden in the patina near the rims but are undetected by the naked eye. A couple of tiny marks on the cheek limit the grade but are truly trivial. Our EAC grade MS60. Population (all varieties included): 3 in 65 Brown, 2 finer (1/16). PCGS# 36919 Base PCGS# 1663

1846 Braided Hair Cent, MS65 Brown, Tall Date, N-14

- 4727** 1846 Tall Date, N-14, R.3, MS65 Brown PCGS. CAC. Grellman Die State a, with uncracked reverse. The mostly brown surfaces of this attractive Gem show traces of original red around the devices. The central design elements are sharply rendered, but some softness is evident on the stars. The 1 in the date shows repunching close above the base. Our EAC grade MS60. Population: 1 in 65 Brown, 0 finer (1/16). PCGS# 403892 Base PCGS# 1871

PROOF LARGE CENT

1857 Large Cent, PR65 Red and Brown
Small Date, N-5

- 4728** 1857 Small Date, N-5, R.5, PR65 Red and Brown PCGS. CAC. The obverse of this Gem proof exhibits considerable mellow orange mint color on its bluish-brown surfaces with fully mirrored fields. All small spot on Liberty's jaw will serve to identify this example. The reverse also exhibits full mirrors with rich blue toning on its chocolate brown surfaces. There are probably 40 surviving proofs from this die pair, and most of those pieces have little or no original mint color. This lovely piece presents a significant opportunity for the advanced collector. Our EAC grade PR62. PCGS# 400613 Base PCGS# 2000

PROOF FLYING EAGLE CENTS

1856 Snow-9 Flying Eagle Cent
Proof, AU Sharpness

- 4729** 1856 Snow-9 — Damage — PCGS Genuine. Proof, AU Details. A collectible example of the first and rarest small cent date. Snow-9 was struck in proof format for collector sale during the late 1850s. The reverse displays distributed small gray spots, and abrasions are noted on the upper left portion of the wreath. The wheat-gold obverse is faintly hairlined, and shows a pinscratch near the E in UNITED. Light wear on the eagle's breast corresponds with brief circulation. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

1856 Proof Flying Eagle Cent, Unc Details
Snow-9, Sharp Strike

- 4730** 1856 Snow-9 — Cleaned — ANACS. Unc Details, Net AU55. Although the old small-sized ANACS holder designates the present lot as a business strike, Snow-9 is currently widely regarded as a proof issue. This piece is fully struck and unworn, although light cleaning reduces ANACS' designation. The surfaces are uniformly amber-orange in color and show numerous planchet laminations (as made). For the collector seeking a sharp, affordable 1856 date representative, this Snow-9 coin possesses pleasing appeal. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

INDIAN CENTS

1859 Indian Cent, MS66
Possible First-Year Registry Set Contender

- 4731** 1859 MS66 PCGS. A delightful Premium Gem from the first year of the Indian cent design, the impeccably preserved coppered surfaces are lustrous and appealing. The well-detailed design elements show just a touch of the usual softness on the headdress feathers and wreath and eye appeal is outstanding. Population: 28 in 66 (2 in 66+), 0 finer (2/16). NGC ID# 227E, PCGS# 2052

**1877 Indian Cent, MS64 Red and Brown
Popular Low-Mintage Key**

- 4732 1877 MS64 Red and Brown PCGS. CAC.** The original red surfaces of this low-mintage key have mellowed to light brown and crimson in many areas, but only minor signs of contact are evident. The design elements are well-detailed and only a few microscopic specks of carbon can be detected. The 1877 is the most sought-after date in the Indian cent series. NGC ID# 2284, PCGS# 2128

PROOF INDIAN CENTS

**1869 Full Red Cent, PR66 Cameo
Deeply Mirrored, None Finer at PCGS**

- 4733 1869 PR66 Red Cameo PCGS.** Fire-red coloration over the deeply mirrored fields combines with frosted raised elements to provide the rare cameo contrast seldom seen on 1869 cents. The strike is pin-sharp on the central motifs, where nearly every feather vane and fletching on the headdress is fully defined. There are no contact marks to mention, and carbon is limited to a few microscopic specks. Population: 5 in 66 Cameo, 0 finer (2/16). NGC ID# 4ZW5, PCGS# 82296

**1877 Cent, PR65 Red and Brown
Bold Coloration**

- 4734 1877 PR65 Red and Brown NGC.** The proof 1877 Indian enjoys strong date collector demand due to the rarity in high grade of its circulation strike counterpart. This Gem Red and Brown proof displays bold design elements and deeply reflective fields. Vivid violet and crimson-orange toning encompasses each side, delivering unique eye appeal. Census: 69 in 65 Red and Brown, 19 finer (1/16). NGC ID# 229W, PCGS# 2319

LINCOLN CENTS

**1912-D Cent, MS66 Red
Top-Tier Registry Coin**

- 4735 1912-D MS66 Red PCGS.** Most Red 1912-D Lincoln cents reside in MS64 or MS65. This Premium Gem example is among the finest certified and conditionally rare as such. The design elements are boldly rendered, and the satiny copper-pink luster is devoid of abrasions. A few microscopic specks do not detract. Population: 20 in 66 (1 in 66+) Red, 0 finer (1/16). NGC ID# 22BB, PCGS# 2455

**1912-D Cent, MS66 Red
Uniformly Attractive Surfaces**

- 4736 1912-D MS66 Red PCGS.** This conditionally rare Premium Gem Red 1912-D cent ranks among the finest of the issue, essential for Registry purposes. This piece is sharply struck with exceptional surface preservation and mattelike luster. Both sides display rich copper-red color and are free of carbon spotting. Population: 20 in 66 (1 in 66+) Red, 0 finer (2/16). NGC ID# 22BB, PCGS# 2455

**1914-D Cent, MS65 Brown
Satiny Surfaces Show Hints of Red**

- 4737 1914-D MS65 Brown PCGS. CAC.** The key Denver issue in the Lincoln cent series, the 1914-D is seldom seen in Gem or finer condition. This Brown coin displays tinges of coppery-red luster in the peripheral recesses, while the bulk of the interior regions show lovely chestnut-brown and burgundy toning. The strike is bold, and the carbon-free surfaces are devoid of significant abrasions. Population: 13 in 65 Brown, 1 finer (1/16). NGC ID# 84BX, PCGS# 2471

**1914-D Lincoln Cent, MS66 Red
Tied for Finest at NGC**

4738 1914-D MS66 Red NGC. From a small mintage of 1.1 million pieces, the 1914-D Lincoln cent is one of the most sought-after issues of the series. It's rarity and importance was recognized in the 1930s, by which time most examples were well-worn and abraded. The 1914-D is actually much rarer in MS66 condition, with red surfaces, than the better-known 1909-S VDB, which was saved by contemporary collectors at the time of issue.

This remarkable Premium Gem is one of the finest survivors, with well-preserved original red surfaces that show only a few microscopic specks of carbon, not easily detected without a loupe. The design elements are sharply detailed and vibrant mint luster adds to the incredible eye appeal. Census: 5 in 66 Red, 0 finer (1/16). NGC ID# 22BH, PCGS# 2473

**1917 Lincoln Cent, MS64 Red and Brown
Doubled Die Obverse, FS-101**

4739 1917 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. The mostly red surfaces of this attractive Choice specimen have mellowed to light brown in a few areas and exhibit only minor signs of contact. Vibrant mint luster adds to the ample eye appeal. The obverse of this extremely popular *Cherrypickers* and *Guide Book* variety shows strong doubling on the date and motto. Population for the variety: 7 in 64 Red and Brown, 3 finer (1/16). PCGS# 37674 Base PCGS# 92496

**1926-S Cent, MS64 Red
Exceptional Eye Appeal**

4740 1926-S MS64 Red PCGS. Advanced Lincoln cent collectors soon learn that the 1926-S is a key date in full Red, much rarer as such than the lower mintage 1909-S VDB, 1914-D, and 1931-S. Since PCGS has certified a mere two pieces as MS65 Red with none finer, the MS64 Red grade is the finest likely to be acquired by even the most ardent specialist. The present orange-red and olive-green has a good strike and exceptional eye appeal. A loupe reveals only trivial contact and carbon. Housed in a green label holder. NGC ID# 22CL, PCGS# 2575

**1928-D Cent, MS66 Red
Registry-Grade Rarity**

4741 1928-D MS66 Red PCGS. In Red condition, the 1928-D cent is usually only available in MS64; Gems are scarce, and Premium Gems are significant rarities. This top-grade Registry coin displays satiny copper-orange and rose surfaces with well-struck design elements. A lack of abrasions promotes outstanding eye appeal. Population: 14 in 66 Red, 0 finer (2/16). NGC ID# 22CS, PCGS# 2590

1950-S Cent, MS67+ Red
Tied for Finest at PCGS

- 4742 1950-S MS67+ Red PCGS. This Superb Gem Red 1950-S is tied for the finest at PCGS, being one of three coins for the grade awarded the Registry-essential Plus designation (1/16). The strike is well-executed, and the frosty copper-red surfaces are devoid of carbon. Close study with 10x magnification fails to reveal noticeable flaws. Population: 85 in 67 (3 in 67+) Red, 0 finer (1/16). NGC ID# 22F2, PCGS# 2785

1969-S Cent, AU Details
FS-101, Doubled Die Obverse

- 4743 1969-S Doubled Die Obverse, FS-101 — Cleaning — PCGS Genuine. AU Details. The 1969-S doubled die is the single most valuable variety in the Lincoln cent series and ranks at the number one spot in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. Bold doubling can be seen on all obverse lettering and the bowtie. This piece shows only brief wear from circulation, although an old cleaning precludes a numeric grade. Both sides display glossy patina in deep burgundy and olive-brown hues. The coin is visually pleasing and will appeal to a number of collectors who find rare finer coins to be out of reach.

PROOF LINCOLN CENTS

1909 VDB Lincoln Cent, PR63+ Red
Few Certified in Red Grades

- 4744 1909 VDB PR63+ Red PCGS. Although the 1915 and 1916 have slightly lower mintages, the 1909 VDB — struck to the extent of 1,194 coins — is the scarcest matte proof Lincoln cent in high grade. PCGS has seen a total of 29 submissions in the Red color category, and this Plus-designated Select example is among the more affordable pieces therein. Soft matte luster glows on each side, illuminating fully rendered design elements within broad, squared rims. Natural coppery-orange surfaces are free of distracting contact marks, although scattered carbon specks contribute to the grade. A pleasing example of the key issue in the matte proof Lincoln cent series. Population: 3 in 63 Red, 25 finer (1/16). NGC ID# 22KR, PCGS# 3302
-

**1916 Lincoln Cent, PR66 Red and Brown
Stunning Coloration**

- 4745 1916 PR66 Red and Brown PCGS. CAC.** Distinctive coloration shades from vivid purple to burnt-orange and umber tones, with hints of forest-green on the obverse. Similar shades of orange, green, and umber cover the reverse. The 1916 final matte proof issue was struck to an extent of 1,050 pieces, but possibly not all were distributed based on the number of known survivors. This example is razor-sharp, benefiting from a new master hub that was introduced for the year. Lincoln's hair and beard are especially sharp. Three or four minuscule pinprick spots are seen with a strong glass, but do not disturb the rich patination in the least. Population: 18 in 66 Red and Brown, 4 finer (2/16). NGC ID# 22KZ, PCGS# 3325

**1941 Cent, PR67 Red, Tied for Finest Certified
Registry Set Essential**

- 4746 1941 PR67 Red PCGS.** The 1941 proof Lincoln cent is plentiful in most grades but becomes rare at the Superb Gem Red level. PCGS lists only six pieces in PR67 Red and none finer, while NGC contributes just eight more in this grade, also with none finer (2/16). No Cameos are known. These rare top-tier coins are actively sought-after by Registry collectors. This piece is fully struck from highly polished dies, delivering watery copper-orange fields that display unsurpassed preservation. A couple of tiny flecks appear near the T in TRUST, but there are no other mentionable imperfections. Eye appeal is outstanding. NGC ID# 22LH, PCGS# 3350

**1950 Cent, PR66+ Red Ultra Cameo
Frosty Contrast, Deep Mirroring**

- 4747 1950 PR66+ Red Ultra Cameo NGC.** Incredibly bold cameo contrast adorns both sides of this mint-fresh Premium Gem proof, a conditional rarity with the Plus designation. The mirrors display seemingly infinite depth, and the design elements are fully rendered. A tinge of violet toning behind Lincoln's neck accents bright coppery-pink color. Census: 19 in 66+ Ultra Cameo, 14 finer (2/16). NGC ID# 22LA, PCGS# 93359

**1950 Cent, PR67 Red Deep Cameo
Rare Registry-Grade Example**

- 4748 1950 PR67 Red Deep Cameo PCGS.** Deep Cameo examples of this late-series proof Lincoln cent are surprisingly scarce. This Superb Gem Red coin is tied with five others as the finest at PCGS (1/16). The strike is full, and the deeply mirrored fields provide stark cameo contrast. Both sides are unmarked and show mint-fresh copper-red color. NGC ID# 22LA, PCGS# 93359

**1953 Cent, PR67 Red Deep Cameo
Gorgeous Contrast**

- 4749 1953 PR67 Red Deep Cameo PCGS.** Among the finest of a small number of Deep Cameo proofs at PCGS. This Superb Gem Red 1953 Lincoln cent boasts mint-fresh copper-pink luster with frosty, contrasted design elements and seemingly infinite depth of mirroring in the fields. A tiny, S-shaped strike-through between the wheat ear stems is the only interruption in the surfaces. Population: 7 in 67 (1 in 67+) Deep Cameo, 0 finer (1/16). NGC ID# 22LD, PCGS# 93368

PROOF TWO CENT PIECES

1869 Two Cent, PR67 Red and Brown Extravagant Coloration

- 4750** 1869 PR67 Red and Brown NGC. A high-end proof with razor-sharp, satiny devices and deeply mirrored fields. Both sides display vivid copper-orange surfaces with prominent violet and blue overtones, delivering the Red and Brown designation. This Superb Gem is beautifully free of contact marks and boasts incredible eye appeal. Conditionally rare. Census: 3 in 67 Red and Brown, 0 finer (1/16). NGC ID# 274Y, PCGS# 3640

1873 Two Cent, PR66 Red and Brown CAC-Endorsed Closed 3 Coin

- 4751** 1873 Closed 3 PR66 Red and Brown NGC. CAC. The distinct Closed 3 logotype designates this Premium Gem Red and Brown proof as one of the original pieces struck in 1873, the final date in the two cent series. The Open 3 proofs of this date are alleged by some researchers to be restrikes of a few years later. This piece is fully struck with reflective fields that show warm copper-orange and burgundy hues. There is no distracting carbon, and the eye appeal is outstanding. Census: 39 in 66 (1 in 66 ★) Red and Brown, 2 finer (2/16). NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

1870 Silver Three Cent, MS66 Rare, Only One Coin Finer

- 4752** 1870 MS66 PCGS. CAC. This Reconstruction-period three cent silver issue is among the keys to the series, boasting a scant mintage of 3,000 coins. Uncirculated survivors are rarely seen at any level. This Premium Gem example should excite a number of collectors. The strike is uncommonly bold, and the fields have somewhat satiny luster rather than blinding prooflike mirroring. Mottled aquamarine, olive, and violet toning encompasses each side. Population: 10 in 66 (1 in 66+), 1 finer (1/16). NGC ID# 22ZL, PCGS# 3691

1871 Silver Three Cent, Colorful MS67 Prooflike Cameo Contrast Tied for Finest at PCGS

- 4753** 1871 MS67 PCGS. This late-series silver three cent is occasionally available in Mint State but is rarely seen at the Superb Gem level. This prooflike example boasts stark cameo contrast that is accentuated by vivid sun-gold, blue, and violet toning. Trivial strike weakness appears on the central shield and on the ribbon around the arrows, confirming the circulation-strike origin. Population: 12 in 67, 0 finer (1/16). NGC ID# 22ZM, PCGS# 3692

PROOF THREE CENT SILVER

1868 Silver Three Cent, PR66+ Cameo Exceptional Eye Appeal Conditionally Rare

- 4754** 1868 PR66+ Cameo PCGS. The 1868 silver three cent is scarce in Cameo grades and genuinely rare as fine as the Premium Gem level. This Plus-designated specimen boasts quality and eye appeal superior to that of most of its peers. The strike, from fresh dies, is needle-sharp, and the fields display a crystal-clear reflection. A blush of light golden toning warms each side. Population: 10 in 66+ Cameo, 2 finer (1/16). NGC ID# 27CE, PCGS# 83718

PROOF THREE CENT NICKEL

1875 Three Cent Nickel, PR66 Cameo Misplaced Date, Conditionally Rare

- 4755** 1875 Misplaced Date, FS-301, PR66 Cameo PCGS. The flag or foot of an errant 1 is seen protruding from the lower part of the Liberty's neck on this *Cherrypickers'* variety. Of greater interest, however, is the rarity of the 1875 proof in this high grade. None are certified finer in Cameo. This piece is fully struck with reflective fields, although the lower reverse wreath is weakened by die polishing. A light golden hue warms each side. Population: 8 in 66 Cameo, 0 finer (2/16). PCGS# 524941 Base PCGS# 83771

SHIELD NICKELS

1876 Shield Nickel, MS66+
Tied for Finest Certified

- 4756** 1876 MS66+ PCGS. CAC. The obverse is minutely die doubled at the annulet, although not nearly as profoundly as seen on the *Cherrypickers'* varieties. This CAC-endorsed Premium Gem is tied for the finest certified. Satiny luster is largely untuned, and the design elements yield bold definition. As is typical of the issue, the obverse is heavily cracked, showing moderate fatigue. Population: 18 in 66 (2 in 66+), 0 finer (1/16). NGC ID# 22PB, PCGS# 3805

1883/2 Shield Nickel, MS64
Popular Overdate

- 4757** 1883/2 FS-302 MS64 PCGS. CAC. One of several *Cherrypickers'* varieties that feature the 1883/2 overdate. This Choice FS-302 example shows remnants of a 2 in the field left of the 3. Some strike weakness appears on the wreath leaves, possibly resultant from the shattered obverse die. Satiny luster displays light champagne toning. PCGS# 38413

PROOF SHIELD NICKELS

1867 Rays Shield Nickel, PR65
Elusive Key to the Proof Series

- 4758** 1867 Rays PR65 NGC. *Dannreuther-3*. The With Rays 1867 proof Shield nickel is the key to the series. The recorded mintage, those coins sold as part of silver proof sets, is only 25 pieces, although small numbers of additional coins were struck on later occasions. It is believed that approximately 50 to 60 examples are known today, which belies the inflated NGC and PCGS certified populations. In the *Guide Book of Shield and Liberty Head Nickels*, Bowers writes: "The 1867 With Rays Proof is a classic rarity. Probably no more than several dozen or so are known today" This Gem example is boldly struck with reflective fields slightly muted in their reflectivity by dusky olive-gold toning encompassing each side. No distracting marks are present, and the overall appeal is pleasing. Census: 7 in 65, 0 finer (1/16). Ex: Greensboro Collection, Part V / ANA Signature (Heritage, 8/2015), lot 3966. NGC ID# 276H, PCGS# 3818

**1873 Shield Nickel, Closed 3, PR67
Attractively Toned Registry Set Candidate**

- 4759 1873 Closed 3 PR67 PCGS.** The 3 in the date was modified after Chief Coiner A. Loudon Snowden complained that it looked too much like an 8, but the proofs were struck early in the year and exhibit the older Closed 3 motif. This spectacular Superb Gem offers sharply detailed design elements and deeply reflective fields, under attractive shades of greenish-gold and cerulean-blue toning. Population: 5 in 67 (1 in 67+), 0 finer (2/16). NGC ID# 5KX3, PCGS# 3827

LIBERTY NICKELS

1883 Liberty Nickel, MS67, First-Year, With Cents Type

- 4760 1883 With Cents MS67 PCGS.** The Liberty design was introduced on the nickel denomination in 1883, replacing the older Shield motif. The first Liberty design simply expressed the five-cent denomination as a large Roman numeral V in the center of the reverse. According to numismatic lore, this led some unscrupulous individuals to gold-plate the nickels and pass them off as the contemporary, similarly sized five-dollar gold pieces (half eagles) issued by the federal government. This situation was rectified later in the year by adding the word CENTS to the reverse design.
- The present coin is a spectacular Superb Gem, with well-detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces are blanketed in attractive shades of pale gold and lavender toning, with terrific eye appeal. Population: 6 in 67, 0 finer (1/16). NGC ID# 22PH, PCGS# 3844

**1883 With Cents Liberty Nickel
Conditionally Rare MS67**

- 4761 1883 With Cents MS67 PCGS.** The With Cents 1883 Liberty nickel is significantly rarer in high grade than its No Cents counterpart. This Superb Gem is among the finest known and is extremely rare as such. The strike is above-average on the wreath and stars, and the champagne-toned surfaces are seemingly pristine. An outstanding type coin and Registry candidate. Population: 6 in 67, 0 finer (2/16). NGC ID# 22PH, PCGS# 3844

**1888 Liberty Nickel, MS66+
Lustrous and Fully Struck**

- 4762 1888 MS66+ PCGS. CAC.** While not notably scarce as an issue, any Liberty nickel in MS66+ is worthy of attention by collectors of high-grade type. This piece is well-struck and highly lustrous, with glowing untuned, virtually unmarked, and carbon-free surfaces. A magnificent Premium Quality Gem. Population: 22 in 66 (3 in 66+), 0 finer (2/16). NGC ID# 2774, PCGS# 3849

**1912-S Liberty Nickel, Appealing MS66
Atypically Lustrous**

- 4763 1912-S MS66 NGC.** This appealing Premium Gem example of this late-series key date Liberty nickel shows far more luster than normally seen, on surfaces that are extremely well-struck overall (save for the lower-left wreath area, as usual). A light tinge of gold patina appears, more prominently on the reverse. While Gem examples of the 1912-S are available for a price, Premium Gems appear relatively infrequently. NGC reports only 13 in this grade level, including one each with the Plus and Star designations (1/16). NGC ID# 277R, PCGS# 3875

1912-S Nickel, MS66
Lovely Iridescent Toning

- 4764 1912-S MS66 PCGS.** A rare Premium Gem example of this key branch mint issue, showing smooth, satiny surfaces and unusually bold definition on the lower-left portion of the wreath. The interiors display ice-blue and champagne hues, while the borders show deeper olive-gold and iridescent rainbow colors. Eye appeal is outstanding. The 1912-S boasts the lowest mintage in the series at 238,000 coins and is proportionately rare above the Gem level. Population: 33 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKEL

1893 Nickel, PR67 Deep Cameo
Dramatic White-on-Black Contrast
Among the Finest Certified

- 4765 1893 PR67 Deep Cameo PCGS.** The proof 1893 Liberty nickel is available in the absolute sense, but Deep Cameos are rare. This Superb Gem is among the finest of just eight Deep Cameo examples at PCGS (2/16). Needle-sharp relief elements showcase dazzling frost-white luster and are set amid watery-black mirroring in the fields and framed by a hint of light golden peripheral toning. Eye appeal is unsurpassed. Population: 4 in 67 (1 in 67+) Deep Cameo, 0 finer (1/16). NGC ID# 2783, PCGS# 93891

BUFFALO NICKELS

1925-S Nickel, Frosty MS65
Exceptional Luster, Rare So Fine

- 4766 1925-S MS65 PCGS.** The 1925-S is a rare Buffalo nickel in Gem condition and is prohibitively so finer. Most were poorly struck from eroded dies, and surface abrasions are common on Mint State survivors. This champagne-toned example boasts stellar surface quality and might have garnered an even finer grade were the obverse better struck. The head die shows weak detail on the portrait from wear, and PLURIBUS is sharply clashed below the Indian's chin, giving the visual impression of whiskers. The reverse is boldly struck from a fresh die and shows a hint of iridescence. Housed in a green label holder. Population: 27 in 65, 1 finer (2/16). NGC ID# 22S4, PCGS# 3956

1937-D Three-Legged Nickel, MS64
Bright Satiny Mint Luster

- 4767 1937-D Three-Legged, FS-901, MS64 NGC.** Genuine 1937-D Three-Legged nickels were struck from a single die pair, which helps weed out the imposters from the authentic coins. The correct reverse die always displays the following diagnostics: a string of raised die lumps (rust pits) between the fore and hind legs, curving from the mound top to the top of the left rear leg ... a pointed beard on the bison, where the right beard tip extends beyond the left tip ... thin, rough hind legs ... and a bison that appears somewhat smaller than on the normal 1937-D nickels. Other signs of die fatigue may be present, including metal flow lines on the bison across the back, rump, and hind legs. This near-Gem displays bright satiny mint luster and pale, even reddish-golden patina covers each side. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS65
Rare and In Demand in Gem Condition**

4768 1937-D Three-Legged, FS-901, MS65 PCGS. CAC. The seeming contradiction between intense collector demand for the 1937-D Three-Legged Buffalo nickel and the high prices realized — despite an abundant supply — is rather neatly explained by a paragraph under the heading “Universal Rarity Scale” in *The Cherrypickers’ Guide*, volume one, fifth edition, by Fivaz and Stanton:

“Rarity and value are not always as closely related as one might suspect. If there are nine known examples of a particular variety, but only six or seven collectors are interested in it, the coin would certainly be rare, but because of a relatively low interest factor (low demand), it would not command much of a premium. Conversely, there could be 10,000 pieces known of a variety, but if 11,000 collectors are interested in obtaining one, the premium over the normal value of the coin would be much greater, due to the high interest factor (high demand). This brings us back to the age-old law of supply and demand.”

It is interesting to note that the *Cherrypickers’ Guide* gives its highest ratings of 5 for both Interest Factor and Liquidity Factor for each of the three popular Buffalo nickel varieties, the 1916 Doubled Die Obverse, the 1918/7-D, and the 1937-D Three-Legged. This seems to be out of kilter, as there are many collectors, even type collectors, who would likely consider the purchase of a 1937-D Three-Legged Buffalo in preference to the other rarer varieties; thus, we believe its Interest Factor should be even higher. The demand especially for Gem examples of the Three-Legged 1937-D can never approach the limited supply. The surfaces of this piece are bright and satiny, and each side has a layer of muted reddish-golden patina. There are no mentionable abrasions on either side, and the strike is above-average for this normally weak issue. Population: 56 in 65 (3 in 65+), 9 finer (1/16).

Ex: *Long Beach Signature* (Heritage, 6/2011), lot 3263, which realized \$40,250. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

**1915 Buffalo Nickel, PR68
Exceptional Eye Appeal, Condition Census**

4769 1915 PR68 NGC. David Lange notes in his Buffalo nickel reference: “This date is slightly scarcer than the 1914 issue, and it’s likely that some portion of the 1915 mintage remained on hand the following year and was melted.” Still, examples are available for a price even through PR67. The present coin is a remarkable Condition Census coin, a great rarity at the PR68 level. NGC and PCGS combined have certified only six pieces this superb (four and two coins, respectively) with a single NGC PR69 coin finer (1/16). Pastel shades of rose, peach-orange, and powder-blue lightly tint each side. The needle-sharp proof strike and absence of noteworthy impairments make this Superb Gem all the more appealing. NGC ID# 278U, PCGS# 3992

**1936 Buffalo Nickel, Type One, PR68
Fully Struck Throughout**

4770 1936 Type One — Satin Finish PR68 PCGS. CAC. This is a great-looking example of this Type One issue, showing pale ice-blue and pinkish accents over surfaces that are fully struck throughout both sides and mark-free. The level of detail present here is far greater than that seen on any business strikes, making these coins perennially popular for type purposes. Population: 39 in 68, 1 finer (1/16). NGC ID# 278X, PCGS# 3994

JEFFERSON NICKELS

1939-D Nickel, MS67+ Full Steps Reverse of 1938

- 4771 1939-D MS67+ Full Steps PCGS.** The initial Reverse of 1938 shows Monticello with indistinct, wavy steps, which were sharpened and straightened on the Reverse of 1940. The 1939-D Jefferson nickel was struck with both types of reverse, neither being significantly scarcer than the other. This is a high-end Superb gem example of the Reverse of 1938 type. The strike is bold, and the surfaces display satiny luster. Olive-gold peripheral toning cedes to soft iridescent and rainbow hues in the centers. Population: 7 in 67 (1 in 67+) Full Steps, 0 finer (2/16). NGC ID# 22T9, PCGS# 84005

1946-D Nickel, MS67+ Full Steps Tied for Finest at PCGS, Lovely Toning

- 4772 1946-D MS67+ Full Steps PCGS.** A sharp Full Steps Superb Gem and one of only two Plus-designated pieces in this grade at PCGS (1/16). Smooth, satiny surfaces display lovely multicolor toning over each side, accentuating the immaculate preservation. Nearly half of a grade point finer than the piece in the current highest-rated Registry Set. Population: 12 in 67 (2 in 67+), 0 finer (1/16). NGC ID# 22U3, PCGS# 84029

PROOF JEFFERSON NICKELS

1939 Nickel, PR67 Cameo Reverse of 1940

- 4773 1939 Reverse of 1940, FS-901, PR67 Cameo PCGS. CAC.** The scarce Reverse of 1940 variant, showing sharp, straight steps on Monticello. PCGS has seen only four examples of this variety worthy of a Cameo designation — the present coin is tied with one other as the finest (1/16). The strike is full, and field-device contrast is discernable on each side. Traces of light golden toning warm the eye appeal. NGC ID# 2TR4, PCGS# 38532

1951 Nickel, Elusive PR68 Ultra Cameo

- 4774 1951 PR68 Ultra Cameo NGC.** This recently graded (or, in a new holder, at least) 1951 Jefferson nickel certified PR68 Ultra Cameo is among only three in this grade at NGC, which reports a single PR69 Ultra Cameo finer (1/16). The fields are ink-black and provide the optimal backdrop for lavishly frosted devices, the surfaces essentially mark-free as expected. Ultra/Deep Cameo examples of this issue in any grade are elusive. NGC ID# BBUZ, PCGS# 94183

1955 Nickel, PR69 Deep Cameo The Sole Finest at PCGS

- 4775 1955 PR69 Deep Cameo PCGS.** The Registry collector's dream coin, this virtually immaculate Deep Cameo proof 1955 Jefferson nickel is the single finest at PCGS (1/16). Fully rendered design elements and flawless, liquidlike fields adorn each side beneath a blush of warm champagne toning. Eye appeal is superb. This remarkable coin should not be passed by. NGC ID# 22YF, PCGS# 94187

1971 No S Nickel, PR69 Deep Cameo Stellar Eye Appeal, Registry-Grade Coin

- 4776 1971 No S PR69 Deep Cameo PCGS.** A challenging variety and genuinely rare at this lofty Registry-contender level. This proof No S 1971 Jefferson nickel boasts essentially flawless preservation with champagne-tinged white-on-black contrast. The depth of mirroring in the fields is seemingly infinite. Tied for the finest known. Population: 7 in 69 Deep Cameo, 0 finer (2/16). NGC ID# 22YN, PCGS# 94204

EARLY HALF DIMES

1792 Half Disme, Judd-7, VF25 First U.S. Circulating Coinage Issue Laminated Planchet Error

4777 1792 Half Disme, Judd-7, Pollock-7, R.4, VF25 PCGS. The 1792 half dime was the first coin struck under the authority of the Mint Act of 1792. President George Washington gave his approval for the coin's production on July 9, 1792 in a letter to Mint Director David Rittenhouse and Thomas Jefferson deposited the silver bullion for the striking two days later. The coins were actually struck in the cellar facility of Philadelphia sawmaker John Harper because the First United States Mint was not ready for operations in its own building at that time. On the 13th, Jefferson recorded the following statement in his personal account book, "Recd. from the mint 1,500 half dismes of the new coinage." Washington mentioned the half dismes in his November 6, 1792 State of the Union Address:

"In execution of the authority given by the Legislature measures have been taken for engaging some artists from abroad to aid in the establishment of our mint. Others have been employed at home. Provision has been made of the requisite buildings, and these are now putting into proper condition for the purposes of the establishment. There has also been a small beginning in the coinage of half dismes, the want of small coins in circulation calling the first attention to them."

From this we see that the 1792 half dismes were clearly intended to be a circulating issue, but they have traditionally been collected with the pattern series, as well. As the first United States coin, the historical importance of this issue cannot be overestimated and the inclusion of a specimen is a mark of distinction for any collection.

The present coin was struck a trifle off-center and the legends on the lower left have run slightly off the planchet. The design elements show considerable wear, but some interior detail remains intact. The date, denomination, and the lettering on the right side of the obverse remain bold. Several interesting planchet laminations show on the obverse (as struck), affecting the bust and the adjacent fields. The pleasing rose-gray surfaces are free of large or distracting abrasions. This coin possesses unparalleled historic interest and an overall attractive presentation, despite the noted surface flaws. We expect intense competition when this lot is called. NGC ID# 946T, PCGS# 11020

1795 Half Dime, Toned MS64
Rare V-3, LM-4 Die Marriage

4778 1795 V-3, LM-4, R.6, MS64 NGC. Of the 10 1795 half dime die marriages, LM-8, -9, and -10 are plentiful, and the earlier seven are rare or very rare. LM-4 is an R.6 variety that is extremely rare in Mint State. This Choice example is in an intermediate die state, as the crack through stars 11-14 has not yet broken away into a cud. The strike is bold on the stars and the portrait but is soft on the eagle's breast and upper-left (facing) wing. The eagle's head is well-defined, and both sides have complete dentils. Satiny fields display olive-gray and amber-gold toning, which also characterizes the satiny relief elements. An outstanding example of this rare die pairing. Census (all varieties included): 35 in 64, 18 finer (2/16). NGC ID# 22ZV, PCGS# 38588 Base PCGS# 4251

1795 Flowing Hair Half Dime, AU53
Popular V-5, LM-8 Variety

4779 1795 V-5, LM-8, R.3, AU53 PCGS. The 1795 Flowing Hair half dime claims a mintage of 78,660 pieces, with 10 die varieties known for the date. The LM-8 variety is identified by the low L in LIBERTY and no berries under the left wing on the reverse. This attractive AU53 example shows light wear on the high waves of hair and tips of the eagle's wings, but most interior design detail is intact. The lightly abraded surfaces retain traces of original mint luster. Population, for the variety: 2 in 53, 1 finer (1/16). NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1795 Flowing Hair Half Dime, MS65
Beautifully Toned V-4, LM-10 Example

4780 1795 V-4, LM-10, R.3, MS65 PCGS. The 1795 is by far the more plentiful of the two Flowing Hair half dime issues, ideal for type representation. This date is thought to have comprised 78,660 of 86,416 half dimes coined in 1795, with the remaining 7,756 pieces, delivered in March, likely dated 1794. As no half dimes were coined in 1794, the likelihood of this scenario is so great that it is generally accepted as fact among collectors.

Coinage of silver was initially delayed in 1793, because of the inability of the chief coiner and assayer to pay the high security deposits (\$10,000 each) which the law required be remitted before those officers were allowed to handle precious metals. This obstacle was remedied in 1794, but silver production was then dictated by both the availability of bullion and the fineness of said bullion. In the early days of the Mint, almost all of the silver used in coinage was acquired from private depositors and banks, and the most common form was foreign coin. The resulting variances in quantity and fineness required that all deposited bullion be put through the tedious and time-consuming task of refining before it could be worked into planchets for coinage. Silver dollars were the first silver denomination struck at the Mint, followed by half dollars, as dictated by the requests of depositors.

Half dime production did not commence until early 1795, but the Mint was not in the practice of wasting outdated dies that were still usable. Three 1794-dated obverse dies were used for regular coinage in 1795. Had these not deteriorated so quickly — a problem that plagued the early Mint for years until the die-making process was perfected — the 1794 issue would be significantly more available today and would rival the 1795 for popularity among type collectors.

V-4 is one of the more frequently seen varieties of the 1795 issue, and is often the one represented when a Mint State coin is located. This is a late die state example with a rim cud over the tops of the TY in LIBERTY and star 9. This Gem is immensely appealing, with strong, satiny luster underlying sun-gold and amber toning that yields to deep aquamarine around the peripheries. The strike is even and well-centered, with just a touch of weakness observed in the extreme center of the obverse portrait and on the eagle's breast. Population: 11 in 65 (1 in 65+), 13 finer (1/16). NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

**1800 Draped Bust Half Dime, MS65+
Famous LIBEKTY Variety, V-2, LM-3
Second-Finest at PCGS, Ex: Norweb**

4781 1800 LIBEKTY, V-2, LM-3, R.4, MS65+ PCGS. CAC. The 1800 Draped Bust half dime claims a mintage of 40,000 pieces, with four die varieties known for the date. Three obverse and two reverse dies were used to accomplish this mintage. The coin offered here represents the LM-3 variety, one of the two pairings to employ the famous LIBEKTY obverse, the result of using a defective R punch with a broken top. The reverse of the LM-3 has only two of the top arrowheads at equal height. This was the first use of the obverse die. It was used again on the rare LM-4 variety. This was the third and final use of the reverse die, as it was also used to strike the LM-1 and LM-2 varieties of this date.

Early half dime specialist Howard P. Newlin was the first numismatist to notice the LIBEKTY variety, as related in his seminal work on half dimes in 1883:

"No. 2. Obverse: 8 lower than 1 in date; top of R in Liberty open, resembling a K. I noticed this peculiarity some time ago, and remarked it to a gentleman who was cataloguing a collection, in his catalogue he termed it the Libekty variety, and as it has since become identified by that name I will thus term it, although I do not think the letter is a K."

The LIBEKTY variety has been a favorite of collectors since it was first identified. Although it is scarce in absolute terms, high-grade examples can be found with patience. It is very rare at the MS65 grade level, however, and finer specimens are virtually unobtainable.

The present coin traces its history to the fabled Norweb Collection, which was formed over several generations before being sold in a series of landmark auctions by Bowers and Merena in the late 1980s. The strike is better-than-average for this issue, which almost always shows some weakness on the centers. The well-preserved surfaces are blanketed in shades of dark gray and golden-brown toning and traces of original mint luster shine through the patina. Eye appeal is quite strong for this early half dime issue. Few examples can match this piece for technical quality and eye appeal, and its illustrious pedigree adds to its intense historic interest. Population: 4 in 65 (1 in 65+), 1 finer (1/16).

Ex: *Norweb Collection, Part I* (Bowers and Merena, 11/1987), lot 309. NGC ID# 2326, PCGS# 38603 Base PCGS# 4265

BUST HALF DIME

1835 Half Dime, MS67
V-7, LM-10, Small Date, Small 5C

4782 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS67 PCGS. The Small Date, Small 5C 1835 half dime is the second-most plentiful date/denomination-size ratio of the issue, despite there being only two die varieties with this combination. LM-10 is the more often seen of the two, particular in regards to high-grade type coins.

In Mint State, the 1835 half dime as a whole is rare in MS66 or better condition. This Superb Gem LM-10 coin is without a doubt among the finer-known representatives. PCGS has designated only 19 1835 half dimes in MS67 (five in MS67+) and two MS68 coins finer; of these, four MS67 and one MS68 are attributed LM-10 representatives (1/16). This glittering Superb Gem displays bold design elements and frosty luster. The interiors are brilliant, while the peripheries display pleasant amber-gold toning.

From The Jim Hilands Collection. NGC ID# 232H, PCGS# 38719 Base PCGS# 4285

SEATED HALF DIMES

1838-O Half Dime, No Stars, Vivid MS63
Fantastic First-Year O-Mint Issue

4783 1838-O No Stars MS63 PCGS. V-1. Fantastic iridescent patina comprises fire-red, cobalt-blue, lemon-gold, and vivid fuchsia thicker at the margins, with the interiors coin-gray with daubs of pale lilac and violet, an incredibly beautiful coin. Only 70,000 examples were struck of this first-year O-mint half dime issue, and those pieces circulated heavily, for the most part. The 1838-O is also the only No Stars half dime from the year, as the Philadelphia Mint produced the With Stars, No Drapery half dimes in 1838. A couple of field marks are of no great import. The strike is a bit soft on Liberty's head on the obverse and conversely on the ribbon bow. This coin should be hotly pursued by collectors from numerous market segments. Population: 3 in 63, 5 finer (1/16). NGC ID# 232N, PCGS# 4314

1860 Half Dime, MS68
None Seen Finer

4784 1860 MS68 NGC. The 1860 half dime is a popular type-coin issue due to its general availability, but Superb Gem examples are scarce and are major rarities at the MS68 level. This piece is among the finest certified. The strike is lacking slightly on portions of the wreath, but the outstanding preservation of the surfaces balances the eye appeal. Virtually brilliant centers cede to violet and blue peripheral toning. Census: 8 in 68 (2 in 68 ★), 0 finer (2/16). NGC ID# 2347, PCGS# 4377

1863-S Half Dime, MS66
Condition Census Example

4785 1863-S MS66 PCGS. This lustrous Premium Gem example exhibits silver toning on both sides, with hints of champagne-gold throughout the fields. Light clashing is evident throughout, on the obverse below the base of Liberty, while on the reverse the telltale horizontal line passes through the top of the wreath. Ample mint frost completes the visual appeal of this attractive half dime, which is solidly in the Condition Census for the issue. Population: 2 in 66, 1 finer (2/16). NGC ID# 234D, PCGS# 4383

PROOF SEATED HALF DIMES

1848 Half Dime, PR64
The Only Proof at PCGS
Second Finest of Four Available Proofs

4786 1848 PR64 PCGS. V-4. We are only aware of six proof 1848 half dimes, despite the PCGS estimate of 10 to 15 pieces known. The finest is the first Eliasberg coin, PR66 Cameo NGC, which we sold as part of the Kaufman Collection in 2008. Three others have been certified PR64 and tied for second place, although one of those has now been delisted at NGC. Finally, the ANS and Smithsonian coins complete the census.

This is an exceptional example showing deep gold and iridescent toning on the obverse that subdues the mirrored fields. The reverse displays delicate gold toning with fully mirrored fields framing the devices. Both sides are pristine, and this Choice proof would earn a higher grade if the obverse toning were not so thick. The reverse is rotated 180 degrees, resulting in medal-turn die alignment. This example is the only proof 1848 half dime in any grade at PCGS. NGC adds one other PR64 and one PR66 Cameo, and the three reported pieces are different. This is one of few issues with no certification resubmissions.

Ex: Wayte Raymond (5/1945), lot 811; John Jay Pittman (David Akers, 10/1997), lot 478; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98192. NGC ID# 235G, PCGS# 4424

1856 Half Dime, Toned PR65
Scarce in All Grades

4787 1856 PR65 PCGS. CAC. As a pre-commercial era issue, the 1856 proof half dime is widely popular in all grades. PCGS suggests 40-50 pieces survive from an unknown but small mintage. Our Auction Archives show 31 offerings in the past two-plus decades, including multiple reappearances of the same coins. This Gem example offers bold violet and blue toning over olive-gold surfaces, with reflective fields and sharp design elements. Modest cameo contrast emerges from beneath the patina on each side. Population: 4 in 65, 0 finer (1/16). NGC ID# 235L, PCGS# 4434

1858 Seated Liberty Half Dime, PR66
Tied for Finest at PCGS

4788 1858 PR66 PCGS. CAC. A delightful Premium Gem from the first year of the Philadelphia Mint's commercial proof set offerings, this piece displays well-preserved surfaces with highlights of pale gold and cerulean-blue toning. The fields are deeply reflective and the design elements are sharply detailed throughout. Population: 4 in 66, 0 finer (2/16). NGC ID# 235N, PCGS# 4437

EARLY DIMES

1796 JR-1 Dime, Near-Mint, Smooth and Coruscating

- 4789** 1796 JR-1, R.3, AU58 PCGS. The cud below star 1 identifies JR-1 at arm's length. The clash marks near LIBERTY are also associated with the variety. This briefly circulated representative is generally cream-gray, although the margins offer occasional gunmetal-blue toning. The dies are lightly rusted but no marks are remotely consequential. 1796 was the first year of dime production at the fledgling U.S. Mint, although half dimes were coined there in both 1794 and 1795. Thus, there are no Flowing Hair dimes, and the Draped Bust, Small Eagle type was the first for the denomination. It lasted two years before the reverse was replaced by the Heraldic Eagle design. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

1804 Dime, VF Sharpness, JR-1, 13 Stars Reverse

- 4790** 1804 13 Stars Reverse, JR-1, R.5 — Corroded, Tooled — ANACS. VF Details, Net Fine 12. The 1804 cent, quarter, dollar, and ten dollar attain greater publicity, but their dime counterpart is also rare. Two die marriages are known, each with a distinct reverse star count and its own *Guide Book* listing. The present example has readable legends and substantial design definition. The lavender, forest-green, and stone-gray surfaces are granular. The obverse field is smoothed near the forehead and the L in LIBERTY. NGC ID# 236N, PCGS# 38766 Base PCGS# 4474

1805 Draped Bust Dime, MS66+
Four Berries Reverse, JR-2
Registry Set Contender

4791 1805 4 Berries, JR-2, R.2, MS66+ PCGS. CAC. From a reported mintage of 120,780 pieces, the 1805 Draped Bust dime is probably the most available date in the series. Only two die varieties are known for the date and this coin represents the more available JR-2 pairing, with four berries in the branch on the reverse. The obverse die was used previously to strike the JR-1 variety of this date and the reverse may have been a left over die from 1798, as it employs the old style narrow A's and small stars arranged in a diagonal pattern.

The 1805 Draped Bust dime has been a popular issue with collectors since the earliest days of the hobby and examples began appearing at auction at least as early as lot 280 of the A.C. Kline Sale (Moses Thomas & Sons, 6/1855). Early catalogers were quick to notice the four berries reverse on the JR-2 variety and numismatists like Howard Rounds Newcomb began listing the 1805 "Four Berries" reverse as early as the catalog for the 1914 ANS Exhibition. The record price realized at auction for the issue is the \$188,000 brought by the MS67 PCGS Secure example in Heritage's ANA Signature sale in August of 2014.

The present coin is a high-end Premium Gem with sharply detailed design elements, aside from a touch of softness on some star radials. A spidery die crack is evident from the rim above B in LIBERTY to star 8, and some clash marks show at the top of the date. The well-preserved surfaces display mingled shades of greenish-gold, magenta, lavender-gray, and amber patina. Vibrant mint luster shines through the toning and eye appeal is outstanding. Few coins can match this combination of high technical quality, terrific visual appeal, and great historic interest. We expect intense competition from series specialists and Registry Set enthusiasts when this lot is called. Population: 5 in 66 (2 in 66+), 2 finer (1/16). NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

BUST DIMES

1824/2 JR-1 Dime, MS64
Rich Original Toning

- 4792** 1824/2 JR-1, R.3, MS64 PCGS. Deep autumn-brown, lavender, and gunmetal-gray toning embraces this Choice Capped Bust dime. Smooth aside from a hair-thin line on the cheek and an interesting mint-made strike-through near stars 11 to 13. The strike is sharp at the borders although the centers are incompletely impressed. Only two 1824-dated John Reich varieties are known, struck from the same overdated obverse die. Combined 1824/2 Population: 8 in 64, 3 finer (2/16).

Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 5659. NGC ID# 2373, PCGS# 38805 Base PCGS# 4502

1829 Curl Base 2 Dime, Good 6
JR-10, FS-301, Famous Rarity

- 4793** 1829 Curl Base 2, JR-10, FS-301, R.6, Good 6 PCGS. 1829 dimes are relatively plentiful, with the exception of the rarest die marriage for the date, JR-10, which also happens to be the sole pairing with a Curl Base 2 in the date. A key Guide Book variety, the Curl Base 2 is almost always encountered well worn. The present example is mostly stone-white but displays charcoal-gray in protected areas, similar to the color scheme seen on circulated 1916-D dimes. The Y in LIBERTY is full and five other letters are partial. The L is absent but UNUM is readable. The peripheral legends are bold and all stars are distinct from the rim. NGC ID# 9BHH, PCGS# 38836 Base PCGS# 4512

SEATED DIMES

1838 F-108a Dime, MS66
'Partial Drapery' Guide Book Variety

- 4794** 1838 Partial Drapery, F-108a, R.4, MS66 PCGS. CAC. Drapery beneath Liberty's raised elbow was introduced on the Seated dime series in 1840. Those pieces dated 1837 to 1839 always lack drapery beneath the elbow. But in 1838, Fortin-108 dies clashed severely, creating the F-108a variety. The upright from the E in DIME appears on the field below the elbow, which upon cursory evaluation resembles the drapery seen on post-1840 Seated dimes. The present high grade example is sharply struck and displays blended dove-gray, apple-green, and golden-brown toning. The coruscating surfaces are undisturbed. PCGS# 537656 Base PCGS# 4570

1838 Seated Liberty Dime, MS66
Large Stars, No Drapery, One Finer at PCGS

- 4795** 1838 No Drapery, Large Stars, F-111a, R.3, MS66 PCGS. CAC. The bisecting die crack from star 7, across the figure of Liberty to the rim below her foot, and the sharply recut star 13 identify Fortin's Obverse 7. The characteristic die crack from the wreath to A in STATES is just barely visible on this specimen. This spectacular Premium Gem is sharply detailed throughout, with well-preserved surfaces and vibrant mint luster on both sides. Housed in an old green label holder. Population: 19 in 66, 1 finer (2/16). From *The Dr. John Young Collection*. PCGS# 537658 Base PCGS# 4568

**1839-O No Drapery Dime, Toned MS67+
Sharply Struck Fortin-104a, Top 100 Variety**

- 4796** 1839-O/O No Drapery, Large O, F-104a, FS-501, High R.4, MS67+ NGC. A Fortin Top 100 Variety. The color plate coin for Fortin-104a, formerly in the Eugene H. Gardner Collection. Star 8 is noticeably repunched, and a spectacular, bisecting die crack runs rim-to-rim from the I in UNITED, through DIME, and through the C in AMERICA. The mintmark is boldly repunched below the primary Large O.

Orange-russet and violet patina visits the highly lustrous silver-gray surfaces of this magnificent Superb Gem. The devices are sharply struck, significantly better than typically seen on this issue, including Liberty's head, the shield, and the leaves, elements usually found weak. Impeccable preservation adds to the coin's wonderful eye appeal. Clearly in the Condition Census for the 1839-O, and perhaps unsurpassable in terms of visual impact. Census: 4 in 67 (2 in 67+), 2 finer (1/16).

Ex: *Bowers and Merena* (8/1999), lot 1314; *Eugene H. Gardner Collection Part III* (Heritage, 5/2015 as MS67 NGC without the Plus designation), lot 98221. NGC ID# 237Y, PCGS# 537685 Base PCGS# 4572

1842 F-106 Dime, MS67

- 4797** 1842 F-106, R.2, MS67 NGC. Die lines near Liberty's raised elbow attribute the Fortin variety. Pastel rose-red toning visits this fully struck and lustrous Superb Gem. The surfaces are close to pristine, and the eye appeal is outstanding. Among the finest examples of the issue. Census: 2 in 67, 0 finer (1/16). PCGS# 537789 Base PCGS# 4581

**1854 Arrows Dime, MS67+
Outstanding Type Coin**

- 4798** 1854 Arrows, F-104a, R.3, MS67+ NGC. A network of prominent obverse die cracks attribute this lustrous, precisely struck, and pristine Superb Gem. Peach-red, powder-blue, and forest-green toning graces the fields, while the high points are silver-gray. A virtually unimprovable representative of the briefly issued Arrows subtype. PCGS# 538014 Base PCGS# 4605

**1866 F-102b Dime, MS66
Vibrant Original Toning**

- 4799** 1866 F-102b, R.6, MS66 PCGS. A mere 8,000 Seated dimes were coined by Philadelphia in 1866, during an era when fractional currency and Gresham's Law combined to remove silver from commerce. The present well struck and coruscating Premium Gem displays rich forest-green borders. The centers are dove-gray and russet-brown. Population: 7 in 66, 1 finer (2/16). PCGS# 538214 Base PCGS# 4643

**1877 Dime, Superb Gem
Iridescent Patina**

- 4800** 1877 MS67 PCGS. The extensive network of reverse die cracks do not match any Fortin-listed variety. Clash marks surround ONE DIME and Liberty's left (facing) arm. Splendid golden-brown, lemon-gold, aquamarine, and lilac toning embraces this lustrous and immaculate Superb Gem. The upper reverse displays a prominent wire rim. Population: 3 in 67, none finer (2/16). NGC ID# 23AL, PCGS# 4682

PROOF SEATED DIMES

**1848 Seated Dime, PR65
Outstanding Proof Rarity
Ex: Eliasberg, Gardner**

4801 1848 F-103, R.7, PR65 PCGS. Ex: Eliasberg. In the Pittman catalog, David Akers estimated the 1848 proof dime's surviving population to be in the eight to 10-coin range, including two pieces housed in the Smithsonian and the ANS. Walter Breen's *Proof Encyclopedia* identified possibly five or more different coins. Our Permanent Auction Archives show nine previous appearances of the 1848 proof dime in the past two decades, but it is important to note that those offerings consist of only five different coins. The present coin is the eighth individual representative currently confirmed to exist. In its previous offering in Stack's 1998 sale of the Boys Town Collection, this coin was described as probably originating from the Harlan P. Smith Collection, sold by the Chapman brothers in May 1906. We examined that catalog, along with the original photographic plate, and it appears that the Eliasberg piece is actually a different coin.

Bold devices are set against glassy mirroring on both sides of this Gem proof. The obverse is encompassed in mottled olive-green and golden-gray toning, while the reverse shows deeper hues of the same around the peripheries and lighter champagne color in the center. No contact marks or distracting hairlines are evident on this incredible proof rarity. NGC has seen nine submissions of this issue, including three PR63, one PR64, two PR65, and three PR66 (one PR66 ★); PCGS shows two each in PR64 and PR65 (1/16). These figures are undoubtedly inflated by resubmissions.

Ex: Louis E. Eliasberg, Sr. Collection (*Bowers and Merena*, 5/1996), lot 1136; Boys Town and Miami Collections (*Bowers and Merena*, 3/1998), lot 536; Eugene H. Gardner Collection, Part III (*Heritage*, 5/2015), lot 98266. PCGS# 538990 Base PCGS# 4735

**1880 Seated Liberty Dime, PR68
Tied for Finest at PCGS**

4802 1880 F-101, R.3, PR68 PCGS. CAC. Ex: Simpson. A generous proof mintage of 1,355 Seated Liberty dimes was achieved in 1880, and this magnificent PR68 specimen is among the finest survivors. This coin offers sharply detailed design elements and deeply mirrored fields, and the impeccably preserved surfaces are blanketed in attractive shades of cerulean-blue and pale gold toning. Population: 2 in 68, 0 finer (1/16). NGC ID# 23D5, PCGS# 539047 Base PCGS# 4777

**1882 Dime, PR66 Deep Cameo
Dazzling Field-Device Contrast**

4803 1882 PR66 Deep Cameo PCGS. F-101, R.3. The proof 1882 Seated dime was struck with an obverse die that shows the 2 in the date recut. This Premium Gem example is one of just five Deep Cameos certified by PCGS, including two in this grade and one finer (1/16). Field-motif contrast is starkly painted on each side, and the interiors remain completely brilliant. A hint of champagne toning around the outer peripheries adds warmth to the overall appeal. Boldly struck and beautifully preserved. From The Jim Hilands Collection. NGC ID# 23D7, PCGS# 94779

**1886 Seated Dime, PR67 Cameo
Brilliant with Bold Contrast**

4804 1886 PR67 Cameo PCGS. CAC. Fortin-103, R.3. Untoned save for a glint of gold rim toning, this nicely contrasted proof displays glassy, silver-mirrored fields set against frost-white devices. The strike is first-rate throughout. Free of all but the most inconsequential, delicate lines, this Superb Gem Cameo is hallmarked by two pinpoint planchet chips — one by the F in OF, the other in the right-hand field opposite the drapery folds beneath the Liberty's elbow, yet they do not distract in the least from the gleaming appeal. CAC endorsed. Population: 3 in 67 Cameo, 0 finer (1/16). NGC ID# 23DB, PCGS# 84783

BARBER DIMES

1909-S Barber Dime, MS67 One of the Finest Known

- 4805 1909-S MS67 PCGS Secure. CAC.** With a mintage of just 1 million pieces, the 1909-S Barber dime is a slightly better date in the upper circulated grades and becomes genuinely scarce in Mint State. Gem or finer representatives are rarely seen. This magnificent Superb Gem is tied with just two others as the finest at PCGS; the finest at NGC are only three MS66 coins (1/16). The strike is boldly executed, and the frosty surfaces yield luminous luster. Vivid lemon-gold and mint-green peripheral hues frame dusky lavender-gray centers, with no mentionable abrasions observed. This is one of two Superb Gems we have ever handled, finer than the Lily Nicole specimen. The Registry competitor should not let this piece pass by.

Ex: ANA Signature (Heritage, 8/2007), lot 1634; Los Angeles Signature (Heritage, 8/2009), lot 510. NGC ID# 23FE, PCGS# 4853

1912-D Dime, Splendid MS67 Lightly Toned Registry Contender

- 4806 1912-D MS67 PCGS. CAC.** Violet and golden tones delicately blanket each side, allowing vibrant satin luster to emanate from the underlying surfaces. The hair curls, headband, and wreath elements, including the corn kernels and wheat sheaves, are pinpoint-sharp. The reverse is in a late state with several die breaks around the peripheries. Wonderfully preserved without a mark of note. Population: 2 in 67, 0 finer (1/16). NGC ID# 28PR, PCGS# 4861

1913-S Barber Dime, Splendid MS67 Tied for Finest With CAC Approval

- 4807 1913-S MS67 PCGS. CAC.** Certain of the S-mint Barber dime issues — 1892-S and 1893-S, 1896-S, 1901-S, 1903-S, 1913-S — have assumed semikey status in the higher Mint State grades within this series. The Barber dime series is popular because there are no great "stoppers" in it, as long as one excludes the great rarity 1894-S, the finest known example of which Heritage recently auctioned (FUN Signature, 1/2016) for \$1.997 million. This Superb Gem 1913-S is well-frosted and exhibits splendid luster radiating from both sides, with a light golden cast and glints of rose amid top-notch preservation. Population: 6 in 67 (2 in 67+), 0 finer. CAC: 5 in 67, 0 finer (1/16). NGC ID# 23FS, PCGS# 4864

PROOF BARBER DIME

1895 Dime, PR68 Ultra Cameo Sole Finest Ultra Cameo Certified

- 4808 1895 PR68 Ultra Cameo NGC.** Despite moderate availability in the absolute sense, the proof 1895 Barber dime is a great rarity at the Ultra/Deep Cameo level. This remarkable coin is the sole finest of three Ultra Cameos at NGC and ranks a full grade point higher than the best PCGS has to offer (2/16). The strike is flawless, and the preservation is comparable. Frost-white design elements are set against deeply mirrored fields, and the only hint of toning is traces of light golden color near the outer peripheries. NGC ID# 23G8, PCGS# 94879

MERCURY DIMES

1917 Dime, MS67 Full Bands

Ex: Green-Newman

- 4809 1917 MS67 Full Bands PCGS. CAC.** Ex: Col. Green-Newman. Frosty, effulgent luster runs over both sides of this nicely preserved and fully struck Superb Gem dime, showing light gold and pearl overtones with dots of sage at parts of the reverse and near the rims on each side. Not only one of the finest survivors in Full Bands, but also with the Col. Green-Eric Newman pedigree. It doesn't get better than this. Population: 26 in 67 (2 in 67+) Full Bands, 0 finer. CAC: 8 in 67 Full Bands (1/16).

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$1.00; Eric P. Newman Numismatic Education Society; Eric Newman Part II Signature (Heritage, 11/2013), lot 33157, as MS67+ Full Bands NGC-CAC. NGC ID# 23H2, PCGS# 4911

1920-D Dime, MS66 Full Bands Superb Preservation, Lovely Color

- 4810 1920-D MS66 Full Bands PCGS.** An almost flawlessly preserved 1920-D dime with impressively full definition of the central devices. Champagne luster has lovely rose warmth near the borders. The 1920-D is elusive in Full Bands above MS65 and is rare at the Premium Gem level. Finer pieces are exceedingly so. Population: 17 in 66 Full Bands, 7 finer (2/16). NGC ID# 23HC, PCGS# 4931

1921 Dime, MS65 Full Bands Bold Interior Detail

- 4811 1921 MS65 Full Bands PCGS.** A sought-after key date in all grades, particularly at the Gem Full Bands level. This piece is boldly defined on the central devices, even if slightly weak around portions of the outer peripheral legends. Dusky tan-gray toning emerges over the interiors, yielding to warm gold at the borders. Seldom available finer. NGC ID# 23HE, PCGS# 4935

1921 Dime, MS65 Full Bands Delicately Toned

- 4812 1921 MS65 Full Bands PCGS.** A frosty, golden-toned Gem example of this key Philadelphia issue. Although some die erosion is evident around the peripheries, the strike is bold, including razor-sharp definition of both the diagonal and horizontal fascies bands. Eye appeal is equally strong. PCGS reports just 47 finer examples (2/16). NGC ID# 23HE, PCGS# 4935

1921-D Dime, MS65 Full Bands Diamond-Sharp Strike

- 4813 1921-D MS65 Full Bands PCGS.** The 1921-D in Full Bands is scarce at the Gem grade level and rarely seen finer. This MS65 coin displays staggering definition that can only be described as completely full in all areas. Satin surfaces show traces of champagne toning while being unabraded. Eye appeal is superb. The astute specialist should not let this key-date coin escape. Population: 66 in 65 Full Bands, 24 finer (1/16). NGC ID# 23HF, PCGS# 4937

1927-D Dime, MS65 Full Bands Impressively Sharp

- 4814 1927-D MS65 Full Bands PCGS.** The 1927-D Mercury dime is quite scarce in Mint State. The issue is also notorious for its poor overall quality, especially weakness in the peripheries and in the central and diagonal bands (David Lange, 2005). This Gem displays fullness on all of the bands, and much better-than-average definition on the peripheral elements. Highly lustrous surfaces are covered in light gray and rainbow coloration on the obverse, while gray-tan patina on the reverse is sprinkled with russet. A couple of light obverse marks are not worthy of discussion. Population: 31 in 65 (3 in 65+) Full Bands, 13 finer (1/16). Ex: Houston Signature (Heritage, 11/2007), lot 60473. NGC ID# 23HV, PCGS# 4963

1927-S Mercury Dime, MS65 Full Bands
Strike Rarity in the Series

- 4815** 1927-S MS65 Full Bands PCGS. Delicate salmon-pink and ice-blue shades grace this thoroughly lustrous and assertively struck Gem. If not for a single tiny mark on the cheek, this coin would be a solid candidate for an even finer designation. The 1927-S is known for weakness on the central reverse bands and as a result, Full Bands coins (such as this attractive example) are rare. Population: 32 in 65 Full Bands, 25 finer (2/16). NGC ID# 23HW, PCGS# 4965

1928-D Dime, MS66 Full Bands
Sharp for the Issue

- 4816** 1928-D MS66 Full Bands PCGS. Known for irregular strikes and rare with the Full Bands designation, the 1928-D is often slightly soft on a few of the peripheral elements such as the present coin, including the 8 in date. Even so, the coin is bold through the all-important centers. Satiny and highly lustrous, this example shows lovely speckles of gold and charcoal patina near the reverse border — an impressively preserved Premium Gem. Population: 21 in 66 (1 in 66+) Full Bands, 5 finer (2/16).
Ex: FUN Signature (Heritage, 1/2008), lot 1987; Philadelphia Signature (Heritage, 8/2012), lot 3908. NGC ID# 23HY, PCGS# 4969

1942/1-D Dime, MS64 Full Bands
Notable Surface Quality

- 4817** 1942/1-D FS-101 MS64 Full Bands NGC. Hub die doubling on IN GOD WE TRUST as well as at the base of the 4 in the date are two of the less-noticed diagnostics of the key series overdate. In addition, the mintmark is repunched with a secondary D leaning west beneath the primary mintmark.
The FS-101 overdate is a challenging *Guide Book* variety in Mint State, although most such pieces exhibit Full Bands definition. This Choice example is consistently sharp and shows soft, satiny luster with warm tan-gold toning overall. Only a few light grazes are observed on the obverse portrait. Census: 24 in 64 Full Bands, 20 finer (2/16). NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

1945 Dime, MS65 Full Bands
Scarce So Well-Struck

- 4818** 1945 MS65 Full Bands NGC. This Gem Full Bands 1945 dime displays satiny luster with speckles of russet over pale champagne toning. The strike is full throughout the peripheral legends as well as the central devices. A few tiny marks are not out of line for the grade. This late-series Philadelphia issue is far scarcer than expected in high grade Full Bands. Census: 5 in 65 Full Bands, 11 finer (2/16). NGC ID# 5A98, PCGS# 5057

PROOF MERCURY DIME

1941 Mercury Dime, Top-Graded PR69
From the Gene Gardner Collection

- 4819 1941 PR69 NGC.** The remarkable condition and eye-catching coloration that define this marvelous proof Mercury dime type coin are immensely desirable qualities in their own right. In tandem, however, they make this top-graded specimen a must-have for a high-grade date set or Registry set. NGC reports two 1941 proofs in this highest-achieved grade, PCGS none (PCGS shows only a single PR69 Mercury dime of any date, a 1942). Across all dates and both services, only eight proof Mercury dimes have been awarded the unsurpassed PR69 grade (1/16). This piece is attractively framed in golden-orange, purple, and rose iridescence with minimally toned interiors. A tiny lamination in the left reverse field is the only break in the otherwise flawless surfaces of this dazzling specimen.
Ex: Long Beach Signature (Heritage, 6/2004), lot 8167; purchased by Eugene Gardner from Aspen Park Rare Coins (2/2012), as PR68 NGC; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98383, as PR68 NGC-CAC, which brought \$7,050. NGC ID# 27DM, PCGS# 5076

PROOF ROOSEVELT DIME

1951 Roosevelt Dime, PR68 Deep Cameo
Tied for Finest at PCGS

- 4820 1951 PR68 Deep Cameo PCGS.** The 1951 Roosevelt dime claims a proof mintage of 57,500 pieces, certainly a modest total for a modern proof issue. Cameo contrast is seldom seen on proof issues of the early 1950s, and Deep Cameo specimens are rare. This incredible PR68 specimen is among the finest-known survivors of this important date, with sharply detailed design elements and deeply mirrored fields that contrast dramatically with the frosty devices to create an intense cameo effect. The virtually pristine surfaces are completely brilliant and overall eye appeal is unsurpassed. Population: 2 in 68 Deep Cameo, 0 finer (1/16). NGC ID# 27EK, PCGS# 95226

TWENTY CENT PIECE

1875-CC Twenty Cent Piece, MS65
Only Collectible Carson City Issue

- 4821** 1875-CC MS65 PCGS. BF-2, R.1. The variety showing the date shifted left in relation to the shield point and Brunner and Frost's "High Close CC" reverse. This lovely Gem Carson City twenty cent piece displays typical weakness at the lower left of the obverse and corresponding point of the reverse. Both sides display pristine surfaces, satiny luster, and appealing iridescent toning in shades of rose and olive. The 1875-CC is the only collectible Carson City Mint twenty cent issue, and extremely popular as such. Only perhaps a dozen examples are certified finer at both services combined, discounting likely duplicates. Population: 28 in 65, 9 finer (1/16).
Ex: Long Beach Signature (Heritage, 2/2011), lot 3482. NGC ID# 23R6, PCGS# 5297

PROOF TWENTY CENT PIECES

1875 Twenty Cent, PR65 Cameo
Lightly Toned and Attractive

- 4822** 1875 PR65 Cameo PCGS. BF-1, R.1. Modestly contrasted beneath lavender-gray toning that blends over champagne-gray surfaces. This deeply reflective Gem proof Cameo twenty cent piece displays bold strike definition and unmarked surfaces. The 1875 is the first of four issues in the proof series, struck to the modest extent of 1,200 coins. Due to the scarcity of high-grade circulation strikes from this year, this Gem proof is an ideal date representative. Population: 11 in 65 Cameo, 3 finer (1/16). NGC ID# 23X7, PCGS# 85303

1876 Twenty Cent, Top-Grade PR68

- 4823** 1876 PR68 NGC. Of the odd-denomination minor coinage issues of the United States, the twenty cent piece is by far the shortest-lived series. Business strikes and proofs were coined in 1875 and 1876, with a combined total of only 1,110 coins struck in proof-only format in 1877 and 1878. Its downfall was directly tied to public confusion between the new twenty cent design and the quarter dollar. Several pattern proposals of the new denomination were issued in 1874 and 1875 but the Treasury preferred uniformity of design within a series of coins of a single metal.

The pattern most similar to the circulating quarter of that time, known by modern day collectors as Judd-1411, was the design chosen by Mint Director Henry Linderman. The obverse is similar to Gobrecht's Seated Liberty motif and the reverse only differs slightly in the design of the eagle, which was borrowed from Barber's Trade dollar. Given the fact that the diameter of the twenty cent piece is only 2.3 mm smaller than the quarter of the same generation, it is easy to see how one could become befuddled when encountering a twenty cent in the course of commerce. The Treasury must have anticipated the likelihood of confusion as the twenty cent piece is the only silver coin, with the lone exception of the three cent piece, ever issued for circulation by the U.S. government with a plain edge. Unfortunately, the elimination of an edge device was not enough of a difference, and the new denomination quickly fell out of favor with the public.

Only three 1876 twenty cent pieces have been accorded the astoundingly high grade of PR68 by NGC, and the only proof finer than PR66 at PCGS is a single PR67 Cameo (1/16). This coin is essentially perfect. Brightly mirrored fields enhance the deep aquamarine and rose toning seen over each side. The strike definition is pinpoint-sharp.

Ex: ANA Signature (Heritage, 8/2007), lot 1643; Central States Signature (Heritage, 4/2009), lot 2303; Greensboro Collection, Part V / ANA Signature (Heritage, 8/2015), lot 4009. NGC ID# 27H3, PCGS# 5304

EARLY QUARTERS

1806/5 Browning-1 Quarter, AU50
Original Surfaces, Popular Overdate

- 4824** 1806/5 B-1, R.2, AU50 PCGS. Tompkins Die State 2/3. A few fleeting glimpses of mint luster remain in protected areas on this attractive, moderately circulated overdate quarter. Liberty's hair strands and the eagle's plumage are strong for the AU50 grade, although slight weakness at the borders exists (as always for the B-1 variety). Delightful, old-silver toning blankets both sides, deepening at the edges around warm, silver-gray centers. Marks and abrasions are minimal on the nicely preserved surfaces. Population: 2 in 50, 31 finer (1/16).
From The Jim Hilands Collection. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

1807 B-1 Quarter, Near-Mint
Partly Lustrous and Unblemished

- 4825** 1807 B-1, R.2, AU58 PCGS. Tompkins Die State 2/2. Blushes of forest-green visit the reverse, but the majority of this Draped Bust type coin displays light golden-brown and silver-gray toning. Luster illuminates the borders, curls, and plumage. The surfaces are clashed but lack any consequential contact. NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

BUST QUARTERS

1818/5 B-1 Quarter, MS64
Album-Toned Example of the Overdate

- 4826** 1818/5 B-1, R.2, MS64 NGC. Tompkins Die State 2/2. An intermediate die state, clashed but not cracked. Sea-green, golden-brown, and gunmetal-gray toning enriches this satiny and unmarked Choice quarter, likely the result of careful preservation in an old-time coin board or album.
One of two overdated varieties for the issue, Browning-1 shares the same obverse with Browning-3. A short "C" in the denomination confirms the more-available B-1 variety. The flag of the underdigit is apparent within the upper loop of the second 8. Census: 29 in 64 (1 in 64+), 12 finer (2/16). NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

**1831 Large Letters Quarter, MS64
B-6, Small 1s, Short Crossbar on 3**

- 4827 1831 Large Letters, B-6, R.3, MS64 PCGS.** Large Letters. The Browning-6 is the scarcest die pair for the year, with narrow arrowheads and a short central crossbar on the 3 of the date. Slightly reflective fields surround sharply struck central motifs and bold peripheral elements. All of the star centers are complete or nearly so. A light dispersal of golden-gray toning is slightly deeper at the margins, while a few light marks and lines determine the near-Gem grade. Population (Large Letters varieties): 15 in 64, 5 finer (1/16).
From *The Jim Hilands Collection*. NGC ID# 23RW, PCGS# 38985 Base PCGS# 5349

**1834 B-4 Quarter, MS64
Attractive Multicolor Toning**

- 4828 1834 B-4, R.1, MS64 PCGS.** Tompkins Die State 1/2. Forest-green, dove-gray, and peach-gold toning enriches this satiny and pleasing near-Gem. The strike is sharp except on stars 1 and 11. The eye appeal is outstanding despite a mint-made flan flaw on the F in OF. A relatively early die state for B-4, despite the many reverse cracks. NGC ID# 23RZ, PCGS# 38995 Base PCGS# 5353

**1835 Capped Bust Quarter, MS63
Popular B-1 Variety**

- 4829 1835 B-1, R.1, MS63 NGC.** Impressive cartwheel luster and faint traces of honey-gold toning affirm the eye appeal of this sharply struck quarter. Initial evaluation suggests an even finer grade, but patience and a glass locates a faint graze on the cheekbone. Census: 21 in 63 (2 in 63+), 24 finer (1/16).
Ex: *FUN Signature* (Heritage, 1/2007), lot 2894; *Chicago Signature* (Heritage, 8/2011), lot 3729. NGC ID# 23S2, PCGS# 38997 Base PCGS# 5354

1836 B-3 Quarter, MS64+

- 4830 1836 B-3, R.1, MS64+ NGC.** Tompkins Die State 4/4. Splendid aquamarine toning fills the peripheries. The fields and motifs display almond-gold and stone-gray shades. This coruscating quarter is minimally abraded and sharply struck. Despite the several die cracks on both sides, the coin is only a middle-to-late die state, since it lacks cracks across the cheek and over the 3 in the date. NGC ID# 23S3, PCGS# 39007 Base PCGS# 5355

**1837 B-4 Quarter, Important MS65
Finest Known of the Variety**

4831 1837 B-4, R.3, MS65 PCGS. CAC. The Coinage Act of 1837 changed the mandated alloy ratio to 90% silver, 10% copper, resulting in a nominal reduction in the weight of quarters. While half dimes and dimes transitioned to the Seated design, Capped Bust quarters continued to be minted in both 1837 and 1838, but in reduced quantities from the higher mintages in 1835 and 1836. The official 1837 mintage was 252,400 pieces, although some numismatists believe part of the 1838 mintage consisted of 1837-dated coins. (A total of six die pairs produced the 1837 coins, while only a single die marriage is known for the larger-mintage 1838 issue.)

This outstanding Gem 1837 example of the scarce Browning-4 variety was heretofore unknown in any of the Condition Census rosters. Both the Tompkins and Rea-Koenings-Haroutunian Census top out at the MS64 level, and Heritage has never sold a B-4 example finer than MS64. The coin has been long-absent from the market, still housed in a first generation PCGS holder. Lilac and rose-gray toning merges with pale-blue and reddish-gold highlights for delightful eye appeal. The strike is strong for the issue, with only slight blending on a few obverse star centers. A few tiny marks exist beneath the toning, but none are distracting in the least. From The Dr. John Young Collection. NGC ID# 23S4, PCGS# 39013 Base PCGS# 5356

SEATED QUARTERS

**1843 Quarter, Elusive MS65
One Certified Finer, Ex: Gardner**

4832 1843 MS65 PCGS. Briggs 1-B. The 1843 Seated quarter, struck to the extent of 645,000 coins, is available in lower grades but seldom seen in Mint State and extremely elusive in Gem condition. Certified in an old green-label holder, this Gem PCGS example shows mostly rose and bluish patina with glints of iridescent color near the rims on each side. Frosty luster complements a paucity of mentionable marks. One of two graded at this level by PCGS with none finer; NGC shows three MS65 with one MS66 finer (1/16). Ex: Doug Noblet Collection (Bowers and Merena, 8/2001), lot 131; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98333. NGC ID# 4B6W, PCGS# 5404

**1843-O Small O Quarter, MS64
Extremely Elusive So Fine, Ex: Gardner**

4833 1843-O Small O MS64 PCGS. Briggs 1-A. The large mintage of this issue, including both Small O (struck from several die pairs) and Large O mintmarks (single die pair known), was a considerable 968,000 coins, but this issue circulated heavily. The average grade of certified survivors is merely XF40. The 1843-O is an extremely elusive issue in higher Mint State grades.

The surfaces are indeed heavily toned on the Gardner coin, and the old photo from this coin's 1999 appearance on our website is unflattering. However, under a good light some beautiful patina appears, including prevailing rose and blue tones and vivid cherry hues on the eagle's legs, fletchings, and the olive branch and leaves. The luster is a bit dull overall, subdued due to die rust, but the strike is quite sharp throughout. A coin that bears a second and third look. Without regard to mintmark sizes, PCGS reports two MS64 in the finest position, one of which has not traded publicly since a 2002 Goldberg auction. NGC lists a lone MS64 (designated as a Large O) and a single MS65 finer (1/16).

Ex: Long Beach Signature (Heritage, 6/1999), lot 5553; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98334. NGC ID# 23SS, PCGS# 5405

**1849 Seated Quarter, Vivid MS65
Sole Gem CAC Example**

4834 1849 MS65 PCGS. CAC. Briggs 1-A. The famous and popular Compass Point reverse, showing a circular anomaly at the top of the leftmost vertical shield stripe. Much of the reverse periphery shows light die cracks. The obverse date is high and heavy, and the stars show recutting. The present Gem is a lovely example of this early Seated quarter issue, showing uniformly well-struck rose-pink devices that contrast marvelously against the sky-blue fields on both sides. One small area of charcoal patina shows under the right (facing) eagle's wing. Population: 2 in 65, 0 finer (1/16). This is the sole CAC example in this grade. NGC ID# 23T2, PCGS# 5413

1853-O Arrows and Rays Quarter, MS65
High-Grade Survivor, Ex: Gardner

4835 1853-O Arrows and Rays MS65 NGC. Briggs 1-B. Briggs' 2008 series update in the Coin Dealer Newsletter called this issue "fairly easy to locate in all grades AG-XF; AU coins very scarce and Mint State coins downright rare." The large mintage figure of more than 1.3 million pieces is deceptive. These lighter-silver-weight coins were meant to restore silver coinage to circulation — and circulate they did. The average certified survivor is less than XF40. This Gem example shows considerable luster emanating from surfaces that show little post-strike contact amid largely silver-gold patina, with daubs of jade, ochre, and mauve more visible on the reverse. Excellent eye appeal.

Briggs 1-B shows notable die clashing on both sides. Like many examples, the present Gem displays a "halo" effect around many of the devices, an attempt, per Larry Briggs, to reengrave the dies to prolong their life. The obverse die nonetheless appears in an advanced state. Aside from the prominent halo effect on the right-side stars, an extremely bold die clash runs from Liberty's lower curls through the pole and upraised forearm. A couple of wispy die cracks appear elsewhere on that side. The reverse shows the legend heavily recut, with the rays extending through the mintmark. Census: 1 in 65, 2 finer (2/16).

Ex: FUN Signature (Heritage, 1/2010), lot 2512; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98426 (as PCGS MS64). NGC ID# 23U5, PCGS# 5428

1856-S Quarter, MS62
Mint State Rarity

4836 1856-S MS62 PCGS. Briggs 1-B. With merely two dozen or so Mint State grading events at the two services combined, there can be little argument over the condition rarity of the 1856-S quarters. The mintage was small to begin with — just 286,000 pieces — and the coins were soon immersed in the small change-starved West Coast commerce, where most were lost to attrition.

The coin displays faint, pale-blue color with equally faint peach-gold at the borders, sprinkled with golden-gray accents. Mint luster shines through the light patina. A few minor surface abrasions are visible with a glass. The star centers, Liberty's hair strands, and the eagle's plumage confirm a tack-sharp strike. This MS62 example is one of five pieces so-graded at PCGS, with 16 examples reported in finer grades (2/16). NGC ID# 23TD, PCGS# 5440

**1867 Quarter, Underrated MS64
Low-Mintage Issue of 20,000 Pieces
One Coin Graded Finer, Ex: Gardner**

4837 1867 MS64 PCGS. Briggs 1-A. The magnificent Gardner example of the 1867 quarter exhibits soft luster filtering through rich patina, a mix of rose and blue on the obverse with navy and violet across the reverse. The strike is quite strong, and only a few small marks are consistent with the grade. Certified in an early small-size PCGS green-label holder. Extensive die lapping and subsequent die clashing on portions of Liberty's gown, stomach area, BER, and the area right of the shield on the obverse, and the ribbon left of IN on the reverse.

Gene Gardner owned six examples of the 1867 quarter, five in Mint State, with this and one other MS64 PCGS coin tied for the finest. The other MS64 PCGS piece was lot 30386 in our Gardner Part I Signature (Heritage, 6/2014), where it realized \$14,100. Many of the high-grade survivors of this issue that appear in our Permanent Auction Archives are of the Briggs 1-A die pair. The 1867 issue was struck to the extent of only 20,000 pieces, and as noted above, only one coin is currently known above the Gem grade level. This piece is tied for the finest at PCGS with two other submissions in MS64; NGC shows none in MS64 but one finer, an MS66 (1/16).

Ex: *Houston Signature* (Heritage, 12/2010), lot 3532; *Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015), lot 98458. NGC ID# 23UD, PCGS# 5470

1874 Arrows Quarter, Impeccable MS66

4838 1874 Arrows MS66 PCGS. Impeccable preservation is visible throughout both sides of this unmarked Premium Gem coin, which boasts frosty luster on lightly toned surfaces that mellow only slightly to golden toning at the extreme rims. All star centers are sharp on the obverse, Liberty's head and gown are well-detailed, and the eagle is similarly boldly impressed, putting this coin into a small minority. Population: 5 in 66, 0 finer (1/16).
From *The Jim Hilands Collection*. NGC ID# 23VX, PCGS# 5494

**1874-S Arrows Quarter, MS66+
Brilliant, Frosted Mint Luster**

4839 1874-S Arrows MS66+ PCGS. CAC. Frosted, untuned mint luster sets this Premium Gem Arrows type quarter aglow with a radiant cartwheel effect. Unless viewed beneath a loupe the fields appear flawless, and only a few faint grazes on the high points of Liberty's figure preclude a Superb Gem designation from PCGS. A few of the right-hand stars lack complete definition, but the remainder of the design elements are sharply rendered. Population: 35 in 66 (2 in 66+), 5 finer (2/16). NGC ID# 23VY, PCGS# 5495

**1874-S Seated Liberty Quarter, MS67
None Finer at NGC**

4840 1874-S Arrows MS67 NGC. Briggs 2-A. The 1874-S With Arrows quarter claims a mintage of 392,000 pieces. Most Mint State examples come from a hoard of 80-100 pieces that surfaced in a bank in 1949. This delightful Superb Gem is sharply detailed throughout, with impeccably preserved lustrous surfaces, under attractive shades of golden-brown and lavender-gray toning. Census: 10 in 67, 0 finer (2/16). NGC ID# 23VY, PCGS# 5495

**1879 Seated Liberty Quarter, MS67
Exceptional Low-Mintage Type Coin**

4841 1879 MS67 PCGS. CAC. Briggs 1-A. Despite a limited mintage of 13,600 pieces, the 1879 Seated Liberty quarter is surprisingly easy to locate in high grade. Contemporary collectors may have noticed the low mintage at the time of issue and saved a number of high-quality specimens for future generations. Of course, the 1879 is still quite rare at the MS67 grade level.

This spectacular Superb Gem exhibits well-detailed design elements, with just a trace of softness on Liberty's hair and bodice. The impeccably preserved surfaces radiate vibrant mint luster and the peripheries are visited by vivid shades of greenish-gold, cerulean-blue, and magenta toning. Traces of prooflike reflectivity are evident in a few selected areas. Eye appeal is terrific. Housed in a green label holder. Population: 23 in 67 (2 in 67+), 2 finer (2/16). From *The Dr. John Young Collection*. NGC ID# 23VB, PCGS# 5511

**1886 Seated Liberty Quarter, MS66
Spectacular Multicolor Toning**

4842 1886 MS66 PCGS. Briggs 1-A From a mintage of just 5,000 pieces, Larry Briggs calls the 1886 "the rarest 'P' mint quarter in the series." This delightful Premium Gem exhibits deeply reflective prooflike fields and well-detailed frosty design elements throughout. The impeccably preserved surfaces are blanketed in attractive shades of greenish-gold and cerulean-blue toning. Population: 17 in 66 (1 in 66+), 3 finer (2/16). NGC ID# 23VJ, PCGS# 5518

**1886 Quarter, Prooflike MS67
5,000 Coins Struck, None Certified Finer**

4843 1886 MS67 PCGS. There was little commercial need, if any, for additional quarters throughout the 1880s, as the Treasury vaults contained sufficient quantities from previous years to satisfy demand. Mint resources and bullion were instead exhausted on silver dollar production, as dictated by the Bland-Allison Act of 1878. Of the quarter issues from this period, the 1886 has not only the lowest mintage of the decade but one of the smallest productions in the entire series (5,000 coins). This prooflike Superb Gem has flashy mirrors overlaid in delicate golden patina. Sharply struck devices are lightly frosted with trivial softness on the date and olive leaves. Population: 3 in 67, 0 finer (1/16). NGC ID# 23VJ, PCGS# 5518

**1887 Quarter, MS67
Low Mintage, Great Eye Appeal**

4844 1887 MS67 PCGS. CAC. A horizontal die scratch on the lower portion of Liberty's shield confirms this is one of just 10,000 circulation strikes. Luminous luster glows beneath surfaces that are beautifully toned in ice-blue, sea-green, and violet hues. The motifs are well-struck with typically flat stars and olive leaves. This is one of the lowest-mintage dates in the series, a fact that was not lost on contemporary collectors. Many coins were set aside, but few can match the quality of this Super Gem. Population: 19 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 23VK, PCGS# 5519

PROOF SEATED QUARTERS

1842 Small Date Quarter, PR64 Cameo
Extremely Rare Proof-Only Issue; Six Known
Ex: Phil Kaufman Collection

4845 1842 Small Date PR64 Cameo NGC. Briggs 1-A. Ex: P. Kaufman. This 1842 Small Date proof quarter is one of only six confirmed pieces, two of which are permanently impounded in the cabinets of the American Numismatic Society and the Smithsonian Institution. Proof 1842 quarters are known for both the Small Date and Large Date varieties. While many additional Large Date quarters exist in circulated and Mint State grades, the Small Date variety is a proof-only issue, thus the six pieces in our roster are the only coins confirmed, just four of which are available to collectors.

Little is known about early appearances of the 1842 Small Date proof quarter. One citation appeared in the April 1975 *Gobrecht Journal*. In an article titled "Three Rare Quarters," Scott Rubin writes that the first offering of an 1842 Small Date that he could find was in the Charles Steigerwalt June 1893 Fixed Price List #39, where a proof was listed at \$20.

The following roster of 1842 Small Date proof quarters is based on a survey of plated auction catalogs, along with information provided in the listings of previous catalogers.

Roster of 1842 Small Date Quarters

1. **PR66 NGC.** Norweb Collection, Part II (Bowers and Merena, 3/1988), lot 1572; Somerset Collection (Bowers and Merena, 5/1992), lot 1179; Bradley Hirst; Richmond Collection Part III (David Lawrence, 3/2005), lot 1516; Rod Sweet; FUN Signature (Heritage, 1/2015), lot 4097.
2. **PR65 PCGS.** Harlan P. Smith Collection (Chapman Brothers, 1906), a tentative pedigree adapted by Q. David Bowers from Walter Breen; Jerome Kern Collection (B. Max Mehl, 5/1950), lot 1432; Eliasberg Collection (Bowers and Merena, 4/1997), lot 1428; Rarities Sale (Bowers and Merena, 7/2002), lot 210; Greensboro Collection, Part IV / Central States Signature (Heritage, 8/2013), lot 5587; Eugene Gardner Collection, Part II (Heritage, 10/2014), lot 98393, realized \$282,000.
3. **PR64 Cameo NGC.** Connecticut family in the 1940s, part of a complete silver and minor proof set; Oscar Schilke; Hollinbeck-Kagin, still in set; Q. David Bowers, quarter only; Century Sale (Paramount, 4/1965), lot 872; R.L. Miles (Stack's, 4/1969), lot 39; Steckler Collection (Stack's, 9/1874), lot 39; Robison Collection (Stack's, 2/1982), lot 1304; Auction '86 (RARCOA, 7/1986), lot 597; August Sale (Mid-American Rare Coin, 8/1987), lot 332; Stanley Simon Type Collection of United States Coins (Stack's, 1/1989), lot 432; Philip Kaufman Collection / Rosemont Central States Signature (Heritage, 4/2008), lot 2380; our current consignor. **The present coin.**
4. **PR64 PCGS.** James A. Stack Collection (Stack's, 3/1975), lot 55; Julian Leidman; private collection; ANA Sale (Bowers and Ruddy, 8/1978), lot 731; Reed Hawn Collection (Stack's, 10/1993), lot 389.
5. **Proof.** American Numismatic Society Collection.
6. **Proof.** Mint Cabinet; Smithsonian Institution.

Additional Appearances

- A. **Proof.** Fifth Semi-Annual Sale (W. Elliot Woodward, 10/1864), lot 293, part of a five-piece silver proof set, realized \$62.50 to J.N.T. Levick.
- B. **Proof.** Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 837, part of a seven-piece silver and minor proof set.
- C. **Proof.** Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 838, part of another seven-piece silver and minor proof set.
- D. **Proof.** Fixed Price List #39 (Charles Steigerwalt, 6/1893).
- E. **Proof.** Richard B. Winsor Collection (S.H. & H. Chapman, 12/1895), lot 1066, part of a seven-piece silver and minor proof set.
- F. **Proof.** Collection of a Prominent American/H.O. Granberg (U.S. Coin Company, 5/1915), lot 620.
- G. **Brilliant Proof.** Granberg/Newcomer/Pray Collections (B. Max Mehl, 11/1919), lot 29, part of a complete silver and minor proof set that Mehl broke up and offered individually.

The coin displays a couple of distinct pedigree markers that establish its provenance. One is a tiny spot below the left base of the rock, at about 7:30 near the rim, and the other is a faint linear planchet defect that extends from the right bottom serif of the right upright of the M in AMERICA into the field above the eagle's left (right facing) wing.

A sparkling near-Gem, the coin is essentially brilliant, save for an occasional whisper of barely discernible light tan-gray patina. A well-executed strike leaves uniformly sharp definition on the design elements, which further accentuates the cameo contrast between the satiny motifs and the deeply mirrored fields. The surfaces are devoid of mentionable abrasions. It is only the presence of a few faint hairlines in the fields that may keep this delightful specimen from attaining Gem status. It is the only 1842 Small Date proof quarter with designated Cameo contrast. NGC ID# 23SM, Base PCGS# 5536

1856 Quarter, PR64 Cameo
Very Scarce Pre-1858 Contrasted Proof

- 4846** 1856 PR64 Cameo PCGS. CAC. Briggs 10-H. Pronounced obverse die doubling is most visible at Liberty's lower gown outline, and the 8 in the date shows minor recutting. A die bulge is sharply evident beneath the A of AMERICA above the wing shoulder. An unknown quantity of proofs were "made to order" at the Mint in 1856, and perhaps 75 to 100 proofs survive today, although a mere handful exist with cameo contrast. This glassy-mirrored example is untoned with bold contrast and a pinpoint-sharp strike. A few delicate lines exist on the glittering surfaces — the only mitigating factor from an even higher grade. Population: 4 in 64 Cameo, 1 finer (1/16). NGC ID# 23WH, PCGS# 85552

1859 Seated Quarter, Toned PR67
Tied for Finest Non-Cameo at PCGS
Ex: Gardner

- 4847** 1859 PR67 PCGS. CAC. Briggs 2-B. The 1859 is the first readily collectible proof issue in the Seated Liberty quarter series. The Mint struck 800 pieces, and enough survive in the lower grades that this date is obtainable for many collectors. High-grade pieces, however, are conditionally elusive, and are major rarities at the Superb Gem level. The present offering should not be overlooked. Sharp stars surround a bold Liberty on the obverse, and the eagle's plumage and talons are crisply struck. Glassy reflectivity in the fields leaves no doubt as to this coin's proof origin, and deep aquamarine toning on the reverse complements softer golden-gray, lavender, and sea-green hues on the obverse. This PR67 piece is tied with two others as the finest non-Cameo at PCGS. This is one of three PR67 with the CAC green approval sticker (2/16).
Ex: Purchased by Eugene Gardner from Joseph O'Connor (2/2008); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98379. NGC ID# 23WL, PCGS# 5555

1868 Seated Quarter, PR66
One Example Finer at Both Services
Ex: Gardner

- 4848 1868 PR66 PCGS. Briggs 2-B.** Quarter dollar mintages remained low in 1868, both in circulation-strike and proof formats. The Philadelphia Mint accomplished a run of 29,400 coins for circulation (though silver did not circulate widely at the time) plus 600 proofs. Like the years immediately preceding and following it, the proofs of 1868 are subject to stronger-than-average demand because of the limited number of well-preserved circulation strikes. Navy and greenish-blue borders give way to red-violet and pumpkin-gold hues, surrounding brilliant centers on each side of this high-end example — a Premium Gem proof of exceptional quality. The pleasingly contrasted surfaces fail to yield any noticeable marks, save for a small planchet flaw (as made) above (I) N G(OD) on the reverse. Population: 9 in 66, 0 finer (1/16).
Ex: *Elite Coin Auction (Superior, 7/2003), lot 1054; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98521. NGC ID# 23WZ, PCGS# 5567*

1883 Seated Quarter, PR68 Cameo
Bold White-On-Black Contrast

- 4849 1883 PR68 Cameo PCGS. CAC. Briggs 1-A.** Proofs were struck from two die pairs in 1883 for a total mintage of 1,039 pieces, yet the issue is surprisingly challenging with cameo contrast and it is elusive-to-rare in the highest grades. The Briggs 1-A die pair is known for remnants of a misplaced 3 in the dentils, as well as numerous die scratches from the engraver's attempt to obscure the errant digit. Other die lines appear across the eagle's tailfeathers.
A tack-sharp strike and nearly flawless surface preservation give this proof remarkable eye appeal. Blaze-white surfaces are glassy-mirrored and display strong contrast with the frosted central motifs. The white-on-black appearance suggests a Deep Cameo designation is not out of the question for this outstanding Superb Gem. The current coin is tied with two others for honors as the numerical finest among all proof 1883 quarters at PCGS. Population: 3 in 68 (1 in 68+) Cameo, 0 finer (1/16). NGC ID# 23XF, PCGS# 85584

1885 Seated Quarter, Richly Toned PR67 Cameo
Ex: Gene Gardner

- 4850 1885 PR67 Cameo PCGS. CAC.** Each side is strongly contrasted with frosty central motifs set against jet-black fields. Green and peach-orange elements accent rich shades of blue and violet that surround the lightly toned interiors. A Superb Gem proof of outstanding all-around quality. Both the proofs and the circulation strikes of this date were issued in only token mintages. Population: 11 in 67 Cameo, 2 finer. CAC: 6 in 67 Cameo, 3 finer (1/16).
Ex: Purchased from U.S. Coins (11/2001); Gene Gardner; Gardner Collection, Part IV Signature (Heritage, 10/2015), lot 98345 as PR67 NGC-CAC, where the Heritage cataloger noted the strong contrast over each side. NGC ID# 23XH, PCGS# 85586

1891 Seated Liberty Quarter, PR66
Rare Deep Cameo Example

- 4851 1891 PR66 Deep Cameo PCGS. CAC.** From a small proof mintage of just 600 pieces, the 1891 Seated Liberty quarter is seldom encountered with Deep Cameo surfaces. This impeccably preserved Premium Gem exhibits well-detailed design elements, with a thick coat of mint frost that contrasts dramatically with the deeply mirrored fields. Population: 3 in 66 Deep Cameo, 1 finer (2/16). NGC ID# 23XP, PCGS# 95592

1891 Quarter, PR67+ Deep Cameo
The Finest Deep Cameo Certified

- 4852 1891 PR67+ Deep Cameo PCGS. CAC. Briggs 1-A.** This amazing coin displays profoundly mirrored, jet-black fields that contrast nicely against the frosted, ice-white devices, producing the white-on-black appearance that collectors so desire in Deep Cameo/Ultra Cameo coinage. This fully struck example is devoid of any other color save for wisps of champagne around the periphery, but the deep contrast should produce a frisson of excitement in the most jaded collector. The 1891 proof Seated quarter issue (600 specimens) was the last of the series, as the Barber design would be introduced in 1892. Population: 1 in 67 (1 in 67+) Deep Cameo, 0 finer (1/16).
Ex: FUN Signature (Heritage, 7/2010), lot 3596. NGC ID# 23XP, PCGS# 95592

BARBER QUARTERS

1893-S Quarter, Toned MS65, Conditionally Rare

- 4853 1893-S MS65 PCGS.** This second-year San Francisco Barber quarter issue was not saved in quantity and is a distinct condition rarity, even at the Gem level. Rich and dappled green-gold, tan, garnet, and umber toning crosses warmly lustrous surfaces. The patina on the reverse is a touch lighter. Population: 13 in 65, 6 finer (1/16).
Ex: *FUN Signature (Heritage, 1/2011)*, lot 3463. NGC ID# 23XY, PCGS# 5606

1893-S Barber Quarter, MS66+ Conditionally Rare

- 4854 1893-S MS66+ PCGS.** This San Francisco issue is elusive in Mint State but becomes a genuine rarity in MS65 or better condition. Superb Gems are prohibitively rare. This Plus-designated Premium Gem example offers a degree of quality and eye appeal that few collectors will have a chance to acquire. The strike is impressively sharp, and satiny luster glows beneath russet-gold toning. The reverse fields show subtle reflectivity. A couple of small marks on Liberty's portrait are all that preclude a full Superb Gem designation from PCGS. Population: 4 in 66 (1 in 66+), 2 finer (1/16). NGC ID# 23XY, PCGS# 5606

1916 Barber Quarter, Vibrant MS67 Tied for Finest Known

- 4855 1916 Barber MS67 PCGS.** The dazzling silver luster on this Superb Gem final-year Barber quarter captivates the eye, while the well-defined motifs and stellar surface preservation complete the visual appeal. The reverse is heavily frosted and the obverse shows faint parallel die striations in the fields, which aid in the spectacular surface glow. A blush of light golden toning graces each side. No examples are certified finer at either service. PCGS population: 5 in 67, 0 finer (2/16). NGC ID# 2425, PCGS# 5673

PROOF BARBER QUARTERS

1892 Quarter, Beautifully Toned PR68 Old Holder, Starkly Contrasted

- 4856 1892 PR68 NGC. CAC.** Type Two Reverse, as are most 1892 proofs. This magnificent proof 1892 Barber quarter is among the finest known of this debut issue. The coin is starkly contrasted beneath vivid multicolor toning, housed in a prior generation holder without a Cameo designation. Only four non-Cameo-graded coins have been CAC-endorsed in this lofty grade, and the only '92 proof certified numerically finer by either service is a single PR69 Deep Cameo at NGC. Champagne, violet, and navy-blue hues paint the liquidlike mirroring of the fields on this coin, while the razor-sharp motifs exhibit thick mint frost. An old-time coin in an old holder. Census: 12 in 68, 0 finer (2/16).
From *The Dr. John Young Collection*. NGC ID# 2427, PCGS# 5678

1894 Quarter, PR68, Rare So Fine, Excellent Color

- 4857 1894 PR68 NGC. CAC.** Old-time concentric toning in shades of aquamarine, violet, and sun-gold adorn the deeply mirrored fields and sharp, frosty devices of this remarkable 1894 proof quarter. The coin is housed in an old no line "fatty" holder without a Cameo designation, but field-device contrast is moderately apparent on each side. The strike is full. Proof 1894 quarters are extremely rare in PR68, with or without cameo qualities. CAC has only endorsed two coins this fine, both non-Cameo. Census: 4 in 68 (1 in 68+), 0 finer (2/16).

From The Dr. John Young Collection. NGC ID# 2429, PCGS# 5680

1894 Barber Quarter, PR68 ★ Cameo
Gorgeous Rainbow Toning, Ex: Gardner

- 4858 1894 PR68 ★ Cameo NGC.** The 1894 had one of the higher proof mintages of the period and is proportionately available in grades through PR66. Finer pieces, however, are conditionally scarce and major rarities at the lofty PR68 level, with or without a Cameo designation. Fully rendered design elements beautifully accent the deep mirroring in the fields on each side of this stellar coin amid vivid, concentric bands of rainbow toning. The relief elements are noticeably frosted with modest cameo contrast, despite the array of toning over each side. Census: 1 in 68 Cameo (1 in 68 ★ Cameo), 1 finer (1/16).

Ex: Pre-Long Beach Sale (Superior, 9/1999), lot 1186; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98423. NGC ID# 2429, PCGS# 85680

1895 Barber Quarter, PR67 Cameo
Only 880 Pieces Struck

- 4859 1895 PR67 Cameo PCGS. CAC.** From a nominal proof mintage of 880 pieces, this spectacular Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices to create a dramatic cameo effect. Eye appeal is terrific. Population: 10 in 67 (2 in 67+) Cameo, 7 finer (2/16). NGC ID# 242A, PCGS# 85681

1896 Quarter, Border-Toned PR68
Ice-White Motifs, Deep Watery Fields

- 4860 1896 PR68 NGC. CAC.** Mind-blowing — there is no other way to describe the impact this 1896 proof makes on the eyes. Tack-sharp relief elements display genuinely glowing frost-white luster, while the depth of the mirroring in the fields seems almost unreal. Old-time sun-gold, violet, and ocean-blue toning hugs the borders, while the interiors remain nearly brilliant to accentuate the Cameo effect. A loupe exposes the flawless preservation of the fields. CAC has endorsed three non-Cameos in this grade and none finer; Ultra Cameo coins in this grade have also seen three approvals at CAC with none finer. Census: 19 in 68 (2 in 68 ★), 0 finer (2/16).

From The Dr. John Young Collection. NGC ID# 23Y7, PCGS# 5682

1897 Quarter, Iridescent PR67
Immeasurable Eye Appeal

- 4861 1897 PR67 NGC. CAC.** A beautifully original Superb Gem 1897 proof, housed in a prior generation holder without a Cameo designation. Measurable field-device contrast is a hallmark of each side, accompanied by razor-sharp detail and immaculate preservation. Iridescent toning consists primarily of champagne-gray, olive, lavender, and steel-blue hues, with occasional amber and lilac accents. The eye appeal is remarkable. CAC has approved only five non-Cameos in this grade and one finer. Census: 17 in 67 (2 in 67+), 6 finer (2/16).

From The Dr. John Young Collection. NGC ID# 242C, PCGS# 5683

**1898 Quarter, Toned PR68
Stark Cameo Obverse**

- 4862 1898 PR68 PCGS.** Tied for the finest non-Cameo at PCGS. The strike is needle-sharp, and the preservation is immaculate. The obverse is starkly contrasted beneath light golden toning with the faint remnant of a print on Liberty's neck. The reverse is deeply toned in lavender-gray, gold, and amber hues that preclude field-device contrast. Housed in an old green label holder and immensely desirable. The 1898 proof is rarely seen this fine. Population: 5 in 68, 0 finer (2/16).

From The Dr. John Young Collection. NGC ID# 242D, PCGS# 5684

**1899 Quarter, Registry-Grade PR68
Sole CAC Coin This Fine**

- 4863 1899 PR68 NGC. CAC.** The 1899 proof quarter is undeniably rare at the PR68 level, with or without cameo qualities. This remarkable piece possesses moderate field-device contrast beneath rich toning, but the prior generation NGC slab does not feature a Cameo designation. This is the only CAC-endorsed coin at the PR68 numeric level. The strike is fully rendered, and the fields display deep mirroring. Lovely violet, gold, and amber hues encompass each side. Census: 7 in 68, 0 finer (2/16).

From The Dr. John Young Collection. NGC ID# 242E, PCGS# 5685

**1902 Quarter, Multicolor PR68
Sole Finest at CAC**

- 4864 1902 PR68 NGC. CAC.** This top-grade 1902 proof is conditionally rare and a full grade point finer than anything at PCGS. NGC has seen five non-Cameos at this finest numeric level, of which the present coin is the only one with a CAC endorsement. Razor-sharp design elements exhibit heavy mint frost, and the eagle is starkly set off from the mirrored fields; the obverse portrait is less contrasted beneath vivid sky-blue, violet, and sun-gold toning. Similar colors encompass the reverse margins but lighten over the central eagle. A truly remarkable example. Census: 5 in 68, 0 finer (2/16).

From The Dr. John Young Collection. NGC ID# 242H, PCGS# 5688

**1904 Quarter, Toned PR68
The Sole Finest Non-Cameo at CAC
Moderate Obverse Contrast**

- 4865 1904 PR68 NGC. CAC.** A dash of turquoise rim toning graces the upper obverse border, while the remainder of that side displays rich golden color; the reverse has a deep blend of aquamarine, lavender, and mint-green hues. This sharp 1904 proof quarter is a great rarity at the PR68 level and is the only so-graded non-Cameo at CAC. The obverse is noticeably contrasted, the reverse less so. Housed in a prior generation holder. Census: 5 in 68 (1 in 68 ★), 1 finer (2/16).

From The Dr. John Young Collection. NGC ID# 242K, PCGS# 5690

**1905 Quarter, PR68
Beautiful Old-Time Toning
Modest Cameo Contrast**

- 4866 1905 PR68 NGC. CAC.** The 1905 proof quarter is rare at the PR68 level and unknown finer. This vividly toned, old-time example is of Condition Census quality. Housed in a prior generation holder, there is no Cameo designation, although measurable contrast adorns each side, even through the rich patina. The obverse is encompassed by sun-gold, violet, and ocean-blue, while the reverse shows similar colors but with an area of brilliance in the center — the eagle is starkly set off from the fields. A sharp proof and one of only two PR68 pieces at CAC (both non-Cameos). Census: 5 in 68, 0 finer (2/16).

From The Dr. John Young Collection. NGC ID# 242L, PCGS# 5691

**1907 Quarter, Attractively Toned PR68
Rare Top-Grade CAC Coin
Substantial Obverse Contrast**

- 4867 1907 PR68 NGC. CAC.** This top-grade Registry coin has thickly frosted devices. The obverse shows considerable cameo contrast, while the reverse is slightly subdued in that regard by the toning palette. Both sides display irregularly patterned gold, lilac, mint-green, and sky-blue with amber accents. This piece is housed in a prior generation holder and is one of only three CAC-endorsed non-Cameos in this lofty grade and none are finer. Any 1907 proof is rare this fine. Census: 14 in 68 (2 in 68 ★), 0 finer (2/16).
From The Dr. John Young Collection. NGC ID# 242N, PCGS# 5693

**1908 Barber Quarter, PR68
Old-Time Toning, Old Green Holder**

- 4868 1908 PR68 PCGS. CAC.** This high-end 1908 proof is tied for the finest non-Cameo certified and is one of only four coins in this grade with CAC approval. Both sides display olive, gold, amber, and blue toning with the reverse eagle somewhat set off from the fields; Liberty's portrait is too deeply toned to qualify for a Cameo grade. The eagle's right (facing) talons are a trifle soft, but there is no other strike weakness. Housed in an old green label holder. Population: 6 in 68, 0 finer (2/16).
From The Dr. John Young Collection. NGC ID# 242P, PCGS# 5694

**1908 Quarter, Conditionally Rare PR68
Contrasted Through Rich Toning**

- 4869 1908 PR68 NGC. CAC.** The 1908 is another proof Barber quarter that is unknown in Ultra Cameo and rare in Cameo. This sharp, vividly toned Registry coin is among the finest non-Cameos known, although a suggestion of field-device contrast emerges from the toning on each side. Deep, original mint-green, sky-blue, and lavender-rose paint the mirrored fields and frosty motifs. CAC has endorsed only four 1908 proofs this fine, all non-Cameos. Housed in a prior generation holder. Census: 6 in 68 (2 in 68 ★), 0 finer (2/16).
From The Dr. John Young Collection. NGC ID# 242P, PCGS# 5694

**1911 Barber Quarter, PR68
Toned Contrast, Rare So Fine**

- 4870 1911 PR68 NGC. CAC.** Sky-blue, navy, lavender, and mint-green blend over the pristine surfaces of this high-grade 1911 proof Barber quarter — among the finest non-Cameos known. CAC has endorsed only four such pieces in PR68. This sharp 1911 is almost flawlessly preserved and offers appreciable contrast even through the blanketed toning. Housed in an old no line "fatty" holder. Census: 14 in 68 (1 in 68 ★), 0 finer (2/16).
From The Dr. John Young Collection. NGC ID# 242T, PCGS# 5697

**1912 Quarter, Beautifully Toned PR68
Cameo Contrast, Immeasurable Eye Appeal**

- 4871 1912 PR68 NGC. CAC.** The 1912 proof is a great rarity at the PR68 level, with or without Cameo qualities. Housed in a prior generation NGC slab, this colorfully toned, old-time example is not designated a Cameo but nonetheless showcases stark field-motif contrast on both sides. The iridescent surfaces yield many colors, although sun-gold, violet, forest-green, and mint are the most prominent. Slight strike weakness is seen on the eagle's right (facing) talons and wing junction. CAC has awarded green labels to four pieces in this grade and none finer. Census: 5 in 68, 1 finer (2/16).
From The Dr. John Young Collection. NGC ID# 242U, PCGS# 5698

**1913 Barber Quarter, PR67 Cameo
Only 613 Pieces Minted**

- 4872 1913 PR67 Cameo NGC.** Only 613 proof Barber quarters were struck in 1913, to accompany a low mintage of 484,000 circulation strikes. Spectacularly patinated in shades of green, golden-brown, and violet, this coin nonetheless displays profound cameo contrast. The design elements are sharply rendered, except for a touch of softness on the right (facing) talon, and the fields are deeply reflective under the toning. Census: 8 in 67 Cameo (1 in 67+ Cameo), 6 finer (2/16).
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3661. NGC ID# 242V, PCGS# 85699

**1914 Quarter, Old-Time PR68
Attractive Toning, Conditionally Rare**

- 4873 1914 PR68 NGC. CAC.** The 1914 had the lowest mintage of the proof Barber quarter series at 380 pieces. Cameos are scarce and Ultra Cameos are unknown. Pieces at the lofty PR68 grade level are rare, even as non-Cameos. This sharp, pristinely preserved example is housed in a prior generation holder and is one of only four PR68 coins at CAC (all non-Cameos). The obverse displays pleasing aquamarine toning with a streak of gold on Liberty's neck; the reverse exhibits concentric mint-gold, blue, lavender, and champagne hues. The reverse is modestly contrasted, the obverse less so. Census: 10 in 68 (3 in 68 ★), 0 finer (2/16).
From The Dr. John Young Collection. NGC ID# 242W, PCGS# 5700

STANDING LIBERTY QUARTERS

**1916 Standing Liberty Quarter, AU55
Low-Mintage Type One Key**

- 4874 1916 AU55 NGC.** A pleasing Choice AU specimen of this first-year series key, from a low mintage of 52,000 pieces. This coin shows just a touch of wear on the design elements and the lightly abraded surfaces are blanketed in dusky shades of gray, golden-brown, and amber toning. A few hints of original mint luster shine through the patina. NGC ID# 43XR, PCGS# 5704

**1917 Type Two Quarter, MS67 Full Head
Among the Finest Certified**

- 4875 1917 Type Two MS67 Full Head PCGS.** Conditionally rare and among the finest-certified examples of this debut Type Two issue. The peripheral details are slightly soft from die erosion, but the interior strike is bold. Dusky olive-gold luster graces much of each side. No abrasions are observed. Although the 1917 Type Two quarter is plentiful in Full Head, few such coins survive at this lofty grade level. Population: 13 in 67 (2 in 67+) Full Head, 0 finer (1/16). NGC ID# 2434, PCGS# 5715

**1917-D Type Two Quarter, MS66 Full Head
Delicate Pastel Toning**

- 4876 1917-D Type Two MS66 Full Head PCGS.** Mint State 1917-D Type Two quarters are fairly balanced between the Full Head and non-Full Head categories, although Full Head pieces are in higher demand and experience more active trading. This Premium Gem example resides near the top of the population charts. Glistening mint luster glows beneath champagne and lavender toning. Liberty's head is well-defined, although more traditional weakness is seen on select shield rivets and portions of the eagle's breast and wing. Population: 21 in 66 (2 in 66+) Full Head, 3 finer (1/16). NGC ID# 2435, PCGS# 5717

**1918-D Standing Liberty Quarter, MS66 Full Head
Only One Numerically Finer at PCGS**

- 4877 1918-D MS66 Full Head PCGS. CAC.** The 1918-D Standing Liberty quarter claims a mintage of 7.3 million pieces, but the issue is conditionally rare in MS66, with the Full Head designation. Dusky shades of golden-brown, silver-gray, and amber toning visit the well-preserved surfaces of this remarkable Premium Gem, with well-detailed design elements and vibrant mint luster underneath. Population: 25 in 66 (4 in 66+) Full Head, 1 finer (1/16). NGC ID# 3TWU, PCGS# 5723

**1918-D Quarter, MS66+ Full Head
Underrated Rarity, Only One Coin Finer**

4878 1918-D MS66+ Full Head PCGS. The 1918-D is among the unsung condition rarities in the Standing Liberty quarter series. Full Head examples are plentiful through MS65 but are rarer in MS66 than certification figures would suggest. Only a single Superb Gem Full Head coin is known finer than this remarkable Plus-graded example. Moderate die rust is seen in the fields, as is characteristic of the issue, but is warmed by rich golden toning. Liberty's head is well-defined even while the central portions of each side exhibit the issue's famous strike deficiency. The date and mintmark are clear, and the preservation is superb. An almost unsurpassable Registry-grade coin. Population: 25 in 66 (4 in 66+) Full Head, 1 finer (1/16). NGC ID# 3TWU, PCGS# 5723

**1926 Quarter, MS67
Conditionally Rare**

4879 1926 MS67 PCGS. CAC. Without a doubt, this Superb Gem stands above almost every other known survivor of the conditionally elusive 1926 quarter. PCGS has seen only three non-Full Head coins in MS67 and none finer; the finest non-Full Head pieces at NGC are two coins each in MS67 and MS68 (2/16). This lovely piece exhibits satiny golden and sky-blue luster with small hints of olive, amber, and russet around the extreme outer peripheries. The strike is above-average for a non-Full Head coin, and the preservation is excellent. NGC ID# 243R, PCGS# 5754

WASHINGTON QUARTERS

**1936-S Quarter, MS67+
Superb Color and Surfaces**

4880 1936-S MS67+ PCGS. CAC. This high-end Superb Gem is tied for the finest-known 1936-S Washington quarter, an essential acquisition for the Registry collector. The strike is sharp, and both sides display frosty mint luster. The obverse is deeply toned in multicolor hues, while the reverse shows lighter champagne and rose-gold color. Population: 50 in 67 (3 in 67+), 0 finer (2/16). NGC ID# 244J, PCGS# 5802

1943-S Quarter, MS66+
Doubled Die Obverse

- 4881** 1943-S Doubled Die Obverse, FS-101, MS66+ PCGS. CAC. This is a long-popular *Guide Book* variety, showing bold die doubling on the date, IN GOD WE TRUST, and LIBERTY. The portrait shows a lesser spread save for the designer's initials, which are clearly doubled. PCGS has seen a limited number of Mint State pieces, primarily below MS65. In MS66, FS-101 is rare, and no Superb Gems are yet attributed at that service. This Plus-graded Premium Gem is tied for the finest at PCGS. Frosty luster has traces of champagne toning, and the design elements are boldly rendered. No major abrasions are observed. For Registry purposes, this CAC-endorsed Premium Gem is impossible to surpass in a PCGS holder. Population: 12 in 66 (2 in 66+), 0 finer (2/16). NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

PROOF WASHINGTON QUARTER

1950 Quarter, PR68 Cameo
Tied for Finest Certified

- 4882** 1950 PR68 Cameo PCGS. The 1950 Washington quarter is challenging to locate in Cameo grades and is rarely seen in Deep Cameo. This magnificent PR68 example is tied with just five others as the finest Cameo at PCGS (2/16). The strike is sharp, and white-on-black contrast is immediately apparent. The sheer quality of this proof 1950 is worthy of the highest Registry Set consideration. NGC ID# 27VA, PCGS# 85982

ERROR

1968-S Quarter, PR65 Cameo
Struck on a Jefferson Nickel Flan

- 4883** 1968-S Washington Quarter — Double Struck on a Five Cent Planchet — PR65 Cameo NGC. 4.9 grams. A standard Jefferson nickel planchet weighs 5 grams, and a standard clad quarter planchet weighs 5.67 grams. The reeding is nearly complete but the edge has a brief plain area at 6:30. The rims are partial and vary in width. The date and UNITED STATES OF AMERICA exhibit spreading consistent with an undersized planchet. Struck aligned with the collar at 9 o'clock. IN GOD WE TRUST is strike doubled. Brilliant and flashy with excellent eye appeal.

EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, Good 6 O-101a, Classic First-Year Type

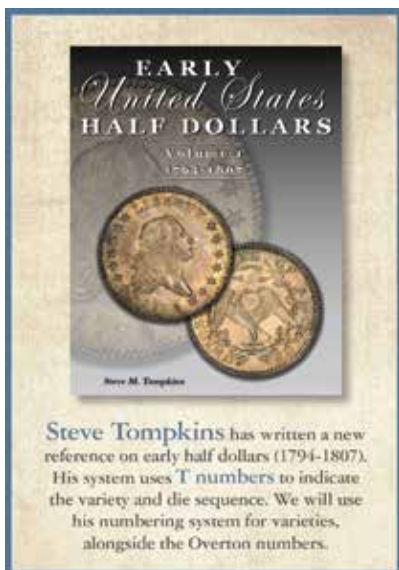

- 4884** 1794 O-101a, T-7, High R.3, Good 6 PCGS. Strong rims and dentils surround well-detailed peripheral elements of this moderately worn early half, weakening just slightly between 3 and 7 o'clock on the obverse. As always, the central reverse shows more extensive wear than the rest of the coin. The in-hand appearance of this 1794 half is pleasing, with old-silver patina that deepens at the borders and counterbalances the lightly toned raised devices. A glass reveals numerous small marks, lines, and pinscratches, now softened by wear. Housed in a green label holder. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half, VG Details In-Demand First Year of Issue

- 4885** 1794 O-101a, T-7, High R.3 — Cleaning — PCGS Genuine. VG Details. Collectors of Flowing Hair half dollars understand the considerable difference in availability of the scarce 1794 issue versus the more-available 1795 halves, and opt for the first-year date whenever possible. This smoothly worn example was once cleaned and now displays a two-tone “circulation cameo” effect with light, silver-gray raised elements against deep-gray fields. A few faint adjustment marks run horizontally from the right rim toward the center of the reverse. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1795 Flowing Hair Half Dollar, XF45+ 2 Leaves, O-104, T-24 Variety

- 4886** 1795 2 Leaves, O-104, T-24, R.4, XF45+ PCGS. The 1795 Flowing Hair half dollar claims a substantial mintage of 317,844 pieces, all delivered between February and June of 1795, with 31 die varieties known for the date. This coin represents the O-104, T-24 variety, with the 7 in the date repunched to the right and two leaves below the eagle's wing on the reverse. The O-104 can be located in lower circulated grades with some patience, but high-grade specimens are scarce. This high-end Choice XF example shows light wear on the design elements and the major devices retain much interior detail. The lightly abraded surfaces show some light adjustment marks on the obverse and an extensive network of die cracks on both sides. Pleasing shades of lavender-gray and golden-brown patina add to the strong visual appeal. From *The Jim Hilands Collection*. NGC ID# 24E7, PCGS# 39219 Base PCGS# 6052

**1795 2 Leaves Half, A Over E in STATES, AU50
O-113a, Near Condition Census**

4887 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, AU50 PCGS Secure. Tompkins Die State 5/2. A over E in STATES. A sharp example of this popular variety, struck from a late state of both the obverse and reverse dies. Pleasing silver-gray surfaces deepen slightly at the margins for glimpses of mint luster remaining near the borders. The mispunched E is clearly visible beneath the first A in STATES, and a large die lump between the date and star 15 connects to the bust tip, 5 in the date, and star 15 with light die cracks.

The denticles are particularly bold and wavy on this example, where a high rim encircles both sides. As always for the variety, Liberty's hair strands are weak — more from strike than from wear. Numerous adjustment marks criss-cross across the eagle on the reverse. Light abrasions are visible with a lens across the obverse fields and portrait, with die clashing visible and a narrow scrape along the hairline at the neck. The Tompkins Condition Census ranks 64,63, 60, 55, 55, 50. NGC ID# 24E7, PCGS# 39254 Base PCGS# 6052

**1806/5 O-101 Draped Bust Half, AU55
Large Stars, Knobbed-Top 6 Over 5**

4888 1806/5 O-101, T-6, R.3, AU55 PCGS. Tompkins Die State 4/3. Both sides display bold die clashing and diagnostic die cracks that approach the Overton-101a late die state, lacking only a solid cud above ITE of UNITED. Golden luster remains at the margins of this Choice About Uncirculated example. The underdigit 5 is paired with the 0 repunched over a horizontal 0, and stars 6 and 12 show repunching. Light abrasions are visible with a lens, and faint gold-gray patina adds to the appeal. Population (all 1806/5 Large Stars varieties): 7 in 55, 13 finer (1/16). NGC ID# 374C, PCGS# 39296 Base PCGS# 6077

**1807 Draped Bust Half, Unc Details
O-102, T-8, Significant Appeal Remains**

4889 1807 Draped Bust, O-102, T-8, R.2 — Obverse Improperly Cleaned — NGC Details. Unc. Tompkins Die State 4/2. The obverse shows a few light marks but no signs of overt cleaning, while the reverse approaches Select or finer Mint State quality. Satiny surfaces retain a fair amount of original mint luster. Golden-gray toning displays lilac, rose, and blue overtones. Characteristic of the variety, slight weakness at the centers gives way to sharp peripheral elements and the milling is sharp for the die pair. Notable die clashing confirms the mid-to-late stage of the dies.

BUST HALF DOLLARS

**1814 O-107 Half Dollar, MS63
Vibrant Mint Luster**

4890 1814 O-107, R.2, MS63 PCGS. Light to medium tan-gold toning overlies pearl-gray surfaces. Lustrous and well preserved with a crisp strike and pleasing surfaces. A minor silver-gray flan streak is noted on the final A in AMERICA. The usual multi-clashed die state with a die chip on the N in UNITED but no die chip on the nose. NGC ID# 24F3, PCGS# 39484 Base PCGS# 6105

1818/7 Half Dollar, MS62
Large 8, O-103a, Smooth Surfaces

- 4891** 1818/7 Large 8, O-103a, R.4, MS62 PCGS. A lustrous representative with powder-blue centers and chestnut-gold margins. Void of noticeable marks, and the strike is sharp save for blending on the LUR in PLURIBUS. Ideal for the grade, and very rare any finer. The scarce late die state with an ascending crack through the date and "bar" clash marks from the shield near Liberty's ear. NGC ID# 24FA, PCGS# 405384 Base PCGS# 6115

1820 O-103 Half Dollar, MS63
Curl Base 2, Small Date

- 4892** 1820 Curl Base 2, Small Date, O-103, R.1, MS63 PCGS. Ocean-blue peripheries encompass cream-gray and wheat-gold centers. Lustrous and well struck with exemplary surfaces and formidable eye appeal for its third-party grade. The 1820 is a diverse date with six different *Guide Book* listings, despite a total of only eight die marriages. O-103 and its later die state O-103a constitute the Curl 2, Small Date entry. O-102 also has a Curl 2 but is an overdate. NGC ID# 9PYL, PCGS# 39563 Base PCGS# 6121

1822 Half Dollar, O-110a, MS64
Lustrous and Fully Struck

- 4893** 1822 O-110a, R.2, MS64 PCGS. Identified on the holder as O-110, although the obvious die crack through the inside star points on the left confirm that this is actually the later die state O-110a. The coin is near-brilliant with vibrantly, semiprooflike fields and fully struck raised devices. Occasional amber-gold accents at the borders add to the lustrous, mint-fresh eye appeal. Likely tied at the lower end of the Condition Census for the variety, according to the Autumn, 2015 Steve Herrman listing (1/16). From *The Jim Hilands Collection*. NGC ID# 24FG, PCGS# 39598 Base PCGS# 6129

1827 O-107 Half Dollar, MS64
Square Base 2, Rich Multicolor Patina

- 4894** 1827 Square Base 2, O-107, R.3, MS64 PCGS. The second T in STATES is entered low, a pick-up point for O-107. This precisely struck Choice half dollar is has plum-mauve centers and deep cobalt-blue borders. The lustrous surfaces are uncommonly smooth. Among the nicest survivors of the variety, with none finer known in a PCGS holder. NGC ID# 24FN, PCGS# 39699 Base PCGS# 6144

1831 Half Dollar, Reflective MS65
O-110, High Condition Census

4895 1831 O-110, R.2, MS65 PCGS. CAC. Ex: Reed Hawn. The 1831 half as a date is not generally considered rare — and the issue is somewhat plentiful as the O-110 variety — yet well-preserved, sharply struck examples the equal of the present coin are seldom encountered regardless of die pair. This fully mirrored piece was at one time listed as a rare brilliant proof in Stack's August 1973 sale of the Reed Hawn Collection, and it was subsequently identified by Walter Breen as one of two or three known proofs in his 1989 *Encyclopedia* of proof coins. Today, there are no proofs recognized from the O-110 die pair.

Rather, the coin is an exceptional Gem Mint State example with undesignated prooflike surfaces. It displays even amber-gold toning over each side, with overall boldly detailed design elements and excellent surface preservation. The fields display considerable mirroring, delivering an incredible visual display when tilted beneath a light. Ranked second in the current Steve Herrman Census of O-110 halves, this is a coin with an impressive provenance to match its exceptional quality and eye appeal. CAC approved, accompanied by its original screw-type Capital coin holder where it is identified as “PROOF 1831.”

Ex: Reed Hawn Collection (*Stack's*, 8/1973), lot 98; *The Eugene H. Gardner Collection, Part 1* (*Heritage*, 6/2014), lot 30476. NGC ID# 24FW, PCGS# 39846 Base PCGS# 6159

1832 O-118 Half Dollar, MS65
Possibly Finest Certified

4896 1832 Small Letters, O-118, R.1, MS65 NGC. A “Laced Lips” variety with a vertical die line through Liberty’s lips. Light to medium powder-blue and straw-gold shades visit this lustrous and well preserved near-Gem. Scattered tiny obverse flecks do not distract. The overall strike is good despite blending on the forehead curls and upper left stars. To the best knowledge of the cataloger, this is the single finest certified example of the die marriage. NGC ID# 24FW, PCGS# 39877 Base PCGS# 6160

PROOF BUST HALF DOLLAR

1834 Half Dollar, O-106, PR63
The George 'Buddy' Byers Example

4897 1834 PR63 NGC. O-106, R.8 as a proof. In our January 2011 FUN Signature, lot 5332, we presented substantial information regarding the various proof 1834 half dollars that are recognized today. The majority of known proofs are described as O-122 and are the Crushed Lettered Edge (CLE) restrikes. There are five other proofs, considered originals, each from a different die pair and therefore each unique. This example is from the George W. "Buddy" Byers, Jr., Collection, which Stack's sold in 2006.

An attractive Select proof, the Byers specimen displays slight contrast, insufficient for a Cameo designation. However, it is an attractive piece with deep gunmetal-blue toning and mostly trivial contact marks. A larger mark extends from the left end of the ribbon carrying the motto.

Ex: Jascha Heifetz (Superior, 10/1989), lot 831; Remick Collection (Stack's, 9/1997), lot 829; Rarities Sale (Bowers and Merena, 1/2000), lot 169; George W. Byers, Jr., Collection (Stack's, 10/2006), lot 1084; Milwaukee Signature (Heritage, 8/2007), lot 1683, realized \$25,300; New York Signature (Heritage, 11/2013), lot 3616, brought \$23,710. NGC ID# 26SB, PCGS# 6217

REEDED EDGE HALF DOLLAR

1837 GR-21 Half Dollar, SP65
Sole Certified Specimen Strike

4898 1837 SP65 NGC. GR-21, R.2. Past offerings of 1837 Specimen strike half dollars include this example, which was offered in a January 2003 Superior auction. Other such coins include an example by RARCOA in Auction '82; and a third that appeared in the 1949 ANA sale. A PR62 NGC example appeared in our sale of the Greensboro Collection, Part Two, at the January 2013 FUN auction. Most recently, the present SP65 coin was in the Eugene H. Gardner Collection.

The GR-21 variety was struck from the second use of the obverse die (which also struck GR-20) — a fact that may explain areas of peripheral weakness on this otherwise impressively struck half dollar. Based on the visual appearance of the central motifs and the contrasting mirrored fields, the current coin is certainly a special strike. Both sides show noticeable die lines, confirming that it is an early die state for the GR-21 die pair, with prominent reverse die lines between the wing and U, and through TE of UNITED.

Although most of the stars and the eagle's claws are indistinct, the balance of the obverse and reverse design elements are extremely sharp. An exceptional Gem, the coin displays mirrored fields and light cameo contrast beneath brilliant orange toning that gains intensity close to the borders. In addition to this example (which is the only Specimen strike NGC has certified), NGC reports one PR62 coin. PCGS does not list a specimen or proof example of this issue (1/16).

Ex: Superior (1/2003), lot 739; The Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98475. NGC ID# 24G4, PCGS# 6176

SEATED HALF DOLLARS

1840 WB-102 Seated Half, Exceptional MS66
FS-301, Reverse of 1839, Repunched Date

4899 1840 Small Letters (Reverse of 1839), Repunched Date, FS-301, WB-102, MS66 PCGS. CAC. The date is noticeably repunched, evidenced by a secondary 4 visible south, and an underdigit 0 easily viewed southeast of the primary numeral to confirm the *Cherrypickers'* FS-301 variety. Several faint die cracks exist in and around the reverse legend. The surfaces are remarkably smooth and semireflective, with sharp definition on Liberty's portrait and hair strands. Stars 6, 7, and 8 lack their centers, but otherwise the strike is sharp. Eye appeal is terrific, with sea-green and blue shades interspersed with bright orange-gold luster that flows consistently over both sides.

Housed in an old green label holder with CAC endorsement, this Premium Gem is the very definition of condition rarity despite a mintage of more than 1.4 million pieces. No pieces are certified finer by either PCGS or NGC, and type collectors and Seated half specialists alike will have keen interest when this top-of-the Condition Census coin is called. Population: 6 in 66, 0 finer (2/16).

From The Dr. John Young Collection. NGC ID# 24GM, PCGS# 392647 Base PCGS# 6234

1842-O WB-101 Seated Half, MS61
Rare Small Date, Small Letters Variety

4900 1842-O Small Date, Small Letters, WB-101, Die Pair 2, R.5, MS61 NGC. Two die pairs were used to strike the rare Small Date, Small Letters 1842-O halves. The obverse die is the same for both varieties. The reverse die is determined by position of the Large O mintmark, which is either high and to the left, or low and to the right. This example is the latter, with the mintmark centered beneath the junction of the branch and the feather, aligned with the right edge of the F of HALF.

Today, just two other Mint State examples are known — one at NGC (the former Eugene Gardner coin), and the other at PCGS (the former Eliasberg coin). Similar to those coins, the current coin offers splendid appeal and unquestioned originality. The strike is sharp on all of the motifs, with slight blending of the eagle's highest feather tips and leftmost talon. Soft luster is complete beneath light, fawn-gold toning. Census: 1 in 61, 1 finer (2/16). NGC ID# 24GV, PCGS# 572015 Base PCGS# 6238

**1844 Half Dollar, Choice Near-Gem
WB-103, Repunched Date Variety**

4901 1844 Repunched Date, WB-103, MS64 PCGS. CAC. The 1844 is among the more available Seated half dollar issues from the 1840s, though it would be misleading to apply that term to examples in this high grade. Choice representatives are very rare, and finer coins come up for sale with such infrequency that one may have to wait years for a chance to bid on one (with no guarantee of success). Flashes of powder-blue and violet complement the intense shades of olive and steel-blue toning that shroud each side. Liberty's head and the eagle's feathers are bold, and all stars show full centers. The 44 of the date is recut south. If not for a few light abrasions, the coin's eye appeal and quality of strike are suggestive of a higher grade. Population (all varieties): 12 in 64, 0 finer (1/16).

Ex: *The Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015 as MS64 NGC, CAC), lot 98654. NGC ID# 24GZ, PCGS# 572027 Base PCGS# 6245

**1853 WB-101 Half Dollar, MS64+
Single-Year Type with Arrows and Rays**

4902 1853 Arrows and Rays, WB-101, MS64+ PCGS. The 1853 reduction in weight discouraged the removal of silver coins from circulation, while the addition of arrows on the obverse and rays on the reverse distinguished 1853 coinage from coins struck at a higher weight standard. This is a sharply struck and attractive example of the single-year design, with frosty silver luster and faint champagne toning on each side. Its status as a one-year type heightens the appeal and ensures a ready demand. The Plus designation separates this coin from other near-Gem examples, with just seven coins receiving the award at MS64 and 26 finer examples certified at PCGS (1/16). NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275

**1859-S WB-102 Half Dollar, MS65
Medium S, Rare in Gem Condition**

4903 1859-S Medium S, WB-102, Die Pair 6, R.3, MS65 PCGS. Medium S mintmark. Eight confirmed die pairs were employed to strike 566,000 1859 San Francisco half dollars. Six of the eight varieties feature a Large S mintmark, leaving just two die pairs with the Medium S variant. Regardless of the variety, the 1859-S halves are rare in Gem or finer grades, with fewer than a dozen pieces known between the two major services in MS65 or finer condition.

This brilliant, frosty example ranks among the half dozen finest at PCGS. Vibrant mint luster radiates from beneath a faint golden-gray patina that does little to temper the mint-fresh silver flash. Sharply struck, a few stars lack their centers but the central motifs are boldly defined. A few tiny marks and some light die clashing are of no consequence. Population (all varieties): 3 in 65, 3 finer (1/16). NGC ID# 24J2, PCGS# 524239 Base PCGS# 6298

**1870-S Half Dollar, MS64
Very Rare in Mint State**

- 4904** 1870-S Very Small S, WB-101, Die Pair 4, R.4, MS64 PCGS. CAC. The 1870-S half dollar displays variations in the placement of the mintmark which may be of interest to specialized collectors. This Select example has the mintmark tucked up into the crotch formed by the feather tip and olive stem. The 1870-S is rare in Mint State, with only 29 coins so-certified by PCGS and NGC combined. This satiny, originally toned Choice example is among the finer-known representatives in that category. Violet and champagne-gold patination displays variations in shade throughout the lustrous surfaces, and the design elements are quite well-impressed. Finer examples are almost unobtainable. Population: 3 in 64, 2 finer (1/16). NGC ID# 6467, PCGS# 572191 Base PCGS# 6329

**1877-S WB-104 Seated Half Dollar, MS67
Blooming Color, Incredible Eye Appeal
The Single Finest at PCGS, Ex: Gardner**

- 4905** 1877-S Closed Bud, Very Small S, WB-104, Die Pair 29, R.3, MS67 PCGS. CAC. The 1877-S Seated Liberty half dollar is an available date in the absolute sense, but the issue becomes a distinct condition rarity in MS67. This is the final truly collectible issue in the series from this mint, as the 1878-S is prohibitively rare and largely unobtainable for the average collector.
- This Superb Gem combines gorgeous peripheral gold, blue, and iridescent toning around ivory centers on both sides. The obverse also includes some pale mint-green and lilac color in the margins. A few mint-made diagonal striations appear across Liberty's leg, the result of drawing the planchet stock to the required thickness for coining. A few tiny abrasions are present but do not impede this coin's magnificent eye appeal. The sole finest at PCGS (1/16).
Ex: Dallas Signature (Heritage, 7/2006), lot 2429; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98494. NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357

**1878-S Seated Liberty Half Dollar, AG3
Rare, Low-Mintage Key**

4906 1878-S WB-101, Die Pair 1, AG3 PCGS. From a meager mintage of just 12,000 pieces, the 1878-S Seated Liberty half dollar is an elusive key issue, and collectors prize examples in all grades and conditions. The San Francisco Mint had to allocate most of its resources to silver dollar production in 1878, because of the provisions of the Bland-Allison Act, accounting for the limited mintage of other silver issues. Since there was almost no interest in collecting branch mint issues at the time few, if any, high-quality specimens were saved for numismatic purposes. Most survivors seen today are well-worn and heavily abraded. Randy Wiley and Bill Bugert estimate about 60 examples are extant in all grades.

The present coin shows extensive wear on both sides, with the rims and LIBERTY worn smooth. The major devices are nearly complete in outline and the date, most of the legend, and mintmark are legible. The lavender-gray surfaces are free of large or distracting abrasions. Population: 2 in 3, 28 finer (2/16). PCGS# 572258 Base PCGS# 6360

PROOF SEATED HALF DOLLARS

**1859 Half Dollar, PR65
Attractive Toning, Full Strike**

4907 1859 PR65 PCGS. Mint records indicate 800 proof Seated Liberty half dollars were struck in 1859, but it is doubtful that so many coins were actually distributed. This impressive Gem displays sharply detailed design elements and reflective fields under natural shades of greenish-gold and powder-blue toning. Just three examples are numerically finer at PCGS. Population: 11 in 65, 3 finer (1/16). NGC ID# 27TJ, PCGS# 6413

**1873 No Arrows Half, PR66
WB-102, Closed 3**

4908 1873 No Arrows PR66 PCGS Secure. CAC. WB-102. The Closed 3 date logotype represents the 600 proofs struck as listed in the *Guide Book*, although a single No Arrows proof reportedly exists with an Open 3 as confirmed in the Wiley-Bugert reference. (All 1873 With Arrows proofs have the Open 3). This beautiful, near-Gem example is richly toned with steel-blue at the borders, magenta and violet accents, and hues of amber-gold at the centers. Deeply mirrored fields surround the frosted central motifs, but contrast is minimized by the intense toning. A splendid, lustrous Premium Gem proof, with few finer at either service. Population: 12 in 66 (1 in 66+), 5 finer (2/16). NGC ID# 27U8, PCGS# 6431

**1874 Arrows Seated Half, PR64+ Cameo
WB-101, Lightly Toned Contrasted Proof**

4909 1874 Arrows PR64+ Cameo PCGS. CAC. WB-101. All of the proof 1874 half dollars feature small arrowheads on either side of the date, a rare occurrence for circulation strikes but the norm for proofs. This high-end Cameo example earned the PCGS Plus designation and CAC endorsement for its Choice mirrored fields and sharp, frosted raised elements. Faint golden toning is deepest at the rims. Few 1874 cameo proofs are finer at PCGS. Population: 37 in 64 (2 in 64+) Cameo, 5 finer (1/16). NGC ID# 27UV, PCGS# 86435

1875 Seated Half, Superb PR67
Richly Toned, Tied for Finest at PCGS

4910 1875 PR67 PCGS. CAC. While proof half dollar production was fairly substantial in 1875 (700 pieces struck), it was just a tiny number of coins compared to the ample circulation strike coinage which totaled more than 6 million pieces. Both formats are popular for type representation, although the proof variant becomes conditionally scarce above the PR65 grade level.

Rich lavender-charcoal toning envelops both sides and lightens a little over the right central obverse. Cobalt-blue undertones backlight the former shade, and a blush of orange-gold color is noted on the obverse near stars 4 and 5. Sharp in virtually all areas, the strike definition is fully appreciable in the absence of noteworthy blemishes. This coin pedigrees to two of the finest collections sold in the past dozen years. Population: 3 in 67, 0 finer (1/16). NGC ID# 27U9, PCGS# 6436

BARBER HALF DOLLARS

1897-S Barber Half, MS68
Sole Finest Certified

4911 1897-S MS68 NGC. The 1897-S is well-known as a scarce issue in mint condition, and especially so in MS65 and better grades. The mintage was a generous 933,900 pieces, but apparently the vast majority were dropped into circulation and stayed there. Of the coins that were set aside, a great many '97-S halves have been cleaned and stripped of their original surfaces; thus, it is difficult to locate a coin with original color. There are fewer than 100 coins (including an unknown number of resubmissions) in Mint State at both of the major services combined (1/16).

Above MS65, the certified population drops to only only 14 submissions.

This is the sole finest example at either NGC or PCGS. The surfaces on this piece are nothing short of extraordinary, as one would expect from a coin in this superior grade. The fields are bright and prooflike with moderate mint frost over the devices. Each side shows a delicate interplay of blue and rose coloring, while the mirroring in the fields makes the array on this piece especially vibrant. The striking details are especially bold. An exceptional Barber half and a landmark coin for the issue.

Ex: FUN Signature (Heritage, 1/2007), lot 995; Greensboro Collection, Part V / ANA Signature (Heritage, 8/2015), lot 4077. NGC ID# 24M2, PCGS# 6479

**1898 Barber Half Dollar, MS66
Strong Registry Set Contender**

- 4912 1898 MS66 PCGS.** This delightful Premium Gem exhibits razor-sharp definition on all design elements and the virtually pristine surfaces display vibrant, satiny mint luster on both sides. A few subtle hints of golden-tan toning add to the outstanding eye appeal. This coin should find a home in the finest collection or Registry Set. Population: 12 in 66 (4 in 66+), 1 finer (1/16).
From *The Jim Hilands Collection*. NGC ID# 24M3, PCGS# 6480

**1898-O Half Dollar, MS65
Conditionally Rare, Recut Date**

- 4913 1898-O MS65 PCGS.** Unlisted in the *Cherry pickers'* reference, this Gem 1898-O half dollar exhibits recutting on the 898 of the date, most prominent on the lower loop of the 9. The surfaces display satiny luster that softly glows in the fields. Both sides have light lavender, gold, and amber-orange toning. For a New Orleans issue of this period, the strike is uncommonly sharp, particularly on the eagle's talons and the fletchings. Population: 8 in 65, 5 finer (2/16). NGC ID# 24M4, PCGS# 6481

**1900-O Half Dollar, MS65
Elusive in High Grade**

- 4914 1900-O MS65 PCGS.** Despite a mintage of more than 2.7 million coins, the 1900-O Barber half dollar saw limited survival in Mint State. Any such coin is scarce, and Gems are genuine rarities. This New Orleans issue is known for its weak strike and often insipid luster. The present coin is typical in the first sense but above-average in the second — the fields are especially lustrous and softly shimmer when rotated beneath a light. The strike is weak, most noticeably on the eagle's body and the right side of the shield. The interiors show light champagne toning, while the peripheries have deeper amber-gold and ocean-blue color. A small, shallow planchet void is discernible on Liberty's cheek, as struck. Population: 6 in 65, 4 finer (2/16). NGC ID# 24MA, PCGS# 6487

1902 Barber Half Dollar, MS67
Finest Known at PCGS

4915 1902 MS67 PCGS. The obverse has a short die crack through the bust tip, ending in the field before reaching the date or star 13. Both sides of this Superb Gem have bold design definition, with amazing surfaces and color. Considerable bright silver on the obverse intermingles with emerald-green and faint gold. The reverse has less bright silver and more emerald-green. The underlying surfaces are essentially mark free, with frosty luster.

The 1902 Barber half dollar, with more than 4.9 million coined, has the third-highest mintage of any issue in the series behind 1899 and 1908-O. Such a high mintage failed to provide today's collectors with an adequate supply of Gem or finer examples.

Formerly part of the Thaine Price and Steven Duckor Collections, in the Price catalog, David Akers wrote words that we are unable to improve: "This will be far from the highest priced Half Dollar in this set, but it certainly will be among the most difficult to duplicate once this coin is sold." Population: 1 in 67, 0 finer (2/16).

Ex: Dr. Thaine B. Price (David Akers, 5/1998), lot 154; Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3203. NGC ID# 24MF, PCGS# 6492

1905-O Half Dollar, MS67
A Condition Census Example
Ex: Gardner

4916 1905-O MS67 NGC. This New Orleans issue claims the second-lowest production total from the Louisiana facility after the 1892-O (505,000 versus 390,000 coins). Examples are extremely rare in this lofty grade, and this Superb Gem is in elite company where comparably graded pieces are concerned. In fact, only the Eliasberg and Duckor/Akers examples, and another MS68 NGC coin are reported finer. This Superb Gem ranks high in the Condition Census, likely tied for fourth place. Lime-green and ice-blue borders merge with beautiful violet-gray centers on each side, while the reverse adds accents of peach-orange and russet toning. The strike is typical for the Southern branch mint, showing softness at the juncture of the right shield corner and wing, the leg feathers, and claws. Radiant luster and pristine surfaces heighten the appeal of this important Superb Gem offering. Census: 2 in 67, 1 finer (2/16).

Ex: Purchased by Eugene Gardner from Bill Nagle (6/2002); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98750. NGC ID# 24MS, PCGS# 6502

**1905-S Barber Half Dollar, MS67 ★
Unequaled at NGC**

4917 1905-S MS67 ★ NGC. Vividly toned with violet and aqua in the center and rich straw-gold at the periphery, this highly lustrous and boldly struck Superb Gem has a pristine reverse and only a few wispy marks in the right obverse field. The strike is bold and the eye appeal exceptional.

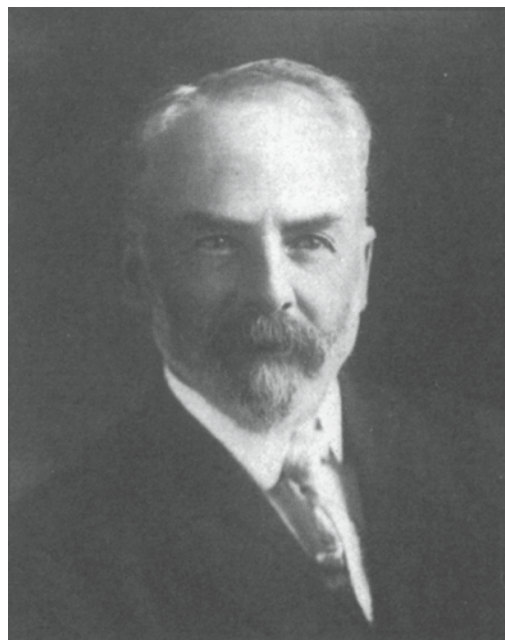

The 1905-S has a mintage of nearly 2.5 million pieces, however, as is the case with so many San Francisco Barber halves, virtually the entire production went into circulation and stayed there. Mint State survivors are highly elusive, and nearly all of them grade between MS61 and MS65. Superb Gems are exceptionally rare; NGC has graded only this one coin finer than MS65, making it the sole finest at that service by two full grade points (1/16).

Ex: *New York Signature* (Heritage, 6/2005), lot 5763; *FUN Signature* (Heritage, 1/2007), lot 1000. NGC ID# 24MT, PCGS# 6503

**1906-S Barber Half, MS66
Deeply Toned but Lustrous**

4918 1906-S MS66 PCGS. CAC. The well-preserved surfaces of this spectacular Premium Gem are blanketed in attractive shades of golden-brown, gray, and violet toning. The design elements are sharply detailed in most areas, with just the slightest softness on the eagle's claw and shield point. Vibrant mint luster adds to the ample eye appeal. The 1906-S is a rarity at the Premium Gem level, and finer coins are exceedingly so. Population: 4 in 66, 5 finer (1/16). NGC ID# 24MX, PCGS# 6507

*Frank Leach, San Francisco
Mint Superintendent, 1897-1907*

**1907-O Half Dollar, Magnificent MS67
Among the Finest Known, Ex: Duckor/Akers**

4919 1907-O MS67 PCGS. CAC. Ex: Duckor/Akers. A lack of cracks or other die deterioration suggest that this Superb Gem was an early strike from a fresh die pair. Although slight merging of detail is evident at the junction of the right wing and shield, the sharpness on this piece is excellent. Both sides have satiny luster with pale champagne centers ceding to a frame of delicate amber-gold and blue toning. The surfaces are devoid of mentionable imperfections.

While the Denver Mint began operations in 1906 and increased production in 1907 and 1908, the New Orleans Mint was slowing down, with its final coinage just two years later in 1909. With the exception of the 1906-O eagle and the 1909-O half eagle, Barber coins were the only pieces minted in New Orleans during its final four years. Coinage momentum was clearly leaning toward Denver, while efforts in New Orleans were geared more toward lowering expenses and closing the facility. The typical weak strikes produced during the closing years of the New Orleans branch suggest that workmen in that facility were attempting to reduce production costs by prolonging die life.

While we have handled several different MS66 coins over the years, this is one of only three individual MS67 examples that have appeared in our auctions. Among the MS66 coins are the Eliasberg coin that appeared in our sale of the Hugon Collection, and the Price coin that we offered in August 2006 and again in May 2007. The other MS67 coins are none other than the Gardner specimen, sold in June of 2014, and the Friend coin (previously MS66), sold in January of 2016. Population: 2 in 67, 0 finer (1/16).

Ex: *David Akers (10/5/1994); The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature (Heritage, 8/2010), lot 3221. NGC ID# 24N2, PCGS# 6510*

**1908-O Half Dollar, MS66
Exceptional Eye Appeal and Luster**

4920 1908-O MS66 PCGS. CAC. Rainbow-toned and exceptionally lustrous, this Premium Gem half offers a sharp strike for the 1908 New Orleans issue. Old-time "coin board" toning combines with underlying silver flash for tremendous eye appeal. The carefully preserved surfaces show a minimum of tiny, ticklike contacts, each well-hidden in the toning. More than 5 million pieces were struck, but few examples are finer. Seemingly poised for upgrade, housed in a first-generation holder with CAC endorsement. Population: 19 in 66 (1 in 66+), 15 finer (2/16).

From The Dr. John Young Collection. NGC ID# 24N6, PCGS# 6514

**1909 Barber Half, MS66+
Tied for Finest Known**

4921 1909 MS66+ PCGS. CAC. Although numerous Mint State 1909 half dollars are known, the majority are of marginal quality. Only 11 MS66 coins, plus four MS66+ are encapsulated by PCGS, these being the finest examples of the issue known; NGC reports a similarly low MS66 population of just five coins, also with finer (2/16). While the Eliasberg Collection had a proof, the Ex: Dale Friend coin is finer than the Price and Pryor coins, and every bit the equivalent of the Hugon example.

This amazing piece has brilliant silver surfaces with reflective fields around satiny devices. Both sides display lovely golden, russet, and iridescent peripheries. The coin is boldly struck throughout the relief elements.

Ex: *Heritage; The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars / FUN Signature (Heritage, 1/2009), lot 2954; The Greensboro Collection, Part VI (Heritage, 10/2015), lot 4591. NGC ID# 24N8, PCGS# 6516*

**1915 Barber Half, Seldom-Seen MS66
Great Quality for Final Year of Design**

- 4922 1915 MS66 PCGS.** The regions of the country served by the Philadelphia Mint had little need for additional half dollars from 1913 to 1915; none of the P-mint issues in those years broke the 200,000-coin mark, and in 1915, only 138,000 pieces were struck. This Premium Gem offers great quality from among the known survivors, richly toned blue-violet, peach, and gold with small streaks of light silver-gray. The streaks disguise the handful of true marks visible on each side, which are small in any event. The portrait has solid detail, and the eagle's talons are uncommonly well-defined. Population: 5 in 66 (2 in 66+), 0 finer (1/16).
Ex: *FUN Signature (Heritage, 1/2012)*, lot 3265. NGC ID# 24NR, PCGS# 6532

**1915-S Half Dollar, MS66
Only Two Coins Finer at PCGS**

- 4923 1915-S MS66 PCGS.** This final-year San Francisco issue is rare in MS66 and extremely so any finer. The present coin displays frosty luster and lightly mottled golden toning. The strike is soft the eagle's right (facing) talons and wing junction, but the obverse is better defined. There are no bothersome abrasions. Finer pieces, when found, are usually out of reach for most collectors. Population: 10 in 66, 2 finer (2/16). NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

**1893 Barber Half Dollar, PR67 Cameo
Stunning Proof Type Coin**

- 4924 1893 PR67 Cameo NGC.** Virtually no distractions exist on this brilliant, silver-white Cameo proof. The deeply mirrored fields contrast strongly with the sharply struck devices, which display a thick coat of mint frost. The high, square rims show a similar frostlike appearance to frame the glittering, glassy fields. Just three Cameo proofs are numerically finer at PCGS and NGC combined. NGC Census: 13 in 67 Cameo (1 in 67 ★ Cameo), 1 finer (2/16). NGC ID# 24NV, PCGS# 86540

**1893 Half Dollar, PR66 Deep Cameo
Rare So Starkly Contrasted**

- 4925 1893 PR66 Deep Cameo PCGS. CAC.** Overall, the proof 1893 Barber half dollar is scarcer than the series-debut 1892, and Deep Cameo examples are especially rare. This frosty Premium Gem boasts stark field-motif contrast with deep mirroring and unmarked surfaces. Traces of light golden toning emerge from the outer peripheries, delivering pleasant eye appeal. The eagle's right (facing) wing junction is slightly soft, as usual, but the remaining design elements show sharp detail. Population: 4 in 66 Deep Cameo, 4 finer (1/16). NGC ID# 24NV, PCGS# 96540

**1895 Barber Half, PR67+ Cameo
Incredible Eye Appeal**

- 4926 1895 PR67+ Cameo NGC.** A captivating Superb Gem proof with innumerable attributes. Tack-sharp detail defines the central devices on both sides, which glow with frost-white luster and are set against fully mirrored, glass-black fields. A trace of rose toning can be seen around the extreme outer peripheries, while the interiors are brilliant. The preservation is flawless. The 1895 proof half is scarce in Cameo grades and a genuine rarity this well-preserved. Census: 16 in 67 Cameo (2 in 67+ Cameo, 4 in 67 ★ Cameo), 9 finer (1/16). NGC ID# 24NX, PCGS# 86542

**1895 Barber Half, PR67 Cameo
Sharp Better-Date Proof**

- 4927 1895 PR67 Cameo NGC. CAC.** The 1895 had a mintage of just 880 proofs and only about one in every five pieces exhibits a Cameo finish. The bulk of 1895 proofs fall in the low-to-mid grades, and PR63 and PR64 specimens are seen with some regularity. At the PR67 Cameo level, however, the issue is seldom seen. This is a deeply reflective proof striking with sharply contrasting, fully defined devices. Pale-gold toning makes a brief appearance on each side. A few delicate lines exist, but otherwise there are no significant marks or flaws. Census: 16 in 67 Cameo (2 in 67+ Cameo, 4 in 67 ★ Cameo), 9 finer (2/16).
Ex: *Chicago Signature (Heritage, 8/2011)*, lot 4143; *Chicago Signature (Heritage, 8/2013)*, lot 4029. NGC ID# 24NX, PCGS# 86542

1897 Barber Half, PR68+ Deep Cameo
Sole Finest for the Type at PCGS

4928 1897 PR68+ Deep Cameo PCGS. CAC. A hint of pale gold-rose patina graces the obverse while the reverse provides more of an untuned appearance, but both sides offer profound contrast between jet-black reflective fields and silver-white, well-frosted devices. The surfaces are completely free of mentionable contact, in keeping with the ultrahigh proof grade. Only the usual right shield tip on the reverse is weak. Regardless of date, proof Barber halves at this grade level are rare as the proverbial hen's teeth. Although PCGS reports five examples in PR68 Deep Cameo, *this is the sole PR68+ Deep Cameo for the entire type at that service.* This is a coin of remarkable quality. Population: 6 in 68 (1 in 68+) Deep Cameo, 0 finer. CAC: 4 in 68 Deep Cameo, 0 finer (1/16). NGC ID# 24NZ, PCGS# 96544

1903 Barber Half, PR68 Cameo
Sole Finest Cameo Certified

4929 1903 PR68 Cameo NGC. Few proof Barber half dollars breach the lofty PR68 grade barrier, regardless of issue, but those that do are in constant demand among advanced specialists and Registry Set collectors alike. NGC has certified only four 1903 proof halves as high as PR68, with none numerically finer; of those, the present piece is the *only* one residing in the Cameo category. PCGS has also certified four proofs at this level, but with none in the Cameo column (1/16). Stellar design definition and equally impressive preservation complement fully mirrored fields of this piece that display a hint of amber-gold toning over the reverse. Field-motif contrast is clear and unmistakable. NGC ID# 24P7, PCGS# 86550

**1905 Barber Half, PR67
Colorfully Toned**

- 4930 1905 PR67 NGC. CAC.** Deeply mirrored with perceptible cameo contrast on each side. This Superb Gem 1905 proof half dollar displays vivid sun-gold, violet, and aquamarine toning over delicately preserved surfaces. The relief elements are struck to full definition throughout each side, delivering outstanding eye appeal. Conditionally rare and housed in a prior generation holder. Census: 13 in 67 (1 in 67 ★), 3 finer (1/16). NGC ID# 24P9, PCGS# 6552

**1906 Half Dollar, Sharply Struck PR67
Dramatic Obverse Toning**

- 4931 1906 PR67 PCGS.** The obverse displays intense rainbow toning with blue, pink, purple, and gold predominating, while the reverse is essentially untuned silver-white with just a hint of gold hue. One of the finest survivors from a proof mintage of 675 coins, certified in a green-label holder. Sharply struck and pleasing. Population: 11 in 67, 1 finer (1/16).
Ex: *Central States Signature (Heritage, 4/2009)*, lot 840. NGC ID# 24PA, PCGS# 6553

**1909 Barber Half, Contrasted PR68 Cameo
The Hugon Collection Coin**

- 4932 1909 PR68 Cameo NGC.** The John C. Hugon Collection was among the most spectacular assemblages of Barber coinage that it had ever been our privilege to offer when it came to us in 2005. Especially strong in the proof Barber series, the Hugon Collection set many milestones that continue to this day. This piece was earlier certified in an NGC slab with the Hugon pedigree on it, and now it is recertified with the same NGC cert number but lacking the Hugon name. It is clearly the same coin, however. At NGC and PCGS combined, there are only five Cameo 1909 proof halves submitted at the PR68 grade level (three at PCGS, two at NGC) with none finer (1/16). Including earlier appearances of this same coin, we have offered a PR68 Cameo on only six previous occasions in more than two decades. For Registry purposes, none is a better choice. Each side of this coin presents a fully brilliant, snow-white finish on the devices, while the deeply mirrored fields are free of handling marks. The strike is well-executed, and a touch of light golden toning warms the periphery on each side.
Ex: *John C. Hugon Collection / FUN Signature (Heritage, 1/2005)*, lot 4289; *Greensboro Collection, Part V / ANA Signature (Heritage, 8/2012)*, lot 4108. NGC ID# 24PD, PCGS# 86556

WALKING LIBERTY HALF DOLLARS

1916-S Walker Half, Blazing MS65 Challenging First-Year Issue

- 4933 1916-S MS65 PCGS. CAC.** The 1916-S easily outpaces the 1916 and 1916-D across all grade levels, but the disparity in availability becomes even more pronounced in MS65 or finer. Only 508,000 Walking Liberty half dollars were struck at San Francisco in 1916, the fourth-lowest mintage in the entire series. This blazing, practically untuned Gem offers swirling frost and strongly defined devices with a touch of incompleteness over the usual areas. Blushes of golden patina appear near the left reverse margins. The series specialist is sure to appreciate this challenging first-year representative. PCGS reports 14 submissions in higher grades (1/16). NGC ID# 24PN, PCGS# 6568

1917-D Walking Liberty Half, MS65 Obverse Mintmark

- 4934 1917-D Obverse MS65 NGC.** In Gem condition, the 1917-D Obverse Mintmark half dollar is slightly more plentiful than its Reverse Mintmark counterpart, but both issues are scarce at this level. The Obverse Mintmark example is boldly struck, with satiny luster and light golden toning. A few small, scattered ticks preclude a finer grade. Census: 54 in 65, 5 finer (1/16). NGC ID# 24PR, PCGS# 6570

1917-D Half Dollar, MS65 Reverse Mintmark Semikey

- 4935 1917-D Reverse MS65 NGC.** A fully struck Gem that boasts smooth surfaces and vibrant luster. Hints of butter-gold toning are confined to the borders. The *Guide Book* mintage for the reverse mintmark '17-D is more than double its obverse mintmark counterpart, yet the reverse mintmark is decidedly rarer, especially in better Mint State grades. Census: 25 in 65 (1 in 65+), 4 finer (1/16). NGC ID# 24PS, PCGS# 6571

1919-S Half Dollar, MS64 Better Date in High Grade

- 4936 1919-S MS64 PCGS. CAC.** An attractive example of a conditionally scarce issue, this Choice Mint State 1919-S Walking Liberty half dollar has satiny surfaces and above-average design definition. Both sides are partially brilliant with lemon-yellow toning at the lower obverse and upper reverse. Close study with a loupe reveals a few trivial ticks, not out of line for the grade. This San Francisco issue is among the less often seen dates from the early series and is a sought-after rarity in Gem condition. This attractive near-Gem will appeal to a range of collectors. PCGS has graded 52 finer examples (1/16).
Ex: *ANA Signature (Heritage, 10/2012)*, lot 3684. NGC ID# 24R2, PCGS# 6579

**1921-D Walker, MS61
Lowest Mintage of the Series**

4937 1921-D MS61 NGC. At 208,000 coins, the 1921-D Walker boasts the lowest mintage in the series. This is a satiny Mint State example with soft tan-gold toning and pleasantly minimal abrasions. Slight strike weakness is seen on Liberty's head and branch hand, as expected for the issue. Of the three 1921 keys, the Denver issue is the second-scarcest in Uncirculated grades. NGC ID# 24R7, PCGS# 6584

**1928-S Half Dollar, MS65
Few Known Finer**

4938 1928-S MS65 PCGS. A deceptively elusive issue in Gem and finer grades, coming from a mintage of nearly 2 million pieces. This MS65 coin is largely unabraded with satin luster that displays soft golden-gray toning. Liberty's head and branch hand are slightly soft, as is the eagle's trailing leg. This 1920s San Francisco issue is rarely seen with a sharp strike. Population: 59 in 65 (1 in 65+), 6 finer (1/16). NGC ID# 24RB, PCGS# 6588

**1935-S Half Dollar, MS66+
Fresh Mint Luster**

4939 1935-S MS66+ PCGS. CAC. The 1935-S Walker is only marginally scarce in MS66 and lower grades, but finer pieces are nothing short of rare. This Plus-designated representative exhibits radiant, frosty luster that is virtually free of any perceptible color. Liberty's branch hand shows partial thumb separation, and the surfaces are devoid of significant contact marks. Only three coins are numerically finer at PCGS (1/16). NGC ID# 24RL, PCGS# 6597

**1945 Half Dollar, MS67+
None Known Finer**

4940 1945 MS67+ PCGS. With no MS68 coins known, this and 13 other Plus-graded MS67 examples are the finest PCGS has seen of this late-series Walker (1/16). Nearly flawless fields showcase boldly rendered relief elements, and Liberty's leg is virtually free of the usual small ticks. Champagne interiors cede to deeper sun-gold around portions of the peripheries. NGC ID# BYKU, PCGS# 6624 Base PCGS# 6624

**1945-S Half Dollar, Lightly Toned MS67
Sharply Struck and Elusive**

4941 1945-S MS67 PCGS. CAC. This frosty Superb Gem 1945-S Walking Liberty half dollar is untoned in the centers but bounded by a light, pale pastel rim of ice-blue and amber-rose near the borders on each side, a beautiful effect. But this coin's high-end preservation is even more important, with the device high points, and even the oft-abraded right obverse field, free of significant abrasions. Liberty sports a partial split thumb, and the strike elsewhere is sharp. Among the finest survivors of this tricky issue and endorsed by CAC, where it is one of 12 in this grade. Population: 32 in 67, 0 finer (1/16). NGC ID# 24SH, PCGS# 6626

**PROOF WALKING LIBERTY
HALF DOLLAR**

**1936 Walking Liberty Half, PR67
Bold Peripheral Toning**

4942 1936 PR67 PCGS. CAC. This first proof Walking Liberty half dollar issue becomes conditionally rare at this lofty Superb Gem grade level. This piece is fully struck. The interiors display dusky champagne and pale lilac color, while the peripheries exhibit more vivid olive and crimson hues. Population: 37 in 67 (3 in 67+), 1 finer (1/16). NGC ID# 27V4, PCGS# 6636

FRANKLIN HALF DOLLARS

1951 Half Dollar, MS67 Full Bell Lines Extremely Rare, Tied for Finest

- 4943 1951 MS67 Full Bell Lines PCGS. CAC.** PCGS has seen only six 1951 Franklin halves this fine in the Full Bell Lines category, and NGC contributes two; neither service records finer submissions (1/16). This Registry Set-worthy example is one of only two at this level with CAC approval, ranking it as arguably the finest known. The strike is sharp, and the surfaces display untouched, satiny luster. Much of each side shows dappled russet-olive toning that thickens toward the borders, while a peripheral frame shows amber and gold. A rare opportunity for the competitive Registry Set enthusiast. NGC ID# 24SY, PCGS# 86658

1952-S Franklin, MS66+ Full Bell Lines Registry-Grade Example

- 4944 1952-S MS66+ Full Bell Lines PCGS. CAC.** With only three coins finer at PCGS and NGC combined, this Plus-graded Premium Gem is well-within the ranks of Registry Set quality. The central devices are boldly rendered, and the surfaces display remarkably clean, frosty luster — only a single small tick on the left edge of the bell is worthy of mention. The obverse is toned in rich amber and olive-gold hues, while the reverse shows lighter ice-blue color. Population: 50 in 66 (7 in 66+) Full Bell Lines, 3 finer (1/16). NGC ID# 24T5, PCGS# 86663

1962 Franklin, MS66 Full Bell Lines Among the Finest Certified

- 4945 1962 MS66 Full Bell Lines PCGS. CAC.** The 1962 Franklin half dollar is rare at the Premium Gem Full Bell Lines level, and this piece is one of two in this grade with a CAC endorsement; none are known finer (1/16). The obverse portrait is boldly rendered, showing untouched, frosty surfaces. A dusting of lavender-gray toning covers each side, allowing full luster to shine through. Population: 10 in 66 Full Bell Lines, 0 finer (1/16). NGC ID# 24TR, PCGS# 86682

KENNEDY HALF DOLLAR

1966 Kennedy Half, MS67 Extravagant Toning Conditionally Rare Circulation Issue

- 4946 1966 MS67 PCGS.** The regular issue 1966 Kennedy half dollar is scarce in MS66 and rare any finer. This Superb Gem is an essential acquisition for the advanced Registry collection. The strike is bold throughout, and the surfaces yield undisturbed, satiny luster. Both sides show large areas of crimson, violet, spruce-green, and sun-gold toning. Population: 6 in 67, 1 finer (1/16). NGC ID# 24WH, PCGS# 6709

EARLY DOLLARS

1795 Flowing Hair Dollar, Fine 15 B-4, BB-14 Variety

- 4947** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4, Fine 15 PCGS. Star 13 is positioned far to the left beneath Liberty's bust truncation of this "Hidden Star" variety, with the B-4, BB-14 die pair the only Flowing Hair dollar with such an unusual star alignment. The date is forced far left, and the right-hand stars are widely spaced as a result of the positioning. This silver-gray example shows nice detail for the grade, although three small planchet flaws occupy the lower obverse rim, plus another tiny flaw at T of UNITED. A small rough area beneath the right (facing) wing is noted. There are no adjustment marks on either side. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

1795 Flowing Hair, Three Leaves Dollar, VF30 B-5, B-27, Smooth and Attractive

- 4948** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF30 PCGS. Bowers Die State II. A splendid example of the plentiful B-5 die marriage, the usual choice of date and type collectors because of its availability in nearly any desired grade. This original, midgrade specimen displays deep gray-brown toning with a few splashes of steel-blue. The smooth surfaces are exceptional for the grade.
Ex: *New York Signature* (Heritage, 12/2011), lot 3683; *Long Beach Signature* (Heritage, 2/2012), lot 3751; *Central States Signature* (Heritage, 4/2012), lot 4833. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Dollar, AU50 Middle Die State

- 4949** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, AU50 NGC. Ex: Pedram Collection. Die State III. The common variety with the diagnostic die line behind Liberty's top hair curl. The die line from the left stem nearly reaches the border, with light flowlines and hints of die rust or spalling at the lower reverse. This is an intermediate die state like nearly all examples of this variety. There are no obverse clash marks on this piece. Faint evidence of a reverse die crack in its beginning stage appears at the upper reverse. The crack begins at the lower leaf of the top inside pair over the right wing to the terminal leaves and the second T of STATES. This piece retains considerable luster with light gold toning at the lower right obverse, and splashed on the reverse. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 B-5, BB-27 Silver Dollar, AU Details
Three Leaves Reverse

4950 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Cleaning — PCGS Genuine. AU Details. Bowers Die State III. A strong light reveals the ubiquitous hairlines that accompany the cleaning, but the work was skillfully done and in-hand the coin displays a natural look. Evenly distributed light, golden-gray toning deepens at the outer borders on both sides. Sharp definition remains for the BB-27 variety, which was struck in relatively high relief, inviting high point wear on the eagle's breast and Liberty's exposed hair strands. Both the About Uncirculated sharpness and the visual impression of this net-graded Flowing Hair dollar will attract type and early dollar specialists.

From *The Jim Hilands Collection*. NGC ID# 24WZ, PCGS# 39977
Base PCGS# 6852

1796 Draped Bust Dollar, B-4, BB-61, AU50
Small Date, Large Letters Guide Book Variety

4951 1796 Small Date, Large Letters, B-4, BB-61, R.3, AU50 PCGS. Bowers-Borckardt Die State I. The 1796 Draped Bust, Small Eagle dollar claims a modest mintage of 79,920 pieces, with six die varieties known for the date. The present coin represents the B-4, BB-61 variety, with a small raised dot die defect above the 1 in the date and a single leaf under the letter D in UNITED on the reverse. The BB-61 is a relatively available variety, with an estimated surviving population of 1,250-2,000 examples in all grades. However, the BB-61 is seldom seen above the VF grade level, and examples in AU53 condition are quite elusive.

This impressive AU53 specimen offers lightly abraded lavender-gray surfaces that retain a few traces of original mint luster and show highlights of golden-brown toning in selected areas. No planchet adjustment marks are present and the well-detailed design elements exhibit just a touch of softness on the centers. Population, for the variety: 3 in 50, 5 finer (1/16).

From *The Jim Hilands Collection*. NGC ID# CAUF, PCGS# 40000
Base PCGS# 6860

1796 Dollar, CAC-Endorsed AU55
B-4, BB-61, Elusive This Fine

4952 1796 Small Date, Large Letters, B-4, BB-61, R.3, AU55 PCGS. CAC. Die State III. BB-61 is an available die marriage within the 1796 issue, although the bulk of the known examples grade XF or lower. Attractive AU or Mint State coins are rarities. This piece is comparable in quality to the Eliasberg coin, which is listed among Bowers' Notable Specimens in his silver dollar *Encyclopedia*. It is also in the late, lapped die state, which is seldom seen at any numeric level. The strike is boldly and evenly rendered with complete dentils around each side. The high points of the eagle's body are indistinct, as is typical of this variety for which the reverse die was not as deeply impressed as on other marriages. Glimpses of luster reside in the fields, and each side displays pleasing olive-gray and amber-gold toning in a mottled pattern. A pleasing, original-looking Small Eagle type coin. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1798 B-27, BB-113 Large Eagle Dollar, AU55
Ex: Cardinal/Hesselgesser Collections

4953 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU55 PCGS Secure. Ex: Cardinal/Hesselgesser. Pointed 9, Close Date. Bowers Die State II. A Choice About Uncirculated example of this moderately available Draped Bust dollar. Light, silver-gray color — more silver than gray — covers both sides with occasional powder-blue accents, with surviving mint luster beneath the even toning. Scattered light marks are visible with a glass over the finely textured fields. The motifs retain most of their original sharp strike. The obverse shows the 8 in the date much too high, the top leaning right, in the first use of a die that saw service on six other varieties. NGC ID# 24X6, PCGS# 40030 Base PCGS# 6873

**1798 B-27, BB-113 Dollar, MS62
Early Obverse Die State**

4954 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, MS62 PCGS. This is the first use of a workhorse obverse die that was used for seven different die marriages. The reverse die was used for four varieties, appearing here in its final use. The present piece has the highest hair wave lapped, apparently as always, although lacks any trace of the die crack through the 9 in the date. The reverse has the usual cracks in the late state of that die.

This sharply defined Mint State dollar has a bold double profile from the forehead to the neck (we recall seeing at least one other example of the BB-113 with this interesting and unusual anomaly). Both sides exhibit pale blue peripheral toning on light silver-gray surfaces. The second edition of the Bowers Silver Dollar Encyclopedia lists 14 Mint State pieces among the Notable Specimens. Population: 16 in 62, 16 finer (1/16), for all 1798 Heraldic Eagle silver dollars. NGC ID# 24X6, PCGS# 40030 Base PCGS# 6873

**1799 B-9, BB-166 Dollar, Smoothly Toned XF45
Attractive, Choice Early Type**

4955 1799 7x6 Stars, B-9, BB-166, R.1, XF45 NGC. Bowers Die State V. Lightly worn, the surfaces of this Choice XF dollar exhibit only shallow, tiny marks visible with a glass. Vestiges of mint luster cling to the borders beneath golden-gray toning with gunmetal-blue accents. Aptly named the "Apostrophe" variety by Bolender for a short die break after the second S of STATES, the advanced stage of the dies is confirmed by multiple die cracks on the obverse congregating in the right-hand field and stars. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1800 B-13, BB-193 Dollar, AU Details
Very Late Die State**

4956 1800 B-13, BB-193, R.4 — Cleaning — PCGS Genuine. AU Details. Bowers Die State IV+. Obverse die failure and reverse die injury are clearly evident on this late die state example, with semicircular bulges and die cracks at stars 1 to 4 and stars 8 to 11. The reverse die is severely clashed through the clouds and OF, while weakness at the top of AMERICA and a lengthy die crack from between M and E extends to the left (facing) claw with arrows. This interesting dollar is bright, untuned, and only lightly hairlined from the cleaning. Mint luster remains to a large extent on both sides. The strike is bold where not compromised by the late state of the dies, which Bolender thought was a different variety (B-18a). *From The Jim Hilands Collection.*

**1801 Dollar, B-1, BB-211, XF45
Sharp Early Die State Type Coin**

4957 1801 B-1, BB-211, R.3, XF45 PCGS. Die State I. A bold, even strike on this Choice XF 1801 Draped Bust dollar is accentuated by the early die state, showing all relief elements in sharp detail. Soft lavender-gold toning deepens to grayish hues toward the borders, giving this piece a nice original look. Little wear is present on the devices, and there are no distracting abrasions. NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893

1802 Narrow Date Dollar, MS64
B-6, BB-241, Great for Type

4958 1802 Narrow Date, B-6, BB-241, R.1, MS64 NGC. Bowers Die State III. The wide separation between the 8 and 0 in the date, the 2 high but not touching the bust, and the missing right foot on the T in LIBERTY all aid in attributing this Narrow Date obverse. (Bowers writes that "this die must have been made about the same time as the reverse for 1801 BB-213, which also displays broken T letters from the same punch.") This is the sole use of this obverse die.

The reverse die, however, was employed in striking the 1801 BB-212, the 1802/1 BB-231 and BB-232, the present 1802 BB-241, and two or three 1803 varieties (the existence of one is uncertain): BB-253 (?) and BB-254 and BB-255. The third cloud from the left shows a straight spur of extra metal protruding from the bottom, and the eagle bites down on a star point slightly back from its tip. The 13th arrow is dodgy to find. The first A in AMERICA touches feather 3 and is connected by a tiny die crack to feather 4.

Among 1802 dollars, the BB-241 is many times more plentiful than all other 1802 and 1802/1 varieties. Despite the reported mintage of only 41,650 dollars in the year, the large number of survivors of 1802 and 1802/1 dollars indicates that further striking were likely in 1803 and/or 1804.

All of the foregoing makes this high-grade near-Gem BB-241 a top-notch candidate to become a member of an equally fine type set — as do its inherently strong production criteria. Attractive rose patina on both sides complements a bold strike on a well-centered planchet free of major post-Mint distractions. The relative availability of this variety among early dollars, simply stated, translates into "more bang for the buck" when a piece such as this comes along.

This piece appears to lie just outside of the Condition Census for the date, given that PCGS reports six Gem examples of the 1802-dated silver dollars (all varieties) including one MS65+ as its finest. NGC reports six 1802s in Gem grade, including one attributed as B-6, BB-241 (1/16). Bowers' Notable Specimens in his second-edition reference enumerates seven Gem examples and 11 in MS63, adding, "Many more Choice Uncirculated specimens could be listed." NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

1803 Small 3 Bust Dollar
B-5, BB-252, Toned Choice XF

- 4959** 1803 Small 3, B-5, BB-252, R.3, XF45 PCGS. The BB-252 variety is easily recognized by the Small 3 in the date and a spur on the outside curve of D in UNITED. This coin is a lightly worn specimen, with attractive gold and blue-steel patina and traces of original mint luster. Well-centered, with no adjustment marks and only minor abrasions. Population: 42 in 45, 49 finer (2/16).
Ex: FUN Signature (Heritage, 1/2012), lot 3792; New York Signature (Heritage, 3/2012), lot 3534. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

GOBRECHT DOLLAR

1836 Gobrecht Dollar, PR60, Judd-60, Die Alignment I
Remarkably Light Color and Clean Surfaces

- 4960** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR60 NGC. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). The straight, angling clash mark is obvious above the eagle's wing and points toward the AT in STATES. As with all 1836 Gobrecht dollars, this piece was struck in the final week of 1836. Habit and tradition have made collectors and grading services call Gobrecht dollars proofs. However, it is an "open secret" that almost all of the 1836 dollars do not fall within the guidelines of what we know proof coins to look like. Undoubtedly the dies were polished and the fields show some reflectivity, but this was most likely to enhance acceptance by the public of the new design, rather than to create a special "master coin" or what we today call a proof. This piece displays undeniable brightness in the fields that serves to backlight the reddish-golden and lilac toning that covers each side. The devices are fully brought up on each side. This is a remarkably clean Gobrecht dollar. No contact marks show on the obverse, and just a few minor ones can be found on the reverse. NGC ID# BLWV, PCGS# 11225
-

SEATED DOLLARS

1845 Seated Dollar, Dove-Gray MS61
Sharply Struck and Appealing

- 4961** 1845 MS61 NGC. The dove-gray surfaces on both sides of this 1845 Seated dollar are strictly Mint State and show no trace of toning. A scattering of small ticks on each side and somewhat muted luster account for the grade. The mintage of the 1845 was a small 24,500 pieces for circulation, and most survivors are well-worn. This piece boasts a sharp strike and surprisingly strong eye appeal. Census: 8 in 61, 9 finer (1/16). NGC ID# 24YF, PCGS# 6931
-

1860 Seated Dollar Rarely Seen Brilliant Gem

4962 1860 MS65 PCGS. CAC. In 1860, Seated dollars were little-used in domestic commerce and large quantities of the issue were never released to the public. Silver continued to be the precious metal of choice for foreign trade (especially in China and the Orient) where silver dollars found a home — albeit a tenuous one — since most of the export dollars were unceremoniously melted for their bullion value.

Likewise, circulation-strike Seated dollars were virtually ignored by collectors. There was little desire to find a high-grade business strike when a pristine proof could be purchased at the Mint. 1860, in particular, was an important year at the Mint for proof issues since it was the first full year of offering proofs to the general public. The demand was overestimated, and results were more of a bungle than a bang. The large mintage of 1,000 pieces saw more than half of the pieces melted at year-end as unsold.

Surviving Gem Seated dollars are rare regardless of date or mint. PCGS reports just 68 MS65 or finer examples for the entire 33-year series, without any allowance for duplications or resubmissions. 1860 happens to be a high-mintage year by virtue of the large production of Seated dollars at the New Orleans Mint, but the Philadelphia issue is as rare in high Uncirculated grade as any other date, despite its own healthy mintage of 217,600 pieces.

The present offering is an exceptional example that has been off the market for more than 25 years. Housed in an early 1990s-vintage PCGS green label holder, the coin is brilliant-white and frosty. Cartwheel mint luster flows with unbroken radiance across both sides, and the coin displays a creamy-smooth presence that captures the eye of even the most discriminating specialist. CAC rightfully endorses the coin.

A few high point contacts exist as well as a pair of tiny reeding marks on the reverse beneath STATES and the eagle's wing, and the strike is minutely incomplete on a few of the top stars and Liberty's head. Even so, there is no denying that this is an outstanding Gem Seated dollar of the highest order. Such appearances are rare at public auction, and we expect spirited bidding when this important lot crosses the block. Population: 4 in 65, 2 finer (2/16).

From The Dr. John Young Collection. NGC ID# 24Z2, PCGS# 6949

**1866 Seated Liberty Dollar, MS64
With Motto, Popular First-Year Type Coin**

- 4963 1866 Motto MS64 PCGS.** The design of the silver dollar was modified to include the motto IN GOD WE TRUST on a ribbon on the reverse in 1866, creating a popular new design type. A nominal mintage of 48,900 business-strike specimens was accomplished at the Philadelphia Mint, and few examples were saved by contemporary collectors. MS64-graded survivors are seldom encountered in today's market and finer coins are very rare. This attractive Choice specimen exhibits sharply detailed design elements in most areas, with just the slightest touch of softness on some star centers. The lightly marked surfaces display highlights of greenish-gold toning, with satiny mint luster and a few hints of prooflike reflectivity in the fields. Population: 18 in 64 (2 in 64+), 8 finer (1/16).
From *The Jim Hilands Collection*. NGC ID# 24Z9, PCGS# 6959

**1872-CC Seated Dollar, MS62
Reflective Fields, Excellent Surfaces
Carson City Rarity in Mint State**

- 4964 1872-CC MS62 PCGS.** Demand for fresh silver dollar coinage in the Nevada Territory in the 1870s never materialized. The high Trade dollar mintages and later Morgan dollar productions were due mostly to federal laws requiring their coinage, not always local demand. The Seated dollar issues from this mint more closely reflect the contemporary situation in that region. Of the four dates struck in this series, only the 1870-CC had a mintage that cracked the five-figure barrier. The 1872-CC is among the low-mintage semikeys of the entire series (although for the collector who cannot obtain such great rarities as the 1851, 1852, and 1870-S, these Carson City issues are full fledged keys).
The present coin is among only a dozen Mint State pieces certified by PCGS, including five in this grade and three finer (1/16). The surfaces display dusky tan-gold toning, but a tilt in-hand reveals nearly prooflike fields. The design elements are well-defined, and a few light marks are the only grade-limiting factors. A rare and important opportunity for the Seated dollar or Carson City enthusiast. NGC ID# 24ZK, PCGS# 6969

PROOF SEATED DOLLARS

1858 Seated Liberty Dollar, PR63 Classic Proof-Only Key

4965 1858 PR63 PCGS. CAC. The Philadelphia Mint began its popular program of commercial proof set offerings in 1858. Although no business-strike silver dollars were produced that year, the Mint struck a limited number of proof Seated Liberty dollars to provide numismatists with an example of the denomination for their collections, if they participated in the new program. The small proof-only mintage made the 1858 a sought-after issue from the earliest days of the hobby. The Chapman brothers estimated the original mintage at just 80 pieces, but it seems likely that some restrikes were made in the 1859-1860 time frame, to satisfy collector demand. The 2016 *Guide Book* estimates the production total as 300 examples, all told.

This impressive Select proof, exhibits sharply detailed design elements and reflective fields, under delicate shades of pale gold toning. A few minor hairlines and contact marks explain the grade, but the overall presentation is most attractive. Population: 31 in 63, 12 finer (2/16). NGC ID# 252C, PCGS# 7001

1864 Seated Liberty Dollar, PR64 Cameo Only 470 Examples Struck

4966 1864 PR64 Cameo PCGS. Only 470 proof Seated Liberty dollars were coined in 1864, and the business-strike mintage was a meager 30,700 pieces, making the issue elusive in both formats today. This delightful Choice proof exhibits sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The well-preserved surfaces show only a few minor contact marks and hairlines, with attractive highlights of pale gold toning. Population: 17 in 64 (2 in 64+) Cameo, 3 finer (1/16). From *The Jim Hilands Collection*. NGC ID# 252J, PCGS# 87007

TRADE DOLLARS

1873-CC Trade Dollar, MS61 Elusive in Mint State

4967 1873-CC MS61 PCGS. Like a few other Carson City issues in the Trade dollar series, the 1873-CC is scarce in Mint State. This example displays dazzling luster beneath a tinge of golden-gray toning. Moderately well-struck but with mild softness on Liberty's head, the eagle's right (facing) talons, and along the upper edge of the left (facing) wing. Light chatter limits the grade but poses little distraction. Population: 8 in 61, 35 finer (1/16). NGC ID# 252X, PCGS# 7032

1878-CC Trade Dollar, Appealing MS61
Final-Year Key in Mint State

- 4968 1878-CC MS61 PCGS. Breen-5822.** The 1878-CC is arguably the rarest Trade dollar issue in Mint State. The circulation-strike series was discontinued in this year, being replaced by the Morgan dollar under the new Bland-Allison Act legislation. The Philadelphia Mint produced only Morgan dollars for circulation in 1878, although the Western branches in California and Nevada each struck quantities of Trade dollars early in the year before dies for the new standard silver dollar issue arrived. The 1878-CC Trade dollar boasts a series-low circulation strike mintage of 97,000 pieces and is proportionately rare in Mint State. This example glows with satiny luster beneath warm golden-gray and lavender toning. There are no singular abrasions, although light contact over the high points of the design elements precludes a finer numeric designation. The coin is well-struck, and the eye appeal exceeds expectations for the grade. Population: 9 in 61, 21 finer (1/16). NGC ID# 253M, PCGS# 7047
-

PROOF TRADE DOLLARS

1879 Trade Dollar, PR66 Cameo
Sharp Strike and Strong Contrast

- 4969 1879 PR66 Cameo PCGS.** Few Trade dollars of the 1879 vintage are found in so high a grade with Cameo surfaces. Strong contrast prevails between the frosty devices and the highly reflective fields, despite the differing color palettes between the two sides, more golden and smoke-gray on the obverse and pale rose tones on the reverse. Even a loupe reveals only a couple of scattered, trivial marks consistent with the grade. The proof strike is quite sharp, if just short of full. The 1879 proof Trade dollars, struck to the extent of 1,541 pieces, was the first of the proof-only issues that would conclude the series. Population: 10 in 66 Cameo, 6 finer (1/16). NGC ID# 27YR, PCGS# 87059
-

1880 Trade Dollar, PR68
Finest Non-Cameo Example at NGC

4970 1880 PR68 NGC. The 1880 Trade dollar was struck exclusively in proof format, with no accompanying business-strike mintage. Its proof-only status became widely known almost immediately, causing speculators to order a large number of proof sets in early 1880 (this activity actually began the year before, with the proof-only 1879 issue). Although the speculation subsided later in the year, the 1880 Trade dollar claims the largest proof mintage of any issue in the series, at 1,987 pieces. Although the 1880 proof is easily located in grades up through the Gem level, finer examples are definitely elusive.

This delightful PR68 specimen is the single-finest non-Cameo example at NGC (1/16). The design elements exhibit razor-sharp definition throughout and the frosty texture of the devices creates noticeable (if undesignated) cameo contrast with the deeply reflective fields. The impeccably preserved surfaces offer mostly brilliant centers, with vivid highlights of greenish-gold and cerulean-blue toning at the peripheries. Eye appeal is terrific. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR65 Deep Cameo
Popular Proof-Only Issue

4971 1880 PR65 Deep Cameo PCGS. When collectors learned that no business-strike Trade dollars were struck in 1879 a short, but quite intense, speculation resulted in the market for proof sets of that year. The trend continued the following year, as the 1880 Trade dollar was another proof-only issue. Although orders for proof sets dropped off after the first half of the year, the 1880 Trade dollar still claims the largest proof mintage of the series, at 1,987 pieces.

Despite the generous production total, relatively few examples have survived with Deep Cameo surfaces. This delightful Gem offers razor-sharp definition on all design elements and the deeply mirrored fields contrast profoundly with the richly frosted devices. The mostly brilliant surfaces are impeccably preserved, with a few hints of pale gold toning. Population: 3 in 65 Deep Cameo, 3 finer (1/16).

From The Jim Hilands Collection. NGC ID# 27YS, PCGS# 97060

**1882 Trade Dollar, PR66 Cameo
Attractively Toned**

4972 1882 PR66 Cameo PCGS. Trade dollars were only produced in proof format in 1882, with a generous reported mintage of 1,097 pieces to satisfy collector demand. It is likely that some examples went unsold and were melted after the close of the year. The date is not too difficult to locate in grades up to the Gem level, but Premium Gem specimens, with the Cameo designation, are very rare.

The present coin is a delightful Premium Gem, spectacularly toned in iridescent shades of golden-brown, lavender-gray, and cerulean-blue. The design elements are sharply detailed in most areas, showing a trace of the softness as typically seen on some stars and Liberty's head. The deeply mirrored fields contrast boldly with the frosty devices to produce a startling cameo effect. Eye appeal is terrific. Population: 7 in 66 (1 in 66+) Cameo, 3 finer (1/16). NGC ID# 27YU, PCGS# 87062

**1883 Trade Dollar, PR65
Reflective Through the Toning**

4973 1883 PR65 PCGS. CAC. Gold, pink, and blue overtones drape each side of this late-date Trade dollar. Detail is quality, while on the reverse, two straight horizontal lines cut through the organic curves of the patina. A few minor hairlines on either side of Liberty's figure are well within the bounds of the grade. Population: 50 in 65, 22 finer (1/16). NGC ID# 5DP8, PCGS# 7063

**1883 Trade Dollar, PR64 Cameo
Well-Contrasted, CAC-Approved**

4974 1883 PR64 Cameo NGC. CAC. The final regular-issue proof in the Trade dollar series, the 1883 poses a challenge for collectors in the Cameo grade range and is genuinely rare as a Deep Cameo. This Choice Cameo displays brilliant surfaces and stark contrast. A few minor hairlines are hardly detracting. The strike is sharp, and the corresponding eye appeal is noteworthy. Census: 25 in 64 Cameo (1 in 64+ Cameo, 1 in 64 ★ Cameo), 45 finer (1/16). NGC ID# 27YV, PCGS# 87063

MORGAN DOLLARS

**1878-CC Dollar, MS66
Semiprooflike Fields, Rare Any Finer**

4975 1878-CC MS66 PCGS. Semireflective fields highlight the frosty sharpness of the central devices on this Premium Gem 1878-CC Morgan dollar, while boasting a lack of bothersome contact marks. This coin is nearly brilliant save for traces of light golden color that emerge from the peripheries. Although marginally available in this grade, the 1878-CC is rare any finer, with just six such coins certified by PCGS (2/16). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan, MS65 Deep Mirror Prooflike
Modestly Contrasted Motifs**

- 4976 1878-CC MS65 Deep Mirror Prooflike NGC.** While available in the lower grades of Mint State and with deeply mirrored fields, at the Gem level there are very few 1878-CC dollars available. This is a brilliant coin that displays thick mint frost over the devices and sharply contrasting deep proof reflectivity in the fields. There is a curious area of weakness on the lower portion of the reverse, possibly from something that clogged the die in that area. Census: 32 in 65 (1 in 65+, 1 in 65 ★) Deep Mirror Prooflike, 0 finer (2/16).
Ex: Long Beach Signature (Heritage, 9/2006), lot 4929. NGC ID# 253M, PCGS# 97081

**1879-CC Morgan Dollar, Sharp MS64
Key Series Issue, Minimally Toned**

- 4977 1879-CC MS64 PCGS Secure.** Normal Mintmark. Aside from a few scattered, light abrasions in the obverse fields, the semireflective silver surfaces of this deeply impressed 1879-CC are exceptionally attractive and appealing. Liberty's hair detail and the eagle's breast plumage are razor-sharp. The cheek is clear of all distraction, and the neck truncation shows just a few ticks. A Choice example of this scarce and in-demand Carson City issue. NGC ID# 253U, PCGS# 7086

**1879-CC Dollar, MS62+
VAM-3, 'Capped Die'**

- 4978 1879-CC "Capped Die," VAM-3, MS62+ PCGS.** A Top 100 Variety. The famous "Capped Die" 1879-CC variety, showing numerous small die chips around the mintmark. This radiantly lustrous, frosty Mint State example displays a bold strike with hints of champagne toning. Light, scattered abrasions determine the grade, with a few marks in the left obverse field being the most obvious. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC Silver Dollar, MS61
Clear CC Variety**

- 4979 1879-CC GSA MS61 NGC. CAC.** Normal Mintmark, Closed 9. A sharply struck, high-end coin for the MS61 grade, as confirmed by the CAC endorsement that accompanies the NGC band certification. Untoned and frosty on the motifs, the surrounding fields are somewhat reflective with fewer than expected marks. Just 756,000 pieces were struck, and just 4,123 of them remained in government hands for the GSA sales. A pleasing example in the original plastic and box, with a certificate that lacks its registration number.
From The Lenny Reiner Collection, Part III. NGC ID# 253T, PCGS# 518848 Base PCGS# 407086

**1879-CC Silver Dollar, MS61
Ex: GSA Hoard**

- 4980 1879-CC GSA MS61 NGC. CAC.** Normal Mintmark, Closed 9. A bit baggy on the cheek, but the fields are quite unabraded for the grade and both sides are partially prooflike. Signs of coin-to-coin contact interrupt the frosted high points of the central motifs, which are otherwise sharply struck. The coin retains a brilliant, mint-fresh appeal, as confirmed by the CAC endorsement. The coin remains in its original black plastic case, with box, although the certificate has had the registration number trimmed off.
From The Lenny Reiner Collection, Part III. NGC ID# 253T, PCGS# 518848 Base PCGS# 407086

1879-CC Morgan Dollar, MS62
Partially Prooflike

- 4981 1879-CC GSA MS62 NGC.** A scattering of almond-gold toning sits on the thickly frosted central motifs and extends into the adjacent fields, but otherwise this better-date GSA example is brilliant. The surfaces show some prooflike character and remarkably few abrasions disturb them, although high point scuffs from years in treasury storage and counting appear on the sharply struck devices. NGC band-certified in the original plastic with box. The certificate remains, but with its registration number trimmed off. *From The Lenny Reiner Collection, Part III.* NGC ID# 253T, PCGS# 518848 Base PCGS# 407086

1879-CC Morgan, MS63
Lightly Toned GSA Coin

- 4982 1879-CC GSA MS63 NGC.** Normal Mintmark, Closed 9. A thin sheen of golden toning visits the frosty, lustrous surfaces. Scattered bagmarks are shallow, yet a few on Liberty's cheek define the Select Uncirculated grade. The strike is sharp except on the eagle's right (facing) claw. The distribution of just 4,123 pieces by the GSA makes the 1879-CC challenging to find band-certified in original GSA plastic — not only because of the small number of pieces released, but also because many were cracked out of the holders. This example retains its original black holder, box, and paperwork, although the holder has a small crack that does not affect the coin. *From The Lenny Reiner Collection, Part III.* NGC ID# 253T, PCGS# 518848 Base PCGS# 407086

1879-S Morgan Dollar, MS68
Ideal Registry Set Contender

- 4983 1879-S MS68 PCGS.** The 1879-S Morgan dollar was produced in large numbers and the issue is one of the most popular type coins of the series, because of its availability in high grade. This magnificent MS68 example exhibits razor-sharp definition on all design elements and the virtually pristine surfaces show a combination of vibrant mint luster and prooflike reflectivity. Eye appeal is terrific. PCGS has graded no numerically finer examples (2/16). NGC ID# 253X, PCGS# 7092

1880-S Dollar, Dazzling MS68
Superb Type Coin

- 4984 1880-S MS68 PCGS. CAC.** Dazzling cartwheel luster blends into semiprooflike fields on this razor-sharp Morgan dollar type coin. Virtually pristine surfaces are nearly brilliant throughout the obverse interior, while the outer periphery displays a warm golden halo. The reverse is lightly toned in champagne hues. For type purposes, this CAC-endorsed 1880-S Morgan dollar would be difficult to surpass. PCGS and NGC each list five MS69 coins finer, all far out of reach for most collectors (1/16). NGC ID# 2544, PCGS# 7118

1881-S Dollar, CAC-Endorsed MS68
Lovely Obverse Toning

- 4985 1881-S MS68 NGC. CAC.** The availability of the 1881-S Morgan in high grade makes it a go-to type-coin issue, although pieces at the lofty MS68 level are in particular demand. This CAC-approved representative is among the finest at NGC (2/16). The obverse displays transitional rainbow hues in pastel shadings, and the reverse has light champagne patina. The strike is sharp, and the eye appeal is particularly pleasing. NGC ID# 2549, PCGS# 7130

**1881-S Dollar, Blazing MS68
Nearly Flawless, CAC-Endorsed**

4986 1881-S MS68 PCGS. CAC. Dazzling luster combines with virtually pristine, brilliant surfaces to deliver seemingly insurmountable eye appeal. This 1881-S Morgan dollar yields sharp design elements and a wealth of attributes that are ideal for type representation. Two MS69 coins at PCGS are all that is numerically finer at either service (1/16). NGC ID# 2549, PCGS# 7130

**1883-CC Morgan, MS66 Deep Mirror Prooflike
Frosty Motifs, Stark Cameo Contrast**

4987 1883-CC MS66 Deep Mirror Prooflike PCGS. CAC. One of only 22 CAC-endorsed Deep Mirror Prooflike coins in MS66, this Premium Gem 1883-CC Morgan dollar yields dazzling cameo contrast and intense, frosty luster over the relief elements. Traces of light golden toning attest to the originality of the surfaces. PCGS has seen only two numerically finer Deep Mirror Prooflike coins and none are CAC-approved (2/16). This remarkable coin should not be passed by. NGC ID# 254H, PCGS# 97145

**1883-S Dollar, MS64
Blazingly Lustrous and Attractive**

4988 1883-S MS64 PCGS. CAC. Radiantly lustrous with a blush of light golden toning, this Choice 1883-S Morgan dollar yields stellar eye appeal for the grade and issue. The strike is sharp, and the CAC-endorsed surfaces reveal only a few trivial grazes on the cheek and in the nearby field. Finer coins are rare, with 18 so-graded at PCGS (1/16). NGC ID# 254K, PCGS# 7148

**1883-S Dollar, CAC-Approved MS64+
Rare Any Finer**

4989 1883-S MS64+ PCGS. CAC. Boasting both a CAC green label and a Plus designation, this Choice PCGS-certified 1883-S Morgan dollar is unsurpassed below the rarely seen Gem grade level. Bold strike sharpness characterizes the design elements, while a few small grazes on Liberty's cheek are less than distracting. A blazing example with significant "pop." PCGS lists 18 finer representatives, a paltry number for any Morgan dollar issue (1/16). NGC ID# 254K, PCGS# 7148

**1884-S Dollar, MS60
High Quality for the Grade**

4990 1884-S MS60 NGC. The large quantity of near-Mint State coins and "sliders" make the assignment of even an MS60 grade of extreme importance for this conditionally rare date. The present example displays full flashy silver luster and undeniable mint-fresh eye appeal. A virtually untoned and sharply struck coin, the reflective fields are less abraded than expected while a few scuffs on the portrait determine the grade. NGC ID# 254P, PCGS# 7156

1886-O Dollar, MS63+
Radiant Luster, Stellar Eye Appeal

- 4991** 1886-O MS63+ PCGS. CAC. This conditionally challenging New Orleans issue is seldom seen with the luster and eye appeal that this Plus-graded Select example offers. The strike is bold, and trivial grazes on the obverse limit the grade but are not overly obtrusive. The 1886-O had a mintage exceeding 10 million coins, but most pieces entered circulation or were later melted. Few pleasing Mint State coins survive, by proportion. NGC ID# 254W, PCGS# 7168

1886-O Dollar, MS64
Extremely Rare Any Finer

- 4992** 1886-O MS64 PCGS. Specks of gold toning are evident on each side of this highly lustrous near-Gem example. The surfaces have frosty white luster and the design elements are boldly detailed in most areas, with slight weakness only over Liberty's ear. Although quite a number of these have been certified as near-Gem quality, few finer pieces have ever been examined by PCGS. The better ones include six Gems (one in MS65+) and one MS67, the latter with deep prooflike surfaces. None are finer than MS64+ at NGC (1/16). Ex: *Central States Signature (Heritage, 5/2007)*, lot 4743. NGC ID# 254W, PCGS# 7168

1887/6-O Dollar, Frosty MS65
VAM-3, Rare in Gem Condition

- 4993** 1887/6-O VAM-3, Top 100, MS65 NGC. A Top 100 Variety. The lower curve of an underlying 6 can be seen along the right side of the 7 in the date. This is a popular variety that is rare in Gem condition. NGC and PCGS have each attributed only a single example in MS65, and none are finer. This, the NGC coin, is high-end for the grade. Unusually frosty luster rolls over each side with a hint of champagne toning, illuminating bold design elements. To the unaided eye, the preservation appears nearly a grade point finer, although faint grazes on the cheek preclude such a designation from NGC. An important opportunity for the VAM specialist. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

1888-O Morgan Dollar, MS62
Famous 'Scarface,' VAM-1B Variety

- 4994 1888-O Scarface, VAM-1B, MS62 PCGS.** A Top 100 Variety. This is an immensely popular variety, distinguished by a heavy die break that gradually extends in various die states from the rim near the P in PLURIBUS, through the nose and across the cheek and neck. This piece is in a late stage of break, with the crack heavy across the cheek and just beginning to form over the neck as well. The luster is radiant and exhibits light golden areas in the margins. The extreme centers are softly struck, as usual, but this remains a pleasing example of this scarce variety. Population: 33 in 62 (3 in 62+), 11 finer (1/16). NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

1888-O Dollar, MS63
VAM-1B3, Advanced 'Scarface' Die Break

- 4995 1888-O Scarface, VAM-1B3, MS63 PCGS.** A Top 100 Variety. VAM-1B3 is a high-premium late die state example of this famous "Scarface" Morgan. The heavy die break extends fully across Liberty's cheek but does not yet divide the neck. This variety is scarce in pleasing Mint State condition, and this Select example shows few distracting abrasions. Moderate strike weakness is seen on the central high points, as is consistent with the issue and the advanced stage of the obverse die break. The luster is satiny and displays dusky lavender-gray toning around much of the reverse periphery. NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

1889-CC Silver Dollar, AU55
Rarest Carson City Morgan

- 4996 1889-CC AU55 PCGS.** A Choice collector-grade example of this key Carson City issue. The slightly reflective fields and Liberty's cheek are remarkably abrasion-free considering the brief circulation. The over-the-ear definition is sharper than many survivors, and traces of soft silver luster remain beneath the light-gray patina. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU55
VAM-2A, Clashed N

- 4997 1889-CC AU55 PCGS. VAM-2A, Clashed N.** This VAM variety is heavily clashed with bold die cracks on the obverse: through stars 1-3 and the date and down from the rim through the S in PLURIBUS. As an 1889-CC date representative, this Choice AU coin displays partial luster in the fields and light golden toning on each side. Well-struck with little wear. The obverse is heavily abraded. NGC ID# 2559, PCGS# 7190

**1889-CC Silver Dollar, MS63 Prooflike
Most Elusive Carson City Morgan**

4998 1889-CC MS63 Prooflike PCGS Secure. The Carson City Mint resumed coinage operations in 1889, after a four-year hiatus. A small mintage of 350,000 Morgan dollars was accomplished that year, but series specialist Rusty Goe notes this meager production total was further reduced by melting. There was little numismatic interest in branch mint coinage before 1893, so few high-quality examples were saved by contemporary collectors. As a result of all these limiting factors, the 1889-CC is the rarest Morgan dollar from the famous Carson City Mint.

The present coin is a spectacular Select specimen, with sharply detailed design elements and prooflike reflective fields that contrast boldly with the frosty devices. The mostly brilliant surfaces show a scattering of minor contact marks that define the grade and a few highlights of pink and gold patina. The overall presentation is most attractive. Population: 32 in 63 (2 in 63+) Prooflike, 8 finer (2/16). NGC ID# 2559, PCGS# 7191

**1890-CC Dollar, Frosty MS65+
Elusive CAC-Endorsed Gem**

4999 1890-CC MS65+ PCGS. CAC. The 1890-CC saw smaller GSA totals than some earlier issues from this mint, making it a slightly better Carson City date in high grade. This Plus-graded Gem is second to only 15 finer coins at PCGS (2/16), and its eye appeal is superb for the grade. Sharp design elements are set against frosty, radiant surfaces. A tinge of gold toning left of the date is the only mentionable color. NGC ID# 255D, PCGS# 7198

**1892-S Morgan Dollar, AU58
Challenging San Francisco Issue**

5000 1892-S AU58 NGC. A bright silver sheen radiates from the lightly abraded prooflike surfaces of this near-Mint Morgan dollar. Untoned and visited by a touch of wear as well as several small marks, the motifs are crisply struck on all but the highest points. Original mint luster glows from the margins.

When no great quantities of the 1892-S silver dollars appeared in the 1962 to 1964 Treasury releases, the true scarcity of near-Mint and fully Uncirculated survivors of this San Francisco issue was revealed. Today, the population reports provide a more reliable indicator of the scarcity of the 1892-S in near-Mint or full Mint State conditions. PCGS reports just 63 coins finer than AU58, while NGC shows even fewer Mint State coins...just 49 pieces (2/16). NGC ID# 255P, PCGS# 7218

1892-S Silver Dollar, Near-Mint
Lightly Toned, Very Few Marks

5001 1892-S AU58 PCGS. The 1892-S is not really a stopper in circulated grades, although in AU58 condition it is quite challenging, and in Uncirculated grades it is second only to the 1893-S in rarity. This lightly toned, near-Mint coin will suit either an upper-end circulated set or fill the spot in a Mint State Morgan collection.

Bagmarks and central weakness of strike are the usual concerns for the 1892-S, but the current coin excels in both areas. The surfaces are nearly unabraded, where Liberty's cheek and neck show only tiny marks visible with a lens. A few hair strands merge over the ear, but the strike is otherwise bold. Soft mint luster remains beneath an attractive warm, silver-gray patina. PCGS reports just 63 finer examples (2/16). NGC ID# 255P, PCGS# 7218

1892-S Dollar, AU58
VAM-2, Doubled Date Variety

5002 1892-S Doubled Date, VAM-2, AU58 PCGS. A Top 100 Variety. Doubling is most visible on the inside loops of the 8 in the date and on the ball of the 9, a variety meaningful to VAM and doubled die enthusiasts alike. Others will be drawn to the rarity the 1892 San Francisco issue per se, particularly with the colorful toning displayed by this near-Mint example. Gunmetal-blue toning at the borders surrounds reddish-gray and gold hues that dominate the fields and devices.

Light rub on the high points defines the AU58 grade, while abrasions are not a problem on this attractive example. The most noticeable marks are some light contacts on Liberty's cheek. The strike is sharp for the issue, with only nominal incompleteness at the eagle's legs and in the hair above the ear. PCGS lists just 63 finer examples — a scant number of survivors from the original mintage of 1.2 million pieces (2/16). NGC ID# 255P, PCGS# 133941 Base PCGS# 7218

1893-CC Dollar, Brilliant MS62

- 5003 1893-CC MS62 NGC. The 1893-CC has always been a collector favorite as it is the final silver dollar struck in the historic Carson City mint. The mintage is also impressively small with 677,000 pieces struck, but a higher percentage were set aside than earlier issues, making the 1893-CC the third scarcest CC dollar following the 1889-CC and 1879-CC. This is an all-brilliant example with the pinpoint-sharp strike sometimes seen. Minimally abraded, this piece should prove of interest to a wide variety of collectors. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63+
Final Carson City Issue, Ex: Redfield

- 5004 1893-CC MS63+ NGC. Ex: Redfield Collection. An attractive Plus-graded Select example of the last issue from the Carson City Mint, this piece exhibits well-detailed design elements and lightly marked surfaces that radiate vibrant mint luster throughout. This coin traces its history to the famous Redfield Hoard and it has been certified by NGC in an old Paramount holder, where it was originally graded MS65. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS64
Conditionally Rare Any Finer

- 5005 1893-CC MS64 PCGS. The 1893-CC was the final silver dollar issued at the famous Carson City Mint, and is widely popular among numismatists both young and old. Most examples, however, are heavily abraded, as Bowers elaborates on in *A Guide Book of Morgan Silver Dollars*: "A piece MS63 or finer, with minimum bagmarks, is a numismatic find and is very special. Discount poor strikes and 'baggy' coins, and you'll find that remaining pieces in the marketplace are few and far between."

This example exhibits vivid blue-gray and aquamarine hues around the margins, with pale lavender-gray in the centers, while strong luster cartwheels beneath the patina. The strike is pleasing, and any grade-limiting abrasions are well-hidden by the rich coloration. PCGS has certified only 14 numerically finer representatives (1/16). NGC ID# 255S, PCGS# 7222

1893-S Dollar, Well-Detailed XF40

- 5006 1893-S XF40 NGC. A pleasing XF example of this key San Francisco issue, showing mottled gray-gold and amber toning over nickel-gray surfaces. Hints of luster remain in the fields, attesting to the originality of the patina. The 1893-S is widely sought in all grades, but upper-end circulated pieces with pleasing aesthetics are elusive. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, XF45
Sought-After, Low-Mintage Key**

5007 1893-S XF45 PCGS. The Panic of 1893 had severe economic consequences, including the repeal of the Sherman Silver Purchase Act, which mandated the large silver dollar productions of the early 1890s. The San Francisco Mint responded to the new situation by drastically reducing the production of Morgan dollars. As a result, the 1893-S Morgan dollar claims a series-low business-strike mintage of just 100,000 pieces. Few examples were saved by contemporary collectors and only a few specimens surfaced in the great Treasury releases of the 1960s. The 1893-S is the rarest circulation-strike Morgan dollar in today's market and collectors prize the issue in all grades and conditions.

The typical 1893-S dollar grades no better than VF30, so this Choice XF specimen offers superior technical quality when compared to the great majority of survivors. Some light wear shows on the design elements, but only the most delicate interior detail has been effaced. The surfaces are lightly abraded and the fields show a few traces of prooflike reflectivity in sheltered areas. This coin will be a welcome addition to a fine collection of Morgan dollars. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Sharp XF45

5008 1893-S XF45 PCGS. When assessing the quality of a Morgan dollar date and mintmark collection, one of the biggest influences is the 1893-S. A collection with a low-grade example of this key issue may often be perceived as having lesser quality. For the enthusiast of circulated Morgan dollars, this Choice XF '93-S is a high-end coin that will boost the appeal of any date run. The coin is well-detailed with bright surfaces that have a hint of champagne color. NGC ID# 255U, PCGS# 7226

**1894 Dollar, Toned MS64+
Philadelphia Rarity in High Grade**

5009 1894 MS64+ PCGS. The Sherman Silver Purchase Act, the replacement legislation for the Bland-Allison Act, was repealed in 1893. Morgan dollar mintages immediately plummeted as a result and did not fully recover until 1896. The 1894 branch mint issues each saw limited production and are semikeys today in high grade. But the 1894 Philadelphia dollar had a particularly scant production of just 110,000 coins — the second-lowest mintage of the circulation strike series. Mint State examples of this P-mint semikey are seldom seen at the Choice grade level, and Gems are rare. This Plus-designated MS64 coin balances rarity with moderate affordability and should draw substantial interest at auction. The strike is bold, and the satiny surfaces reveal few noticeable abrasions. The obverse is warm golden in color, the reverse displays mottled lavender-gold and ocean-blue hues. There are 27 finer examples at PCGS, five at NGC (1/16). NGC ID# 255V, PCGS# 7228

1894-O Dollar, MS64
Much Better New Orleans Issue

- 5010 1894-O MS64 PCGS.** A carefully produced and well-preserved example of this semikey New Orleans issue, with Choice surfaces and attractive toning that covers both sides. Vivid electric-blue shades at the borders merge into magenta and amber-gold central toning. The strike is generally sharp, although a bit soft above the ear as usual for the issue. Few 1894-O dollars show such significant surface quality and eye appeal. Just 11 pieces are graded numerically finer at PCGS (2/16). NGC ID# 255W, PCGS# 7230

1894-O Dollar, Colorful MS64+
Louisiana Condition Rarity

- 5011 1894-O MS64+ PCGS. CAC.** The New Orleans Mint struck more than 1.7 million Morgan dollars in 1894. The 1894-O is more available in circulated grades than the P or S-mint issues, and such coins are often found in date sets. In Choice Uncirculated condition the 1894-O overtakes the low-mintage 1894-P in terms of rarity. Examples are scarcely seen at that level, let alone with a Plus designation and a CAC approval sticker for eye appeal and quality within the grade (as here). Gems are very rare with only 11 such grading events at PCGS (1/16).

Liberty's profile remains mostly brilliant, surrounded by swathes of russet-gold, violet, and cobalt-blue toning in the fields. The reverse is fully patinated in similar hues, giving that side a visually impressive appearance. Design definition is typical for the Southern branch mint, but the aesthetic appeal more than compensates. A great example that will prove exceedingly difficult to improve upon. NGC ID# 255W, PCGS# 7230

1894-S Dollar, MS65
Rarely Seen Finer

- 5012 1894-S MS65 PCGS.** The 1894-S is a recognized semikey in the Morgan dollar series, but its scarcity is most significant above MS64. This well-struck Gem is conditionally scarce and trails only a rare few finer pieces at either service. The surfaces display bright luster with a hint of champagne color, while numerous parallel die striae in the fields deliver a touch of modest reflectivity. PCGS has 15 numerically finer representatives (1/16). NGC ID# 255X, PCGS# 7232

1895-O Morgan Dollar, AU58
Scarcer, Low-Mintage Issue

- 5013 1895-O AU58 PCGS.** Only 450,000 Morgan dollars were struck at the New Orleans Mint in 1895, and few examples have survived in high grade. This attractive near-Mint example exhibits just a touch of wear on the high points of the design elements and the surfaces retain much of their original mint luster, despite a large number of minor, grade-consistent contact marks. A few hints of greenish-gold toning visit the peripheries, with some lavender-gray highlights on the mostly brilliant centers. NGC ID# 255Y, PCGS# 7236

**1896-S Dollar, Frosty MS65
Conditional Rarity**

5014 1896-S MS65 PCGS. With its 5 million-coin mintage, one might expect the 1896-S Morgan dollar to be available in high grade, but it is quite the opposite. Any Mint State example carries a premium over the common date, and at the Gem level this issue is seldom seen. Circulation claimed a large number of coins in the 19th century, but the majority were likely melted, possibly in 1918 under the terms of the Pittman Act. The Mint State population of today originated in part from occasional small dispersals of coins from the Treasury that were spared from destructive legislation.

This Gem is vibrantly lustrous and impressively clean. The surfaces are essentially brilliant. The only visual distraction is strike weakness on the eagle's breast and the hair above Liberty's ear, as is often seen on this issue. Population: 76 in 65 (4 in 65+), 5 finer (2/16). NGC ID# 2564, PCGS# 7244

**1898-S Dollar, MS66
Repunched Mintmark**

5015 1898-S MS66 PCGS. VAM-6. The mintmark is repunched north on this interesting VAM variety, and the date numerals show minor doubling. As a date, the 1898-S is scarce in MS66 and extremely rare any finer. This Premium Gem boasts sharp, frosty design elements and brilliant, semiprooflike fields. Eye appeal is superb, as is the preservation. Population: 85 in 66 (5 in 66+), 3 finer (2/16). NGC ID# 256A, PCGS# 7256

**1901 Morgan Dollar, MS62
Lustrous and Lightly Toned**

5016 1901 MS62 PCGS. CAC. A CAC-endorsed Uncirculated example of this conditionally scarce 20th century Morgan. The 1901 is famously among the most challenging post-1800s issues to acquire in Mint State, with the availability slipping rapidly in each successive grade. This piece displays satiny luster and mottled olive-gold toning. Minor strike weakness is seen on the central high points, as often seen on the 1901. NGC ID# 256J, PCGS# 7272

**1903-S Dollar, Radiant MS65+
20th Century Semikey**

- 5017 1903-S MS65+ PCGS. CAC.** The 1903-S Morgan dollar boasts semikey-date status in all grades, and is one of the most sought-after 20th century issues in the series. Mint State coins are seldom seen, and then almost always in MS64 or lower grades. Gems are scarce and finer pieces are rare. Potent luster adorns both sides of this lovely MS65 example, and a well-executed strike leaves strong definition on the design elements, including the hair over Liberty's ear and the eagle's breast feathers. A few minor marks are consistent with the grade designation. There are 42 finer submissions at PCGS (1/16), of which some are likely resubmissions.
Ex: Long Beach Signature (Heritage, 5/2008), lot 2707. NGC ID# 256T, PCGS# 7288

**1904-S Dollar, MS65
Rarely Located in a Higher Grade**

- 5018 1904-S MS65 PCGS.** The 1904-S is a better 20th century date, scarce in MS65 and rarely seen finer. This Gem example is richly lustrous and well-preserved. The obverse displays mottled amber-gold and lilac-gray toning, while the reverse has a light golden hue. Both sides show trivial strike weakness on the central high points. This piece will appeal to many quality-conscious Morgan dollar collectors and investors. PCGS has seen only 16 finer submissions (2/16). NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

**1890 Morgan Dollar, PR64 Cameo
Low-Mintage Proof Issue**

- 5019 1890 PR64 Cameo PCGS. CAC.** Only 590 proof Morgan dollars were struck in 1890 and few examples show the bold cameo contrast of this sharply detailed Choice example. The devices are richly frosted and stand out boldly against the deeply mirrored fields. Shades of lavender-gray, champagne-gold, and violet toning enhance the outstanding eye appeal. A few minor hairlines and contact marks prevent an even higher grade. Population: 24 in 64 Cameo, 22 finer (1/16). NGC ID# 27ZK, PCGS# 87325

1901 Morgan Dollar, PR66
In-Demand Business Strike Alternative
Ex: Childs Collection

5020 1901 PR66 PCGS. Ex: Childs Collection. The obverse features noticeable contrast between the frosted portrait of Liberty and the glassy fields, though the effect is partially subdued by the dappled reddish-violet and ice-blue patina. A uniform layer of lilac-gray toning shrouds the minimally contrasted reverse, and marks are barely perceptible on either side.

The extreme rarity of high-grade Uncirculated 1901 Morgan dollars, most of which either entered circulation or were melted under the terms of the Pittman Act of 1918, places considerable demand on the 813 proof dollars struck. Proofs are readily available through PR64, but the issue becomes rare in PR65 or better.

Purchased directly from the Philadelphia Mint by Walter H. and C.F. Childs; Childs Family Collection (Bowers and Merena, 8/1999), lot 517. NGC ID# 27ZZ, PCGS# 7336

1904 Dollar, Warmly Toned PR65
Subtle Field-Device Contrast

5021 1904 PR65 NGC. This Gem proof 1904 Morgan dollar possesses significant field-motif contrast for a non-Cameo proof. The fields are seemingly flawless and display near-infinite depth of mirroring. Vivid amber-orange and ocean-blue peripheries fade to warm champagne over the interiors. Slight strike weakness on the hair above Liberty's ear is often seen on this issue. The 1904 proof Morgan is seldom encountered so fine. NGC ID# 2824, PCGS# 7339

1904 Morgan Dollar, PR65
Spectacular Multicolor Toning

5022 1904 PR65 NGC. Spectacular shades of burnt-orange and violet toning blanket the well-preserved surfaces of this attractive Choice specimen. The design elements are sharply detailed and the fields are deeply mirrored, under the patina. The eye appeal is terrific. From a small proof mintage of 650 pieces. Census: 41 in 65 (1 in 65+), 62 finer (2/16). NGC ID# 2824, PCGS# 7339

PEACE DOLLAR

1935-S Dollar, MS66
Only Two Coins Finer at PCGS

5023 1935-S MS66 PCGS. Three Rays below ONE. The dazzling surfaces of this brilliant Premium Gem will capture and hold the attention of any knowledgeable series student. Each side showcases a combination of cartwheel luster and exceptional preservation, explaining the extraordinary eye appeal. A bold impression makes this offering all the more desirable. The 1935-S was stuck to the extent of nearly 2 million coins, yet MS66 survivors are very scarce. PCGS has seen merely two finer submissions (1/16). NGC ID# 2583, PCGS# 7379

EISENHOWER DOLLAR

1977-D Eisenhower Dollar, MS67
Tied for Finest, Splendid Surfaces

5024 1977-D MS67 PCGS. Although a common date in the perception of many collectors, Registry-competing Eisenhower dollar enthusiasts will find the 1977-D to be a challenging acquisition at the Superb Gem level. PCGS has seen only eight submissions in MS67 and none finer (2/16). This piece displays razor-sharp detail and seemingly flawless nickel-gray surfaces. Luster is especially vibrant, and the eye appeal is superb. NGC ID# 258N, PCGS# 7424

SACAGAWEA DOLLAR

2000-P Sacagawea Dollar, MS67
Popular 'Cheerios' Variety

5025 2000-P "Cheerios," FS-902, MS67 PCGS. The scarce "prototype reverse" variety of the 2000-P Sacagawea dollar that was distributed in boxes of cereal to promote the coin's circulation. The eagle's tailfeathers show greater detail than those pieces that were struck later. This Superb Gem example displays full detail and beautiful surface preservation. Radiant yellow-gold luster dazzles the eye. NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

GOLD DOLLARS

1849-C Gold Dollar, MS61
Pleasing Closed Wreath Example

- 5026 1849-C Closed Wreath MS61 PCGS. Variety 1.** A lovely orange-gold example of this first-year Charlotte gold dollar, showing semireflective fields and limited abrasions — light surface chatter appears to be the only grade-limiting factor. The strike is slightly soft on the upper hair curls, although definition is overall above average. From a mintage of 11,634 pieces, fewer than 300 are believed extant in all grades, and Mint State coins are rare. Population: 4 in 61, 13 finer (1/16). NGC ID# 25BC, PCGS# 7505

1854 Gold Dollar, MS67
Fully Struck Type One Example, Conditionally Rare

- 5027 1854 Type One MS67 PCGS.** Fully struck with frosty luster over pristine lemon-gold surfaces, this Superb Gem gold dollar is perfect for type representation. It is tied with just three others as the finest at PCGS, which makes it a conditionally rare example of the entire type. The 1854 Type One dollar (855,502 coins struck) is as rare as the 1854 Type Two dollar (783,943 coins produced later in the year) in MS66 and finer, yet the Liberty Head issue sells for a fraction of its Indian Princess Head counterpart. This piece is remarkably eye-appealing with peach and mint-gold accents in the fields. A tiny speck at the tip of the coronet is a fabulous pedigree identifier. NGC ID# 25BY, PCGS# 7525

1854-D Gold Dollar, AU55
Elusive Low-Mintage Issue

- 5028 1854-D AU55 NGC. Variety 6-H.** The 1854-D gold dollar is an elusive issue in all grades, from a low mintage of 2,935 pieces. Perhaps 100 to 125 pieces are extant in all grades. This attractive Choice AU example displays lustrous, lightly abraded surfaces and well-detailed design elements with pleasing green and rose patina. Census: 8 in 55, 50 finer (1/16).
Ex: Houston Signature (Heritage, 11/2012), lot 4708. NGC ID# 25BZ, PCGS# 7526

1855 Type Two Gold Dollar, MS65
Frosty Original Luster

- 5029 1855 Type Two MS65 NGC.** A glance at the certified population figures reveal the inherent conditional scarcity of this otherwise plentiful Type Two gold dollar in MS65, although the frequency of auction appearances in this grade is even lower than the official data suggests. In more than two decades, we have sold at auction only a dozen examples in this grade, and finer coins are similarly elusive.
The present piece displays lovely wheat-gold luster that delivers outstanding luminance, even when viewed from a distance. The central high point of Liberty's hair and the LL in DOLLAR show mild weakness, but the wreath and headdress are bold. As is typical of the issue, heavy clash marks are seen on each side; this piece shows a clear outline of a D in front of Liberty's nose. Census: 31 in 65, 14 finer (1/16). NGC ID# 25C4, PCGS# 7532

**1857-D Gold Dollar, AU58
Highly Sought Branch-Mint Issue**

- 5030 1857-D AU58 PCGS. CAC. Variety 9-L.** The scant mintage of 3,533 pieces made the 1857-D rare from its day of issue, and low survivability makes it considerably more scarce than the 1858-D and 1859-D despite a similar mintages. Doug Winter estimates just 150 to 200 examples remain in all grades, many of them impaired. This example is softly struck at the central obverse and on the obverse dentils, and weakness is noted at the bow knot and at the date as normally seen. Even so, attractive orange-gold color and only minor abrasions earn this near-Mint example CAC endorsement. Population: 20 in 58 (1 in 58+), 14 finer (1/16). NGC ID# 25CF, PCGS# 7546

**1859 Gold Dollar, Vibrant MS67
An Important Condition Rarity**

- 5031 1859 MS67 PCGS. CAC.** A pair of MS68 coins top the Condition Census for the 1859 gold dollars — one of which was the astounding MS68+ coin from the Duckor Family Collection that we sold at the 2015 ANA Signature Auction as lot 4258, which realized \$37,600. This impressive MS67 coin is tied with perhaps five others for third in the Census, by virtue of its jewel-like quality that is seldom exceeded in the widely collected series.

Sparkling mint luster coruscates across the pristine surfaces with an extra dimension imparted by a combination of mint frost and light-gathering field striations, which are often present on the finest specimens. The strike is razor-sharp despite die clashing that is visible with a lens, as well as some inconsequential high point blending at the lower-most curls. Rose-gold highlights amplify the sun-gold intensity that radiates from both sides of this immaculate Superb Gem. Population: 3 in 67, 2 finer (1/16). NGC ID# 25CL, PCGS# 7551

**1859-D Gold Dollar, AU58
Excellent Branch Mint Type Coin**

- 5032 1859-D AU58 PCGS. Variety 11-O.** An attractive near-Mint example of the scarcer Variety 11-O, with the 9 in the date centered under the A in DOLLAR. This coin exhibits just a trace of wear on the high points of the well-detailed design elements, which show a typical strike for the issue. The pleasing surfaces are lightly abraded and lustrous. Population: 27 in 58, 27 finer (2/16). NGC ID# 25CN, PCGS# 7553

**1860-S Gold Dollar, MS64
One Finer Coin at PCGS**

5033 1860-S MS64 PCGS. Only 13,000 gold dollars were struck at the San Francisco Mint in 1860, as the glory days of the Gold Rush were waning and the Civil War was looming on the horizon. The great majority of the coins were released into circulation and few high-quality examples were saved for numismatic purposes. Accordingly, specimens in Mint State condition are seldom encountered in today's market.

This impressive Choice specimen exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. Overall eye appeal is simply outstanding. Population: 4 in 64, 1 finer (2/16). NGC ID# 25CT, PCGS# 7557

**1873 Closed 3 Gold Dollar, MS64
Rare Low-Mintage Type**

5034 1873 Closed 3 MS64 PCGS. CAC. Just 1,800 circulation strikes plus 25 proofs were struck with the Closed 3 logotype, making the variety much more challenging for type than its Open 3 counterpart. This is a semiprooflike near-Gem example, with reflective fields and sharp eye appeal. Only a few tiny marks and light die clashing interrupt the gleaming, yellow-gold surfaces. A CAC-endorsed coin for both its visual merit and technical quality. Population: 7 in 64, 4 finer (1/16). NGC ID# 25DA, PCGS# 7574

**1881 Gold Dollar, MS68
Incredible Type Three Representative**

5035 1881 MS68 PCGS. CAC. The 1881 gold dollar is among the most plentiful Type Three issues in Superb Gem condition, despite a small mintage of 7,620 coins. There was little commercial need for this denomination during the last quarter of the 19th century, and contemporary dealers were able to put away numerous Uncirculated coins for future generations. Nonetheless, surviving 1881 gold dollars worthy of the incredible MS68 grade are seldom seen, and anything finer is prohibitively rare. This semiprooflike, orange-gold example is among two dozen so-graded coins boasting a CAC green label. The strike is bold, and the surfaces are seemingly immaculate. An undeniable eye-catching type coin with few peers. Population: 43 in 68 (4 in 68+), 1 finer (1/16). NGC ID# 25DK, PCGS# 7582

EARLY QUARTER EAGLES

1807 Quarter Eagle, BD-1, MS61
Final Capped Bust Right Issue

5036 1807 BD-1, R.3, MS61 NGC. Bass-Dannreuther Die State a/b. The Capped Bust Right design was discontinued after 1807, an important consideration for type purposes. A nominal mintage of 6,812 quarter eagles was produced that year and a single die variety is known for the date, called BD-1 in the current series reference by John Dannreuther. The surviving population numbers 250-350 examples in all grades, making it reasonably available in today's market. The present coin offers well-detailed design elements and pleasing antique-gold surfaces that show no trace of planchet adjustment marks. Only minor signs of contact are evident and the overall presentation is quite attractive. NGC ID# BFVY, PCGS# 45514 Base PCGS# 7656

1827 Quarter Eagle, AU55
Low-Mintage Issue
BD-1, The Only Known Variety

5037 1827 BD-1, R.5, AU55 PCGS. Bass-Dannreuther Die State a/c. The 1827 Capped Bust Left quarter eagle is an elusive date, with a reported mintage of just 2,800 pieces. There is a single die variety known for the issue and only a single die state of the variety has been identified. The reverse die was previously used to strike quarter eagles in 1826, and it appears to have been lapped before its use in 1827. Probably no more than 45-55 examples of the 1827 quarter eagle are extant in all grades.

The present coin displays well-detailed design elements, with some reverse detail incomplete, due to lapping. The pleasing yellow-gold surfaces are lustrous and lightly abraded, with no mentionable distractions. Eye appeal is quite strong for an early quarter eagle. Population: 6 in 55, 18 finer (1/16). PCGS# 45522 Base PCGS# 7666

1832 BD-1 Quarter Eagle
Uncirculated Details

- 5038 1832 BD-1, R.4 — Improperly Cleaned — NGC Details. Unc. The sole die marriage for this rare date. Just 4,400 pieces were struck, and a sizeable majority of those were melted long ago. The present unworn green-gold representative is hairlined and the reverse field near the eagle is glossy. The strike is generally sharp with slight inexactness on the curl above the ear and the left shield border. The Capped Head type was struck intermittently between 1821 and 1834. Although all dates are rare, the patience advanced collector can acquire each of them, since unlike its half eagle cousin, the series has no great rarities.

1833 Quarter Eagle, BD-1, XF
Reverse Die Carried Over From 1830-32

- 5039 1833 BD-1, R.5, XF40 NGC. Bass-Dannreuther Die State a/c. Only a single die combination was needed, understandably so, to coin the meager 4,160 reported examples of the 1833 quarter eagle, and only a single die state is known for those pieces, the BD state a/c. The c reverse die state is attributed to that die's reuse from coining the quarter eagles of 1830, 1831, and 1832, all in virtually the same state. This XF example shows some moderate wear on each side consistent with the grade, but the only singular marks are a couple of scrapes on Liberty's lower neck and a vertical mark between the 3s in the date. A diagonal scrape runs through the eagle's shield and onto the neck. Prevailing olive-gold color deepens near the rim to a amber-gold. NGC ID# BFWC, PCGS# 45527 Base PCGS# 7673

PROOF EARLY QUARTER EAGLE

1831 Quarter Eagle, BD-1, Proof
Attractive, Razor-Sharp Example

- 5040 1831 — Tooled — PCGS Genuine. Proof, Unc Details. BD-1, R.7 as a proof. This date had an unknown proof mintage that was undoubtedly small, with 10 pieces as the most optimistic estimate that we have heard. Akers stated that there are five or six proofs known, according to PCGS Coinfacts. Five unpaired specimens have been certified, including a PR63, PR64 Cameo, and a PR66 at PCGS, with one coin each in PR63 Cameo and PR66 at NGC (1/16). The present piece is not listed in this figure due to its Genuine grade.

While there has been much controversy over prooflike coins being rated as proofs of this date, the present piece shows undeniable evidence of being one of the few known proofs. The strike definition is razor-sharp on virtually every design detail, save for a small area of softness on the eagle's upper left (facing) wing, just to the left of the shield (this feature was also recognized on an NGC PR63 coin that we sold in our 2009 Central States auction in Cincinnati). The fields are glassy and highly reflective on the obverse, while the reverse fields show minor tooling in certain areas, denoted by a satiny, faintly granular texture.

LIBERTY QUARTER EAGLES

1854-C Two and a Half, AU58+
High-End and Rare

- 5041 1854-C AU58+ PCGS. Variety 1. After a brief hiatus in 1853, the Charlotte Mint resumed quarter eagle production in 1854 with a coinage of 7,295 pieces. Perhaps only 105-145 examples survive in all grades, making the 1854-C significantly scarce in all grades and extremely rare in Mint State. This high-end near-Mint example is uniquely appealing as the only Plus-graded AU coin at PCGS. The surfaces show medium yellow-gold color with modest reflectivity in the fields. The central eagle feathers are ill-defined, as is typical of the issue, although actual wear is virtually nonexistent. Population: 7 in 58 (1 in 58+), 6 finer (1/16). NGC ID# 7J2P, PCGS# 7770

1859 Old Reverse Quarter Eagle, MS63
Conditionally Elusive

- 5042 1859 Old Reverse, Type One, MS63 PCGS. In this year the Mint introduced a New Reverse quarter eagle, but a few P-mint quarter eagles from 1859, 1860, and 1861 feature the Old Reverse, with larger letters, the top two arrowheads touching, and an arrowhead close to the R in AMERICA. The 1859 Old Reverse quarter eagle is scarce in all grades and conditionally elusive. This piece offers much luster and eye appeal despite a small patch of thin marks in the right obverse field behind the portrait. This variety went unrecognized until the 1960s, and examples remain seldom-seen today. Population: 6 in 63, 3 finer (1/16). NGC ID# 25JK, PCGS# 97788

PROOF LIBERTY QUARTER EAGLES

1896 Quarter Eagle, PR65+ Deep Cameo
Excellent Produced and Preserved

- 5043 1896 PR65+ Deep Cameo PCGS. It is not only the Morgan dollar proofs of the late 19th century that exhibit excellent production criteria and, often, Deep Cameo contrast — they are merely the most famous and widely collected. But a piece such as this Gem proof Deep Cameo quarter eagle is equally to be admired, for it shows many of the same characteristics: deeply mirrored fields, lavishly frosted devices, and a full strike, along with good preservation. A single tick shows on Liberty's chin, along with a faint toning spot near star 3 — minor flaws consistent with the PR65+ grade, and ones that fail to defeat the broad eye appeal on display. Population: 7 in 65 (1 in 65+) Deep Cameo, 10 finer (1/16). NGC ID# 288K, PCGS# 97922

1900 Quarter Eagle, PR64+ Cameo
Eye-Catching Type Coin

5044 1900 PR64+ Cameo PCGS. A glittering near-Gem Cameo example of this final 19th century proof quarter eagle issue, showing sharp, frosty design elements set against deeply mirrored butter-gold fields. The field-motif contrast is outstanding, and the eye appeal superb. A loupe reveals a few faint hairlines in the left obverse field that limit the grade, but to the unaided eye there are no distractions. Population: 9 in 64 (1 in 64+) Cameo, 7 finer (1/16). NGC ID# 288P, PCGS# 87926

1903 Quarter Eagle, PR65
One-Sided Cameo

5045 1903 PR65 PCGS. The Mint altered the proof die preparation process during this period, very nearly eliminating field-device contrast on its proof coins. Those that have been certified as Cameos are barely so, with the contrast disappearing at various angles of view. For a non-Cameo, this Gem 1903 proof quarter eagle is a remarkably attractive coin, showing bold design definition and beautifully preserved, honey-gold mirrors. The reverse is incredibly, distinctly contrasted between the eagle and the fields, though the obverse, fully brilliant, does not warrant the Cameo designation from NGC. This proof issue was struck to the extent of 197 coins, slightly more than half of which are known to survive. Still, any proof Liberty Head quarter eagle is a rare find and worth considerable bidder attention. Population: 22 in 65, 10 finer (2/16). NGC ID# 288T, PCGS# 7929

INDIAN QUARTER EAGLES

1909 Quarter Eagle, MS66
Rare, Tied for Finest Known

5046 1909 MS66 NGC. Bela Lyon Pratt's sunken relief Indian Head design debuted on the quarter eagle in 1908. As was traditional, first-year examples of the new type were saved in abundance. As a result, the 1908 is unusually plentiful in high grade. The 1909 issue was not so fortunate. The coins largely circulated in banks, and those that were paid out to the public experienced limited use in commerce. Nonetheless, the exposed fields were prone to acquiring abrasions more easily than were those of coins from the earlier Liberty Head design, even from something as harmless as being stacked by a bank teller. Few Premium Gem-quality examples have survived of the 1909 issue, and the certified population totals may even be inflated by resubmissions. This piece is razor-sharp with satiny orange-gold luster. There are no mentionable abrasions. Census: 26 in 66, 0 finer (2/16). NGC ID# 288Z, PCGS# 7940

**1914 Two and a Half, MS64
Outstanding for the Grade**

- 5047 1914 MS64 PCGS.** This Choice 1914 Indian quarter eagle must have just missed a Gem designation. Close study reveals frosty, beautifully preserved surfaces with only a few insignificant lines in the reverse fields precluding a rarely seen MS65 grade. The strike is bold, and the glistening surfaces display varying shades of olive-gold and peach-yellow luster. Finer examples are seldom seen, with many resubmissions likely reflected in the official data. NGC ID# 7KRA, PCGS# 7946

THREE DOLLAR GOLD PIECES

**1859 Three Dollar Gold, MS64
Rarely Seen Finer**

- 5048 1859 MS64 PCGS.** The 1859 three dollar gold piece claims a modest mintage of 15,558 pieces, and the issue is seldom encountered in high grade. This impressive Choice example exhibits well-detailed design elements with some interesting clash marks on both sides. The pleasing orange-gold surfaces radiate vibrant mint luster and show minimal signs of contact. Population: 17 in 64 (2 in 64+), 9 finer (2/16). NGC ID# 7K5K, PCGS# 7979

**1860-S Three Dollar Gold, AU55
Partially Lustrous Fields**

- 5049 1860-S AU55 PCGS.** The branch mint issues in the three dollar gold series are generally scarcer than their Philadelphia counterparts. The 1860-S had a small 7,000-coin mintage, and almost none were spared from circulation. This Choice AU coin is conditionally scarce, and finer pieces are rare. The strike is bold, and the devices show trivial wear. Remnants of luster in the protected regions of the fields deliver pleasing eye appeal. Population: 9 in 55, 12 finer (1/16). NGC ID# 7K5M, PCGS# 7981

**1863 Three Dollar Gold, AU55
Slightly Better Philadelphia Issue**

- 5050 1863 AU55 NGC.** This 1863 gold three dollar piece is well-struck with little high-point wear. Luster emerges from the protected regions of the fields, while light chatter elsewhere contributes to the grade. A double set of clash marks is seen on each side, hardly affecting the eye appeal. The surfaces yield pleasing wheat-gold color. From a mintage 5,000 pieces, the 1863 is a slightly better Civil War-era issue in the upper AU grades, and Mint State coins are rare. NGC ID# 7K5R, PCGS# 7984

**1874 Three Dollar Gold, MS65
Conditionally Rare at the Gem Level**

- 5051 1874 MS65 PCGS. CAC.** The 1874 gold three dollar piece is a widely recognized type coin, but often overlooked is this issue's conditional rarity at the Gem level. In stark contrast to lower grades, PCGS and NGC record just 35 MS65 or finer representatives combined, including possible resubmissions. Compared to the several hundred Gem or better 1878 coins certified, high-end 1874 three dollar gold pieces begin to appear underappreciated. This shimmering, frosted example displays rich reddish-gold luster and largely unabraded surfaces. The wreath bowknot is soft, as usual, but the remaining design elements are well-defined. CAC-endorsed in an old green label holder. Population: 15 in 65, 5 finer (2/16). NGC ID# 7KDE, PCGS# 7998
-

1878 Gold Three Dollar, MS64
Shimmering Luster

- 5052 1878 MS64 PCGS. Although frequently available, the 1878 three dollar gold piece is widely popular for type purposes. This Choice Mint State example displays shimmering orange-gold luster with few abrasions. The wreath bow is predictably soft, but the obverse portrait is sharp. This eye-appealing coin is housed in a green label holder. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, Richly Lustrous MS64
Great Type Coin

- 5053 1878 MS64 NGC. CAC. The richly lustrous surfaces of this near-Gem are relatively unabraded and sport thick honey-gold color. The cheek of the Indian princess masquerading as Liberty and other focal points are free of mentionable distractions. The strike is nicely executed on this coin as well, producing good detail throughout the headdress feathers and the hair on the obverse. The reverse is similarly attractive. A great example of this type-coin issue. NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar Gold, MS65
Popular Low-Mintage Issue

- 5054 1879 MS65 PCGS. The three dollar gold piece was never a popular issue and the Philadelphia Mint struck only token quantities of this denomination from 1879 until it was cancelled ten years later. Only 3,000 circulation strikes were produced in 1879, all delivered on December 20, and many of these were subsequently destroyed after the close of the year. In lot 422 of the Thompson and Ely Collections (Henry Chapman, 5/1915), the cataloger noted:

"1879 Uncirculated. Mint lustre. Only 3,030 coined, and about 2,000 or more of these were melted at the mint."

Chapman's mintage figures included the 30 proofs struck earlier in the year. Fortunately for present-day collectors, a number of high-grade specimens escaped the ravages of circulation, probably initially stored in bank vaults because there was little demand for them in the channels of commerce. When the denomination was discontinued in 1889, the three dollar coins suddenly became popular with collectors and contemporary numismatists began preserving nice examples for future generations.

The present coin is a delightful Gem, with well-preserved yellow-gold surfaces that radiate satiny mint luster on both sides and show attractive orange highlights. The design elements are sharply detailed and eye appeal is quite strong. Population: 41 in 65, 7 finer (1/16). NGC ID# 25N2, PCGS# 8001

EARLY HALF EAGLES

1798 Large Eagle Five, XF40 Rare BD-5 Variety

5055 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-5, High R.5, XF40 PCGS. Bass-Dannreuther Die State b/b. There are eight varieties of 1798 half eagle: one with the Small Eagle reverse, the remainder with the Large (Heraldic) Eagle reverse. All 1798 half eagles are scarce to rare, and Dannreuther (2006) writes that BD-5 is a High R.5 with an estimated population of 30 to 40 examples. This is the only use of this obverse die; amazingly, it took six obverse dies and eight reverse dies to strike the entire mintage for this date, which is thought to be only 24,867 coins. Dannreuther believes that BD-5 comprises around one-tenth of that number.

A good amount of luster remains around the peripheral devices. Numerous abrasions are seen on both sides, which is not unusual for the grade, and none merit individual mention. The central design elements are softly defined, also fairly typical, especially considering the prominent clash marks on the obverse. A rare early half eagle. Housed in a green label holder.

Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4284. NGC ID# BFX6, PCGS# 507325 Base PCGS# 8078

1800 BD-2 Half Eagle, VF20 Moderate Circulation Wear

5056 1800 BD-2, High R.3, VF20 PCGS. Bass-Dannreuther Die State c/d, showing a diagonal die crack through IB in LIBERTY and a tiny die crack to the rim from the eagle's right wing tip. The caramel-gold surfaces show distributed small- to medium-sized contact marks throughout both sides along with the moderate wear expected at this grade level. This midgrade early half eagle will nonetheless make a prized addition to many a type set at a reasonable price of admission. NGC ID# 25NW, PCGS# 45592 Base PCGS# 8082

1802/1 Half Eagle, BD-8, AU55

5057 1802/1 BD-8, R.4, AU55 NGC. Bass-Dannreuther Die State c/b. This is the variety that Bass-Dannreuther calls the High Overdate, although it could well be called Left Overdate with the 1 far left compared to the 2. The obverse is shared with the BD-6 and BD-7 as well. The reverse here shows perfect T's and the last S far right over a cloud. Die clashing on the obverse runs through the date and on the reverse through UNI, but there is as yet no sign of later cuds or cracks at ITE. This is a beautiful Choice AU example of this very scarce variety, the amber-gold surfaces showing original color that deepens slightly at the rims. A few scattered marks are insignificant. NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

**1803/2 Capped Bust Right Half Eagle, MS62
Popular BD-1 Variety**

5058 1803/2 BD-1, R.4, MS62 PCGS. Bass-Dannreuther Die State a/b. The Philadelphia Mint struck 32,506 Capped Bust Right half eagles in 1803, using overdated obverse dies from 1802. Two obverse and three reverse dies were combined to produce four different die varieties for the date. The present coin represents the scarce BD-1 variety, with a surviving population of 150-200 examples in all grades. The obverse die, with an imperfect T in LIBERTY, was used on two other varieties in 1803, and the reverse die was previously used to strike the BD-7 variety of 1802. The coin offered here is sharply detailed on the obverse, but some light planchet adjustment marks cause some incomplete detail on the lower reverse. The lustrous orange-gold surfaces show only minor signs of contact, with traces of prooflike reflectivity in selected areas. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

**1806 Half Eagle, Knob 6, BD-6, MS63
Lustrous and Appealing Type Coin**

5059 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS63 PCGS. Bass-Dannreuther Die State d/e. An advanced die state but preceding later clash marks that define the terminal stage of this marriage. Of the six known die pairings of this year, the first five are scarce or rare in all grades. BD-6 is the plentiful Knob 6 die variety, often encountered in type collectors' cabinets. As many as 900 pieces survive in various conditions, per John Dannreuther. Nonetheless, high-end Mint State coins are elusive and highly sought-after. This Select example displays glowing, frosty luster over green-gold surfaces that lack significant abrasions. The strike is even and well-centered, showing weakness only on the left corner of the reverse shield, as usual. Eye appeal far exceeds that which is typically seen on this type. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1807 Small Date Bust Right Five, BD-4, MS64
Small Obverse Stars, Large Reverse Stars

- 5060 1807 Bust Right, BD-4, High R.4, MS64 NGC.** Bass-Dannreuther Die State d/b. Always important as final-year type in the transitional year when Robert Scot's design was retired and John Reich's Capped Bust Left design was introduced, the conditionally rare Bust Right fives are always appealing to type and series collectors. The fact that only one numerically finer piece exists at both services combined (regardless of variety) makes this exceptional half eagle even more enticing as high-grade type.

Almost certainly, if not for some softness at the centers — particularly on the reverse at the eagle's head, wing junction, and scroll — this piece would be a candidate for an even finer grade. The originality of the surfaces, a notable lack of abrasions, and the vibrant mint luster seldom exist after two hundred-plus years for these Heraldic Eagle fives, no matter how careful the preservation. Aside from the central blending, the rest of the strike is remarkably sharp. The unevenness of strike may be related to the demise of the obverse die, which was retired for unknown reasons at the end of production for BD-4, its second use. Indeed, the reverse shows a die crack from the bottom left serif of N across the arrowheads to the junction of the shield and wing — a later die state for the reverse than indicated by the Bass-Dannreuther reference for BD-4 — suggesting it was struck close to the retirement of the BD-4 obverse. Census: 10 in 64 (1 in 64 ★), 1 finer (1/16). PCGS# 519901 Base PCGS# 8092

1807 Bust Left Half Eagle, XF40
Sharp BD-8 Type Coin

- 5061 1807 Bust Left, BD-8, R.2, XF40 PCGS.** Bass-Dannreuther Die State d/b. BD-8 is by far the more plentiful of the two Capped Bust Right 1807 half eagle varieties, suitable for type purposes. This lightly circulated example shows excellent detail for the grade with hints of luster in the recesses. The honey-gold surfaces are largely free of mentionable abrasions save for a thin line above the eagle's head. Housed in a green label holder and high-end for the XF level. NGC ID# 25P9, PCGS# 507607 Base PCGS# 8101

1807 Bust Left Five Dollar, BD-8, MS62
Pleasing Mint State Type Coin

- 5062 1807 Bust Left, BD-8, R.2, MS62 NGC.** Bass-Dannreuther Die State d/b. The 5 in the denomination is high and left of the fletchings. The 1807 Bust Right (or Capped Bust, as opposed to the earlier Draped Bust/Bust Left) half eagle, designed by German immigrant and indentured servant John (Johann Matthias) Reich and introduced in this year, is by far the most available of the eight different varieties of both types known for the year — and the other Bust Right variety, BD-7, is ranked High R.5 or rare. This makes the present coin and others of its ilk prime territory for type collectors or early gold specialists. The strike is well-centered and even, with sharp devices and frosty green-gold luster. Remnants of adjustment marks can be seen around portions of the reverse periphery. NGC ID# 25P9, PCGS# 507607 Base PCGS# 8101

1808 BD-4 Half Eagle, VF30
Smooth Surfaces, Ideal Type Coin

- 5063** 1808 Wide 5D, BD-4, High R.3, VF30 PCGS. Bass-Dannreuther Die State c/a, reverse unclashed. Of the four 1808 half eagle varieties, BD-4 is the most available with a survival of 175-225 pieces. For type purposes, this upper-end VF example is ideal. Moderate wear is even over a well-centered strike, and the surfaces are uncommonly smooth for the grade. Olive-gold toning delivers pleasing eye appeal. NGC ID# 25PA, PCGS# 507605 Base PCGS# 8102

1809/8 Half Eagle, BD-1, AU58
Ample Luster, Unabraded Surfaces

- 5064** 1809/8 BD-1, High R.3, AU58 NGC. Bass-Dannreuther Die State a/b, showing light die clashing above the eagle's left (facing) wing. Only a single die pairing is known for the reported mintage near 34,000 pieces for this issue. This near-Mint State coin would make an excellent representative for type purposes of the short-lived Capped Bust to Left half eagle series, which ran only from 1807 through 1812. The ample luster and relatively untroubled surfaces — the patch of small ticks below the eagle on the reverse amounting to little more than a quibble — make this a great potential acquisition. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

1811 Half Eagle, BD-1, MS64
Dazzling Luster, Original Surfaces

- 5065** 1811 Tall 5, BD-1, High R.3, MS64 PCGS. Bass-Dannreuther Die State b/d, lightly clashed. In Mint State, BD-1 is by far the scarcer of the two 1811 half eagle varieties. However, in Gem condition, both are rare and prohibitively so finer. In the absolute sense, BD-1 is fairly plentiful for an early half eagle with perhaps 175 to 250 coins known, per John Dannreuther. But the population thins considerably in Mint State, and pieces with original surfaces are downright rare at this level.

This Choice representative glows with frosty, original luster in warm honey and peach-gold hues. When viewed beneath a loupe, the eye appeal is even more impressive. The strike is even and well-executed, producing complete dentils around each side, with only trivial weakness on the eagle's left (facing) wing. A few minor grazes preclude full Gem status but hardly hinder the eye appeal. A finer Capped Bust Left type coin would be extremely difficult to locate. Population (Tall 5): 6 in 64, 3 finer (1/16). NGC ID# BFXS, PCGS# 507600 Base PCGS# 8110

1811 Small 5 Half Eagle, XF45
Sharp BD-2 Example

- 5066 1811 Small 5, BD-2, R.3, XF45 PCGS. Bass-Dannreuther Die State e/b. A faint die crack on the obverse connects stars 9 and 10; the reverse shows minor clashing near the rim above the right (facing) wing. A few thin scrapes appear on each side in accord with a short stint in circulation, but much luster clings to the yellow-gold surfaces, and the eye appeal is excellent for the grade. Certified in a green-label holder.
Ex: *Pittsburgh Signature* (Heritage, 10/2011), lot 4870. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

1812 Five Dollar, Choice AU
Wide 5D, BD-1

- 5067 1812 BD-1, R.3, AU55 PCGS. Bass-Dannreuther Die State a/a. The "Wide 5D" variety, the usually encountered 1812 die marriage. BD-1 invariably exhibits a bold curved die scratch within the eagle's shield and left (facing) wing, as issued. The present honey-gold Choice AU example shows slight wear on the eagle's neck and Liberty's curls, but luster dominates design elements. A small flan flaw is near Liberty's mouth, and moderate marks are noted near the D in UNITED. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

1813 BD-1 Half Eagle
Uncirculated Sharpness

- 5068 1813 BD-1, R.2 — Improperly Cleaned — NGC Details. Unc. Bass-Dannreuther Die State a/a. A complete *Guide Book* set of Capped Head Left half eagles is out of reach for even the resourceful collector, since only one known 1822 is held outside the Smithsonian, and other great rarities include the 1815, 1825/4, and 1828/7. But a type representative of the series can be acquired, thanks to the comparatively available 1813. This canary-gold example is slightly bright but surprisingly unabraded. The strike is sharp and luster beckons from design elements.

CLASSIC HALF EAGLE

1838-D Half Eagle, AU58+
Popular First-Year Branch Mint Type Coin

- 5069 1838-D AU58+ PCGS. McCloskey 1-A, R.3. The Dahlonega Mint struck 20,583 half eagles in 1838, the first year of coinage operations at the popular Southern facility. The 1838-D was the only Classic Head half eagle produced at Dahlonega, another point of interest for branch mint type collectors. With a surviving population of 300-350 examples in all grades, the 1838-D is reasonably available in the context of the series, but high-grade specimens are still very rare. This Plus-graded near-Mint specimen shows just a trace of high-point wear on the strongly impressed design elements, and the lustrous orange-gold surfaces are lightly abraded. Overall eye appeal is quite strong. Population: 22 in 58, 1 in 58+, 10 finer (2/16). NGC ID# 25S6, PCGS# 8178

LIBERTY HALF EAGLES

1842-D Small Date Half Eagle, Attractive AU53

- 5070** 1842-D Small Date AU53 PCGS. CAC. Variety 7-E. This is the Small Date and Small Letters variety, besides the eponymous characteristics diagnosed by die scratches in LIBERTY inside the coronet. The Small Date and Large Date varieties combined were struck to the extent of nearly 60,000 pieces, but the Small Date is seen more often — usually in lower grades than this AU53 PCGS example. A few trivial ticks and light high-point rub are consistent with light circulation, but the orange-gold surfaces retain considerable luster and attractive verve. Population: 12 in 53, 34 finer. CAC: 2 in 53, 7 finer (1/16). NGC ID# 25SX, PCGS# 8210

1845-D Half Eagle, MS61 Conditionally Rare in Mint State

- 5071** 1845-D MS61 PCGS. Variety 13-H. The 1845-D is among the most plentiful Dahlonega half eagles overall, ideal for the collector seeking a single representative from this mint. The present piece, however, is a rare Mint State coin. The strike is impressively sharp, and the bright yellow-gold surfaces yield moderate reflectivity in the fields. Light surface chatter limits the grade in the absence of singularly bothersome abrasions. Population: 12 in 61, 7 finer (1/16). NGC ID# 25TC, PCGS# 8224

1858 Half Eagle, MS64+ Sole Finest at PCGS Elusive in Any Mint State Grade

- 5072** 1858 MS64+ PCGS. CAC. The Philadelphia Mint struck only 15,136 circulation strikes of the 1858 half eagle, starting a string of low-mintage issues (save for the 1860) that would last until well after the Civil War. The seldom-seen remainders of this issue usually appear in well-circulated grades; the average certified survivor, the top end of all coins, is an AU50 or Choice AU example. Mint State pieces are quite rare. This was a favorite date of Harry W. Bass, Jr., whose collection featured five examples. The present MS64+ PCGS-certified coin shows many virtues including a bold, sharp strike throughout most of both sides — minor softness is confined to Liberty's lowest hair lock on the obverse and the fletchings on the reverse — and only trivial ticks appear amid copious luster. This example is the sole finest graded at PCGS, although NGC reports three finer. Population: 7 in 64 (1 in 64+), 0 finer. CAC: 2 in 64, 0 finer (1/16). NGC ID# 28BY, PCGS# 8276

1893-CC Half Eagle, MS63
Final Carson City Emission

- 5073 1893-CC MS63 NGC. Variety 1-A. Three die marriages are confirmed for the 1893-CC, despite a low mintage of 60,000 pieces. The present sun-gold Select representative exhibits good luster and a bold strike. The reverse is well preserved, the portrait shows minimal marks, and the obverse field displays moderate contact, mostly near the profile. NGC ID# 25YB, PCGS# 8384

INDIAN HALF EAGLES

1908-S Half Eagle, Richly Lustrous MS63

- 5074 1908-S MS63 PCGS. Rich, thick luster complements attractive caramel-gold color on both sides of this Select 1908-S half eagle, a fine survivor from the low production of only 82,000 coins. One thin mark runs through the Y of LIBERTY, and a couple of other minor marks appear on the reverse. The 1908-S is perhaps underrated and overshadowed by the 1909-O half eagle issue, struck to the extent of 34,200 coins but many times more costly, grade for grade. NGC ID# 65K3, PCGS# 8512

1909 Half Eagle, MS65+
Glowing Luster, Rare Any Finer

- 5075 1909 MS65+ PCGS. The 1909 is among a handful of Indian half eagle issues that are marginally available in Gem condition, although it is somewhat scarcer than the 1908 and 1909-D at this level. This is one of four Plus-graded pieces at PCGS, which trail eight finer Premium Gems (1/16). Possible resubmissions exist, considering the popularity of this series with upgrade attempts. This coin balances the comparable eye appeal of a finer grade with the obtainability of the Gem level. The Indian's headdress is crisply detailed, and the eagle is bold. The obverse fields and cheek are seemingly pristine, while the reverse shows a few tiny marks near the eagle's beak and IN GOD WE TRUST that preclude a full MS66 grade. Frosty surfaces yield lovely rose and honey-gold luster, delivering a degree of eye appeal that is unsurpassed at the Gem level. NGC ID# 28DH, PCGS# 8513
-

1914-S Half Eagle, Sharp MS63
Seldom Seen in Finer Grades

5076 1914-S MS63 PCGS. The few scattered ticks that account for the grade on this Select 1914-S half eagle are largely confined to the reverse, as the Indian's cheek is free of all but a single tiny, undistracting mark. Deep, attractive reddish-orange patina is accented by a bit of golden-orange in the obverse recess below the neck. An excellent sharp strike further enhances the eye appeal. The luster is a tad muted on this piece, typical for the issue but better than usually seen. The surfaces are moderately well-struck. Finding an example in a finer grade will probably require a long search. Population: 50 in 63, 8 finer (1/16). NGC ID# 28DW, PCGS# 8529

1929 Half Eagle, MS62
Strong Eye Appeal, Late-Series Rarity

5077 1929 MS62 NGC. The year 1929 was nearly over when the Dow Jones Industrial Average lost nearly 25% of its value in two days on Black Monday and Tuesday October 28 and 29, 1929, initiating (or confirming) the Great Depression to follow. On July 8, 1932, the Dow closed at 41.22, its lowest level of the 20th century.

Although the reported mintage of 662,000 half eagles dated 1929 was likely hindsight by that point, few examples of the issue were ever released, and most were clearly melted in the few years that followed, most probably after 1933's Gold Recall. The 1929 issue is the last in the Indian Head series (the first struck since the 1916-S, 13 years previously) and the most difficult overall; circulated examples are seldom seen. The present MS62 representative shows deep and lovely reddish-peach color that instantly contributes to the considerable eye appeal. An unfortunate nick shows in the center of the Indian's cheek, however, and a couple of smaller hits show on the jawline and before the profile. The reverse is free of singular marks. This piece, with its sumptuous color and good eye appeal, may pose an attractive entry point for this late-series rarity. NGC ID# 28E2, PCGS# 8533

EARLY EAGLES

1797 Capped Bust Right Ten, VF25
Large Eagle, BD-4 Variety

5078 1797 Large Eagle, BD-4, High R.4, VF25 NGC. Bass-Dannreuther Die State d/a. The reverse design for the ten dollar gold piece was modified in 1797, with the BD-1 variety featuring the old Small Eagle motif, while the other three varieties display the Heraldic Eagle. The present coin represents the scarce BD-4 die marriage, with a long thick neck on the eagle and an irregular cross pattern on the reverse stars. The reported mintage for the Heraldic Eagle type was 10,940 pieces, and the BD-4 variety probably accounted for 3,500-5,000 examples of this total. John Dannreuther estimates a surviving population of 90-110 pieces in all grades.

The coin offered here shows considerable wear on the devices, but all lettering and major detail is still present. The fields exhibit a few minor abrasions, but no adjustment marks are evident. This coin is a very acceptable, no problems representative of this early eagle.
Ex: Central States Signature (Heritage, 4/2011), lot 5416. NGC ID# 25ZY, PCGS# 45719 Base PCGS# 8559

1799 Eagle, BD-10, AU58
Pleasing Natural Surfaces

5079 1799 Large Obverse Stars, BD-10, R.3, AU58 NGC. CAC. Bass-Dannreuther Die State a/a. The more obtainable of two Large Obverse Stars varieties for the 1799 issue, with a widely spaced date and the lowest berry under the foot of the final A in AMERICA. In point of fact, the BD-10 is one of the most available varieties of the entire early eagle series, with perhaps 300 to 400 pieces known in all grades.

This natural-looking example borders on full Mint State, with pleasing apricot-gold patina that flashes remaining mint luster in protected areas. The surfaces show high point wear but remarkably few abrasions, the most significant mark being a tiny depression between R and T of LIBERTY. CAC endorsed, the coin is an excellent representative of both the Large Stars Obverse and the Heraldic Eagle design for ten dollar type. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

LIBERTY EAGLES

1839/8 Liberty Ten, AU58
Type of 1838, Brief Two-Year Design

5080 1839/8 Large Letters AU58 PCGS. The Large Letters 1839 Liberty ten is more easily differentiated from its Small Letters counterpart by the obverse portrait, which features the original Christian Gobrecht design. The stylized, artistic rendering of Liberty seen on the 1838 issue was employed for the first 25,801 eagles coined in 1839, after which the final 12,447 pieces were struck with the modified portrait that would endure until 1907. This Head of 1838 example displays sharp detail with the appropriate high-point wear for the borderline Mint State grade. Bright yellow-gold surfaces yield hints of original mint luster in the protected areas. Population: 6 in 58, 13 finer (2/16). NGC ID# 54XF, PCGS# 8576

1848-O Ten Dollar, AU55
Seldom Located in AU

5081 1848-O AU55 NGC. Variety 3. Even though 35,850 pieces were struck of the 1848-O, AU examples are difficult to locate. This piece exhibits the always-seen softness of strike on the obverse, most likely the result of poor die preparation. The reverse is better-defined with softness limited to the eagle's claws and arrow fletchings. Numerous small abrasions are peppered over each side, but less so than usually seen. Only two dozen or so AU pieces are believed known. NGC ID# 2634, PCGS# 8600

New Orleans Mint

1867 Ten Dollar, MS61
Tied for Finest Known

5082 1867 MS61 PCGS. Only 3,090 circulation strikes were produced in the Philadelphia Mint in 1867, placing the 1867 on par with the 1866 With Motto. High-grade examples usually are AU, and Uncirculated coins are virtually unheard-of. The population numbers confirm this with only one other MS61 certified at PCGS, one at NGC, and none finer at either service (2/16). Most of the Uncirculated examples known display a common appearance with prooflike reflectivity in the fields. The strike details on this piece are generally strong, and each side shows small, scattered abrasions. The only mark of note is in the field between the eagle's head and the right side of the scroll. A seldom-offered opportunity for the astute gold collector. NGC ID# 264L, PCGS# 8651

1898 Liberty Eagle, MS66
Tied for Finest at PCGS

5083 1898 MS66 PCGS. The 1898 Liberty eagle is more difficult to locate than its substantial mintage of 812,130 pieces would suggest. Unlike other high-denomination gold issues of the era, few examples of the 1898 have been repatriated from European or Latin American holdings. Specimens in lower Uncirculated grades can be found with a little patience, but the issue is very rare at the MS66 level. The present coin is a delightful Premium Gem, with well-detailed design elements and well-preserved orange-gold surfaces that emit satiny mint luster on both sides. Overall eye appeal is quite strong. Population: 2 in 66, 0 finer (2/16). NGC ID# 267G, PCGS# 8740

INDIAN EAGLES

1907 No Periods Eagle, MS66 Great Type Coin

- 5084 1907 No Motto MS66 PCGS.** Honey-gold color and copious luster are blatant on each side of this finely preserved 1907 No Periods ten, the third and final issue of this date, reflecting Charles Barber's considerable redo of the Augustus Saint-Gaudens design. It also saw extensive public exposure due to its relatively large mintage of nearly 240,000 pieces, and Mint State examples are available even in Gem and sometimes finer grades. No mentionable contact marks or other impairments blur the desirability of this appealing and beautiful coin, a great acquisition for type purposes. The strike is bold, and the luster is first-rate. PCGS shows only 11 pieces numerically finer (1/16). NGC ID# 28GF, PCGS# 8852

1909-D Eagle, MS63 Original Satin Luster

- 5085 1909-D MS63 NGC.** Original satiny, orange-gold surfaces boast well-defined devices, making this an especially pleasing example for the MS63 grade level. Scattered abrasions pose little distraction, although a small cluster of ticks appears below the ST in TRUST, and a thin pedigree marker occurs on Liberty's neck. The Denver Mint struck 121,540 eagles in 1909, of which only a handful are certified in higher grades. Census: 62 in 63 (1 in 63+), 32 finer (2/16). NGC ID# 28GN, PCGS# 8863

1910-S Indian Eagle, MS64 Conditional Semikey

- 5086 1910-S MS64 PCGS.** The 1910-S Indian eagle is a legendary rarity in Gem condition, and even at the Choice level it is exceedingly scarce. This MS64 example displays satiny wheat-gold luster and minimally abraded surfaces — only light contact on the high points of the design limits the grade. The strike is slightly soft on the eagle's shoulder but is otherwise well-executed. A finer example will prove to be far out of reach for most collectors. Population: 30 in 64 (2 in 64+), 4 finer (1/16). NGC ID# 268D, PCGS# 8867

1912-S Ten Dollar Indian, MS65 Remarkable Condition Rarity

- 5087 1912-S MS65 PCGS.** As an issue overall, the 1912-S is positioned in the middle of the 32 issues in the ten dollar Indian series, but it is in Uncirculated grades that it is best known. Few were set aside in mint condition, and of the ones that were most are not better than MS62. At the Gem level, the 1912-S is a stand-up-and-take-notice rarity. PCGS has only certified 12 others in MS65 with one piece finer (2/16). The surfaces exhibit bright mint frost over sharply struck devices and fine-grain mattelike texturing. As one would expect from a Gem, there are no noticeable abrasions on either side. NGC ID# 269G, PCGS# 8872

LIBERTY DOUBLE EAGLES

1850-O Liberty Twenty, AU53 First Branch Mint Double Eagle

5088 1850-O AU53 PCGS Secure. The 1850-O Liberty twenty was the first double eagle struck at a United States branch mint. With a reported mintage of 141,000 pieces, the 1850-O was a heavily circulated issue, and it is doubtful that any high-quality examples were saved by contemporary collectors. As a result, the issue is not too difficult to locate in lower circulated grades, but high-grade specimens are elusive. This impressive AU53 example shows just a touch of wear on the well-detailed design elements, and the lightly abraded orange-gold surfaces retain traces of original mint luster. Population: 24 in 53, 17 finer (1/16). NGC ID# 268G, PCGS# 8903

1851-O Liberty Twenty, XF45 Excellent Branch Mint Type Coin

5089 1851-O XF45 NGC. Typically worn for the Choice XF grade level, this attractive example displays noticeable luster remnants on each side. The surfaces reveal numerous small to moderate abrasions, including one that rests in the left obverse field to the right of star 3. This is the most available New Orleans double eagle issue, and the best choice for type collectors. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, Seldom-Seen AU58

5090 1851-O AU58 NGC. Variety 1. Ex: Duquesne. The 1851-O boasts the highest mintage of the New Orleans double eagle series (315,000 coins) and is proportionately the most available overall. This issue is the most likely to be encountered in a type collection, and it challenges the 1852-O as the most widely seen New Orleans date in high grade. A smattering of lower-end AU coins are sometimes available, but the population thins considerably in AU58; Mint State coins are rare. Even the Smithsonian Institution lacks an Uncirculated example of this Southern gold issue — unsurprising, since most gold pieces produced during the height of the California Gold Rush, particularly in the South, experienced heavy circulation.

The present example is nearly Mint State, showing a trace of high-point friction under magnification. The surfaces are uncommonly smooth, allowing the lemon-gold patina to emit pleasant luster in the protected regions. An 1851-O of this caliber stands apart from most other examples as decidedly choice for the grade. Census: 63 in 58 (1 in 58+), 19 finer (1/16).

Ex: Duquesne Collection / Chicago Signature (Heritage, 9/2015), lot 4444, which brought \$13,513. NGC ID# 268J, PCGS# 8905

**1852-O Twenty Dollar, AU53
Popular New Orleans Type Coin**

- 5091 1852-O AU53 NGC. Variety 1.** New Orleans struck double eagles for the first 12 years of the series, interrupted by the advent of the Civil War. The facility unexpectedly reopened in 1879, to aid the coinage of silver dollars to fulfill the Bland-Allison Act. New Orleans struck twenties that year also, making a total of 13 different dates. But most are rare, and Souther gold collectors in search of a single O-mint type coin typically select an example dated between 1850 and 1853. This butter-gold representative has pleasing sharpness and ample luster. The surfaces are somewhat glossy near obverse star 4, below the right (facing) wingtip, and on Liberty's cheek. NGC ID# 268L, PCGS# 8907

**1854 Small Date Twenty, MS61
Conditionally Scarce in Uncirculated**

- 5092 1854 Small Date MS61 PCGS.** While not as scarce as its Large Date counterpart, the Small Date 1854 is scarcer than the two previous Philadelphia issues. Most of the survivors of this issue show distracting abrasions, but that is not the case on this piece. Each side certainly shows the small abrasions that characterize an MS61, but these are individually insignificant. It is estimated that between 1500 and 2000 examples are known in all grades, but most of these are in the VF-XF grade range. Uncirculated pieces are in the distinct minority with only 25-50 pieces estimated known. This is a bright yellow-gold example with generous mint luster over each side. The obverse strike details are strong, but some weakness is noted on the reverse scroll and arrowheads. Population: 14 in 61, 8 finer (2/16). NGC ID# 268R, PCGS# 8911

**1857-O Double Eagle, AU53
Excellent Color and Detail**

- 5093 1857-O AU53 NGC. Variety 1.** The O-mint double eagles are a short, challenging subset of the Liberty Head series. Bullion deposits from the West Coast fueled moderate coinage from 1850 to 1853, but after the San Francisco Mint began operations in 1854, double eagle coinage plummeted at New Orleans and did not recover before the outbreak of the Civil War, during which all three Southern branch mints ceased federal operations. The 1857-O is arguably the most collectible of the post-1853 issues, coming from a mintage of 30,000 coins. Uncirculated coins exist but are extremely rare. This sharply detailed AU representative is among the finest most collectors will have a chance to acquire. Both sides display rich honey and orange-gold color with relatively smooth surfaces considering the grade. Eye appeal is superb, accentuated by hints of semiprooflike reflectivity in the protected regions of the fields. Census: 28 in 53 (1 in 53+), 66 finer (1/16). NGC ID# 2694, PCGS# 8921

1857-S Double Eagle, MS63

Ex: S.S. Central America

- 5094 1857-S MS63 PCGS. Variety 20B.** Ex: S.S. Central America, SSCA 0099. Bold S. Fully struck and dazzling with frosty orange-gold luster. A few light grazes limit the grade but none pose significant distraction. The S.S. *Central America* was the origin of most of the high-end 1857-S double eagles known to collectors, and this piece beautifully showcases the eye appeal and quality of the shipwreck coins. NGC ID# 2696, PCGS# 8922

1857-S Double Eagle, MS64
Likely Ex: S.S. Central America

- 5095 1857-S MS64 NGC. CAC.** The "Spiked Shield" reverse with a pair of die lines near the left shield border. Because of its die variety and high grade, it is a virtual certainty that the present near-Gem is from the S.S. *Central America* shipwreck, although the NGC insert omits any such pedigree. A beautiful and lustrous near-Gem, smooth aside from a reed impression at 5:30 on the reverse. The butter-gold surfaces are free from any indication of granularity, although a pair of small planchet flaws are noted on the reverse border at 1 and 8 o'clock. NGC ID# 2696, PCGS# 8922

1858-S Double Eagle, AU58

Frosty, Rose-Gold Surfaces

- 5096 1858-S AU58 NGC. CAC.** The San Francisco facility manufactured 846,710 No Motto twenties in 1858. Doug Winter's doubleeaglebook.com estimates a survival rate of 250 to 300 pieces in all AU grades, plus 25 to 35 Uncirculated coins. Rose and wheat-gold surfaces feature still-vibrant mint frost. Strong strike definition and minimal marks occur over each side of this near-Mint Type One double eagle. A hint of wear is virtually unseen, and the eye appeal is excellent. NGC ID# 2699, PCGS# 8925

1858-S Double Eagle, AU58

Difficult in Mint State

- 5097 1858-S AU58 PCGS. CAC.** Most 1858-S double eagles entered the channels of commerce, accounting for the high number of XF and AU examples in the certified population along with relatively few Uncirculated coins. Luster resides in the recessed areas of the well-defined design elements of this AU58 specimen. Finer pieces are rare. Population: 54 in 58, 17 finer (1/16). NGC ID# 2699, PCGS# 8925

1862 Double Eagle, Lustrous AU58
A Scarce Type One P-Mint Issue

- 5098 1862 AU58 NGC.** Fewer than 100,000 pieces were struck of the 1862 and it is one of the scarcest Type One double eagles from the Philadelphia Mint. This is an especially lustrous example for a lightly circulated coin and is sharply struck throughout. Attractive orange-gold color graces both sides. Numerous small abrasions are scattered about, along with a couple of specks of grease that were struck into the planchet at the time of manufacture, both around star 3. The amount of luster present will surely impress. Rarely seen finer. Census: 19 in 58 (1 in 58 ★), 9 finer (2/16).
Ex: Long Beach Signature (Heritage, 1/2004), lot 7288. NGC ID# 269M, PCGS# 8937

1862-S Liberty Double Eagle, AU58
Seldom Seen Finer

- 5099 1862-S AU58 NGC. Like most early double eagles, the 1862-S is difficult to locate in Mint State, which makes nice AU58 examples extremely popular with collectors. Flashy luster accents the butter-yellow patina that graces the surfaces. A number of minor bagmarks on both sides is typical for the issue and none merit specific mention. Several stars are softly struck and Liberty's hair is weakly defined. NGC has certified only 35 pieces finer (1/16). NGC ID# 269N, PCGS# 8938

1862-S Twenty Dollar, Mint State Sharpness

- 5100 1862-S — Improperly Cleaned — NGC Details. Unc. Medium S. Even though the fields show light hairlines there is much commendable eye appeal present on this Uncirculated-sharpness 1862-S twenty. There are relatively few sizeable contact marks, and much luster remains on wheat-gold surfaces that show a decent strike. An interesting die crack appears on the lower reverse periphery, connecting the D and following period in the denomination to the rim nearby. Even though well over 850,000 pieces of this issue were struck, most survivors today are well-circulated.

1862-S Double Eagle, MS61
Repunched Date, Condition Rarity

- 5101 1862-S MS61 NGC. Breen-7214, Repunched Date. The 86 in the date shows clear repunching within the loops. Doug Winter believes less than 10% of surviving 1862-S double eagles feature repunching, while Garrett and Guth's *Gold Encyclopedia* adds that about half of the 127 coins found on the S.S. *Republic* were of this variety. The hoarding of gold and silver in the East at the outset of the Civil War resulted in the suspension of specie payments at the close of 1861. Consequently, the Philadelphia Mint reduced double eagle production by 97% between 1861 and 1862. However, Western commerce remained relatively unchanged, and gold continued to circulate heavily. San Francisco Mint officials increased twenty dollar output to 854,171 coins in 1862. Examples survive mainly in VF and XF condition. All Mint State coins are rare.

This Type One issue generally comes softly struck. The obverse of the present MS61 coin features full radial lines on stars 6 through 13 and good detail on the hair curls. Pleasing green and rose-gold surfaces exhibit frosty luster over each side with an expected number of scattered bagmarks. Census: 18 in 61, 9 finer (1/16). NGC ID# 269N, PCGS# 8938

1863-S Double Eagle, MS61
Rich, Luminous Luster

5102 1863-S MS61 NGC. The 1863-S double eagle is a notable rarity in Mint State with most such coins also showing heavy abrasions. This MS61 example is quite attractive for the issue with glowing orange-gold luster and surprisingly few major abrasions — light chatter on the cheek and in the adjacent field appears to be the chief grade-limiting factor. The strike is bold, and eye appeal is pleasing. Census: 36 in 61 (1 in 61+), 26 finer (1/16). NGC ID# 269R, PCGS# 8940

1866 Motto Double Eagle, AU58+
FS-801, Doubled Motto

5104 1866 Motto, Doubled Die Reverse, FS-801, AU58+ PCGS. IN GOD WE TRUST is doubled, especially the N in IN. 1866 was the first year of the Motto subtype, and the Motto may have been recut by hand on the working reverse die. This sharply defined and original olive-gold near-Mint double eagle offers substantial cartwheel shimmer. Minor marks are prevalent but none are obtrusive. NGC ID# 38JK, PCGS# 145733 Base PCGS# 8949

1864 Liberty Double Eagle, AU58
Elusive Type One Twenty

5103 1864 AU58 PCGS. CAC. Just 42 pieces were recovered from the S.S. Republic, and most surviving examples of the 1864 double eagle are non-shipwreck coins. This still-lustrous near-Mint example has the original look of a coin that never saw the bottom of the ocean, with pleasing medium-gold patina and a few orange accents.

While the surfaces show the expected abrasions, the bagmarks are less severe than many coins of the grade and the eye appeal is undeniable. Nice definition remains on the devices. This elusive issue is seldom seen any finer, with CAC endorsement to confirm the quality. Population: 30 in 58, 27 finer (2/16). NGC ID# 269S, PCGS# 8941

1869-S Twenty Dollar, MS61
Popular Type Two Issue

5105 1869-S MS61 PCGS. While available in circulated grades, the 1869-S is scarce in mint condition. Out of an estimated 1250-1500 pieces estimated extant in all grades, only 50-60 coins are believed to be known in Uncirculated grades. Of those in Mint State, MS60-61 is the entry level with few known finer. PCGS has only certified 14 pieces in higher grades than this MS61. The surfaces display the expected frosted mint luster, common to almost all S-mint products. Also as expected for this issue, the peripheral stars are weak (does a '69-S exist with full stars?). Numerous small to medium-sized abrasions are scattered across each side. NGC ID# 26A6, PCGS# 8956

1872-CC Twenty Dollar, XF40
Smooth Surfaces

- 5106 1872-CC XF40 NGC. Variety 1-A. A scarce variety with the date close to the dentils and the mintmark closely spaced. The 1872-CC twenty is a slightly better early date in the Carson City short set and widely sought in any grade obtainable. This lightly circulated piece displays wheat-gold surfaces with faint hints of luster. Unusually smooth patina for the grade. NGC ID# 26AE, PCGS# 8964

1873-CC Double Eagle, XF40
Some Luster Remains

- 5107 1873-CC XF40 PCGS. Variety 2-A, with the upper loop of a misplaced numeral in the dentils below the 73 of the date. This lightly circulated 1873-CC double eagle displays pleasing detail with remnants of luster throughout the wheat-gold surfaces. A nick below Liberty's eye is the only abrasion of note. A slightly better date in the Carson City short set. NGC ID# 26AJ, PCGS# 8968

1874 Liberty Double Eagle, MS64
Tied for Finest at PCGS

- 5108 1874 MS64 PCGS. The Philadelphia Mint struck a nominal mintage of 366,800 Liberty double eagles in 1874. Like most Type Two issues, the 1874 can be found in middle-circulated grades without much trouble, but few high-quality specimens were saved, and examples in Mint State condition are quite elusive. The issue qualifies as very rare at the MS64 level.

The present coin is a most attractive Choice specimen, with well-detailed design elements and vivid orange-gold surfaces that show highlights of red. Only minor signs of contact are evident and vibrant mint luster enhances the outstanding eye appeal. Population: 3 in 64, 0 finer (2/16). NGC ID# 26AN, PCGS# 8970

1874-CC Twenty Dollar, AU50
Some Luster Remains

- 5109 1874-CC AU50 NGC. Variety 4-A. The 1874-CC is of mid-level scarcity in the Carson City short set but remains a rarity in Mint State. This AU coin displays uncommonly smooth surfaces with orange-gold patina. Hints of luster emerge from the protected regions of the fields. A few small marks on Liberty's cheek are minimally distracting. Ideal for the quality-conscious collector. NGC ID# 26AP, PCGS# 8971

1876-CC Liberty Double Eagle, AU55
Excellent Branch Mint Type Coin

- 5110 1876-CC AU55 NGC. Variety 1-A.** The 1876-CC Liberty double eagle claims a substantial mintage of 138,441 pieces, the largest production total of the series. Despite the large mintage, the 1876-CC was still a rare issue in Mint State grades until a hoard of nice examples surfaced in the mid-1990s. This attractive Choice AU specimen exhibits lightly abraded peach-gold surfaces that retain much original mint luster. The well-detailed design elements show only light wear on the high points. NGC ID# 26AW, PCGS# 8977

1879-CC Double Eagle, XF40
Better Carson City Issue

- 5111 1879-CC XF40 PCGS. Variety 1-A.** The reverse is lapped on this late-die-state coin, with the eagle's tailfeathers weakened. The strike is sharp, and wear is light. Both sides display smooth green-gold surfaces. The 1879-CC double eagle had a mintage of only 10,708 coins and is a better date in high grade. This XF representative is a pleasing collector-grade piece. NGC ID# 338L, PCGS# 8989

1880 Double Eagle, MS61
Rare Issue, Bold Eye Appeal

- 5112 1880 MS61 PCGS.** A notable run of rare Liberty Head double eagles from the Philadelphia Mint starts with the 1880 issue, known for its low mintage of 51,456 pieces and few Uncirculated survivors. Subsequent mintages of Philadelphia twenties range from minuscule to negligible until 1888, when the "silver frenzy" instigated by the Bland-Allison Act subsided and more-normal double eagle production resumed.

The current example exhibits a Mint freshness that excites the eye. Some prooflikeness in the fields yields to a frosty brilliance, and the sun-gold patina flashes orange, rose-red, and lilac highlights. The coin shows a sharp strike throughout, with minor abrasions in the left obverse field that determine the grade but do not diminish the splendid appeal. Population: 20 in 61, 10 finer (2/16). NGC ID# 26BA, PCGS# 8992

**1882-CC Double Eagle, Choice AU
High-End For the Grade**

- 5113 1882-CC AU55 NGC. CAC. Variety 1-B.** The 1882-CC is a collector favorite because of its low mintage and high production quality. Examples can be obtained through AU, but Mint State representatives are rare and command prices that exceed most budgets. This AU55 CC twenty showcases surprisingly radiant luster over light yellow-gold surfaces with a degree of semiprooflikeness throughout the obverse. Razor-sharp design detail is typical for the issue. Die cracks pass through the upper reverse legend. The absence of distracting imperfections and essentially imperceptible wear suggest this coin is high-end for the grade. CAC has correspondingly awarded a green approval sticker. NGC ID# 26BF, PCGS# 8997

**1883-CC Liberty Double Eagle, AU55
Outstanding Branch Mint Type Coin**

- 5114 1883-CC AU55 PCGS. Variety 2-A.** A noticeable raised die dot to the right of the 3 in the date identifies the variety. From a mintage of 59,962 pieces, the 1883-CC Liberty double eagle is one of the more available issues from the Carson City Mint and a popular choice with branch mint type collectors. This attractive Choice AU specimen shows just a trace of wear on the strongly impressed design elements and the lightly abraded orange-gold surfaces retain most of their original mint luster. NGC ID# 26BH, PCGS# 8999

**1884-CC Twenty Dollar, AU55
Original Khaki-Gold Surfaces**

- 5115 1884-CC AU55 PCGS. CAC. Variety 1-A.** A mintage of 81,139 coins is low in the context of the series, but it represents one of the higher production totals for the Carson City Mint after the 1874 through 1876 issues. Original khaki-gold color adorns this Choice AU double eagle, accounting for the CAC approval sticker. All stars show full centers, though the upper stars are somewhat better brought-up. Liberty's curls and hair strands are impeccably delineated with only the slightest suggestion of friction. Each side is remarkably clean for the assigned grade, and there are no major abrasions to report. NGC ID# 26BK, PCGS# 9001

**1885-S Liberty Twenty, MS64+
Only Two Finer Coins at PCGS**

- 5116 1885-S MS64+ PCGS.** The 1885-S Liberty double eagle claims a substantial mintage of 683,500 pieces, but few high-quality examples were saved by contemporary collectors. Most of the coins circulated heavily in the regional economy, or were used in foreign exchange, where rough shipping and storage resulted in considerable attrition. As a result, the issue is reasonably available in circulated and lower Mint State grades today, but high-grade examples are quite rare. This Plus-graded Choice specimen offers sharply detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster and show only minor signs of contact. Overall eye appeal is terrific. Population: 35 in 64 (1 in 64+), 2 finer (2/16). NGC ID# 26BP, PCGS# 9005

**1889-S Double Eagle, MS63+
Pleasing for the Grade**

5117 1889-S MS63+ PCGS. The 1889-S Liberty twenty was made famous by the Saddle Ridge Hoard, which yielded hundreds of examples, many in Mint State. This Plus-graded Select representative is not pedigreed to the hoard, but its eye appeal is comparable to that of many of those pieces. The strike is sharp, and frosty luster cartwheels in blended rose and green-gold hues. Light, scattered abrasions define the grade but none are individually detracting. NGC ID# 26BW, PCGS# 9012

**1889-S Liberty Twenty, MS63+
Ex: Saddle Ridge Hoard**

5118 1889-S Saddle Ridge Hoard MS63+ PCGS. Ex: Saddle Ridge Hoard. The 1889-S Liberty double eagle was well-represented in the famous Saddle Ridge Hoard. This high-end Select example displays lightly marked yellow-gold surfaces with vibrant mint luster and sharply detailed design elements throughout. Despite the recent Saddle Ridge find, PCGS has graded only 36 numerically finer examples (1/16). NGC ID# 26BW, PCGS# 109012 Base PCGS# 9012

**1893-CC Liberty Twenty, MS61
Popular Branch Mint Issue**

5119 1893-CC MS61 NGC. The 1893-CC Liberty double eagle is a scarce issue in high grade. The two varieties known for the small mintage of only 18,402 coins share a common reverse die showing the two C's in the mintmark level, the bottom of the second C centered over the upright of the D in DOLLAR. The obverse of this variety shows the B in J.B.L. (the designer James Barton Longacre's initials) above the right-side loop of the 8 in the date, and a small spike of metal sticks out from the front of Liberty's neck. This Mint State example displays excellent luster and a good strike with overall above-average eye appeal. A few marks appear on Liberty's neck and cheek, but there are a pair of deep reeding marks on the forward bust truncation. The reverse on its own would likely garner an MS62 grade. NGC ID# 26C9, PCGS# 9023

**1899-S Twenty Dollar, MS64+
Exceedingly Rare Finer**

- 5120 1899-S MS64+ PCGS.** The 1899-S Liberty double eagle is rare in Gem condition, making the slightly more plentiful Choice population in high demand. This Plus-graded coin is sharply struck and vibrantly lustrous with straw-gold surfaces. A few trivial ticks are not out of line for the grade. PCGS has seen only four finer coins, including three MS65 and an MS67 (2/16). NGC ID# 26CN, PCGS# 9036

**1906 Double Eagle, MS63
Undeniably Original Patina**

- 5121 1906 MS63 PCGS. CAC.** One of just 69,500 pieces minted, the 1906 Philadelphia double eagles are often overlooked by collectors who focus on the 1902 and 1905 issues as the main scarcities of the decade. This Select Uncirculated example approaches rare air, a notch removed from just 32 numerically finer pieces at PCGS (2/16). The frosty greenish-gold surfaces are softly lustrous with faint orange and lemon-yellow accents. A sharp and minimally abraded twenty, with CAC endorsement. NGC ID# 26D4, PCGS# 9049

HIGH RELIEF DOUBLE EAGLES

**1907 High Relief Double Eagle, MS63
Prominent Wire Rim**

- 5122 1907 High Relief, Wire Rim MS63 PCGS.** Though Augustus Saint-Gaudens was the sculptor behind the High Relief double eagles, President Theodore Roosevelt was the driving force who saw the coins through, even though they had certain impracticalities for everyday commerce. This Wire Rim example shows off one of those frequent impracticalities, an uneven "fin" of metal around much of each side that would have impeded stacking of the big and beautiful coins. This patinated yellow-gold Select example's interiors are not significantly abraded, though a number of rim nicks and bumps are noted at the left obverse and bottom reverse. NGC ID# 26F2, PCGS# 9135
-

1907 Flat Rim High Relief Twenty, MS62
Bright and Satiny, Clean Surfaces

SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Twenty, MS68
Incredible Wells Fargo Hoard Example

5123 1907 High Relief, Flat Rim, MS62 PCGS. Known for his meticulous attention to detail, Augustus Saint-Gaudens tinkered and toyed with his designs until they met his exacting standards. According to Michael Moran's *Striking Change*, the sculptor "always considered arranging flowing draperies a complicated task." Saint-Gaudens remarked in a letter to his son Homer regarding the Sherman Monument's cloak: "I've just remodeled the cloak for over the 10,000th time and today it seems beautiful. Tomorrow it will probably appear hellish and so things go." Years later, Saint-Gaudens would similarly struggle with Liberty's drapery for the twenty dollar gold coins. After the Ultra High Relief coins were struck, he created new models with an added skirt fold to enhance the sense of beauty and motion, and to smooth the transition between the relief elements and fields. These seemingly minor modifications are evident when one views a High Relief twenty in its totality, giving the figure of Liberty a sense of dynamic realism.

Yet even after production began in 1907, modifications continued on High Reliefs. During the production run the Mint Director noticed a "fin" (a.k.a. Wire Rim) encircling much of each side of the coins. This "defect" was eventually (mostly) solved, but only about 20-25% of the High Reliefs struck showed the lack of a fin (Flat Rim coins). This is a bright, satiny example with just a hint of reddish patina over each side. Magnification is required to see the few tiny contact marks that keep this lovely piece from grading even higher. NGC ID# 26F2, PCGS# 9136

5124 1908 No Motto, Wells Fargo Nevada, MS68 PCGS. The Wells Fargo Hoard was a treasure of nearly 20,000 examples of the 1908 No Motto double eagles, coins that had resided undisturbed — and even *unmoved* — in bank bags from 1917 until they surfaced in the numismatic market in the 1990s. The quality of the hoard was even more staggering than the quantity, with PCGS grading 10 examples in the unheard-of grade of MS69. This MS68 example displays superb bright mint luster over even, orange-gold surfaces that approach technical and aesthetic perfection, as one would expect from such a grade. As this lot makes obvious, the Wells Fargo Hoard continues to provide multiple delights for collectors today. The population data have not budged: PCGS continues to show 10 pieces finer (1/16). NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

**1908-S Saint-Gaudens Twenty, MS60
Low-Mintage Branch Mint Issue**

- 5125 1908-S MS60 NGC.** The 1908-S Saint-Gaudens double eagle claims an extremely low 20th century mintage of just 22,000 pieces and represents the first year of the Motto design. This well-detailed Mint State example displays lustrous yellow and rose-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 26FA, PCGS# 9149

**1911 Double Eagle, MS64+
Great Color and Luster**

- 5126 1911 MS64+ PCGS.** An exceptionally sharp strike covers both sides of this lustrous and frosty borderline Gem double eagle. MS64 is the final readily available grade for this low-mintage twenty, making the Plus designation a significant factor. The smooth surfaces are remarkably free of abrasions or marks with vivid, sun-gold coloration. Population: 37 in 64+, 57 finer (2/16). NGC ID# 26FK, PCGS# 9157

**1920-S Saint-Gaudens Twenty, AU58
Challenging, Heavily Melted Issue**

- 5127 1920-S AU58 NGC.** Despite an adequate mintage of 558,000 pieces, the 1920-S Saint-Gaudens double eagle is one of the most challenging issues of the series in today's market. The great majority of the substantial production total was never released into circulation, and few examples were used in overseas commerce. As a result, most of the coins were still being held in Treasury vaults or banks when President Roosevelt's Gold Recall took effect in 1933. Virtually the entire mintage of the 1920-S was rounded up and turned over to the government and later melted into gold bars for the Fort Knox Bullion Depository. The 1920-S was the first date in the Saint-Gaudens series to suffer this fate, but several later dates were also heavily melted.

This attractive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded yellow and orange-gold surfaces retain most of their original mint luster. The overall presentation is quite pleasing. Census: 15 in 58, 55 finer (1/16). NGC ID# 26FZ, PCGS# 9171

**1926-S Twenty, MS64+
Heavily Melted Branch Mint Issue**

5128 1926-S MS64+ PCGS. CAC. More than 2 million pieces were struck of this San Francisco double eagle, many of which were melted during the 1933 gold confiscation. Still, enough survived either in collector hands or in European hoards to make the date relatively available for today's gold specialists.

This lustrous and attractive near-Gem example offers smooth, yellow-gold surfaces and a strong strike. A few tiny marks do little to distract from the considerable visual impact of the gleaming fields and devices. PCGS has certified just 37 numerically finer examples (1/16). NGC ID# 26GF, PCGS# 9185

COMMEMORATIVE SILVER

**1893 Isabella Quarter, MS66+
Attractive Multicolor Toning**

5129 1893 Isabella Quarter MS66+ PCGS. CAC. The Isabella quarter was the only commemorative design of the classic era placed on a quarter-denomination coin, and to many collectors' eyes, it is among the most graceful and artistic of the many that followed — despite its design by Charles Barber. Prevailing pinkish-gray and sky-blue accents are accompanied by glints of pale yellow and rose near the rims of this high-end Premium Gem. The strike is powerfully brought up, and no mentionable contact marks appear. NGC ID# BYJ9, PCGS# 9220

**1936-S Cincinnati Half Dollar, MS67
Among the Finest at Both Services**

5130 1936-S Cincinnati MS67 PCGS. Prominent numismatist Thomas G. Melish takes his place in history as the originator of 1936 Cincinnati commemorative half dollars. Unfortunately, the circumstances surrounding the coins' conception and production were questionable. The issue supposedly celebrated the city's 50-year contribution to the art of music. However, the ploy was a money-making scheme through and through. Sets could be acquired for a then-record high of \$7.75, and thousands were withheld and sold on the secondary market for significant premiums. Initially, Melish even sought to distribute production across the three mints such that the Denver issue would be great rarity, resulting in greater profits. Instead, each facility coined 5,000 Cincinnati halves plus a small number of assay pieces.

Remarkably, this Superb Gem is one of eight top-graded survivors, the population being split equally between the two leading certification firms (1/16). Softly frosted surfaces have largely brilliant interiors that cede to dappled specks of multicolor patina around the borders. A few trivial marks are visible only with magnification. NGC ID# BYCL, PCGS# 9285

**1923-S Monroe Half, Lightly Toned MS66+
A One-Year Key to the Complete Design Set**

- 5131 1923-S Monroe MS66+ PCGS.** A one-year key to the classic commemorative design set, this high-end Premium Gem Monroe half ranks close to the finest-known specimens at PCGS and is therefore a worthy candidate for any advanced collection. Occasional amber-gold accents add life to the lightly iridescent, pearlescent-silver surfaces. A sharply struck and nearly mark-free example of the type. Population: 90 in 66 (10 in 66+), 6 finer (2/16). NGC ID# BYH4, PCGS# 9333

**1923-S Monroe Half, Pastel-Toned MS67
A Key to the 50-Piece Commemorative Design Set**

- 5132 1923-S Monroe MS67 PCGS.** While the contorted female figures on the reverse may not make the most aesthetic design — it seemed like a good idea at the time — and the jugate profiles on the obverse are pedestrian, this Superb Gem is certainly among the most beautiful survivors of this issue we have ever seen. Pale pastel violet, gold, jade, and rose colors enliven portions of each side, the balance remaining silver-gray and the surfaces showing impeccable preservation. The surfaces show fine satin luster and remarkable eye appeal. The last time we handled an example in this grade and service was, in fact, this same piece in a lower-numbered holder: Lot 4538 in our Chicago ANA Signature (Heritage, 8/2015), which realized \$11,163. Population: 6 in 67 (1 in 67+), 0 finer (1/16). NGC ID# BYH4, PCGS# 9333

**1939-D Oregon Trail Half Dollar, MS68
Strong Registry Set Candidate**

- 5133 1939-D Oregon MS68 PCGS. CAC.** The Oregon Trail half dollar is one of the most popular issues of the silver commemorative series, due to its beautiful and evocative design. This magnificent MS68 example displays sharply detailed design elements and impeccably preserved surfaces that radiate vibrant mint luster on both sides. A few hints of pale gold toning add to the outstanding eye appeal. Population: 26 in 68 (4 in 68+), 0 finer (1/16). NGC ID# BYHM, PCGS# 9353

COMMEMORATIVE GOLD

1904 Lewis and Clark Gold Dollar Conditionally Rare MS67

- 5134** 1904 Lewis and Clark Gold Dollar MS67 PCGS. In MS66, the 1904 Lewis and Clark gold dollar is somewhat more plentiful than its 1905 counterpart, but in MS67, both dates are genuine rarities. This Superb Gem 1904 boasts sharp detail with rich honey-gold luster and partially reflective fields. Close study with a loupe fails to reveal any mentionable flaws. This issue had a distribution of 10,025 coins, including assay pieces. Examples were sold in conjunction with the Lewis and Clark Centennial Exposition, held in Portland, Oregon, in 1905. Charles Barber prepared the double-headed design. Population: 19 in 67 (1 in 67+), 1 finer (1/16). NGC ID# BYLF, PCGS# 7447

1915-S Pan-Pac Quarter Eagle, MS66+ Seldom Seen in Finer Grades

- 5135** 1915-S Panama-Pacific Quarter Eagle MS66+ PCGS. The 1915-S Panama-Pacific quarter eagle was produced to commemorate the opening of the Panama Canal and the recovery of San Francisco after the devastating earth quake. This high-end Premium Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces with satiny mint luster throughout. PCGS has graded 39 numerically finer examples (1/16). NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS67+ Incredible Luster and Surfaces The Sole Finest at PCGS

- 5136** 1915-S Panama-Pacific Quarter Eagle MS67+ PCGS. CAC. Even with a 10x loupe it is difficult to discern a grade-limiting flaw on the surfaces. This Panama-Pacific quarter eagle is superb in both strike and preservation, showing frosty golden luster that glows uninterrupted on each side and shimmers when rotated beneath a light. PCGS has certified 39 Pan-Pac quarter eagles at the MS67 level, but this remarkable coin is the only one with the coveted Plus designation; neither service has seen a finer example (2/16). This coin is also CAC-endorsed, an attribute only 23 top-grade pieces from both services combined have achieved. This is a classic commemorative that could be on every collector's want list. NGC ID# BYLP, PCGS# 7450

MODERN BULLION COINS

1990 Tenth-Ounce Gold Eagle, MS70 Rare This Fine at PCGS

- 5137** 1990 Tenth-Ounce Gold Eagle MS70 PCGS. Like most early issues in the tenth-ounce Gold Eagle series, the 1990 is rare graded by PCGS in perfect MS70 condition. This example is one of just 16 such coins (2/16). The strike is bold, and the surfaces display lovely yellow-gold luster. Destined for a highly competitive Registry Set. NGC ID# 26KZ, PCGS# 9838

1992 Quarter-Ounce Gold Eagle MS70, Condition Rarity

- 5138** 1992 Quarter-Ounce Gold Eagle MS70 PCGS. The High Relief double eagles struck in 1907 bore the Roman numeral date MCMVII. For this reason, Roman numeral dates were used on gold eagles between 1986 and 1991. In 1992, the gold eagle program abandoned investor-unfamiliar Roman numerals in favor of conventional Arabic dates. By this time, mintages had declined for the fractional issues, and the 1992 quarter-ounce eagle has a production of less than 60,000 pieces. Perfect examples are rare. This intricately impressed piece offers sweeping luster and virtually flawless apricot-gold surfaces. Population: 7 in 70 (2/16). NGC ID# 26M8, PCGS# 9860

1993 Quarter-Ounce Gold Eagle, MS70 Only 12 Coins So Fine at PCGS

- 5139** 1993 Quarter-Ounce Gold Eagle MS70 PCGS. This bullion issue, struck to the extent of 71,864 pieces, is seldom seen in perfect MS70 condition. PCGS has only graded 12 examples this fine (2/16), making the present piece a highly important acquisition for Registry collectors. The strike is full, and the glistening golden surfaces showcase perfect preservation. NGC ID# 26M9, PCGS# 9870

1993 Half-Ounce Gold Eagle, MS70 Rare So Fine in a PCGS Holder

- 5140** 1993 Half-Ounce Gold Eagle MS70 PCGS. The half-ounce Gold Eagle of 1993 is nearly as rare in PCGS-graded MS70 as its quarter-ounce counterpart, tallying in at just 16 pieces in this grade at that service (2/16). The present example displays fully rendered design elements and mint-fresh golden luster. Eye appeal is superb. NGC ID# 26NE, PCGS# 9872

1993-P Half-Ounce Gold Eagle Elusive PR70 Deep Cameo

- 5141** 1993-P Half-Ounce Gold Eagle PR70 Deep Cameo PCGS. Proof half-ounce Gold Eagle mintage figures began to decline in 1993, with the Philadelphia Mint producing only 43,819 coins that year. Examples are plentiful in the absolute sense but scarce in the perfect PR70 Deep Cameo grade. This piece is fully struck with eye-catching cameo contrast and seemingly infinite depth of mirroring in the fields. NGC ID# 28YF, PCGS# 9873

1994 Half-Ounce Gold Eagle Rare PCGS-Graded MS70

- 5142** 1994 Half-Ounce Gold Eagle MS70 PCGS. The 1994 half-ounce Gold Eagle is slightly scarcer in perfect MS70 condition than the 1993, at least at NGC. At PCGS, the population in this finest grade is tied with that of the previous issue at just 16 coins (2/16). This piece is razor-sharp and delicately preserved, showing superb eye appeal. NGC ID# 26NF, PCGS# 9882

1995-W Silver Eagle
PR70 Deep Cameo

- 5143** 1995-W Silver Eagle PR70 Deep Cameo PCGS. The 1995-W is the key to the Silver Eagle series. This proof issue was struck at the West Point Mint for inclusion in special 10th anniversary bullion coin sets, alongside the various gold issues. However, the set's rather high cost of \$999 limited sales to just 30,125. This is by far the lowest mintage of any proof or business strike in the Silver Eagle series. NGC-graded PR70 Deep Cameos are occasionally seen, but PCGS-graded examples are scarce. The *Population Report* lists only 107 submissions in this flawless condition (1/16). This piece is fully struck with stark white-on-black contrast and beautiful preservation. Ranked fourth in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. NGC ID# 28WZ, PCGS# 9887

1995 Half-Ounce Gold Eagle, MS70
Only Five Coins So Graded at PCGS

- 5144** 1995 Half-Ounce Gold Eagle MS70 PCGS. Half-ounce Gold Eagle coinage declined in 1995 from the previous two years to 53,474 pieces, and the PCGS certified population in MS69 and MS70 is proportionately lower, as well. Registry collectors will clamor for just five 1995 tens in perfect MS70 condition (2/16), one of which is offered here. This magnificent coin is a standout condition rarity in the modern bullion series in a PCGS holder. The strike is fully rendered, and the preservation is flawless. Satiny luster illuminates each side in a radiant cartwheel. Undoubtedly one of the most impressive modern bullion coins in this sale. NGC ID# 26NG, PCGS# 9892

1997 Quarter-Ounce Platinum Eagle
Rarely Seen MS70

- 5145** 1997 Quarter-Ounce Platinum Eagle MS70 PCGS. Although plentiful in MS68 and MS69, the 1997 quarter-ounce Platinum Eagle is a great rarity in MS70 PCGS, with only seven coins so-graded (2/16). This piece is fully struck and starkly contrasted with outstanding eye appeal. From a series-debut mintage of 27,100 coins. One of the true condition rarities in the bullion coin series. NGC ID# 26SR, PCGS# 99753

1997 Half-Ounce Platinum Eagle, MS70
Only Six Coins This Fine at PCGS

- 5146** 1997 Half-Ounce Platinum Eagle MS70 PCGS. Many of the early issues in the half-ounce Platinum Eagle bullion coin series are rare in perfect MS70 condition. The 1997 is no exception. Coming from a mintage of 20,500 coins, this popular first-year issue has seen only six coins graded MS70 at PCGS (2/16). The present piece displays fully rendered motifs and dazzling luster. The stark “reverse proof” contrast of the devices is outstanding. NGC ID# 26TC, PCGS# 99752

TERRITORIAL GOLD

(1837-42) C. Bechtler Quarter Eagle
70G. 20C., MS62
K-13, None Finer at NGC

- 5147** (1837-42) C. Bechtler Quarter Eagle, 70G. 20C. MS62 NGC. K-13, R.6. As early as the spring of 1831, Christopher Bechtler formulated a plan to mint quarter eagles and five dollar gold pieces at his Rutherfordton, North Carolina private mint. The elder Bechtler realized that a local minting operation was needed for native Carolina and Georgia gold dust — which otherwise had to travel to Philadelphia for assaying and minting — providing local miners a more cost-effective option while satisfying the critical need for cash in local commerce.

This attractive C. BECHTLER quarter eagle was struck on a smooth planchet sometime between 1837 and 1842, with a Plain Edge, apparently during the seventh series of the Christopher Bechtler coinages (BECHTLER without the C.). An even, medium-gold color shows faint orange patina around the raised elements. Only minor ticks and abrasions dot the surfaces. This example is among the finest known of the denomination, where only a single K-13 example in MS63 is finer at PCGS and none exceed MS62 at NGC. NGC Census: 7 in 62, 0 finer (1/16). Listed on page 381 of the 2016 *Guide Book*. NGC ID# 2B9J, PCGS# 10070

**1834 C. Bechtler Half Eagle, AU Details
K-17, RUTHERFORD**

- 5148** 1834 C. Bechtler Five Dollar, RUTHERFORD, Plain Edge, K-17, R.5 — Reverse Repaired, Graffiti — NGC Details. AU. The K-17 is one of the more frequently seen Bechtler half eagle varieties, made of 140 grains of 20-carat CAROLINA GOLD and having RUTHERFORD spelled out, along with the date AUGUST 1, 1834, showing the coins conformed to the national gold standard change at the time. The Bechtler coins were actually slightly overweight in comparison to the federal standard. This wheat-gold piece shows plenty of detail remaining, although some graffiti remains near the reverse rim, and some of the central area has likely been smoothed to remove other graffiti. This is still a pleasing and attractive coin, one showing plenty of eye appeal. This variety is listed on page 382 of the 2016 *Guide Book*. NGC ID# 2B9P, PCGS# 10091

**(1842-1852) A. Bechtler Dollar, MS62
Plain Edge, 27 G. 21C., K-24**

- 5149** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge MS62 NGC. K-24, R.3. The more-available Plain Edge variety of this August Bechtler gold dollar, with the Reeded Edge variant extremely rare and virtually uncollectible. The smooth surfaces are somewhat convex on the obverse and concave on the reverse, with a high obverse rim that shows a few tiny irregularities and test cuts. The attractive surfaces are somewhat stippled by die rust, but sharply struck for the issue with few other marks. Listed on page 382 of the 2016 *Guide Book*. Census: 40 in 62, 8 finer (1/16). NGC ID# 2B99, PCGS# 10040

**1850 Baldwin & Co. Five Dollar, XF40
K-2, Elusive San Francisco Coiner**

- 5150** 1850 Baldwin Five Dollar XF40 PCGS. K-2, R.5. Baldwin & Co. five dollar pieces were briefly plentiful in San Francisco, but the firm's issues were proved underweight. They were accepted in commerce only at a severe discount to face value, and most were melted by the late 1850s. The Baldwin five is less iconic than its famous Horseman ten dollar counterpart, but is nearly as rare. The present peach-gold piece has the sharpness of a higher grade along with a smattering of unimportant marks. Encapsulated in an old green label holder. Listed on page 391 of the 2015 *Guide Book*. NGC ID# ANHJ, PCGS# 10025

**Clark, Gruber Five, MS63 Brown
Rare Copper Die Trial, K-10c**

- 5151** 1861 Clark, Gruber \$5 Copper Die Trial MS63 Brown NGC. K-10c, R.7. Clark, Gruber and Co. began issuing gold coins in various denominations in 1860. The firm was known for integrity and the reliability of their coins. Off-metal strikings of their two-and-one-half, five, ten, and twenty dollar coins are known for the years 1860 and 1861. Apparently, these strikings were made to test the dies before the gold coinage was produced. This piece represents the third and final variant of the 1861 five dollar die trial, identified as K-10c by Donald Kagin. This piece is struck from the regular dies used to coin gold five dollar pieces in 1861. Struck in copper, with a reeded edge.

The present attractive Select Brown representative is one of four K-10c examples at NGC, including two in this grade and one Gem Brown coin finer (1/16). The strike lacks high point definition in the center of each side, the same as a regular production gold coin would. Each side is dark brown with subtle underlying blue and rose colors that are evident when closely inspected. The only mentionable flaw is a small planchet flake out of the obverse field by star 12. The 1861 Clark, Gruber half eagles in copper are very rare today. A few examples of this design are known in gilt format, as well.

Ex: Long Beach Signature (Heritage, 9/2010), lot 5818; Long Beach Signature (Heritage, 2/2011), lot 4755. NGC ID# ANLV, PCGS# 10151

CALIFORNIA FRACTIONAL GOLD

**1872 Indian Round Dollar, MS65
Finest Certified BG-1207 at PCGS**

- 5152** 1872 Indian Round 1 Dollar, BG-1207, R.4, MS65 PCGS. The BG-1207 variety was first mentioned in 1884 in Scott's *Coin Collector's Journal*. This delightful Gem offers well-detailed design elements, with sharp definition on the Indian's bust but softer detail on the stars. The well-preserved yellow-gold surfaces show much prooflike reflectivity in the fields. Population: 1 in 65, 0 finer (1/16). NGC ID# 2C46, PCGS# 10952

COINS OF HAWAII

1881 Hawaii Five Cent Pattern, MS62
Rare Medcalf 2CN-1.

5153 1881 Hawaii Five Cent Pattern MS62 NGC. Medcalf 2CN-1. The obverse shows a bust of King Kalakaua facing left with KALAKAUA KING OF SANDWICH ISLANDS 1881 around. The reverse features a numeral 5 enclosed by a garter inscribed AU MAU KE EA O KA AINA I KA PONO (state motto with the first word misspelled). The garter was topped by a crown with a cross on top. Struck on a thin nickel planchet.

During a world tour in 1881, King Kalakaua was approached by the owner of a nickel mine in New Caledonia about the possibility of striking nickel coinage for the kingdom. Approximately 200 patterns were struck in Paris and forwarded to the king on his return to the islands. Unfortunately, the reverse inscription transposed the two letters in the first word of the state motto (The life of the land is perpetuated in righteousness), which should read UA instead of AU. Perhaps because of this, the pattern was rejected and no official coinage was issued until 1883, when the U.S. Mint was contracted to strike silver coins. Many of these patterns were mishandled, used in jewelry or carried as pocket pieces, and few high grade examples have survived. Restrikes were made in Canada circa 1900, but they are easily recognized by the omission of the cross on the crown.

The present coin is an attractive MS62 specimen, with lightly marked surfaces that are blanketed in delicate shades of jade-gold toning. The design elements are well-detailed and the fields show hazy, semiprooflike reflectivity in most areas. Census: 2 in 62, 4 finer (1/16). NGC ID# 2C53, PCGS# 10975

Three Medallion Art Co. Statehood Medals
Gold, Silver, Bronze Set

5154 Three-Piece Lot of Medallion Art Co. Hawaii Statehood Medals. The official statehood medal, issued by Medallion Art Co. of New York, is 64 mm in diameter and is known in bronze (Medcalf 2MS-1); .916 Fine silver (Medcalf 2MS-2), mintage 3,000 pieces; and .900 Fine gold (Medcalf 2MS-3), 216 gm, mintage 50 pieces. The present lot includes one example each in bronze, silver (edge serial number 2515), and gold (edge serial number 46), from the dies with corrected spelling of Niihau. The medals are Uncertified, but in our opinion grade MS66 to MS67. Each medal is accompanied by its original box and information sheet. (Total: 3 medals)

PATTERNS

Rare 1856 Flying Eagle Cent Judd-181, Snow-5b, Copper Pattern

- 5155** 1856 Flying Eagle Cent, Judd-181, Pollock-213, Snow-5b, High R.6, PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has tooled fields. Struck with a plain edge from Snow-5 1856 Flying Eagle cent dies, but in copper instead of the standard copper-nickel alloy. Snow-5b is called as “Very rare” by Rick Snow, who lists five specimens, none of which correspond to the present microgranular example. It is moderately circulated and displays iridescent lime-green, lavender, and tan-gold toning. The fields have been smoothed and a small field depression is noted near the first A in AMERICA. NGC ID# 29AY, PCGS# 11793

1856 Flying Eagle Cent Pattern, Judd-184, PR64 Snow-PT1, A Flashy Coin

- 5156** 1856 Flying Eagle Cent, Judd-184, Pollock-220, Low R.7 PR64 PCGS. Snow-PT1. The obverse was struck from the normal 1856 Flying Eagle cent dies, showing a flying eagle in a plain field with the legend UNITED STATES OF AMERICA and the date below. The obverse is the Type of 1856, showing a squared-off inside to the O in OF. The reverse exhibits an oak wreath with ornamental shield above and the denomination ONE CENT in the center — a design vaguely presaging the regular-issue reverse with shield and oak wreath of the 1860-1909 Indian cents. Struck in copper-nickel with a plain edge.

On this die pair, the U in UNITED shows a point at the bottom. The reverse die (Snow's Reverse C) shows the arrow feathers fused/connected; they are separate/polished on the Snow-PT1 reverse (Reverse A, paired with the same obverse). Rick Snow comments on the pairing of an 1856 obverse and an 1858 reverse:

“One die, Rev. A, is found only on this die pair, and the second die, Rev. C, is found on the pieces struck for the 12-piece pattern sets. This is significant because examples with Rev. C can be die-linked to the 12-piece pattern sets of 1858. The other die is paired with an earlier die state obverse. These two die pairings could have been struck the same day, or years apart. It is uncertain if any of these were struck in 1856, but if any were, it would be the ones struck with Rev. A.”

Snow estimates that no more than 25 pieces were struck of this pattern or fantasy piece. This is a fine and flashy example, displaying much medium orange color with golden-brown device high points. An extremely eye-appealing coin. Population: 4 in 64 (1 in 64+), 2 finer (1/16). NGC ID# 29B3, PCGS# 11808

1871 Copper Indian Princess Dollar
Judd-1148, PR66 Brown

- 5157** 1871 Dollar, Judd-1148, Pollock-1290, Low R.7, PR66 Brown PCGS. The Longacre obverse, with a seated Liberty facing left, wearing an Indian headdress and supporting a liberty pole with her right hand. Her left hand rests on a globe inscribed LIBERTY. Behind is a flag ornamented with 22 stars. Thirteen stars surround, the date 1871 is at the bottom. The design is executed in high relief with the appearance of a medal. The reverse was struck from the die used for regular issue Seated Liberty dollars. Struck in copper with a plain edge. Implemented by William Barber after James Longacre's death, this Indian Princess design is a favorite among pattern collectors and available in a number of metals, edges, and reverse types. The surfaces of this piece are deep moss-green, blue, and brown, but the mirrored fields flash strongly when angled just so beneath a light. Remarkably problem-free for a copper coin and among the finest certified. Population: 2 in 66 Brown, 0 finer (1/16). NGC ID# 99A8, PCGS# 61410

1873 Trade Dollar Pattern, PR64
Judd-1276, Pollock-1418

- 5158** 1873 Trade Dollar, Judd-1276, Pollock-1418, R.5, PR64 PCGS. Struck in silver with a reeded edge. The obverse depicts Liberty facing left surrounded by 13 stars, while the reverse shows the required legends set within a laurel wreath. According to USPatterns.com: "This is one of the designs that was sold by the mint in 6 piece sets for \$30. The sets were made in silver with both plain and reeded edges, copper, and aluminum." The surfaces show golden-orange patina and rose accents when held at the correct angle. Population: 9 in 64, 5 finer (1/16). NGC ID# 2A88, PCGS# 61561

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment
< \$10.....	\$1
\$10 - \$49.....	\$2
\$50 - \$99.....	\$5
\$100 - \$199.....	\$10
\$200 - \$499.....	\$20
\$500 - \$999.....	\$50
\$1,000 - \$1,999.....	\$100
\$2,000 - \$4,999.....	\$200
\$5,000 - \$9,999.....	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999	\$1,000
\$20,000 - \$49,999	\$2,000
\$50,000 - \$99,999	\$5,000
\$100,000 - \$199,999	\$10,000
\$200,000 - \$499,999	\$20,000
\$500,000 - \$999,999	\$50,000
\$1,000,000 - \$4,999,999	\$100,000
\$5,000,000 - \$9,999,999	\$250,000
>= \$10,000,000	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A

REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In

Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or

b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Kathleen Guzman 0762165; Paul Minshull 2001161; Ed Beardsley 1183220; Nicholas Dawes 1304724; Fiona Elias 2001163; Samuel Foose 0952360; Alissa Ford 2009565; Elyse Luray 2015375; Jennifer Marsh 2009623; Bob Merrill 1473403; Brian Nalley 2001162; Scott Peterson 1306933; Mike Provenzale 2014734; Michael J. Sadler 1304630; Andrea Voss 1320558, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards or receive a guaranty. A registered bidder may inquire whether a lot is subject to an advance, a reserve, or a guaranty. Auctioneer has made advances to various consignors in this sale and a guaranty. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 2-8-2016

How to Ship Your Purchases

[illegible]

Agent Shipping Release Authorization form

Heritage Auction Galleries requires "Third Party Shipping" for certain items in this auction not picked up in person by the buyer. It shall be the responsibility of the successful bidder to arrange pick up and shipping through a third party; as to such items auctioneer shall have no liability.

Steps to follow:

1. Select a shipping company from the list below or a company of your choosing which will remain on file and in effect until you advise otherwise in writing.
2. Complete, sign, and return an Agent Shipping Release Authorization form to Heritage (this form will automatically be emailed to you along with your winning bid(s) notice or may be obtained by calling Client Services at 866-835-3243). The completed form may be faxed to 214-409-1425.
3. Heritage Auctions' shipping department will coordinate with the shipping company you have selected to pick up your purchases.

Shippers that Heritage has used are listed below. However, you are not obligated to choose from the following and may provide Heritage with information of your preferred shipper.

Navis Pack & Ship
11009 Shady Trail
Dallas, TX 75229
Ph: 972-870-1212
Fax: 214-409-9001
Navis.Dallas@GoNavis.com

The Packing & Moving Center
2040 E. Arkansas Lane, Ste #222
Arlington, TX 76014
Ph: 817-795-1999
Fax: 214-409-9000
thepackman@sbcglobal.net

Craters & Freighters
2220 Merritt Drive, Suite 200
Garland, TX 75041
Ph: 972-840-8147
Fax: 214-780-5674
dallas@cratersandfreighters.com

- It is the Third Party Shipper's responsibility to pack (or crate) and ship (or freight) your purchase to you. Please make all payment arrangements for shipping with your Shipper of choice.
- Any questions concerning Third Party Shipping can be addressed through our Client Services Department at 1-866-835-3243.
- Successful bidders are advised that pick-up or shipping arrangements should be made within ten (10) days of the auction or they may be subject to storage fees as stated in Heritage's Terms & Conditions of Auction, item 35.

NOTICE of CITES COMPLIANCE; When purchasing items made from protected species.

Any property made of or incorporating endangered or protected species or wildlife may have import and export restrictions established by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). These items are not available to ship Internationally or in some cases, domestically. By placing a bid the bidder acknowledges that he is aware of the restriction and takes responsibility in obtaining and paying for any license or permits relevant to delivery of the product. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or for failure to mark lots containing protected or regulated species.
